PROCEEDINGS AND DEBATES OF THE 97th CONGRESS, FIRST SESSION

HOUSE OF REPRESENTATIVES—*Thursday, November 12, 1981*

The House met at 12 o'clock noon.

Rev. Charles Mallon, permanent deacon, Holy Family Church, Mitchellville, Md., offered the following prayer:

In the beginning God created the heavens and the Earth. The Earth was without form and void, and darkness was upon the face of the deep; and the Spirit of God was moving over the face of the waters.— Genesis 1: 1-3.

Father we pray for world peace through Your active participation in conflict resolution. Inspire us to seek optimal solutions that reduce world stress brought on by unacceptable solutions to complex problems.

Our hope and faith in eternal life comforts us against the threat of catastrophic destruction, however we are mindful of our responsibility as caretakers to this creation which You brought into being.

Father, You have entrusted us with this secular stewardship, allow your Spirit to dwell among us and preserve within us Your image.

We ask this through Christ our Lord. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. WALKER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 337, nays 8, answered "present" 1, not voting 87, as follows:

□ 1215

Mr. TAUKE changed his vote from "present" to "yea."

So the Journal was approved.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

A MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the amendments of the House to a bill of the Senate of the following title:

S. 195. An act to incorporate the U.S. Submarine Veterans of World War II.

The message also announced that the Senate had passed bills and a concurrent resolution, of the following titles, in which the concurrence of the House is requested:

S. 1322. An act to designate the U.S. Department of Agriculture Boll Weevil Research Laboratory building, located adjacent to the campus of Mississippi State University, Starkville, Miss., as the "Robey Wentworth Harned Laboratory"; to extend the delay in making any adjustment in the price support level for milk; and to extend the time for conducting the referenda with respect to the national marketing quotas for wheat and upland cotton;

S. 1551. An act to amend title 5, United States Code, to extend the period within which physicians comparability contracts may be entered into, and for other purposes; and

S. Con. Res. 43. Concurrent resolution granting the status of permanent residence to certain aliens.

The message also announced that the Vice President, pursuant to Public Law 84-372, appointed Mr. LEVIN to be a member, on the part of the Senate, of the Franklin Delano Roosevelt Memorial Commission.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The Speaker laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
November 12, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, the Clerk received at 3:20 p.m. on Tuesday, November 10, 1981, the following message from the Secretary of the Senate: That the Senate passed without amendment H.R. 4734.

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

MAKING IN ORDER CONSIDERATION OF DEFENSE APPROPRIATION BILL, FISCAL YEAR 1982

Mr. ADDABBO. Mr. Speaker, I ask unanimous consent that it be in order to take up the Defense appropriation bill for fiscal year 1982 on Wednesday next or any time thereafter.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 4144, ENERGY AND WATER DEVELOPMENT APPROPRIATIONS, 1982

Mr. BEVILL. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 4144) making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Alabama? The Chair hears none, and appoints the following conferees: Mr. BEVILL, Mr. BOLAND, Mrs. BOGGS, Messrs. CHAPPELL, FAZIO, WATKINS, BENJAMIN, WHITTEN, MYERS, BURGENER, Mrs. SMITH of Nebraska, Mr. RUDD, and Mr. CONTE.

PERMISSION TO FILE CONFERENCE REPORT ON H.R. 4144, ENERGY AND WATER DEVELOPMENT APPROPRIATIONS, FISCAL YEAR 1982

Mr. BEVILL. Mr. Speaker, I ask unanimous consent that the managers may have until midnight Monday, November 16, to file a conference report on the bill (H.R. 4144) making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

MAKING IN ORDER CONSIDERATION OF CONFERENCE REPORT AND AMENDMENTS AND DISAGREEMENT THERETO ON H.R. 4144, ENERGY AND WATER DEVELOPMENT APPROPRIATIONS, FISCAL YEAR 1982

Mr. BEVILL. Mr. Speaker, I ask unanimous consent that it may be in order at any time on Tuesday, November 17, of next week, or any day thereafter, to consider the conference report and any amendments in disagreement thereto on the bill (H.R. 4144) making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

Mr. WALKER. Mr. Speaker, reserving the right to object, I reserve the right to object to ask the gentleman whether or not this has been cleared with the minority and whether they are satisfied with that kind of timing.

Mr. BEVILL. Yes, so far as I know, there is no one objecting to it.

Mr. WALKER. Mr. Speaker, I thank the gentleman, and I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Alabama?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 3455, MILITARY CONSTRUCTION AUTHORIZATION ACT, 1982

Mr. BRINKLEY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3455) to authorize certain construction at military installations for fiscal year 1982, and for other purposes, with the Senate amendment thereto, disagree to the Senate amendment, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Georgia? The Chair hears none, and appoints the following conferees: Messrs. PRICE, BRINKLEY, MONTGOMERY, KAZEN, WON PAT, DICKINSON, TRIBLE, WHITEHURST, and MITCHELL of New York.

PERMISSION TO HAVE UNTIL MIDNIGHT THURSDAY, NOVEMBER 12, 1981, TO FILE CONFERENCE REPORT ON H.R. 4522, DISTRICT OF COLUMBIA APPROPRIATIONS

Mr. DIXON. Mr. Speaker, I ask unanimous consent that the managers

may have until midnight tonight to file a conference report on the bill (H.R. 4522) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1982, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 3413, DEPARTMENT OF ENERGY NATIONAL SECURITY MILITARY APPLICATIONS OF NUCLEAR ENERGY AUTHORIZATION ACT OF 1982

Mr. PRICE. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3413) to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982, and for other purposes, with the Senate amendment thereto, disagree to the Senate amendment, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Illinois? The Chair hears none, and appoints the following conferees: Mr. PRICE, Mr. STRATTON, Mrs. BYRON, Mr. MAVROULES, Mr. DICKINSON, Mrs. HOLT, and Mr. HILLIS.

REVENUE ENHANCEMENT FOR BIG CORPORATIONS

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, an article in the Atlantic Monthly quotes Budget Director David Stockman as acknowledging that "supply side" economics was just a new name for "trickle down" policies that favor the wealthy over the middle and lower income Americans.

According to published accounts, Mr. Stockman is said to have acknowledged that the taxing and spending numbers in his budget did not add up, that the strategists never really expected to get the Kemp-Roth tax cut, that the whole thing was slapped together hastily and "frenetically," and that for a period of weeks the trickle-down strategists "got away with that" because of the novelty of it all.

Many of us were saying exactly these same things at the time it was happening. We knew the tax cut was excessive. We knew that it favored the wealthy. We knew that it did practically nothing for the average American. We knew that it made big deficits unavoidable.

We are only beginning to discover, however, the astonishing extent to which the huge tax cut has opened gaping loopholes through which the wealthiest corporations in the country are benefiting by hundreds of millions of dollars at the expense of the average American taxpayer.

Surely Congress did not intend for Ford Motor Co. to sell $200 million worth of tax credits it could not use to a company as wealthy as IBM and thus enable IBM to avoid paying a reported $400 million in taxes.

Surely Congress did not intend that Occidental Petroleum Co., which earned more than $700 million in profits last year and paid not one penny in taxes to the United States, should be able to sell unused tax credits for a reported $20 million to a third company which uses them to avoid paying taxes which it otherwise owes to the Treasury.

That tax evasions of this magnitude could have been made legal by the machinations of the very planners who would reduce the milk in school lunches, cut payments for meals-on-wheels, reduce benefits to America's elderly and make it harder for young Americans to attend college, is worse than an outrage.

To learn now that some are cynically planning to make up for these multiple hundreds of millions in tax avoidance which some of the Nation's most profitable corporations have exploited, by increasing sales and excise taxes upon the middle and low income American families compounds the outrage and exposes the cynical nature of the "trickle down" conspiracy of which the Budget Director reportedly boasts.

The SPEAKER pro tempore (Mr. SYNAR). The time of the gentleman from Texas has expired.

RHETORIC AND REALITY

(Mr. BONIOR of Michigan asked and was given permission to address the House for 1 minute.)

Mr. BONIOR of Michigan. Mr. Speaker, the administration has flooded the American people in a great stream of paper promises. Now, just this week, they have revealed their real thinking.

The so-called across-the-board tax cut was always a trojan horse to bring down the top rate * * * the rest of it was secondary.

Perhaps the vast millions of working Americans will remember that they were promised real tax relief.

"Supply side is 'trickle down' theory." Perhaps the 8.5 million unemployed Americans will remember that it was billed as more jobs, new growth. "None of us really understand what's really going on with all these numbers."

Perhaps Mr. Stockman should talk to disabled children seeking an education, or families grappling with college tuition, or retirees facing minimum benefit cuts. The numbers are simple. After all the rhetoric, after all the promises, the numbers mean that the American people suffer while the "hogs" feed.

ECONOMIC POLICY HAS MEANT HAVOC FOR SMALL BUSINESSES

(Mr. GLICKMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. GLICKMAN. Mr. Speaker, recently Fred Schoenfeld, head of Select Brands Industries of Kansas City, Kans., testified before the House Subcommittee on Domestic Monetary Policy on behalf of the National Small Business Association. He made some startling points that we in the Congress need to be alert to; let me quote:

I founded Select Brands in 1954. Since then, we have had 27 consecutive years of increased sales and 27 years of profitability. Now, for the first time ever, I feel my own business is being threatened with possible extinction. I am also extremely concerned that federal policy may be leading us to a point of no return for thousands of well-managed small firms, and severe financial damage for thousands of others, which will be felt for many years to come. . . . Although there has been a welcome reduction in short-term rates in recent weeks, our information is that medium and long-term rates have actually increased during this period. . . . Among the consequences (of high interest rates) we have observed so far are:

The amount of interest payable on farm debt has risen more than 20 percent in one year. . . .

Interest expenses of non-financial corporations have risen from 19 percent of pre-tax profits in the 1960's and about 25 percent in the 1970's to approximately 30 percent . . . in 1981.

Business bankruptcies have increased dramatically. . . .

The federal government has also experienced higher-than-expected interest costs. . . .

Mr. Schoenfeld was not talking about fly-by-night firms; he was talking about well-managed businesses on Main Streets all over America. With small businesses at the heart of our economy suffering, even failing, the potential for economic recovery seems increasingly doubtful.

FARM BILL CONFERENCE MUST BE DEFEATED

(Mr. PEYSER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEYSER. Mr. Speaker, I am going to leave the demise of David Stockman to others today, and talk about something that does deeply concern me, which is the conference on the farm bill on which I was a conferee last week.

As many Members now know, the conferees accepted without any change the sugar part of the farm bill that the House had defeated, and had defeated over the previous years as well.

Mr. Speaker, I feel there is only one course of action for the Members of the House to take to defend what is vitally important not only to the Members here, but to the entire country, and that is to defeat the farm conference bill when it comes back to the floor, and then instruct the conferees to go back into conference and to come out without a sugar bill.

□ 1230

DAVID STOCKMAN, "WIZARD OF WISHFUL THINKING"

(Mr. DANIELSON asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. DANIELSON. Mr. Speaker, I well remember the summer of 1972 when one day, in this well, was announced: "Watergate." And then awhile later came "Koreagate," and now we have "Ombigate."

It is a shock to find that the great economic plan we have heard so much about is nothing but experimental therapy for our ailing economy. The American people are being used as guinea pigs to test a new panacea.

But is it a new panacea? I understand that the truth is that it is not. It is the same old trickle-down theory. It is the same old snake oil in a better looking bottle, and we now find that the much heralded Kemp-Roth tax plan is nothing but a "Trojan Horse."

And from whose mouth do these words come? They come from that great architect of the economic plan, David Stockman, who now admits that his plan was made of sand, and now, instead of an architect, he turns out to be nothing but the wizard of wishful thinking.

And I just wonder if there was an 18-minute gap in that tape.

THE ADMINISTRATION'S FISCAL CREDIBILITY

(Mr. SHANNON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHANNON. Mr. Speaker, what this administration has had going for it was the trust of the American people. The offices of Members of Congress were flooded, when we were considering the budget resolution and the tax bill, with letters and phone calls from people who thought that the administration was on the level.

Now we find that the $38 billion tax cut and the $35 billion budget reduction for 1982—which have formed the basis for what has been called the most dramatic change in U.S. economic policy since the New Deal—was just a snap judgment. In the December issue of the Atlantic Monthly magazine, an article by William Greider, entitled, "The Education of David Stockman" quotes Budget Director David Stockman as saying:

> The numbers didn't quite mesh . . . But . . . for about a month and a half, we got away with all that because of the novelty of all those budget resolutions.

The whiz kid apparently had a crib sheet.

David Stockman also said though, it might all work, Who knows? Who knows? We have dismantled more than $35 billion in Federal budget allocations for fiscal 1982 and who knows?

Supply-side theory, Mr. Stockman says, is really not an economic theory but new language to conceal the old Republican idea of a tax cut for the rich. Democratic Members of the House and Senate recognized this and said so. Apparently even Mr. Stockman recognized it during the tax bill debate and he is saying it now.

I think the American people, who have been so trusting, deserve now to know what this administration's plans for them really are? Do not Mr. Stockman's extremely revealing cynical statements raise questions now about what the administration really intends to do about social security? About medicare? About the safety net? About the environment?

It has come down to a question of badly failed trust. Cynicism of this kind should not be rewarded with continued credibility.

BUDGET DEFICITS

(Mr. VOLKMER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. VOLKMER. Mr. Speaker, as reported recently, on Friday, the Office of Management and Budget projects that the fiscal year 1982 budget deficit will exceed $100 billion. This is an astounding admission, considering the earlier spring and summer projections from that same office.

We are constantly reminded of the Carter budget deficits. I think a little comparison is called for. The Reagan budget deficit of $100 billion is slightly less than the combined total of the last two Carter budget deficits. The next two fiscal year deficits will exceed the total 4-year Carter deficit by some $50 billion.

Mr. Speaker, let us consider a little history. Since the founding of this country, until 1981, in 205 years the total national debt reached $1 trillion. This is nothing to be proud of, but it is a fact.

Mr. Speaker, we are now told by the President's own people that in the next 3 years we can expect that $1 trillion debt to be increased by one-third, in excess of $300 billion. If we project that forward in the next 8 years at the same rate, we will double that $1 trillion and end up with a $2 trillion debt.

Mr. Speaker, we will do in 8 years what it took this country 205 years to do.

HISTORIC FIRST TELECAST OF HOUSE PROCEEDINGS TO WASHINGTON VIEWERS

(Mr. ANNUNZIO asked and was given permission to address the House for 1 minute.)

Mr. ANNUNZIO. Mr. Speaker, today marks the first time that the House of Representatives will be televised live in the Washington area on other than cable television. WNVT-TV channels 53/14 in northern Virginia, is carrying the broadcasts, and the station is to be commended for its efforts in bringing about these broadcasts.

I want to especially commend the gentleman fron North Carolina (Mr. ROSE), chairman of the Speaker's Advisory Committee on Broadcasting, for arranging for these telecasts. Mr. ROSE has protected both the integrity of the House and the right of the American people to see Congress in action by making certain that the proceedings of the House are available to the widest possible audience and on a cost-free basis.

Mr. Speaker, there are some who feel that the House broadcasts do not belong to the people, but rather are the property of private industry. Mr. ROSE has made certain by bringing about the start of live telecasts that the proceedings of the House, the House of the people, will be available to the people without charge.

Once again, I commend Chairman ROSE, and I commend WNVT, its president, B. W. Spiller, its vice president and general manager, Dan Ward, and its director of news and public affairs, Bruce Miller, for this television first.

A CALL FOR THE RESIGNATION OF DAVID STOCKMAN

(Mr. OBEY asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. OBEY. Mr. Speaker, I take the floor today to call for the resignation of David Stockman and to urge the Congress to immediately reconsider the President's entire tax package.

We have already heard a number of Members here today detail cogently Mr. Stockman's startling comments in the Atlantic Monthly article. He is quoted as saying, for instance, that the whole supply-side tax program was nothing more than a "Trojan Horse"

which was designed to aid the rich under the guise of helping everybody.

On the defense budget, Mr. Stockman is quoted as saying that the Pentagon has been given "a blank check."

"I let it go," he said.

On taxes, Mr. Stockman is quoted as saying:

> The hogs were really feeding. The greed level, the level of opportunism, just got out of control.

On the overall program, he is quoted as saying:

> It didn't quite mesh . . . but, you see, for about a month and a half we got away with that because of the novelty of all these budget reductions.

I am convinced that the President is sincere, but we cannot afford to have cynical men around the President who are giving the President advice which they know to be wrong and not in the best interest of this country.

Mr. Speaker, Mr. Stockman's usefulness to this administration is over, and he will no longer be respected by the Congress. He is discredited and so is the economic policy of which he is the principal architect and for which he is the principal spokesman.

His words demonstrate that he has known since spring that you cannot double the defense budget and cut taxes by 30 percent at the same time without killing the economy.

The loser in this revelation is not just Mr. Stockman but the American people who were trusting enough to believe there was any purpose behind the administrations' tax plan except to help the rich at the expense of everyone else.

A SUGGESTED REPLACEMENT FOR MR. STOCKMAN

(Mr. COELHO asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COELHO. Mr. Speaker, while most of my colleagues are outraged by David Stockman's remarks, I find myself scratching my head and wondering. Frankly, I am a bit puzzled, but not for the same reasons.

There is an overlooked link here.

Mr. Stockman admits the White House does not know what it is doing, that the Republican plan favors the rich, and that the President's scheme is just the same old trickle-down theory.

Yet Richard Richards, chairman of the Republican National Committee, and other GOP campaign groups are exploiting the inequity of Reaganomics and have raised millions of dollars through direct mail appeals. The GOP letters say the main goal of raising these millions is to take control of the House next year.

Since Mr. Richards has been so successful, and Mr. Stockman has admitted failure, I am considering asking the President to seek Mr. Stockman's resignation—but only if Mr. Richards is given the OMB job.

Mr. Richards obviously knows how to manage a budget and erase deficits; and Mr. Stockman, according to his own words, is just guessing.

Mr. Richards and his GOP committees plan to raise more than $100 million for the 1982 elections. In fact, the Senate GOP campaign group already has enough money to give the maximum amount to all GOP Senate candidates next year. They are already planning for 1984. Mr. Stockman is trying to figure out what happened last spring.

I know this President can be steadfast, and, as the morning news reported, Mr. Reagan may want to continue supporting Mr. Stockman.

But I would urge the President to consider putting someone at OMB who knows something about economic planning, budget control, and erasing deficits.

It is obvious Mr. Stockman does not. Perhaps Mr. Richards can do a better job and can be honest with the public and Congress.

A PLEA FOR VANADIUM PURCHASES FROM U.S. STOCKPILES

(Mr. KOGOVSEK asked and was given permission to address the House for 1 minute.)

Mr. KOGOVSEK. Mr. Speaker, the General Services Administration will announce today the award of a $6 million contract for the purchase of 1.8 million pounds of vanadium. This purchase by the U.S. Government could mean a substantial boost for the domestic mining industry, a boost which the vanadium-uranium mining companies sorely need. But instead of buying the ore from stockpiles in this country, the administration is awarding this $6 million contract to the Republic of South Africa. This initial buy is just the first part of a plan to purchase 15 million pounds of vanadium a multimillion-dollar package. I am wondering, and so are unemployed miners in Colorado and other States sitting on top of vanadium stockpiles, whether the administration will choose to purchase all 15 million tons from foreign sources. I am wondering why we are sending our capital to foreign countries when it would go a long way in boosting our economy and improving an unemployment rate which is already plaguing the administration and its master plan for revitalizing our economy. Sending this capital to South Africa will not revitalize our economy, and it obviously goes against the grain of the administration's rhetoric, and economic commonsense.

STOCKMAN'S STATEMENT—NOT EDUCATION BUT A CONFESSION

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, today we have heard many references to the Atlantic Monthly article referring to the "Education of David Stockman."

Mr. Stockman's disclosures increase my concern that the Reagan economic policy, which cuts taxes by deficit spending and increases the military budget, contains no coherent plan to balance the Federal budget during the President's term. Mr. Stockman confirms that Reaganomics will produce big deficits which will perpetuate high interest rates. The President's deficit, as it is reported, will likely exceed $300 billion during the 3 years remaining in his term.

Mr. Speaker, the Atlantic Monthly article seems to report more of a confession than it does an education. But it is the American people who will pay the penance, not Mr. Stockman.

NO SWITCH IN PARTY ALLEGIANCE SEEN FOR DAVID STOCKMAN

(Ms. FERRARO asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. FERRARO. Mr. Speaker, Washington's gossip and rumor mills have been working overtime in the wake of the publication of OMB Director David Stockman's comments criticizing the Reagan tax cut as simply a recycled version of the old-time Republican "trickle-down" economics.

There have been reports that Mr. Stockman would soon be leaving the administration, or that other disciplinary actions were pending.

There have been the responses of the congressional Democratic leadership in both Houses that Mr. Stockman's credibility was irreparably damaged, and that the American people could not trust any information coming out of OMB any more.

There have been reports that Ed Meese decided not to wake the President up to tell him about the Stockman interview, and that Secretary of State Haig called Jack Anderson to deny that he had framed Mr. Stockman.

Mr. Speaker, I cannot say whether any of these other rumors or reports have any validity. I can say, however, in my role as Secretary of the Democratic Caucus of the House, that there is no truth whatsoever to the rumors that Mr. Stockman has been meeting clandestinely with members of the Steering and Policy Committee to discuss switching party allegiance.

I must add, however, that I have no comment on the rumored joint press conference that Speaker O'NEILL, DNC Chairman Charles Manatt, and Mr. Stockman have scheduled for later today.

PROPOSED HHS CUTS WOULD WREAK HAVOC ON NATION'S HELPLESS

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, in the context of the Stockman confessions, I want to express my dismay at the administration's newest assault on our Nation's helpless.

Secretary Schweiker of HHS has proposed cuts in his Department of $9.3 billion in fiscal year 1983 by implementing a series of Draconian measures, among which is one that would require mothers in the aid to families with dependent children program to work regardless of the age of their children.

Does the Reagan administration not care about the fate of those 2 million children less than 6 years old who would be affected by this proposal? We recoil in horror at stories of children who die in fires or who are injured when left unattended. Such incidents might well become common if mothers are forced to work without being provided with day care programs, yet funds for day care have been slashed and replaced with various tax incentives which will benefit middle and upper income families for the most part.

The AFDC program has been under relentless attack possibly because of the common misconception that its recipients are able, but unwilling, to work. The plain fact is that 80 percent of AFDC recipients are either children, or disabled, aged or blind people; 19 percent are mothers; and only 1 percent are fathers.

To undermine basic support to children and their families as proposed by Secretary Schweiker is unconscionable.

PROPOSED ABOLITION OF BATF CITED AS A MISTAKE

(Mr. HUGHES asked and was given permission to address the House for 1 minute.)

Mr. HUGHES. Mr. Speaker, the Reagan administration is moving to downgrade another Federal anticrime program. The Secretary of the Treasury has advised me that he has recommended the abolition of the Bureau of Alcohol, Tobacco and Firearms.

More than any other Federal law enforcement agency, the BATF is directly involved in fighting violent crime through its investigations of rings that sell stolen and illegal handguns, rifles, machineguns, silencers, and explosives.

ATF's experts in the area of fire and explosives help solve the most complex arson cases such as the MGM Grand Hotel fire in Las Vegas.

ATF's arson investigations save consumers millions of dollars in insurance premiums by stopping frauds against insurance companies.

Various administration spokespersons have given conflicting rationale for this move. When the move was first revealed in late September, Secretary Regan told the Budget Committee it was a cost-saving step. On the same day, a spokesman for the Director of OMB said it was not being done to save money, and that only a tiny percentage of the overall budget was involved. Testifying before our Crime Subcommittee a few days later, Assistant Treasury Secretary Walker denied that a decision to abolish BATF had even been made.

I do not oppose Government reorganization, and while BATF has done a good job in enforcing our Federal firearms, explosives, and arson laws, I do not even oppose reorganization of these functions. However, I do oppose any and all steps that will reduce our law enforcement capability.

The abolition of BATF and the proposed transfer of its functions is such a move, in my view. It is prompted by a need to placate a special interest lobby, and designed to augment the resources of other Treasury agencies at the expense of effective enforcement of firearms, explosives, and arson laws.

BATF has been so abused and maligned, both within and without the Government, that even its own agents welcome its abolition and the reassignment of its responsibilities. A more sensible solution, however, would be to transfer these functions to our primary law enforcement agency, the Department of Justice. The Attorney General's Task Force on Violent Crime recommended similar action, and I plan to introduce legislation to this effect in a few days.

UNEMPLOYMENT RATES INCREASING IN AUTO INDUSTRY

(Mr. HERTEL asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. HERTEL. Mr. Speaker, the economic picture in the auto industry in this country is becoming worse. In Michigan we are talking about a 12.7-percent unemployment rate now. We are talking about 500,000 people—a half million people—out of work in one State. That would be comparable, of course, to one congressional district—every man, woman and child—and if we divide that up among Members of the House, we would be talking about 10,000 per member in unemployment being added to one's own constituency.

□ 1245

We are talking about 8 million people nationwide under unemployment, and the worst year for the auto sales since 1958 when we had a recession under the Republican administration at that time. We have the highest unemployment rate in Michigan since 1975 when we had our last Republican administration.

Now the gentleman from Michigan (Mr. BLANCHARD) has asked for an auto summit, a bipartisan auto summit with the administration and they tell us no.

The policies have to change because the auto industry cannot be allowed to die in this country. It is important to millions of families in this country. It is also important to our national strength.

PRESIDENT'S ECONOMIC PROGRAM IS WORKING

(Mr. ROUSSELOT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROUSSELOT. Mr. Speaker, we have had a lot of discussion in this House about interest rates. The President's economic program is working. T-bill rates are down, and so is the prime rate.

Look where T-bill rates started. It started with Jimmy Carter and the Democratic Congress under Democrats at 5.3 percent, skyrocketed to 14.7 percent. That is what the Treasury had to pay for all that debt you have created, you Democrats that work so hard for big spending and big deficits.

Now those T-bill rates are coming down because the Reagan economic program is working. It is finally working after years of going the wrong way. I want the record to show that the Democratic side is cheering.

Interest rates are now coming down, thanks to Reagan economics.

PRESIDENT'S ECONOMIC PROGRAM IS WORKING

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, today we have heard a lot about what the national economic policy is and how difficult some people find it to define it, and exactly where we are going economically.

One thing is for certain. We know where we have gone under the previous administration. I have heard Democrat, Republican, conservative, liberal, and everybody in between, say that one of the keys to getting ourselves out of an economic problem is increas-

ing the productivity of the American worker.

What did we do when you folk who are criticizing us had control of both sides of Congress?

On this chart, look how we moved in productivity growth on an annual basis of 3.3 percent to minus 0.2 percent, minus 0.3 percent, minus 0.2 percent over the lifetime of the Carter administration. Now we are going up. We are not going up fast enough but we are going up. And these are nonpartisan figures, by the way. These are from the Joint Economic Committee report that just came out last month.

It looks like we are going in the right direction. If those of you who would like to reverse our present course, to utilize those programs we have had in the past, then I think you ought to explain to the American people how 3 years back-to-back of productivity negative growth is going to solve our problem.

THE PRESIDENT'S ECONOMIC PROGRAM IS WORKING

(Mr. EVANS of Delaware asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EVANS of Delaware. Mr. Speaker, there has been a lot of discussion recently about Dave Stockman, our former colleague, and now Director of the Office of Management and Budget. It has been implied that Dave does not agree that the President's economic program will work.

He does, in fact, believe that the President's comprehensive economic program will work. But I might add that all of the speculation as to Dave's subjective judgment is all academic. The program is, in fact, working.

May I remind those in this body who have been somewhat critical of the comprehensive economic plan that their major focus of criticism has been on high interest rates. Let me remind those same individuals of a few figures. The prime rate of interest in early 1981 was 21.5 percent. Today, November 12, 1981, it is 16.5 percent. In January of 1981, 90-day Treasury bills were at 15.7 percent and today they are under 11 percent. Inflation is also trending downward and this is progress even though we have a substantial way to go. There can be no instant solutions to our economic problems for they are the result of many years of bankrupt policies. You cannot tear down overnight what took over 30 years to build, no matter how poorly it has been constructed.

Now is not the time to play politics but to continue on our steadfast course toward full and long lasting economic recovery.

VOTE DOWN INTERIOR APPROPRIATION CONFERENCE REPORT

(Mr. HANSEN of Utah asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HANSEN of Utah. Mr. Speaker, the Interior appropriation bill which we will be voting on today is $1.5 billion over the level proposed by President Reagan.

As the Congressman representing one of the Western States with many Federal lands, in fact my State has 70 percent of its land owned by the Federal Government, this Interior appropriation bill is too much money. The $1.5 billion would be nice. We would love to have it out there. We could really use the money. However, I am against that higher spending.

As a westerner, I could easily rationalize that this would help my district, it would be great for the district, and the State of Utah to have, but we all know that is the same kind of reasoning that got us into the economic mess that we are in today.

The Interior appropriation bill is $1.5 billion over budget, and it really needs to be cut. In my 11 months that we have sat here, I have heard people get up and deplore the high interest rates, deplore all of the deficits we have. Yet today we have a chance to see what we are really made of and that we really believe that.

I personally feel that this country is looking for legislators who have the courage to say we cannot afford it, and we cannot afford the one we are voting on today.

WAS JOHN F. KENNEDY A CLOSET TRICKLE-DOWNER?

(Mr. WEBER of Ohio asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEBER of Ohio. Mr. Speaker, all of this fuss about so-called trickle-down economics begs the question: Does cutting tax rates help or hurt the average American, no matter what it does for the rich?

The answer is clear and, in fact, well documented. President John F. Kennedy cut tax rates in the early 1960's and that cut helped all Americans.

Was J.F.K. a closet trickle-downer or a clandestine supply sider?

The answer is "who cares?" His theory worked. It helped America.

Instead of concentrating on labels, we would be better off looking at results.

The results of the economic philosophy of the Democratic leadership during the last 4 years are: Double-digit inflation, 20-percent interest rates, low productivity, low rate of savings, a deteriorating economy, and, in general, the political equivalent of the record of the Washington Capitals hockey team.

Call President Reagan's theory trickle-down if you want to. I call it wising up.

INTERIOR APPROPRIATION EXCEEDS BUDGET RESOLUTION

(Mr. McCOLLUM asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McCOLLUM. Mr. Speaker, I believe very strongly in the need for a balanced budget in this country. I believe very strongly that we have not begun to ask for enough spending cuts.

But let me ask my colleagues how in the world do we ever expect to achieve those additional cuts or a balanced budget in the future if we cannot abide by the present budget resolution we are working under? Today's appropriation bills, the ones we will take up from the conference, and those down the road, do exceed that, particularly the Interior appropriations and the ones for related agencies under it.

The Interior appropriations for the Department of Interior alone are $0.6 billion, or 19 percent above the President's budget request. That portion of the Interior that is related to the DOE programs is $0.4 billion above the President's request. That is 95 percent above. The Forest Service programs are $0.2 of a billion, or 16 percent above.

I cannot imagine we are going to vote for a conference report on any appropriation bill in this day and age when we are looking to balance the budget and cut additional spending which that much exceeds our budget already. I call for the defeat of this conference report on Interior.

CONCERNED ABOUT INTERIOR AND RELATED AGENCY APPROPRIATIONS CONFERENCE REPORT

(Mr. MORRISON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MORRISON. Mr. Speaker, I, too, am concerned about the Interior and related agencies' appropriation conference report that is before us today. This report is $0.6 billion in budget authority and $0.4 billion in outlays above the March budget request. Notice I said March. It appears there was no effort at all to achieve the additional savings of $1.4 billion in budget authority and $1.1 billion in outlays that the President called for in September.

I am afraid this Congress is going to look pretty silly giving lipservice to controlling the Federal deficit but not

having the resolve to make individual appropriation bills fit the big picture.

Unfortunately, the Interior appropriation conference report reflects this irresponsibility.

REQUEST FOR PERMISSION TO CONSIDER HOUSE JOINT RESOLUTION 357, CONTINUING APPROPRIATIONS FISCAL YEAR 1982 ON MONDAY, NOVEMBER 16, 1981, OR ANY DAY THEREAFTER

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that it be in order on Monday, November 16, 1981, or any day thereafter, to consider House Joint Resolution 357, making further continuing appropriations, fiscal year 1982.

The SPEAKER pro tempore. (Mr. MURTHA). Is there objection to the request of the gentleman from Mississippi?

Mr. ROUSSELOT. Mr. Speaker, reserving the right to object, why is this unanimous consent necessary? Can the gentleman tell us?

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Mississippi.

Mr. WHITTEN. There are at least two reasons.

Mr. ROUSSELOT. This is for the continuing resolution?

Mr. WHITTEN. That is right. First, it is to enable us to have a pro forma session tomorrow should the House want to. Otherwise we have to go to the Rules Committee. But if this is agreed to, we obviate the necessity of being here tomorrow.

Mr. ROUSSELOT. In other words, the only reason for the unanimous consent for this gigantic continuing resolution is to avoid having to get a rule?

Mr. WHITTEN. It is so that we can have a pro forma session tomorrow and then, by doing this, it enables the other body to have as many days as possible to consider the resolution. As the gentleman knows, we have to complete this by midnight of November 20 and as I understand it, the leadership in the other body has asked the House to act as promptly as possible.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. Further reserving the right to object, I yield to my colleague from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding. Would I understand that under this procedure, if we adopt this procedure under unanimous consent, that it would mean we would not be able to offer any amendment to the resolution?

Mr. WHITTEN. Will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Mississippi.

Mr. WHITTEN. If it is considered in the House, that would be the situation. However, with the whole Government involved, and with the deadline of November 20, I do not see any way to obviate that situation.

There would be a motion to recommit.

Mr. ROUSSELOT. There would be a motion to recommit?

Mr. CONTE. With or without instructions.

Mr. ROUSSELOT. With instructions?

I would yield to the gentleman.

Mr. WALKER. Mr. Speaker, I object.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, I would like to yield to the gentleman from Massachusetts.

The SPEAKER pro tempore. Objection is heard. Objection is heard.

Mr. WALKER. Mr. Speaker, I withdraw my objection.

Mr. ROUSSELOT. I would like to yield to my colleague from Massachusetts.

The SPEAKER pro tempore. Objection has been heard from the gentleman from Pennsylvania.

Mr. ROUSSELOT. The gentleman withdrew his objection.

Mr. WALKER. Mr. Speaker, I withdraw my objection.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, I would like to yield to my colleague from Massachusetts (Mr. CONTE).

□ 1300

Mr. CONTE. In regard to the question by the gentleman from California, under the unanimous-consent request we will protect the minority side with a motion to recommit with instructions.

Mr. ROUSSELOT. With instructions?

Mr. CONTE. With instructions.

Mr. ROUSSELOT. So the unanimous consent does include the right to offer a motion to recommit with instructions?

Mr. CONTE. That is right.

Mr. ROUSSELOT. And that does not require a rule?

Mr. CONTE. No.

Mr. ROUSSELOT. Is that correct?

Mr. CONTE. If we get unanimous consent.

Mr. ROUSSELOT. I appreciate that. But as the gentleman understands, when granting a unanimous consent that few of us have seen, except those offering it, we just want to be sure that there is the opportunity to offer a motion to recommit with instructions.

Mr. CONTE. The gentleman is absolutely right.

Now, if the gentleman persists on objecting, we will go to the Rules Committee and we are going to get a rule, so the problem here is that we are running out of time. I think this is November 12.

Mr. ROUSSELOT. I remember the date.

Mr. CONTE. We have 8 days left and the Senate would like to get this as fast as possible so that they can work on it and we can go to conference with the Senate and bring forth the continuing resolution.

Mr. ROUSSELOT. Further reserving the right to object, the chairman can assure us all people on the Appropriations Committee that drafted this substantial legislation are aware that it is coming up, it is very apt to come up next week?

Mr. WHITTEN. If the gentleman will yield, yes, that is true, and as the gentleman from Massachusetts said, and I concur in his understanding, that there will be in order a motion to recommit.

May I say we will file this report today which will make it available to the membership tomorrow. That is all we can do. We are doing everything we can do.

Mr. ROUSSELOT. Is this concurrent resolution over the budget?

Mr. WHITTEN. I did not hear the gentleman.

Mr. ROUSSELOT. Is this continuing resolution over the budget?

Mr. WHITTEN. No, it is under the March budget. There may be some question otherwise as to the other budget, but it is my understanding and from the figures that I have seen that it would be below the budget as it stands now.

Mr. ROUSSELOT. As of March, the March budget?

Mr. WHITTEN. Yes, sir; about $20 billion below the March budget.

Mr. ROUSSELOT. How about the September budget?

Mr. WHITTEN. My understanding at the present time is it would be very close at least and I think under the amendments which as the gentleman knows have come down in a constant stream. Some of them have not been received yet.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. Further reserving the right to object, I yield to the gentleman from Illinois.

Mr. MICHEL. Mr. Speaker, I am constrained to object, but before doing so I want to tell the gentleman, the distinguished chairman of the committee, that last week when we had the dialog with respect to why we would be meeting Thursday and Friday, it was for the express purpose of keeping people here to get a rule on the continuing resolution, expecting that it would be controversial and that there would probably be some amendments that Members would want to make a case for before the Rules Committee. This unanimous-consent request

comes to me unbeknownst with no prior notice. The whole schedule was predicated on having the Rules Committee meet Friday and be on the floor Monday. We are not altogether sure under this sudden change in procedures that a single motion to recommit is going to satisfy our needs.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. ROUSSELOT. I yield to the gentleman from Mississippi.

Mr. WHITTEN. May I say I agree with the gentleman as to the understanding the other day. May I say it only came to me recently, the reason being so many of our colleagues on both sides of the aisle wanted a pro forma session instead of having to stay here.

Mr. MICHEL. I know there was plenty of notice given and I guaranteed the ranking member of the Rules Committee, the gentleman from Louisiana (Mr. LONG) that I would have the Republican members there for a meeting because I knew how important it was.

We all like to run home. We have been home 4 or 5 days prior to today's meeting and I think it is not asking Members too much that we have a corporal's guard around here to get a rule for something as controversial as the continuing resolution.

Mr. ROUSSELOT. Mr. Speaker, further reserving the right to object, is the gentleman telling us then that he had no notice of this?

Mr. MICHEL. This is the first notice I have had of a unanimous-consent request.

Mr. WHITTEN. If the gentleman will yield, I apologize because we got in touch with the ranking member of the Committee on Appropriations and this came to me because so many people were asking if there was not some way to obviate the necessity to stay, even though we had to come back. We did have to come back today to get it out of committee.

May I say again that the bill was reported out of the committee by voice vote. That does not sound like it is so controversial.

Mr. MICHEL. Well, I might differ with the gentleman. For that reason I object, Mr. Speaker.

The SPEAKER pro tempore. Objection is heard.

LAYING THE GROUNDWORK FOR PUTTING THE FEDERAL HOUSE IN ORDER

(Mr. CRAIG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CRAIG. Mr. Speaker, President Reagan has laid the groundwork for putting the Federal house in order for the first time in a decade and a half.

After years of unchecked expansion of nondefense programs, almost no one has been prepared to stand up and argue that no reductions should be made.

The fact is, however, that the President's first round of budget reductions are not really reductions in the previous year's outlays at all; they simply represent a reduction in the increase planned by the Carter administration. The budget changes represent a reduction in Government spending of roughly 10 percent.

Budget changes are never easy—there are always groups which benefit from any program, no matter how useless, wasteful, helpful, or worthless the program may be to the general welfare.

A review of the recent explosion in Government expenditures reveals this. It took only 9 years, from 1962-71, for the budget to pass the $200 billion mark. After that, it took only 4 years to reach the $300 billion, and just 2 more years to surpass $400 billion. By fiscal year 1982 the spiral of spending will reach over $700 billion.

The Interior appropriation bill we have before us today, does not conform to the budget reforms that are necessary to reduce Government spending. In fact, they will add fuel to the escalating Federal budget and deficit.

The budget for H.R. 4035 will be between $1.5 billion to $2 billion over the President's recommended groundwork for controlling Government spending.

If we truly want to lower interest rates and control inflation, then additional reductions are needed in these appropriation bills before they are sent to the President. Thank you.

LET US STOP BEING SO CRITICAL

(Mr. HARTNETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HARNETT. Mr. Speaker, I would like to ask for 3 minutes and 20 seconds. That is the time that was given to the distinguished majority leader. But I guess that would be out of order.

I have heard a lot said this morning about the Atlantic Monthly. Not only have most of my colleagues never heard of it, but they have never read it until this month, and now everything that they print is the gospel, according to the Democratic Party.

A few months ago David Stockman was saying a lot of things and everybody said he was crazy. Now he utters one sentence in an interview with a magazine no one ever heard of and everything he says is the truth.

It is amazing to me, we talk about a tax cut and an economic package that favors the rich. Try telling that man and woman making $15,000 that a 10-percent tax cut is not going to help him and he is not going to believe us, because he knows it is going to help him.

I urge those on this side of the aisle charged with the responsibility of doing something positive for this economy, try supporting what we have done as a body and quit being so critical. It falls close to the guise of treason, if you ask me.

INFLATION RATE IS DROPPING

(Mr. HILER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HILER. Mr. Speaker, a year ago in polls that were taken of the American people, the No. 1 economic problems they presented was inflation, and the reason the American people said inflation was the No. 1 problem was because of the distrust of the economic policies of the previous administration and the leadership by the Democrats in both bodies of the Congress.

What happened for the American people to distrust the Democrat leadership? The last year of a Republican administration in 1976, there was 4.8 percent inflation. The first year under President Carter, inflation had climbed to 6.8; in 1978, 9 percent; in 1979, 13.3 percent; in 1980, 12.4 percent.

This year, the first year with a Republican in the White House since 1976, inflation will drop to about 9.5 percent. Now 9.5 percent is still too high, but I would say to my colleagues it is a far sight better than the trend that was going on under previous administration.

DEVASTATING ADMISSION

(Mr. FIELDS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FIELDS. Mr. Speaker, this morning's Washington Post quotes the Speaker as saying he recently read what he called devastating admissions on the part of a well-known public figure.

If the Speaker is interested in devastating admissions let me quote to him the following words, spoken on the floor of the House, May 7, 1981:

> Sure, in the 1970's my party made mistakes. We overregulated. There was too much redtape and probably too much legislation * * * sure, we admit there were inequities and we had failures * * *

Those devastating admissions were made by the Speaker, about his party and about the political and economic goals they have pursued for a generation.

If the Speaker is not available to Atlantic Monthly to offer specific documentation of the failures of his party, I know of many Members, on both

sides of the aisle, who are more than willing to give facts and figures of the admitted failures of his party.

LET US SERIOUSLY ADDRESS PROBLEMS OF SOCIAL SECURITY

(Mr. BLILEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BLILEY. Mr. Speaker, I would like to take this opportunity to further express my deep concern for the continued action by the Democratic National Committee with the cooperation of certain Members of this body to reduce social security to a partisan political issue. Two weeks ago, I stood on this floor and relayed the disgust and concerns of many of my constituents who had received a so-called important social security notice which, as you know, was nothing but a fundraising ploy by the Democratic National Committee. The social security system is not a fundraising matter.

Needless to say, I was surprised and extremely disappointed to learn that this letter continues to be mailed. The American people should not be abused by such direct mail chicanery. The very thought of using scare tactics on poor, elderly Americans who survive solely on social security benefits, is disgusting. No contribution to the Democratic National Committee will lessen the chances of any social security benefits being cut; all of us here know that.

It is time to seriously focus on the real issues, the problems of the social security system cannot be solved by sending an "emergency contribution of $15, $25, $100, or whatever you can afford." I remain committed to the fact that by working together, a sound bipartisan solution can be found to reviving this ailing system. And I call on all my colleagues to rise above partisan politics and seriously address the problems of social security.

INTEREST RATES AND INFLATION RATES ARE COMING DOWN

(Mr. GREGG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. GREGG. Mr. Speaker, talking about devastating admissions, I would like to quote from one of the more respected individuals of this House, the gentleman from California (Mr. PANETTA). He indicated Democrats simply cannot ignore the issue of controlling Federal spending, lowering deficits, moving toward a balanced budget, issues that frankly Democrats did ignore for a long time. In fact, they ignored it so long that when the Republican Party came into the position of executive leadership in this country we had 20-percent interest rates. We had 13.5-percent inflation rates.

Today those rates are coming down. They are down to 16½ percent on the interest side. They are down to 9 percent on the inflation side.

That is the type of program this country needs, a program that brings under control this economy, and I think it is about time we supported that program.

TAX INCREASES

(Mr. WATKINS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WATKINS. Mr. Speaker, in light of the certain huge deficits resulting from the 1982 budget, Senators BAKER and DOLE, Republican leaders in the Senate, are putting out "trial balloons"—proposals for massive tax increases.

The two courses of action being proposed are: First, passage of a national sales tax; and/or second, implementation of a windfall profit tax on natural gas. I, for one, will not even consider voting for either one of these tax increases right now.

In addition, David Stockman has suggested "midcourse" corrections are needed to reduce the 1982 deficit which he now projects to be closer to $100 billion—more than three times greater than the $31 billion projected in May when the administration's budget was adopted.

These mind-boggling deficits were forecast back in May and caused grave concern and reservations for many of us. The people who are now advocating massive tax increases were the same ones who applied pressure for huge tax cuts less than 3 months ago.

In lieu of the balanced budget for 1984 which was based on erroneous economic assumptions in May, David Stockman's projection now for 1984 is a deficit closer to $145 billion. The administration's own projected combined deficit for 1982, 1983, and 1984 is $338 billion—more than a third of $1 trillion in only 36 months. The figures Stockman now projects for the Reagan program are closer to what many were projecting last May. And they are clearly higher than what the administration was projecting at that time.

The administration's budget bill has been in effect only 40 days. Too much work was done by the Congress in adopting the administration's program last July for the Senators to now propose such immediate and drastic tax increases.

I do not believe the American people will accept these massive tax increases unless they are convinced some corrective action is needed for the Reagan economy program. The only person who can convince the American people that some corrective action is necessary is the President himself and according to the President's own remarks he will make his proposals in January 1982.

Before 535 Senators and Representatives propose their own solutions I would like a clearer signal from the President to the people and to the Congress on how he proposes to correct the problem.

QUALIFYING DEFICITS

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, I feel so much better having sat here and looked at all these wonderful charts that have been put together somewhere. There must be a lot of smoke and mirrors back there in one of the rooms. Voodoo economics is alive and well and generating charts.

Having just returned from my district, I certainly did not see people out tapdancing in the streets saying, "Everything is wonderful, Reaganeconomics is working. Inflation is coming down. Hallelujah." I heard just the opposite. People were upset that unemployment was going up, the deficit was going up and bankruptcies were going up.

So I do not know whose districts those little charts reflect, but they certainly do not reflect what I hear and see going on in my district.

I think the problem David Stockman has, for he is a very sincere man, is he honestly believed all deficits were wrong, and that we had to get the budget under control. And I think I basically would agree with him. Now he is very disillusioned for he found out the group he works for do not believe all deficits are wrong. People who won the election saying deficits were wrong were secretly qualifying their statement by saying deficits are wrong only if created by spending for people programs. They think deficits are terrific if they come about because you had all sorts of tax cuts for the rich, spending for defense, pork barrel projects, and other things. That is why David Stockman became disillusioned when he discovered the qualifier. Mink coats do not trickle down, they shed.

HYPOCRITS ARE NOT HELPING THE ECONOMY

(Mr. CAMPBELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CAMPBELL. Mr. Speaker, last year when President Reagan was sworn in we had just come through a

period that had given us 21½-percent interest rates, 20-percent inflation rates, and when the budget deficit was projected for 1984, using the preceding administration figures, it would have been double the amount that is now projected as a deficit for the Reagan administration.

Yes, there has been some success, but not enough. However, I would like to point this out to the Members. Those who have said that the tax program was a trickle-down program, should remember it was the Democratic side that offered a 30-percent corporate tax cut, not the Republican side. It was the Democratic side that cut the top marginal tax rate from 70 to 50 percent.

President Reagan asked for a 10-5-3 depreciation schedule and a 10-10-10 across-the-board tax cut for working Americans. If my colleagues are so concerned about it, why do they not put up a bill to repeal all of the tax cuts that they put in except what the President originally asked for and quit being hypocrits.

□ 1315

WHOSE CREDIBILITY?

(Mr. WALKER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALKER. Mr. Speaker, we have heard a number of comments here this morning about an article that appeared in the Atlantic Monthly magazine. It seems to me the questions that were raised here were essentially questions of credibility; but those who raise such questions, it seems to me, ought to be credible themselves.

What is the Democratic leadership's record on giving the American people the facts?

Well, within the last few weeks we completed the fiscal year. The budget deficit for the end of that fiscal year was at $57 billion. That is the budget that the Democratic leaders brought to this floor and told the American people it was going to be a balanced budget. That is right. They said it was going to be a balanced budget. It just happened to be an election year, but they said in their promises that this is going to be a balanced budget, and what they delivered was a $57 billion deficit.

No one with such a record should be calling other people's credibility into question.

HONORING THE SERVICE OF REPRESENTATIVE JAMIE L. WHITTEN

(Mr. MILLER of Ohio asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MILLER of Ohio. Mr. Speaker, last week, the House paid tribute to its longest serving Member, JAMIE L. WHITTEN of Mississippi. Unfortunately, I did not have the opportunity to express my congratulations at that time so I would like to take a moment today to salute this outstanding man for the many contributions he has made to this House and to this country.

First elected to the 77th Congress in a special election and subsequently sent back to Washington for every Congress since, Chairman WHITTEN is now the dean of House Members. As such, I want to personally congratulate him and extend him the very best on this special anniversary.

I have had the honor and privilege to serve with this outstanding American and able legislator for the past several years as a member of the Appropriations Committee. I have had the firsthand opportunity to witness his dedication to the principles of good government. He is a credit to the First District of Mississippi, to his State, and to the country as a whole. During this particularly difficult period when the battle of the budget is being fought almost daily in the Congress, it is reassuring to know that committee consideration of appropriations is in the very capable, very reasonable hands of Chairman WHITTEN.

Being a leader is not new to JAMIE WHITTEN. He was elected to the Mississippi House of Representatives at age 21. He was elected district attorney of Mississippi's 17th District at age 23 and served in that position until coming to Washington. He has since charted a true and steady course of leadership and fairness on a committee that literally touches the livelihood of every American household. He is a man who has accepted the most challenging and difficult legislative tasks cheerfully. He is a good friend and an enthusiastic chairman who has a rare talent which brings reason and reality to a process that sometimes can get lost in a fog of bureaucracy.

On this occasion, I extend my sincerest thanks for his service and my best wishes for continued good health and happiness.

FIFTY MILLION DOLLARS IN WELFARE PAID TO INELIGIBLE HERE

(Mr. COATS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. COATS. Mr. Speaker, we have heard a lot today about trickle-down economics. Today's Washington Post has a story on the front page that is a different version of trickle down.

I show you the article, "$50 Million in Welfare Paid to Ineligible Here in Washington, D.C."

This story tells about $51 million paid out to people who were not eligible for welfare benefits in the District of Columbia during the past 2 years, and I think we can multiply that many times if we look across the country.

It appears to me that one of the things that is trickling down here is taxpayers' money down the drain in terms of waste and fraud.

Any time anyone raises the question about cutting back on the budget, trying to bring things in balance, we hear from the other side that we are taking money away from the poor and from poor and innocent homeless children. No credit is given to those who are seriously trying to deal with a budget that has grown out of control. No one on the other side of the aisle is addressing the question trying to do something about the waste of the taxpayer's money.

I think our purposes would be better served by not simply sitting around here and labeling each other and ascribing certain catch-all phrases, but by getting down to the business of bringing our budget in reasonable balance and doing what is necessary to make this country and this economy whole again.

HOUSE WAYS AND MEANS COMMITTEE ROAD SHOW IN BALTIMORE

(Mr. DAUB asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DAUB. Mr. Speaker, just a point of interest that I hope does not turn out to be a prediction for what this House may be engaged in as the result of leadership planning for us next Tuesday. As I understand it, the House Ways and Means Committee will be engaged in hearings in Baltimore, Md., on that very important issue of the impact of the administration's so-called budget cuts.

I am wondering if we will be voting on Tuesday or postponing the very important business of this House for the convenience of that committee's chairman and its members in that road show in Baltimore until 4 o'clock or sometime thereafter on that day.

MOTION TO CLOSE CONFERENCE COMMITTEE MEETINGS ON DEPARTMENT OF ENERGY NATIONAL SECURITY PROGRAMS AUTHORIZATION BILL WHEN CLASSIFIED NATIONAL SECURITY INFORMATION IS UNDER CONSIDERATION

Mr. PRICE. Mr. Speaker, I offer a motion.

The SPEAKER pro tempore. The Clerk will report the motion.

The Clerk read as follows:

Mr. PRICE moves that, pursuant to rule XXVIII 6(a) of the House rules, the conference committee meetings between the House and the Senate on H.R. 3413, the fiscal year 1982 Department of Energy national security programs authorization bill, be closed to the public at such times as classified national security information is under consideration: *Provided, however,* That any sitting Member of Congress shall have the right to attend any closed or open meeting.

The SPEAKER pro tempore. Does the gentleman from Illinois wish debate time?

Mr. PRICE. I do not seek any time, Mr. Speaker. I move the adoption of the motion.

RECORDED VOTE

The SPEAKER pro tempore. Under the rule, a recorded vote is necessary.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 385, noes 0, not voting 48, as follows:

□ 1330

So the motion was agreed to.

A motion to reconsider was laid on the table.

LEGISLATIVE PROGRAM

(Mr. LOTT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOTT. Mr. Speaker, I take this time for the purpose of inquiring of the majority leader as to the schedule for the balance of the week and for next week.

I would be happy to yield to the gentleman from Texas.

Mr. WRIGHT. I thank the gentleman for yielding.

Mr. Speaker, the plan is, we shall take up immediately, after some other preliminary business, I think, a unanimous-consent request by the chairman of the Committee on Agriculture.

We shall take up the Interior Department appropriation conference committee report.

We hope to complete that today. We plan to complete that today.

There remains no business ripe for our action following the completion of that report. It had been hoped originally that the conference committees on the social security bill would have met as planned this morning and that we would have the social security conference report tomorrow. But this morning Senator DOLE, the chairman of the conferees on the Senate side, informed our chairman, the gentleman from Illinois (Mr. ROSTENKOWSKI) that he could not meet today and would have to postpone that conference meeting until Monday. Therefore, the social security conference will not be ready tomorrow, and we will have a pro forma session tomorrow.

On Monday, we will meet at noon and will consider the continuing appropriations resolution, fiscal 1982, subject to the granting of a rule. The Rules Committee will have to be meeting tomorrow in order to grant that rule, inasmuch as the unanimous-consent request to consider that bill, which was offered by the distinguished chairman, the gentleman from Mississippi (Mr. WHITTEN), was objected to. Therefore, the continuing appropriations, we assume, will be ready, a rule having been granted, for our consideration on Monday.

On Tuesday, we meet at noon. We have a Private Calendar, then six bills scheduled for consideration under suspension. They are, as enumerated:

H.R. 4500, pilot program extentions;

H.R. 4793, Federal physicians comparability allowance extension;

H.R. 4879, International Banking Facility Deposit Insurance Act;

H.R. 4515, remove certain limitations on FNMA and FHLMC purchase authority;

H.R. 4482, establish a U.S. Circuit Appeals Court and a U.S. Claims Court; and

H. Con. Res. 203, TVA bill.

Thereafter, we will consider the conference report on the defense authorization bill, subject to the granting of a rule on that bill.

We would anticipate that votes on Tuesday would occur at approximately 4 p.m.

On Wednesday and for the balance of the week, the House will meet at 10 a.m.

We would encourage Members to think in terms of a probable session on Friday of next week, inasmuch as there is still a certain amount of activity remaining before we can adjourn for the Thanksgiving district work period.

□ 1345

We have to pass the Defense Department appropriations, or we hope to do so. We have to pass the continuing resolution because the deadline on the existing resolution expires on the 20th. We hope to act upon a bill to authorize the U.S. participation in implementing the Egypt-Israeli Peace Treaty. So, that is it insofar as we are able to project the program at this moment.

Of course, conference reports may be brought up at any time, and it is conceivable that we might be able to take action on the energy and water appropriation conference as well as upon the District of Columbia appropriations conference, but that is not known at this time.

Adjournment times will be announced individually from day to day. When the House has completed its business for the week, it will adjourn for the Thanksgiving week recess and the district work period, and will reconvene at noon on Monday, November 30.

Mr. LOTT. I would like to ask the gentleman a couple of points for emphasis, and then others for information. We will not, then, have any votes tomorrow, but strictly pro forma. But, the gentleman does anticipate a vote or votes on Monday, is that correct?

Mr. WRIGHT. The gentleman is exactly correct. Tomorrow will be a pro forma session; no votes tomorrow. We do definitely expect to have votes on Monday next, on November 16. We expect to have a vote on the continuing resolution, continuing appropriations for fiscal year 1982.

Mr. LOTT. I would like to inquire of the distinguished majority leader, what has happened to the agricultural appropriations conference report? There is a lot of interest in that conference report. I understand the conference has been completed and it was on the schedule for today. There was some talk that it would come up tomorrow. Then, it was on a tentative schedule for next week, on Tuesday, but it has disappeared from there, too. Do we have any idea whether the Agriculture appropriations conference report might come up, if at all, or if there is some problem?

Mr. WRIGHT. There is no disposition on the part of the leadership to delay, most certainly. Perhaps the gentleman would like to yield to the distinguished chairman of the Appropriations Committee, Mr. WHITTEN.

Mr. LOTT. I yield to the gentleman from Mississippi.

Mr. WHITTEN. There are two reasons involved. One of them, I do think it would be much better if we had an agreement on the farm bill, before the appropriation bill

The other conference, I understand, has been adjourned until next week. That is maybe not all that important. The primary reason is this continuing resolution, which covers the whole Government, and where we are trying our best to get it to the Senate and give them a week to deal with it. We need to devote full time and attention for the time being to finalizing this essential measure.

The chairman in the Senate believes, as well as myself and others, that as important as the Agriculture appropriations bill is, since it like other bills are covered by the continuing resolution, I thought it just better to be free to deal with the continuing resolution, which is of prime importance, until the others can be taken care of and we can get an agriculture bill through the Congress and to the President.

Mr. LOTT. Is the Chairman saying it is not anticipated that we would have the agriculture appropriations bill up next week?

Mr. WHITTEN. It is anticipated that we will bring it up as soon as we can get these other more pressing matters out of the way, but it is pretty hard to do it all at once, particularly since the continuing resolution deals with all 13 subcommittees, and the continuing operation of Government.

Mr. LOTT. So it could be next week, but the gentleman does not know for sure?

Mr. WHITTEN. It could be. I will try to give ample notice, but I do not know whether they will get together on the legislative bill, and it would be a whole lot better to know what the bill might be. As the gentleman knows, we have to anticipate many things.

Mr. LOTT. One final question. On Tuesday we have five, I presume, relatively noncontroversial suspensions that are listed here. I would assume that we will be through with the Private Calendar and those suspensions in a couple of hours or three at the most. But, I notice the votes would be delayed until approximately 4 o'clock. Is there some explanation as to why we would want to delay? If the Members are going to have to come back in there for votes and to be here Tuesday, or recess subject to the call of the Chair for 1 hour, or what is happening?

Mr. WRIGHT. I would suggest to the gentleman that experience dictates a prudent course. Once the gentleman from Texas (Mr. WRIGHT) was playing center field, and he thought "Well, that fellow is going to hit that ball and he can't hit it much beyond the shortstop, so I will play up real close."

But, he did, and I missed the ball and was embarrassed by the whole thing. Therefore, rather than suggesting that we might vote at 2 o'clock and take an optimistic view, I am suggesting that we might reasonably expect that those votes would occur at approximately 4 o'clock on Tuesday. I just regard it as prudent planning.

Mr. LOTT. I think you struck on that question, majority leader.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

REQUEST FOR PERMISSION FOR COMMITTEE ON RULES TO FILE PRIVILEGED REPORTS

Mr. PEPPER. Mr. Speaker, I ask unanimous consent that the Committee on Rules may have until midnight Friday, November 13, 1981, to file certain privileged reports.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

Mr. WALKER. Mr. Speaker, reserving the right to object, can the gentleman tell me whether one of those privileged reports has to do with the continuing resolution? Would one of those privileged reports have to do with the continuing resolution?

Mr. PEPPER. The subject of the Rules Committee meeting and hearing tomorrow is House Joint Resolution 349, from the Foreign Affairs Committee to authorize U.S. participation in the implementation of the treaty of peace between Egypt and Israel; House Joint Resolution 357, the continuing appropriation, to which the majority leader has just alluded; third, the conference report on S. 815, the Department of Defense authorization, from the Armed Services Committee. I understand the holding of the hearings in respect to the appropriations is dependent upon the application of the chairman of the Appropriations Committee for the rule.

Mr. WALKER. Reserving the right to object, Mr. Speaker, I would have no objection to any of the reports except for the one on the continuing resolution. I would be constrained to object to that one. If the gentleman wants to separate out that one, then I would not object. Otherwise, I will have to object to the whole request.

Mr. PEPPER. The gentleman does not object?

Mr. WALKER. I will object to the whole request if the continuing resolution is included in that. What I am suggesting to the gentleman, if he wants to separate out the other measures other than the continuing resolution I will not have any objection to those, but I do object to the continuing resolution.

Mr. PEPPER. Our committee does not have the determination of how the continuing resolution is ordered. That will come from the chairman of the Appropriations Committee, and I assume he contemplates the kind of continuing resolution the majority leader referred to a moment ago.

Mr. WHITTEN. May I say it was reported out by voice vote.

Mr. WALKER. Reserving the right to object, what I am saying to the gentleman is that in terms of his request, I will object to the whole request if it includes the continuing resolution. If it does not include the continuing resolution, if he takes that one out, I will allow the others to go through under unanimous consent, and if the gentleman wants to separate his request, that is fine. If not, I am going to object to the whole request.

Mr. PEPPER. Would the able gentleman hear the chairman of the Appropriations Committee before he interposes an objection?

Mr. WALKER. Reserving the right to object, I will be glad to yield to the gentleman from Mississippi.

Mr. WHITTEN. What I said when I made the earlier request, and the gentleman's position was understood by me, I had just been approached by a whole lot of Members who wanted to be sure it came up, so we approached it that way. I talked to my counterpart on the Appropriations Committee. We also had discussed it the other day with the leadership on both sides. The reason we came back is so that these matters could be considered, but then when they asked me to try to expedite it further for the reasons I stated when I made the request, I acceded and asked unanimous consent, at which time it was objected to, and I understand.

Mr. WALKER. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

Mr. PEPPER. May I just say to the able gentleman, the committee is not disposed to separate these three subjects that we have scheduled for the hearing tomorrow. Now, the objection of the gentleman leaves us with the alternative of either requesting unanimous consent tomorrow to bring out the continuing resolution appropriation, or asking the leadership to keep the House in session tomorrow until we can bring from the Rules Committee the privileged reports on the matters I discussed earlier. I would hope maybe that the able gentleman might not wish to indispose his colleagues, that he might perhaps not be willing to interpose his objection.

Mr. ROUSSELOT. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield.

Mr. ROUSSELOT. Well, the gentleman can separate the one out from the other three, could he? Why not? We are not the ones holding it up. The gentleman is.

Mr. PEPPER. Well, it all depends on how you look at it.

Mr. ROUSSELOT. OK, that is fine.

HOUR OF MEETING ON FRIDAY, NOVEMBER 13, 1981

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that when the House adjourns today, it adjourn to meet at noon on tomorrow, Friday, November 13, 1981.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

PERMISSION FOR SPEAKER TO DECLARE RECESS ON FRIDAY, NOVEMBER 13, 1981

Mr. WRIGHT. Mr. Speaker, I ask unanimous consent that it be in order for the Speaker to declare recesses at any time tomorrow, Friday, November 13, 1981.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. WALKER. Mr. Speaker, reserving the right to object——

The SPEAKER pro tempore. The objection comes too late. The gentleman was not on his feet.

DESIGNATING U.S. DEPARTMENT OF AGRICULTURE BOLL WEEVIL LABORATORY BUILDING, STARKVILLE, MISS., AS "ROBEY WENTWORTH HARNED LABORATORY"

Mr. DE LA GARZA. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the Senate bill (S. 1322), to designate the U.S. Department of Agriculture Boll Weevil Research Laboratory building, located adjacent to the campus of Mississippi State University, Starkville, Miss., as the "Robey Wentworth Harned Laboratory"; to extend the delay in making any adjustment in the price support level for milk; and to extend the time for conducting the referenda with respect to the national marketing quotas for wheat and upland cotton, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1322

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the United States Department of Agriculture Boll Weevil Research Laboratory building, located adjacent to the campus of Mississippi State University, Starkville, Mississippi, shall hereafter be known and designated as the "Robey Wentworth Harned Laboratory". Any reference in a law, map, regulation, document, record, or other paper of the United States to that building shall be held and considered to be a reference to the "Robey Wentworth Harned Laboratory".

SEC. 2. (a) The Act of October 20, 1981 (Public Law 97-67), is amended by striking out "November 15, 1981" in the first section and inserting in lieu thereof "December 31, 1981, or the date of enactment of S. 884, the Agriculture and Food Act of 1981, whichever is earlier".

(b) The last sentence of section 336 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1336) is amended by striking out "November 15, 1981" and inserting in lieu thereof "January 1, 1982".

(c) Section 343 of the Agricultural Adjustment Act of 1938 (7 U.S.C. 1343) is amended by adding at the end thereof the following new sentence: "Notwithstanding any other provision hereof, the referendum with respect to the national marketing quota for cotton for the marketing year beginning August 1, 1982, may be conducted not later than the earlier of the following: (1) thirty days after adjournment sine die of the first session of the Ninety-seventh Congress, or (2) January 1, 1982.".

● Mr. DE LA GARZA. Mr. Speaker, S. 1322 designates a U.S. Department of Agriculture boll weevil research laboratory at Mississippi State University as the Robey Wentworth Harned Laboratory.

This bill is emergency legislation because of other provisions that were added on the floor of the Senate to delay and increase in the milk price support level that would otherwise become effective on November 16, and extend the time for conducting the wheat and cotton referendum that is required by permanent law for the 1982 crop in the absence of any new legislation.

The reason for taking action today is that the provisions of law which would be delayed by S. 1322 are provisions which would be superseded by new legislation contained in the farm bill which is now in conference. As you know, both the House and Senate con-

ferees have met a number of times over many hours and have made great progress in a attempt to reach agreement on the many issues contained in the farm bill. However, looking at the calendar, it seems quite obvious that we will not have a farm bill signed into law by November 15 and accordingly, find it necessary to take this action today. S. 1322 would extend the relevant dates from November 15, 1981, until January 1, 1982, or the date of enactment of the farm bill, whichever is the earlier. An earlier extension was adopted in Public Law 97-67 which extended until November 15, the date for the increase in the milk price support program and the time of the wheat referendum.

I am pleased to be able to report to the House that the conferees on the 1981 farm bill have reached tentative agreement on the dairy provisions of that bill. Under that agreement, the support price for milk for the current marketing year ending September 30, 1982, would remain at the present level of $13.10 per hundredweight. That was the level under both the House and Senate versions of the bill.

In view of that, it simply makes no sense to allow the milk price support level to go above $13.10 per hundredweight to 75 percent of parity under the law now in effect for a short period of time and then to have to lower it back to $13.10.

If the support price is allowed to increase to 75 percent of parity on November 15, the Government would have to purchase milk from handlers at some 40 cents above the $13.10 level.

This would not benefit dairy farmers, but would cause confusion and serve to invite abuse of our dairy price support program. If the support level adopted by the conferees is finally enacted, the price the Government pays handlers would then revert back to the $13.10 level. Because of the buyback provisions of the dairy program, these handlers will be able to purchase what they sold at $13.49 at 110 percent of $13.10, that is, $13.23. This will result in a 26 cents per hundredweight windfall to those handlers—plus the storage costs.

S. 1322 also amends section 336 of the Agricultural Adjustment Act of 1938 to extend from November 15, 1981, to January 1, 1982, the date by which the Secretary is required to conduct a referendum of eligible wheat producers to determine whether they favor establishment of a national marketing quota for wheat for the marketing year beginning June 1, 1982.

The original date for conducting such a referendum, August 1, 1981, was delayed to October 15, 1981, by Public Law 97-67.

With regard to the wheat referendum, as I pointed out, the farm bill cannot be enacted before November 15, 1981—the current date for the referendum. Extending this date to January 1, 1982, would prevent a costly and unnecessary exercise. The Department of Agriculture estimates the cost to be about $4 million.

Also, Mr. Speaker, the same principle applies to a similar referendum of eligible cotton producers which the Secretary will be required to conduct by December 15, 1981. Extending that date to January 1, 1982, at this time could save a potentially necessary effort to do that later this year if any kind of unforseeable impasse should result in the new farm bill not being enacted by December 15, 1981.

I urge adoption of this legislation.●

● Mr. WAMPLER. Mr. Speaker, I rise in support of the passage of S. 1322, a bill which would hold milk price supports at current levels through December 31, 1981, that would delay the wheat referendum, which has already been extended through November 15, 1981, to January 1, 1982; and would delay the cotton referendum called for in section 343 of the Agriculture Adjustment Act of 1938 from December 15, 1981, to January 1, 1982.

The Senate obviously has already acted on this matter and attached an amendment to this effect to S. 1322, this bill that would designate a boll weevil research laboratory building in Starkville, Miss., as the Robey Wentworth Harned Laboratory.

I would point out to my colleagues that if we do not take this action that milk price supports will rise from $13.10 per hundredweight to approximately $13.49 per hundredweight and will substantially increase the cost of the dairy price support program. We are in a conference on the farm bill and have tentatively resolved the dairy issue which calls for a price support of $13.10 per hundredweight for fiscal year 1982. So the action we take here today is the tentative action we have taken in the conference on this issue.

Meanwhile, we do in fact intend to move as swiftly as possible on the farm bill in conference, but there is no question but that it will be necessary to extend the dates for the wheat and cotton referendums so that we will have adequate time to get the farm bill passed and signed into law before we can conduct either referendum.

The action we take with respect to the wheat referendum will save approximately $4 million, and the cost of the cotton referendum were it to be conducted would be substantial. It does not make good sense to proceed with either of these referendums when it is highly likely that we will have a farm bill prior to the first of the new year.

I strongly urge my colleagues to support this measure. It is a money-saving economy measure which accords with the action we are taking in the conference on the farm bill, and I assure my colleagues we are working long and hard on this conference. We met yesterday on the Veterans Day holiday, and we are meeting today and tomorrow to see that we can conclude this conference as soon as possible. However, we do need to take this action which is contained in the amendment to S. 1322, and I urge you to support it.●

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 4035, DEPARTMENT OF INTERIOR AND RELATED AGENCIES APPROPRIATIONS FOR FISCAL YEAR ENDING SEPTEMBER 30, 1982

Mr. YATES. Mr. Speaker, I call up the conference report on the bill (H.R. 4035) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of November 5, 1981.)

The SPEAKER pro tempore. The gentleman from Illinois (Mr. YATES) will be recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. MCDADE) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Illinois (Mr. YATES).

Mr. YATES. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today I bring to the House the conference report on the fiscal year 1982 appropriations bill for the Department of the Interior and related agencies. It is a good bill, Mr. Speaker. It is a realistic bill. It is a bill that incorporates the funding needed for the operations for the Department of the Interior and the agencies within the bill, with the realization of the fiscal restraints that this time calls for.

I want to pay my tribute to my good friend, the ranking minority members JOE MCDADE, for his superb work on this bill, and for all his work in the conference. I want to pay my tribute as well to the other members of the subcommittee, both Republican and Democratic, who cooperated in drafting the conference report.

This bill represents a compromise with the Senate that was a result of tough, hard bargaining. The chairman of the Senate subcommittee was in constant touch with the task force which met on so many occasions with

the Republican congressional leadership, with OMB, and with the White House in reviewing cuts recommended in the so-called September OMB budget, and that budget was always in the background of our discussions. We came to the same conclusions that the budget task force did, that the Stockman September budget was unrealistic and was unacceptable unless one is willing to accept figures without reference to facts. As our good friend, Dave Stockman said yesterday, according to the press, "None of us understands what's going on with all these numbers."

Mr. Speaker, these are the numbers that are pertinent to the conference report:

The conference statement that we bring to the Members provides $7,541,651,000 in new budget authority. This is $3,598,076,000 below the bill approved by the House—a substantial number, Mr. Speaker. It is $188,194,609 above the Senate bill.

□ 1400

When the House bill is adjusted for taking funds for the strategic petroleum reserve and timber purchaser credits off budget, this report is still $171 million—I want the Members to listen to this—this report is still $171,534,000 under the amount passed by the House, and it is $1,135,422,000 over the comparably adjusted budget estimates as of September 30, 1981. That is the so-called September budget that was promulgated by OMB 2 months after this House passed the bill.

It is also important to note that this is $675,345,000 below the Interior Subcommittee's section 302 allocation under Gramm-Latta. It is $675 million below that allocation. And that was the guide that we received from the House of Representatives and from the Congress that we were to proceed by in connection with our bill.

When the 302 allocation is adjusted for the fact the conference agreement takes the timber purchaser credits off budget, the adjusted allocation becomes $7,974,458,000, and the conference agreement is $432,807,000 below the adjusted allocation. It is almost half a billion dollars under the 302 allocation. That is an important figure.

An equally important figure is the one that shows the receipts that come into the Treasury under this bill. Seventeen billion dollars in receipts comes into the Treasury under this bill. I say that so that those who intend to make a case against this bill will realize that this bill brings into the Treasury approximately $15 billion over the amount that the bill is over the September budget.

Mr. Speaker, this has been an amazing and a difficult year for the Appropriations Committee. We hold our hearings on the President's budget recommendations; and we waited this year until the new President presented his budget after we had started our hearings on the Carter budget. We waited, and then the Budget Committee, for the second time in our history since the Budget Act was approved into law, came back with a reconciliation provision in the first budget resolution, and we were bound by that. Then we had to wait until the authorizing committees reconciled their legislative totals with the reconciliation.

But Gramm-Latta as enacted provided for $770 billion. That was the overall Gramm-Latta level. That level was then divided among the subcommittees of the Appropriations Committee of the House, and our subcommittee received a level to which we had to adhere. As I stated to the House before, this bill is $432.8 million below that level.

We thought the rules had been set by the Gramm-Latta budget resolution. They were new rules; they had not been tried before. Well, we presented our bill to the House last July, and we were well within the 302 level, as we were required to be, except for the strategic petroleum reserve which Gramm-Latta had taken off budget.

The total amount of this conference report is below the 302 level. We have complied with the law.

I received a call from OMB on Tuesday. OMB says it is opposed to this conference report. OMB had told us when we brought the bill to the floor in July that it was opposed to the bill at that time, and the House knew it at that time and approved our bill by a vote of 358 to 46.

The fact is that now OMB has forgotten the Gramm-Latta resolution. The subcommittees of the Appropriations Committee are bound by it. OMB says it is not bound by it; it has a new budget to which it says we have to adhere.

Well, even the task force of the White House and the Republican leadership have not agreed with the OMB budget. They cannot agree with that budget. They have not been able to come to an understanding as to how much they should ask for in cuts, and yet OMB says that we should recognize the budget that they presented.

Let us look at what happened to this bill as it went ahead chronologically. Why are we over budget?

At the time we passed our bill, on July 22, the bill was $79 million below the budget proposed by President Reagan. It was $79 million under that budget which President Reagan had sent to the Congress. On September 30, 1981, 10 weeks after the bill had passed the House, the President submitted his second budget to the Congress. That budget for this bill was $1.4 billion below the bill that the House had passed.

Ten weeks after we had passed our bill, OMB came forward with this new budget and said, "You should have paid attention to our budget," even though we did not know at the time we passed our bill what that budget was.

The Senate, on October 27, 3 weeks after the September 30 budget had been announced by OMB, passed its version of the bill by a vote of 87 to 8, and their bill was $947 million over the September 30 budget estimate.

I would observe that the Senate took 6 weeks to cut $160 million out of the amended request, not $1.4 billion as had been requested by OMB. And I might say in passing that the chairman of the Senate subcommittee was a part of the task force. He knew about the OMB resolution, and yet there was little attention paid to it in the amounts approved by the Senate.

Mr. Speaker, the conferees met last Wednesday, and we resolved the differences between the two bodies. The report we bring today—and it is a good report, I repeat—is the product of that conference. It is $171,534,000 below the bill passed by the House. It is $171 million below the bill that the House approved the last time it was before the House. It was approved by the Senate by a vote of 87 to 8.

The truth is that it is becoming clearer every day—and this is the reason for OMB's predicament—that the President's tax bill simply cut too much out of the revenues of the Treasury, and the Treasury does not have the money and it will not have the money to pay the Government's bills. Personally, I think we ought to defer some of the tax benefits that were voted in that bill, and I would be happy to vote against those. I note that some of the big corporations in the country are having a ball with just one "goodie" in that bill. IBM is buying Ford's tax losses for a couple of hundred million dollars, thereby reducing the taxes it would have to pay the Treasury. Occidental Petroleum is selling some of its depreciation benefits to another giant to reduce its taxes. It is no wonder that the Treasury is short of money.

Let me emphasize again that this bill will not cost the Treasury the amount of money that is in the overage, the amount that is over the budget. On the contrary, the conference report will provide more than $15 billion as a surplus in receipts to the Treasury.

Mr. Speaker, I suppose that we might have done more to meet the new OMB budget if, for example, we had closed the national parks, if we had slammed the gates on the national parks. But that does not make much sense when more Americans than ever before in our history are visiting the national parks.

We went the other way. We put money in the bill over the budget be-

cause we thought that the American people who were visiting the parks were entitled to a safer and more enjoyable reward as they visited the parks. We put funds in the bill for that purpose.

I suppose we could have closed the fish hatcheries throughout the country. We could have stopped stocking the rivers and the lakes with salmon and steelhead and trout and bass and all the other fish that the Fish and Wildlife Service produces.

My staff told me that it had received a call Tuesday from the office of the gentlewoman from Nebraska (Mrs. SMITH) wondering or inquiring if a hatchery in Nebraska had been closed. The budget would have closed that hatchery. It would have closed them in Georgia, it would have closed them through all the Southern States, throughout the country, but we do not think the American people want that. So in this agreement, they are open. We think it is important that our rivers be kept clean, and that they be well stocked with fish so the American people can enjoy their natural resources.

In passing, I want to pay my tribute to the gentleman from Massachusetts, Mr. SILVIO CONTE. I saw in the Smithsonian magazine the other day that Atlantic salmon are coming back in the Connecticut River. We can thank the gentleman from Massachusetts for going ahead with his above-budget fights to put the salmon back into that river, to restore that beauty of nature to New England.

Or, Mr. Speaker, we could have stopped the reforestation program, as another example. Ten years ago this committee dedicated itself to making sure that for every tree cut a new one would be planted. And we put enough money in our bill above the budget, may I say, to establish a 10-year reforestation program to replace the forests that are burned out by fire or that are crosscut by loggers' saws.

To omit these funds did not make any sense to us. We went over the budget in this bill to harvest the lumber, to begin the harvest of the lumber that now lies on the slopes of Mount St. Helens that was cut down when that volcano erupted. We have taken steps to save that timber because we think it is only good husbandry to do that so that the timber is not destroyed by insects or by fire or by other hazards. Moreover, that timber that is cut brings receipts into the Treasury, and we thought that, yes, there will be a day when high interest rates come down and we would need lumber in the future for a revived housing industry, with lower prices for timber because of the increased timber cuts that our committee had approved.

Mr. Speaker, let me say what else we might have done. We might have done to the Indians what so many generations of Americans had done to them for decades in the past, for almost a century, degrading them, ignoring them, and depriving them of funding to educate their children, to protect their resources, and to provide for their health. For some strange reason, for years OMB has refused to provide funds for schools that were unsafe and for health clinics that were so decrepit as to be nonusable.

Since I have been chairman of this subcommittee, with my good friend, the gentleman from Pennsylvania, Mr. JOSEPH MCDADE, the ranking minority member, we have tried to meet the problems of native Americans and to remedy in some measure the wrongs that have been done to them for decades, and we decided against continuing those wrongs. For example, in this bill, as we have in earlier bills, we put money in the budget to take care of the Indian children who were 100 percent unhoused. We have money here for two schools. There are extra funds in this bill to build only two schools, and there are many that should be built for the Indian children. OMB provided no money in its budget for any Indian schools.

I could go on and on to point out places where we went over the budget to do what we thought was good for America, for the conservation programs, for instance. For energy, for example, we provide funds to make us less dependent on Sheik Yamani of Saudi Arabia and his partners in OPEC for our oil needs. Yes, we are making progress in cutting down oil consumption in this country. That is one reason we have an oil glut now, and this committee's funding in past years for the Department of the Interior has helped toward that goal.

But OMB recommended relatively little funds in this budget for the conservation program, and we went over the budget to try to keep the program built up because we can see that a barrel of oil saved is a barrel of oil that we do not have to buy.

□ 1315

In sum, Mr. Speaker, our committee could have been as slavishly devoted to the account books as OMB. Important as that is, we could have done that without exercising our legislative judgment, without taking account of the actual conditions within the areas of funding responsibility that this committee has.

But we thought other things were more important, that there were higher purposes for this great, beautiful country of ours than worrying about a few less dollars when it comes to making the lives of Americans a little richer. And yes, to make their pocketbooks a little richer, too, for this bill pays its way. This bill provides funds for the Treasury over and above the overages that are here, $17 billion in receipts.

I notice in yesterday's paper, Mr. Speaker, that in his press conference the President said that he would veto any budget-busting bill the Congress sent to him, and I suppose he is talking about this bill, among others, because, as I said, this bill is $1 billion over the budget.

But I say to the President: this is not a budget-busting bill. Before he puts his pen to any veto, I would hope he would remember that this is a moneymaking bill for the Treasury, $17 billion worth, and capable of making more.

Mr. Speaker, I suggest, too, that the President remember his visits to the beautiful forest of Camp David on weekends and to his bodybuilding and soul-healing ranch in the mountains of California as he considers this bill. We hope he continues those trips because we wish him well and we want him to relax from the enormous pressures and tensions of his job and to build himself up. But I would hope the President would remember that Camp David, which he enjoys so much, is in the Catoctin National Park and that this bill gives the people of America the same opportunity, a similar opportunity, to enjoy themselves in the national park too, with their children, to ride, or to backpack in the majesty of the mountains at Grand Teton or the Rockies, or to enjoy the clear streams in our national forests, or to bring their children to view the wonders of Yellowstone or Yosemite.

Also in this bill we foster the tradition that was established by another President, a Republican President, about 100 years ago to set aside and to develop the national treasures of this Nation, our national heritage, to be enjoyed by our children and our children's children. That is what this bill does.

Can this rich, powerful, and wonderful country of ours afford to pay for this bill for the people's national heritage? I think so. I am sure the American people think so, too. That is why I asked for your support for this bill, for your vote, because this is a nonpartisan bill.

I see the gentlewoman from New Jersey (Mrs. FENWICK) on the floor. She and I were talking about New Jersey the other day, about the Pinelands that are such an excellent cooperative adventure between the Federal Government and the States. We put $6 million in this bill at the request of Governor Byrne of New Jersey because it is such a good idea. That is above the budget.

Again, Mrs. FENWICK and I were talking about the aquifers below the surface in New Jersey and how there the possibility exists of their being despoiled as a result of what is happen-

ing in the development of the State. The Geological Survey receives funds in this bill to protect that aquifer and every aquifer throughout this country. That is why I say this is a bill you can be proud of. This is a bill you can support, because you can take pride that in voting for this bill you will vote for America the beautiful.

Mr. GONZALEZ. Mr. Speaker, will the gentleman yield?

Mr. YATES. I yield to the gentleman from Texas.

Mr. GONZALEZ. Mr. Speaker, I rise to compliment the gentleman and to thank him for a tremendous job. I am chairman of a subcommittee, too, and I know that problems can confront, especially in view of the fact that the gentleman has obtained a bipartisan coalition and recognizing the basic responsibilities as the gentleman has so eloquently pointed out in these very sensitive areas.

I really, sincerely want to congratulate the chairman of this committee for this excellent job. I intend to support the gentleman's recommendations.

Mr. YATES. I thank the gentleman.

Mr. GONZALEZ. I also had a question. That is with respect to the Bureau of Indian Affairs and the housing program. Am I correct in saying that the House prevailed in its views in that respect?

Mr. YATES. The gentleman is correct. I am glad the gentleman brought that up.

Because of a strained situation that pertains in the funding of Indian housing programs, another subcommittee of the House approves funding for construction of housing for the Indian people. For some strange reason that committee does not have jurisdiction over funding the sanitation facilities and OMB puts in neither of the bills that come before the subcommittee for those sanitation facilities. If this committee did not go over the budget, I think it is about $29 million that we put into this bill for sanitation facilities, those houses would be out there useless, just empty shells. But we have provided the money in this bill over the budget to make sure that the Indian people have dwellings that they can enjoy and that the money that has already been invested in the construction will not be lost.

Mr. GONZALEZ. I thank once again the gentleman and congratulate the chairman.

Mr. YATES. Mr. Speaker, there are several instances where the statement of the managers does not fully explain the actions of the conferees. The following information supplements the statement of the managers:

Amendment No. 20: The correct amount for the headquarters security system in Indiana Dunes NL is $50,000 rather than $500,000 as printed in Statement of the Managers.

Amendment No. 28: The managers expect that the recommendation of no state funding in fiscal year 1982 will be a one year moratorium. We recognize the value and importance of the program and expect the Administration to submit a budget request for State assistance in fiscal year 1983.

The managers urge the National Park Service to use any available deficiency account funds, or reprogram other available funds, in addition to the $6,150,000 provided herein to pay promptly court awards resulting from condemnation proceedings at Big Cypress NP, Florida.

The following tables provide a summary of the Land and Water Conservation Fund along with a listing of Federal acquisitions by agency:

Amendment No. 77: The managers note the contribution which helicopter logging has made to the harvest of forest products, particularly in areas which are environmentally sensitive and in salvaging timber that would otherwise be lost. It urges the Forest Service to consider the possibility of a program of helicopter logging within its overall management plans and as a fire-fighting tool.

The managers are aware of the concern with the Federal Prison Industry backlog and its effect on various Forest Service activities, as well as Department of Interior agencies. The managers expect the Forest Service to work closely with the FPI, as the various Interior agencies are, to reduce the backlog. If these efforts do not result in better service, the Committee will support legislative relief in fiscal year 1983.

Amendment No. 80: The managers agree with the Senate's concern over the Forest Service's failure to provide a consistent approach to the development and maintenance of the private air tanker fleet and the potential consequences of continuing this trend. Therefore, the Forest Service is directed to provide for at least the same level of service through air tanker contracts for the 1982 fire season as it provided for the 1981 fire season, which involved 44 air tanker contracts.

The managers further agree that the Forest Service should identify separately and justify the amount initially budgeted for air tanker services in its fiscal year 1983 and subsequent budget requests. The managers intend for this to result in development of a consistent long-range approach which will realistically enable the Congress to oversee, and the public to have a reliable expectation of, adequate air tanker fire protection.

Finally, the managers understand that existing contracting authority is sufficient, without the actual transfer of funds be-

tween budget categories, to enable the Forest Service not only to renew the present contracts, but also to contract for additional air tankers when conditions warrant.

This is to ensure that the critical availability of air tanker fire fighting services is determined by resource needs rather than competing internal budget considerations of the agency.

Amendment No. 99: The managers agree that Georgetown University will receive $1,500,000 to begin construction of cogeneration capability for its fluidized bed boiler.

Amendment No. 103: The managers agree that the $5,000,000 for the coal conversion program is to be used not only for the completion of outstanding prohibition orders, but also for the processing of prohibition orders for additional plants for which utilities submit the necessary certification under section 301 of the Powerplant and Industrial Fuel Use Act (as amended by the Omnibus Budget Reconciliation Act of 1981). The managers are concerned about the declining staff levels in this program. The $5 million will provide for the program to be maintained at no less than current staff levels, plus funds for outside contractors necessary to help in expeditiously processing new prohibition orders, and such additional personnel necessary for the anticipated workload and to permit the retention of experienced personnel whose valuable expertise is crucial the effectiveness of the program. Congress is concerned that this expertise not be lost and that the necessary level of personnel be maintained.

Amendment No. 127: The following table provides the distribution of funds agreed to by the National Council on the Arts referred to in the Statement of the Managers:

ALLOCATION OF FUNDS FOR NATIONAL ENDOWMENT FOR THE ARTS

Salaries and expenses:	
Artists in school	$5,075,000
Dance	7,992,000
Design arts	4,786,000
Expansion arts	7,316,000
Fellows	101,000
Folk arts	2,829,000
Inter-arts	3,987,000
Regional representatives	969,000
International	126,000
Literature	4,497,000
Media arts	9,632,000
Museums	10,803,000
Music	9,796,000
Opera—Music theater	3,034,000
Research	505,000
Special constituencies	252,000
State arts agencies	22,173,000
Theater	6,928,000
Visual arts	6,834,000
Subtotal, program funds	107,635,000
Administration	11,365,000
Total, salaries and expenses	119,000,000
Matching grants:	
Treasury funds	15,000,000
Challenge grants	15,000,000
Subtotal, matching grants	30,000,000
Grand total, National Endowment for the Arts	149,000,000

Amendment No. 131: The following table provides the distribution of funds agreed to by the National Council on the Arts referred to in the Statement of the Managers:

ALLOCATION OF FUNDS FOR THE NATIONAL ENDOWMENT FOR THE HUMANITIES

Salaries and expenses:	
State programs	$21,177,000
Media grants	8,800,000
Museums and historical organizations	7,200,000
Public libraries	2,760,000
Educational institutional grants	6,036,000
Higher education/regional and national	3,960,000
Elementary and secondary education grants	4,900,000
Endowment fellowships	6,280,000
Other study programs	7,683,000
Research grants	16,360,000
Special projects	8,284,000
Planning and analysis	760,000
Subtotal, program funds	94,200,000
Administration	11,800,000
Total, salaries and expenses	106,000,000
Matching grants:	
Treasury funds	8,400,000
Challenge grants	21,600,000
Total, matching grants	30,000,000
Grand total, National Endowment for the Humanities	136,000,000

Amendment No. 136: The following table provides the distribution of the $12,000,000 appropriated for the Institute of Museum Services:

Operating support grants	$10,580,000
Special project grants	750,000
Museum services board	70,000
Administration	600,000
Total	12,000,000

Mr. Speaker, I include at this point in the RECORD a table comparing new obligational authority recommended in the bill for 1982, and the respective recommendations contained in the House and Senate bills and comparison thereto:

[Fiscal years]

Mr. McDADE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of this conference report. Before proceeding, I wish to express my commendations and compliments once again to my friend, the chairman of the committee, the gentleman from Illinois (Mr. YATES), who does such an excellent job, and to thank all of the members of the committee and the staff who work on this bill. They do a superb job and they do it with their hearts and with their heads, because they recognize the importance of the bill and its impact on America.

Mr. Speaker, I would be less than honest if I were to say I was completely happy with the end product of this bill. It is the result of a tremendous amount of give and take with the other body. It is the work product of many meetings and informal negotiations between the conferees regarding the level of expenditures we would achieve in this bill.

I must say that throughout the course of our deliberations we were under the impression that we were making progress in bringing a bill to my colleagues that the administration could sign and which the Congress could embrace. Signals from the Office of Management and Budget in the last couple of days now indicate that our hopes were unfounded.

I know that all Members of Congress have been inundated with numbers and complaints from OMB about the great problems they have with this bill, and I recognize those problems. I do not, however, agree with all of the numbers and conclusions which they have reached to support their calculations.

I have, however, respect for their concerns and recognize that disagreements on such subjects are part of our political processes.

Mr. Speaker, as one who signed this conference report, it is my intention and expectation to vote to support the conference report.

Mr. MURTHA. Mr. Speaker, will the gentleman yield?

Mr. McDADE. I yield to my colleague from Pennsylvania (Mr. MURTHA).

Mr. MURTHA. Mr. Speaker, I would like to request a point of clarification from the gentleman. Amendment No. 97 disapproves deferral D82-9 and makes those funds available to the SRC-I project. Am I correct that it is the intent of the conferees to make those funds available for continuing design activity on the SRC-I project regardless of whether D82-9 is ultimately classified as a deferral or as a rescission?

Mr. McDADE. The gentleman from Pennsylvania, my colleague, is correct. As you are well aware, the Comptroller General has yet to rule on letters from the majority leader and others questioning whether a deferral, when coupled with the transfer of those funds to another account, is truly a deferral. These letters state that, since the funds in question would be denied to the SRC-I program on a permanent basis, the action should be reclassified as a rescission.

The potential reclassification was not a factor in the conferees' decision. We would have rejected a rescission request just as we have ended the deferral.

In the Supplemental Appropriations and Rescission Act of 1981, we already have denied one request to rescind these funds. The strong votes in both Houses in favor of spending of $135 million on SRC-I which have occurred since the rejection of the last rescission, show that it is the intent of the Congress to make these funds available to the project throughout fiscal year 1982 to continue design activity. Clearly, further delay is counterproductive, and design work must proceed in a timely fashion on this, the sole remaining large coal liquefaction plant which is beyond the idea stage.

Mr. MURTHA. I thank the gentleman.

Mr. McDADE. Mr. Speaker, I reserve the balance of my time.

Mr. YATES. Mr. Speaker, I have no further requests for time. If the gentleman from Pennsylvania has no further requests for time, it would be my intention to move the previous question.

Mr. McDADE. Mr. Speaker, I yield 10 minutes to the gentleman from Texas (Mr. LOEFFLER).

Mr. LOEFFLER. Mr. Speaker, I thank my distinguished ranking Republican member of the committee for the time he has yielded me. Before I get into the main body and thrust of my remarks this afternoon, I offer my sincere appreciation and thanks to our distinguished chairman of the subcommittee, to our ranking Republican, and to the members of the subcommittee who have genuinely made a very sincere effort to reach accommodations that this body and the other body have imposed upon the Interior appropriations process.

This conference report, on the Interior and related agencies appropriations bill, however, is a serious threat to the budget. When one takes into account deferrals from 1981 and increases in off-budget accounts, the bill is over the President's September request by almost $2 billion in budget authority, and $1.5 billion over in outlays.

Just as are many of us in this body and in the other body, the President is sincere in achieving additional budgetary savings. He has clearly stated, as the chairman of our subcommittee has indicated, that he will veto those appropriations bills that bust the budget.

While we may not be able to achieve a 12-percent across-the-board reduction in domestic expenditures over and above what we have already done, I believe we must make a concerted effort to do everything within our power to reduce the growth of Federal spending further. Our immediate objective must be to reduce fiscal year 1982 spending and to do it through the appropriation process, the process that, in fact, was instituted at the inception of the Congress to address the spending needs for the Federal Government.

All totaled, this bill adds some $2.3 billion to Federal deficits over the next 2 fiscal years, with more than $1.5 billion of that amount being added in fiscal year 1982. If threatened increases in other spending bills occur, we can very easily see $10 billion, $12 billion, or $15 billion being added to the deficit as a result of the pending appropriation bills that still

must work their way through our body and the other body.

In my judgment, now is the time for Members of Congress in this body and in the other body to be responsible and to address the needs that our economy dictates, the needs that say we must reduce further the growth in Federal spending.

Incidentally, if we make it possible through our efforts today to provide further reductions in discretionary funds, then that will ease the pressure somewhat on pending entitlement programs that we ultimately will have to addresss.

□ 1430

Because of my concern with respect to the need for further reductions in spending through appropriations bills, and the outlay figures for fiscal year 1982 and thereafter, at the appropriate time I will move to recommit this conference report back to the conference. I do so because I believe in our institution and in our ability as Members of Congress to reach the final accommodation that is consistent with budgetary demands as well as the needs of our society.

I believe in the members of the Interior Subcommittee on our side, as well as on the other side, and I believe that through this motion we will be short-circuiting a problem that will occur if this appropriation bill passes Congress and goes to the White House, and that is a veto, as I also believe that veto will be sustained in the event it comes.

So why do we not circumvent that unnecessary delay? Why do we not be responsible and go back to conference knowing full well that this bill is, as the chairman indicated, at least a billion dollars over the President's request.

I urge my colleagues to join me and pass the motion to recommit so that we can go back to conference and do a better job with respect to fiscal outlays for 1982 within the Interior and related agencies appropriations bill.

Mr. LOTT. Mr. Speaker, will the gentleman yield?

Mr. LOEFFLER. I yield to the gentleman from Mississippi.

Mr. LOTT. Mr. Speaker, I commend the gentleman for his efforts here and also certainly will support his motion to recommit. I think it shows good judgment to offer the motion to recommit so that the committee will have a chance and the conference will have another chance to take a look and see if they cannot make some savings.

Let me ask the gentleman some questions. First of all, is this conference report in fact over the March budget request of the President and, if it is, does the gentleman have some approximate figures as to how much it might be over in outlays and in budget authority?

Mr. LOEFFLER. This conference report is in fact over the President's March budget request, once you consider the fact that the SPRO acquisition funds have been removed both from the budget request and the amounts in the bill.

The conference report does exceed even the March budget by some $600 million in budget authority and $400 million in budget outlays.

Mr. LOTT. So obviously no effort was made to try to get closer to the September request of the President. If this is the case, obviously the conference report is substantially, as the gentleman has already said, over the President's September request by a billion dollars or more; is that correct?

Mr. LOEFFLER. It may be up to $2 billion over when one looks at the September request by the President.

Efforts were made, there is no question about that, on both sides of the conference, but not enough. Certainly with a little more determination I believe the conference can come up with something that will be compatible to the House and to the executive branch and the President of the United States.

Mr. LOTT. I think certainly they should have that opportunity to try. One impact of the 1981 supplemental and rescission bill, or one impact it will have on this whole process is that it will add some costs to this whole area of appropriations, too, will it not?

Mr. LOEFFLER. There is no question about that. I believe we must look at things such as we just mentioned, the strategic petroleum reserve acquisition funds which are off budget, in addition to the deferrals that have not been a part of the overall numbers provided by the Appropriations Committee in its analysis.

What we are doing in simple realistic terms is adding more and more numbers onto a budget or onto an appropriations bill that already exceeds the smallest amount of the request by the administration by a billion dollars. When we start adding the items that the gentleman just referred to, we are getting numbers that approach $2 billion over the request by the President in September.

Mr. LOTT. I would like to address one more question to the gentleman.

Suppose this conference report is a billion dollars over and I know that the HUD and the independent agencies appropriations conference report was over and we also understand the agriculture appropriations conference report will be a little over although some maybe not as much as others. We are adding up a substantial amount of overages in these conference reports.

As a member of the Appropriations Committee, does the gentleman have any idea what we are headed toward in terms of the overall cost of these various appropriations bills? That has to be the bottom line. How much are these things going to finally wind up costing more than what the President is asking for?

Mr. LOEFFLER. If the gentleman will allow me to respond, this bill is at least $1 billion over. The Agriculture appropriations bill is somewhere in the range of $1 billion over. The HUD appropriation bill is almost $1 billion over. That is three. There are nine more to go.

Assuming that a couple would be within the request of the administration, it could be $10 billion, $12 billion, $15 billion; I do not know where we will end up, but I do know we should have the opportunity to make responsible reductions where we can. $10 billion? $12 billion? Here is one. There is another. Where is it going to end?

We can stop it right here and avoid a veto and do the work people have elected us to do, and that is to authorize and appropriate in a responsible manner.

Mr. LOTT. I thank the gentleman.

Just a final comment. I know it is never easy to cut back on these appropriations bills. We want more funds for all these programs and many of them are good programs, many of them affect my State, but also my constituents are still very much interested in inflation and interest rates and moving toward a balanced budget and getting the Government under control.

When we look at some of the things that are in this bill, the Smithsonian, the Institution of Museum Services, Pennsylvania Avenue Development Corporation, the Alaska Pipeline Inspector, the National Capital Planning Commission, there have to be some places where we can make some savings. There must be some areas where we can cut more.

I urge my colleagues let us vote to recommit and I know that the distinguished chairman and the ranking minority member and the members of this subcommittee can do more to save a few hundred million dollars in this bill.

Mr. LOEFFLER. I might inform this body that I was a member of the conference and made a very difficult decision, which was not to sign the conference report, not because my chairman and the ranking member——

The SPEAKER pro tempore. The time of the gentleman from Texas (Mr. LOEFFLER) has expired.

Mr. McDADE. Mr. Speaker, I yield 3 additional minutes to the gentleman from Texas (Mr. LOEFFLER).

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. LOEFFLER. I yield to the gentleman from Illinois (Mr. YATES).

Mr. YATES. I thank the gentleman for yielding.

Did I understand the gentleman to say when we brought the bill to the House that we were over the March budget?

Mr. LOEFFLER. As we review what we have now versus when the bill came to the floor of the House, we were approximately $600 million over the March budget request, $400 million in outlays.

Mr. YATES. Well, that differs from my understanding of what happened at the time that we brought the bill to the floor. My understanding was that his was some 79 million under the budget, that what occurred was that the strategic petroleum reserve, which was on budget at the time, was subsequently removed by Gramm-Latta and that as a result of that removal that then that converted the bill from being under the budget to being over budget. That was not the fault of our committee. We brought the bill to the floor well under the budget, as I say, $79 million under the budget.

May I also ask the gentleman a question. The gentleman from Mississippi asked the gentleman about what the deferrals that we are using here will do to the bill, and the gentleman said that they will increase the bill. Of course they do.

But does not the gentleman agree with me that the deferrals that we are using in this bill for financing were for sums that were saved from the 1981 budget; that is, we agreed in our committee at the time when we considered those deferrals that we would indeed recognize some of them at that time and postpone others, postpone deferrals until the 1982 budget so that we would not have to use additionally appropriated funds at that time?

What the gentleman is doing by his argument is he is completely overlooking the fact that to the extent that we save those deferrals from the 1981 budget, that we are not going over expenditures as such. We saved the costs. We could have deferred them completely for 1981. We did not do that.

Mr. LOEFFLER. With all due respect to my distinguished chairman, who I have the great pleasure of working with, whether we say something is a deferral, whether we say something is off budget, or whether in fact we say it is on budget, we are going to have to pay for it in outlays of dollars by the Federal Government.

We can play charades with numbers, but the deferrals and the off-budget authority is still going to be dollars spent by the Federal Government. It is not included in the so-called $1 billion overage that the chairman referred to in his remarks. There will be an additional $800 million which may be spent in fiscal year 1982.

So while my chairman is correct in describing the way the numbers have been put into the system, and it only then is $1 billion over, the fact of the matter is that $800 million is going to have to be expended in addition to the $1 billion we are looking at—almost a $2 billion increase over the budget.

Mr. McDADE. Mr. Speaker, I yield 5 minutes to the gentleman from California (Mr. LUNGREN).

Mr. LUNGREN. Mr. Speaker, I am not a member of the Appropriations Committee or the subcommittees involved here. I am not a member of the leadership. I am one of the large body of the membership who does not have the opportunity to serve in those positions, and oftentimes I think we do not speak and we allow those to speak who have the expertise here.

But I think that when we talk about the appropriations bill that is before us we have to start to make some fundamental judgments.

I heard the distinguished chairman talk about all the wonderful things that this bill actually produces money for. I agree with him. I have had the opportunity with my family to go to many of the national parks. I did so this summer. I think one of the most beautiful places in the world is the Grand Tetons, but, I do not think that is the question. I do not think anybody here ought to take it personally that some of us may believe that we are spending too much here. We are not questioning the integrity or motivations or the work that has gone into this, the good will that has gone into this on behalf of the chairman or ranking member or others.

It seems to me we have to confront some fundamental questions at a certain time, and that is where are we and where are we going?

I hate to be part of a show-and-tell class here. At times it seems to me sometimes we forget those fundamental questions that we have to resort to very simply displays.

When we talk about peaks of the Grand Tetons, they diminish, they diminish or pale into insignificance when we look at the peaks of Federal spending that we are about to charge the American taxpayer. This chart which I had done several months ago unfortunately now is out of date, because the acceleration or the rate of acceleration as we go more steeply over the next few years is even greater than I had anticipated or more than anybody had anticipated either here on the legislative side or the Executive side.

I would just ask anybody here on the floor, how much of this money do we think was the product of bad intentions? How much of this money was the product of our trying to spend too much? How much of it was the product of our trying to be wasteful? How much of it was going into programs that we thought at the time we voted for were unworthy programs? How much of the money that we paid in the past was because we intentionally wanted to get ourselves into difficulty?

I would suggest that there is nothing—there is nothing that is illustrated by this particular chart that was produced by an intention by the membership of the House of Representatives to do ill to the people we serve. In fact, we have done ill.

We have had all the best intentions and everyone here wants to give as much money as we possibly can for the National Park Service. We want to give as much money as we possibly can for these various programs. The fact of the matter is we do not have the money. We do not have the money to pay our bills right now. We do not have our moneys to pay our bills next year. We do not have the moneys to pay our bills the year after that.

And at some point in time we just have to say, with all good intentions, do we not have to look at the bottom line.

The President has made some suggestions about how we ought to make cuts and he is now being criticized because we have not made enough cuts and because the deficit is going to be larger than we had anticipated.

This is the first opportunity we have to give a clue to the American people, the taxpayers, the people we represent, as well as those people down there on the other side of Pennsylvania Avenue, that we mean something when we say we would like to bring the deficit down.

Now, as some would suggest, we are going about it the wrong way. Instead of cutting our spending we ought to get rid of the tax cuts we put into place.

I would be glad to show them figure after figure for the last administration in which we tried the policy of taxing the people to the greatest extent we possibly could and spending to the greatest extent that we possible could, showing that that would get us out of our problems.

It does not work. It has not worked. It has created a situation where we have 3 back-to-back years of negative productivity growth, and I would challenge anybody who would like to ask a question to suggest how we are going to get out of this problem as long as we have negative productivity growth in this country, as long as we are continuing the line where we have greater and greater tax burdens given to the American people, and even if we do not even take into consideration the fact that with the tax cut we passed, the average person we represent is going to pay higher tax this year because of bracket creep and because of the fact of the impact of the social security tax, laws that we passed just in the last 4 years, and when we take all of that together, we come to the conclusion that we tried higher taxes,

that we tried everything else, that the only thing we can do is try and bring our costs down, and I suggest we try to begin here.

□ 1445

Mr. McDADE. Mr. Speaker, I yield 5 minutes to the distinguished minority leader, the gentleman from Illinois (Mr. MICHEL).

Mr. MICHEL. Mr. Speaker, may I first pay my respects to the distinguished chairman of the subcommittee who represents an urban district in our home State of Illinois, but still handles this measure dealing with the Interior appropriation bill with aplomb. I think he can look at the items involved here very dispassionately. I respect him for what he has done over a period of years on that particular subcommittee, and to the gentleman from Pennsylvania (Mr. McDADE) who is similarly situated and so well-informed. I would not attempt to argue specific figures with either one of the two gentlemen who are so much better informed on what is involved in this bill than I.

But I have some mixed emotions here because I am just so convinced that if we adopt the conference report as presented and send it on to the President that he would be compelled to veto it in view of its being over his budget figures.

I suspect there might very well be more publicity attended with a Presidential veto of this measure than simply voting down a conference report, if that were our inclination here today.

I think, too, that conditions have changed since we considered this measure on the floor, I believe it was in July. As I recall the figures in rough form, we were probably $600 million over the March budget at the time we adopted the bill. If I am incorrect in that, I would stand corrected by the distinguished chairman.

Mr. YATES. Actually, if the gentleman will yield, as the interchange between the gentleman from Texas (Mr. LOEFFLER) and myself indicated, at the time we brought the bill to the floor, the strategic petroleum reserve was an item within our bill. As long as it was included among the items in the bill, we were $79 million under the budget, the March budget.

When Gramm-Latta provided for the strategic petroleum reserve to be taken off budget, our overall bill then moved over the budget.

Mr. MICHEL. Well, that is true. It was only improved probably in the conference by $100 million in that respect; but the point is, I think the bottom line is that there is no question but that if the President had the opportunity to register his will on this measure, it would be vetoed.

So then we are in the kind of situation here where the ground rules have changed since the first of the year. The deficit situation when we look at the projections for this year and for the outyears is just becoming worse and worse.

I think we have no alternative but to try to look to you gentlemen who are the specialists in this field and to recommit the measure back to the conference to see if there is something more that could be wrung out to give the President an opportunity to sign the bill, rather than veto it.

Mr. YATES. Mr. Speaker, will the gentleman yield?

Mr. MICHEL. I am happy to yield.

Mr. YATES. Why is it not just as feasible to suggest that perhaps there ought to be a deferral of some of the tax cuts and a disposal of some of the goodies that were voted in the tax bill, so that there may be more money coming to the Treasury through that route, rather than through the blood-wringing cuts that the gentleman and the President suggest?

Mr. MICHEL. I guess I have always said and taken the position that it took a lot more guts to cut spending around here than it ever did to reduce taxes. I still would stand by that.

Mr. YATES. I am suggesting that we add to the taxes.

Mr. MICHEL. I understand; but I think the gentleman would also concede that if we are in a recession, like most people will not admit and the President himself, the first thing we should be doing, as a Congress, would be to lower personal income taxes rather than increase them.

Mr. YATES. If the gentleman will yield further, I am talking about the outyears. I am not talking about current years. My impression is that we would be over the budget.

Mr. MICHEL. I understand, but my principal concern now is 1982 and what we are going to do about it in individual appropriation bills. This is one of those, and as I was looking over the group this morning of the entire batch of appropriation bills, I think the gentleman from Texas (Mr. LOEFFLER) alluded to several, including HUD and Agriculture in addition to Interior, but you can go down several others and when you add all those figures up, even if there are significant reductions from Defense, we have got a serious problem here to be dealt with.

So I would much rather opt today to support the motion to recommit from the gentleman from Texas back to the conference with the hope that there can be something more wrung out of it, rather than simply voting the conference report down.

So I am here to support that motion when it is made at the appropriate time by the gentleman from Texas (Mr. LOEFFLER) and I think that will, in turn, signal our willingness to do something about excessive spending.

The SPEAKER pro tempore. The time of the gentleman from Illinois has expired.

Mr. McDADE. Mr. Speaker, I yield 1 additional minute to the gentleman from Illinois.

Mr. MICHEL. I would suspect that then we would have the vehicle here for making adjustments and, hopefully, to have an appropriation bill sent down to the President and then, if it is within his figures, he will sign it. If it is not, obviously he will have an opportunity to veto it.

I am personally convinced that in this body we can marshal 145 to 150 votes, which is sufficient to sustain any veto.

So that is really the key here. We may not win on the motion to recommit the measure, but a significant number of votes would signal to those who have to be told, whatever, that there are a sufficient number of votes here in opposition to the bill because of it being so much over the President's budget.

Mr. McDADE. Mr. Speaker, I yield myself such time as I may consume and I yield to the gentleman from Indiana (Mr. DECKARD).

Mr. DECKARD. Mr. Speaker, I thank the gentleman for yielding.

I take this time merely to clarify language in the conference committee report affecting the SRC-I coal liquefaction plant.

I am speaking specifically to language which says that the $135 million for the SRC-I may be used to pay all expenses of the project except for normal operation of the Wilsonville, Ala., pilot plant, whether or not they are considered operating expenses or construction expenses.

My question to the gentleman from Pennsylvania—and I would hope to have the gentleman's clarification for the record—is whether any of these $135 million will go beyond design work.

Mr. McDADE. May I say to my friend, the gentleman from Indiana, that it is the clear intent of the conferees that the money be limited to design work.

I now yield such time as he may consume to my colleague, the gentleman from Pennsylvania (Mr. RITTER).

Mr. RITTER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, today we have before us H.R. 4035 which provides $3.7 billion in offbudget financing for the strategic petroleum reserve. This reserve is the best insurance policy we have against prolonged oil supply disruptions, and filling the reserve in a timely fashion is vital to our Nation's security and our economy.

I know that many of us here do not like the idea of offbudget financing for the strategic petroleum reserve. Total Federal offbudget financing is at

record levels, and the sale of bonds for the reserve at current high interest rates adds a heck of a burden to the taxpayer.

I have introduced legislation, H.R. 4404, which will help ease the offbudget financing burden for the strategic petroleum reserve at no cost to the taxpayer. My bill channels all unidentifiable refunds that the Department of Energy has received from oil company fuel price violations into the strategic petroleum reserve account.

The bill also encourages the Secretary of the Department of Energy to negotiate with those companies who have violated the fuel pricing laws to pay back overcharges in kind in quantities of oil to the reserve. It has the support of Democrats and the Republicans on the Energy and Commerce Committee, which has jurisdiction over the bill, and bipartisan support in the House.

This bill is not intended to be the sole solution to funding the reserve. It is merely a way of assisting current efforts being made to fill the reserve in a timely fashion.

● Mr. LEVITAS. Mr. Speaker, I rise today to support H.R. 4035, the conference report for fiscal year 1982 appropriations for the Department of the Interior. This bill contains funding for a project which is of vital interest to the people of my State, and to all Americans genuinely concerned with protecting this Nation's resources for this and future generations.

Several years ago Congress created the Chattahoochee River National Recreation Area. Public Law 95-344, signed into law on August 15, 1978, authorized $72.9 million for the acquisition of lands and interest in lands for this national recreation area; $53 million of this authorization was appropriated in fiscal year 1980. No appropriations were made toward the remaining $19.9 million in fiscal year 1981. The Reagan administration's budget proposal for fiscal year 1982 contained no provision for land acquisition funds for the Chattahoochee Park.

As part of the acquisition process in this very important and beautiful park, there are parcels of land along the river which have been placed under option at very favorable prices to the Government. The guiding concept behind the park is that of a series of park tracts along the river, linked by the river like a string of pearls. One tract of land in particular, the Sope Creek/Powers Ferry tract, is of critical importance in the development of the entire park. This parcel is the vital in the chain—or the vital pearl on the string—lying between two other already acquired major tracts in the river corridor. At present it is undeveloped and unspoiled. But it is in danger of radical development if the Federal Government does not act to acquire it. Thankfully, this conference report contains the $14.2 million necessary to purchase it.

In 1979 the National Park Service acquired a 24-month option, for $500,000, to purchase this key piece of parkland, an option which was to have expired on October 31 of this year. The owners of this property have voluntarily extended this option until November 30, 1981. They have been extremely supportive of the creation of the Chattahoochee Park, but they appear over the last 2 years to have extended themselves to a point where they will not continue to hold up the development of the land when the nearby area is under so much pressure from development interests. So you can understand how crucial it is that this money be appropriated.

Earlier this year it did not seem likely that funding for the Chattahoochee parkland would be available, due to budgetary considerations. Earlier this year on several occasions, I contacted our colleague, SIDNEY YATES, chairman of the Appropriations Subcommittee on the Interior, to express my hope that his committee could include the $14.2 million needed to continue the orderly development of the park. While sympathetic, Representative YATES pointed out that his bill faced certain budget constraints and that the funds could not be added in the House version. At this point I would like to include a letter dated July 10, 1981, which I wrote to Mr. YATES describing the importance of this land acquisition:

Hon. SIDNEY R. YATES III,
Chairman, Subcommittee on Interior of the House Appropriations Committee, Rayburn House Office Building, Washington, D.C.

DEAR SID: I am writing you with an urgent request that you give favorable consideration to appropriating the necessary funds to acquire a critical tract of land within the Chattahoochee National Recreation Area.

These funds have already been authorized. The Chattahoochee River Recreation Area was authorized by Congress and signed into law on August 15, 1978 (Public Law 95-344). The land acquisition ceiling was set at $72.9 million. From that amount there was $53 million appropriated in fiscal year 1979 and 1980 for the acquisition of lands and interests in lands for the National Recreation Area. No appropriations were made in fiscal year 1981 toward the remaining $19.9 million. The administration's budget proposal for fiscal year 1982 and the House marked-up version contain no provision for land acquisition funds for the Chattahoochee River National Recreation Area.

The concept of this park is a series of park tracts along the river, linked by the river like a string of pearls.

Tract 103-34 (River Properties, Inc.) is the most critically needed parcel in the park. It is the vital link in the chain—or the vital pearl on the string. This 354.67 acre parcel lies between and separates two other already acquired major tracts (289 acres and 192 acres) in the river corridor. This key parcel, at present, is undeveloped and no business or persons would be displaced through its acquisition.

The National Park Service entered into a $500,000/24-month option to acquire Tract 103-34. This option expires on October 31, 1981, and there is no provision for an extension. It is highly likely that this property will be extensively developed if the option is not exercised. While the owners have been very supportive of the creation of the Chattahoochee River National Recreation Area, they appear over the last two years to have extended themselves to a point where they will not continue to hold up the development of the tract when the nearby area is under so much pressure from development interests. Unless Congress appropriates the already authorized approximately $14,2 million plus other associated overhead costs (title insurance, closing costs, etc.) needed to complete the purchase by October 31, 1981, the half million dollar option money supplied by the federal government will be lost.

In order to protect the initial investment and preserve the integrity of this key park unit, it is imperative that this tract be acquired at this time.

In addition to the monetary savings outlined above, the government will gain by:

1. Allowing full utilization of existing and future park facilities as determined by the General Management Plan to accommodate a wide range of visitor use activities.

2. Allowing management to concentrate on the development of a complete park unit for maximum visitor enjoyment. The unit as foreseen by Congress is at present incomplete. It is divided and creates problems in maintenance, law enforcement, interpretation, and visitor accessibility. The completion of this unit will allow the National Park Service to contain visitor use on public property thereby minimizing trespassing and encroachment on private property nearby.

3. Removing the area from the imminent threat of development thereby protecting the natural and scenic beauty of the Chattahoochee corridor and the preservation of archeological sites. If the area undergoes development, the sites could be severely impacted.

4. Enhancing the visitors' appreciation and use of one of the most heavily used recreational units on the river. The heavy use of jogging trails and open recreational activity areas is best exhibited in this unit. Approximately 80 percent of the present use takes place within Tract 103-34 with the full knowledge of the landowner. If the option is not exercised, this recreational use will be terminated.

5. Avoiding possible land value escalations, if the tract remains available for purchase, and maintaining credibility of the National Park Service with conservation and civic groups who have been working toward completion of the Chattahoochee National Recreation Area.

In light of the foregoing, I trust this will meet with your favorable consideration and that you will initiate or request such steps as are necessary to provide the necessary funds. It would truly be a shame as well as a loss of the taxpayer's investment to miss this opportunity. This is not a situation of expanding beyond the boundaries of the existing park, but rather it is filling in a predetermined, selected unit contiguous to the remainder of the park which has already begun to be acquired.

If there are other persons you feel I should contact regarding this, please let me

know. I will be happy to meet with them to discuss the matter.

With best wishes, I am

Very truly yours,

ELLIOTT H. LEVITAS,
Member of Congress.

When the bill came before the House I engaged Chairman YATES in a colloquy concerning this important matter. At that time he assured me that if it was at all possible for the House-Senate conference committee to negotiate a sum of money necessary to take up the Sope Creek option, they would do so. Subsequent to our discussion Senator MATTINGLY, at my urging, prevailed upon the Senate Appropriations Committee to include funding for the tract. After some deliberation, the Senate agreed, and the conference committee, true to Representative YATES' promise to me, concurred to fund the park's development.

So today, after our long and fruitful efforts, we have an Interior appropriations bill containing the $14.2 million for the Chattahoochee River National Recreation Area, and I want to express my deep appreciation to the gentleman from Illinois (Mr. YATES) for his generous consideration in this matter, and to the gentleman from Pennsylvania (Mr. MCDADE) for his efforts. I also want to especially thank my colleague from Georgia, BO GINN, also a member of the of the Appropriations Committee, for his invaluable support and the crucial role that he played in bringing this about.

Mr. Speaker, if this money is not appropriated, we will be losing not only $500,000, but also an irreplaceable area of natural beauty. Any future efforts to acquire this essential link in the park chain would be enormously more costly to the taxpayers and to the protection of the $53 million of taxpayer dollars already invested in this national treasure. In order to protect the initial investment and preserve the integrity of this key park unit, it is imperative that this tract be acquired at this time. It would be truly a shame as well as a loss of the taxpayer's money to miss this chance. I believe we would be pennywise and pound foolish to forgo obtaining this valuable property, at what amounts to a bargain price, and I urge my colleagues to support this bill.●

● Mr. RAILSBACK. Mr. Speaker, I would like to address one aspect of the Interior appropriations bill—the Energy Information Administration (EIA). Because I support the goal of reducing the Federal deficit, I am voting to recommit the Interior appropriations bill. The $1.5 billion above the President's September budget is excessive. However, I would like to recommend that conferees retain the $82,207,000 for the Energy Information Administration.

The energy information programs were set up during a crude oil shortage, they are in place, and we may waste money in the long run by cutting the EIA budget more than the amount in the conference report. Since the Middle East is extremely volatile, we have no guarantee another supply cutoff will not occur, and Congress will again recognize the need for energy data that is not produced by the oil industry.

Basically, $82,207,000 is barely adequate for maintaining a core energy information data bank, including specific programs of importance to me and the Northeast-Midwest Congressional Coalition. EIA, for example, can maintain the Financial Reporting System, State-level supply and price information, and development of a small- and medium-size dealer and wholesaler data base. However, personnel levels are already being lowered. A reduced budget would require termination or sharp curtailment of essential programs. I am also concerned that the conference agreement did not mention industrial and commercial consumption surveys and that, even with adequate funds, the petroleum marketing and price program may be severely limited by Office of Management and Budget (OMB) actions.

The commercial consumption survey looks at nonresidential building energy consumption, while the industrial survey views the boilers and machinery inside. Data obtained by the surveys will be invaluable in monitoring building and equipment efficiency. Knowledge of the fuel switching capabilities of boilers and machinery could be crucial in conservation and emergency planning. The data will aid in monitoring the health of regional economies, to foster conservation, and to monitor the regional impact of Federal energy policies. In addition, money for the industrial survey is used to fund the energy portion of the Census Bureau's "Annual Survey of Manufacturers." Without the money, the Census survey will not include that energy data. I understand the EIA may still have the option of maintaining the consumption surveys, and I would urge them to do so.

The second area of concern is the fact that OMB is considering the elimination of five of nine petroleum price and marketing forms, citing excessive industry burden and cost in furnishing data to EIA. EIA is making good effort to streamline forms to minimize duplication while maintaining the ability to acquire crucial statistical information. Twenty-three forms have already been eliminated. Seventeen others, including nine petroleum price and marketing forms, are being consolidated. EIA published a completed version of the so-called super form on June 5, but the hastily put together form was not acceptable to industry or other users, and another 2 years is needed to development. In the meantime, authority for five price and supply forms expired on September 30. These forms collect basic information needed by State and Federal Governments, research institutions, industry, and others. The OMB published a notice of agency forms under review in the September 24 Federal Register. The matter should have been routine, but OMB considers the forms too burdensome and costly, and the American Petroleum Institute (API) submitted a draft information system that is being seriously considered by OMB.

The API draft as originally submitted would have eliminated six of nine EIA forms which collect price and supply data on the national, regional, and State levels, information of particular interest to myself and the coalition. Although API has since indicated an interest in retaining supply data on the State level, State level price data is in question as is market share information, the percentage of the market distributed by retailers, wholesalers, and refiner-marketers.

EIA now has the most complete energy price data on a comparative basis for States, and no other organization is developing a data base for dealers and wholesalers, an aspect of EIA's petroleum market share reports. State policymakers need price information for planning and budgeting. Distribution data is used for analysis of refiner-marketer practices, monitoring changes in market shares, and refiner distribution patterns, and planning.

So, while I am certainly encouraged by the level of funds approved by the conferees for the Energy Information Administration, I felt it necessary to point out the need for industrial and commercial consumption surveys. I also wanted to comment on the importance of data collected by petroleum price and marketing forms currently under consideration by OMB. If we, as Members of Congress, do not make our need for energy information known, I fear we will terminate or sharply curtail programs that would prove essential during an emergency, in predicting another shortage, and—most importantly for the Northeast-Midwest Congressional Coalition—in monitoring prices and supplies by State and region.●

● Mrs. SCHROEDER. Mr. Speaker, I rise to congratulate the gentleman from Illinois, the chairman of the subcommittee (Mr. YATES), for his efforts to preserve efficiency and effectiveness in the Department of Interior. He and I have worked together to avoid a large waste of money which would have occurred had the reorganization plan for the Office of Surface Mining proposed by Secretary Watt in late May been implemented in its original form.

The original plan called for the needless move of the first rate techni-

cal unit of the Office of Surface Mining Region V from Denver to Casper, Wyo. Because of the disruption which this move would have caused, my Subcommittee on Civil Service held hearings in Denver on June 5. We learned that the move would be quite costly, that no rationale was provided for the move, that the employees were demoralized, and that Department management had failed to consult with the employees, or the companies or States involved. When the General Accounting Office looked into this move, on request of Chairman DINGELL, they came to many of the same conclusions.

This evidence convinced Chairman YATES that something was amiss. When efforts to get the Secretary to reconsider his decision failed, Chairman YATES inserted language in this bill to stop the move. The conferees accepted the key purpose of this language and prohibited the move of the technical service center out of Denver.

While I am pleased with the result, I do not consider it a major legislative victory because none of this should have happened. The Cabinet Secretary with responsibility for management of the Department of Interior should have developed a reorganization plan in an open and deliberate manner. Had he done so, he would have learned that moving an existing office from one city to another merely adds costs. He would have known that the incumbent, talented employees of OSM in Denver were unlikely to move and that, without them, the productivity of the office was sure to fall.

I commend Chairman YATES, as well as Chairmen UDALL and DINGELL for their efforts on this issue. It is too bad it took so much congressional effort to do the job for which the Secretary of the Interior is paid.●

● Mr. FRENZEL. Mr. Speaker, H.R. 4035, the Interior appropriation conference report is above the President's September request in both budget authority and outlays. Even with the strategic petroleum reserve off-budget shell game, the bill is over budget.

The House Early Warning Report for the week of November 9, 1981, states that the bill is under its 302(b) targets for discretionary spending. This wrongful conclusion, based on old economic assumptions, illustrates the difficulties and the damages built in to the incomprehensible scorekeeping procedures by the Budget Committee. It is essential that budget figures be based on, and compared to, up-to-date economic conditions and the most recent assumptions available. The committee insists on using numbers and assumptions which are obsolete. The practice of comparing apples to oranges must be stopped.

The President's September request is based on more current economic assumptions. They are not perfect, but I believe it is to that request that the conference report must be compared. The House Budget Committee's assumptions, approved today, would also be a good standard of comparison.

However, such comparisons are depressing. The conference report exceeds the President's request by $2 billion in budget authority. In outlays during 1982, the conference report is $1.5 billion over the September request. Total outlays are over the President's request by $2.3 billion when outyears are included. Further, fully funding the mandatory items will result in an excess of $88 million over the first resolution assumptions for mandatory items.

I object to the funding for the SRC-I demonstration project for which the President had requested a deferral of fiscal year 1981 funds. If the project is built, and that is doubtful, it will add $3 to $4 billion to the deficit's expenditure side over the next 5 years.

In addition, funding for the DOI is 19 percent over the President's budget request. DOE programs, other than the SPR, are funded at levels 95 percent over budget, the Forest Service is 16 percent over budget, and Arts and Humanities are 87 percent over budget.

Further, it appears the conferees failed to leave any room for October pay increases, nor did they properly reflect the $0.4 billion in fiscal year 1982 outlays mandated by the 1981 supplemental appropriations and rescissions bill.

Making this conference report yet more objectionable is the issue of its transfer of the SPS from on to off budget. This is a less conspicuous substitute for direct on budget Federal spending. The well disguised overbudgeting within this bill represents a major turnabout from this Congress progress toward bringing the growth of Federal spending under control. As one who believes in the accountability of Congress and the fundamental need for more restrained budgetary procedures, I cannot support this bill.

The Interior conference report has been camouflaged to appear to conform to the budget. Its true spending impact has been concealed. Someday Congress will learn that outlay targets must be met. The crowding out affect of Federal spending on the credit market is felt whether spending is done on budget or off. The old free-spending ways of the House can no longer be tolerated. Huge Federal deficits cannot be tolerated. Either we make the budget process work, or the taxpayers will find people who can. This bill should be defeated or vetoed.●

● Mr. AUCOIN. Mr. Speaker, I rise in strong support of the conference report on H.R. 4035, the Interior appropriations bill for fiscal year 1982. Preparing appropriation bills this year has not been an easy task. I commend my colleagues for their perseverance during this process. I would particularly like to acknowledge the efforts of the chairman of the subcommittee, SIDNEY YATES, and the ranking member, JOE MCDADE. The cooperation and skills they have exhibited serves as a model for all of us.

I know they have a deep commitment that the natural resources of this country be properly managed. The agreement we have reached with the Senate is a fair one that adequately funds the important natural resource agencies of the Federal Government.

Mr. Speaker, there are those who will suggest that this bill exceeds the President's budget request. In fact, the conference report is nearly $4 billion less than the President's March request. It is nearly $433 million under reconciliation. The President did recommend further unspecified cuts. But frankly, Mr. Speaker, I am perplexed as to what the administration intends to do about balancing the budget. Does it intend to cut the payment in lieu of taxes program, so vital to the counties of the Western States? Does it intend to follow through with cuts in the Forest Service budget—a cut designed to produce the largest drop in the timber sales program in 20 years? It is difficult to say, because the administration has not specified all of its recommendations. This means the President himself does not know how to make the further cuts he has sought.

Let me illustrate with a concrete example how pennywise and pound-foolish the administration's proposal is with respect to a 12-percent reduction in timber sales from our national forests. The Forest Service tells me that, at a level of 11.9 billion board feet, the level provided in this bill, receipts to the U.S. Treasury from timber sales over the next 3 to 5 years will be $2.3 billion. If the Forest Service budget is trimmed 12 percent, or $200 million, the revised timber sales level will be 10 billion board feet. That will produce $1.9 billion in revenue over the next 3 to 5 years. In other words, Mr. Speaker, the Treasury will suffer a net loss of $200 million if the 12-percent cut is enacted.

Let me suggest, Mr. Speaker, that when we consider this conference report we heed the words of the Director of the OMB, David Stockman. In essence, Mr. Stockman has admitted that the tax cut proposed by the administration is nothing more than the old trickle-down theory that has been discredited so many times in the past. He also admits that the budget proposals submitted by this administration have nothing to do with priorities based upon sound judgments, but were

numbers pulled out of the air to meet an artificial political deadline.

This conference report should be adopted by the House because it funds those agencies of the Federal Government that are revenue producers. Funding for the agencies of the Department of the Interior and the Forest Service is an investment that suffers irreparable harm if not carried out on a consistent basis.

Mr. Speaker, I suggest we take Dave Stockman at his word when he suggests that in Defense spending there is a total somewhere between $10 billion and $30 billion that can "be ferreted out if you really push hard." Let me also suggest, Mr. Speaker, that the amount this bill falls over the President's September budget request can be made up if we simply build three fewer B-1 bombers.

Mr. Speaker, this conference report should not be used as a political tool by the administration. This is a bill that invests tax dollars and actually guarantees revenues to the U.S. Treasury. I urge that my colleagues give it their full support.●

● Mr. SIMON. Mr. Speaker, I would like to compliment my colleague, Interior Appropriations Subcommittee Chairman SIDNEY YATES on his efforts to bring us a responsible and responsive conference report which funds programs through the Department of the Interior, the National Park Service, and the Bureau of Indian Affairs among other agencies. These programs are vital to the well-being of our Nation's lands, provide our citizens with access to national parks and monuments and protect and replenish our natural resources for future generations.

The conference report provides $7.5 billion in appropriations, $3.5 billion below the original House-approved budget for the coming fiscal year, and $188 million above the Senate version. Appropriations in this report are $675 million below the allocation under Gramm-Latta. It is, however, about $1 billion above the revised administration request, a request sent to us weeks after the House had completed action on the appropriations bill.

As chairman of the authorizing subcommittee for some of the agencies funded in this conference report, I have a special interest in the future of H.R. 4035.

The National Endowment for the Arts and the National Endowment for the Humanities are slated for budgets of $149 million and $136 million respectively in the conference report. This contrasts with the administration request to cut each Endowment by 50 percent to levels of $88 million and $85 million. The Institute for Museum Services will receive $12 million under the conference report as compared to zero program funds under the President's proposed budget.

Congress and Presidents from both parties have shown strong support for the Endowments through their 15 year history. It has been a history of growth not only for the Endowments but for the arts and humanities communities and corporate and private involvement in these areas.

Corporate support for the arts and humanities, encouraged by Endowment matching grants, has increased from $22 million in 1967 to over $400 million in 1978. This is directly reflected in the increase in symphony orchestras in this Nation, increased touring of performing companies to all States and increased access to live cultural events and museum exhibits as well as presentations on public television. All of this has been supported by a combination of private and public giving. I could cite an impressive list of performing companies, television broadcasts, translations, and editions, and prominent artists, and writers who have at one time received Endowment grants. But the major point is that the Endowments, with their seed money and matching funds serve two purposes—the encouragement of excellence and access to this cultural excellence for the American people. And it is been done in a partnership with individuals, the business community, and foundations. It is the kind of partnership the administration has been calling for. The Endowments are a superb example of how it works—of the immense return on a small investment of public dollars.

Now is not the time to slash the Endowments by 50 percent, to slash programs that embody the goal of a private-public partnership. The arts are alive and healthy in America. We can help keep them that way with continued support through the Endowments. It is not just good policy for the spirit of the Nation, it is good for the economy. One dollar invested in the arts results in a minimum of $5 in commercial spending in tourism, publishing, and so forth. To me that is $1 well spent.

It has been with the support of friends of the arts and humanities like SID YATES and the support of the Congressional Arts Caucus, chaired by FRED RICHMOND, that the Endowments will remain healthy and important foundations for the cultural and academic worlds.●

Mr. YATES. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

MOTION TO RECOMMIT OFFERED BY MR. LOEFFLER

Mr. LOEFFLER. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the conference report?

Mr. LOEFFLER. I am, Mr. Speaker.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. LOEFFLER moves to recommit the conference report of the bill (H.R. 4035) to the Committee of Conference.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the yeas appeared to have it.

Mr. YATES. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 199, nays 199, not voting 35, as follows:

[Roll No. 297]

Ginn	McCloskey	Zablocki
Goldwater	McDonald	

□ 1500

The Clerk announced the following pairs:

On this vote:

Mr. McDonald for, with Mr. Huckaby against.

Mr. Badham for, with Mr. Florio against.

Mr. Beard for, with Mr. Fazio against.

Mr. Forsythe for, with Mr. Rangel against.

Mr. Smith of Oregon for, with Mr. Savage against.

Until further notice:

Mr. Ginn with Mr. Madigan.

Mr. Zablocki with Mr. Lowery of California.

Mr. Bevill with Mr. Paul.

Mr. Neal with Mr. Shumway.

Mr. White with Mr. Pritchard.

Mr. Stark with Mr. Hopkins.

Mr. Hance with Mr. Dornan of California.

Mr. Hatcher with Mr. Goldwater.

Mr. Jenkins with Mr. Martin of New York.

Mr. Bonker with Mr. McCloskey.

Mr. Jones of Oklahoma with Mr. Smith of Iowa.

Mr. Mattox with Mrs. Byron.

Messrs. MOLLOHAN, FOUNTAIN, ANDREWS, and RUSSO changed their votes from "aye" to "no."

Messrs. COLEMAN, HAGEDORN, WILLIAMS of Ohio, DAVIS of Michigan, and JEFFORDS changed their votes from "no" to "aye."

So the motion to recommit was rejected.

The result of the vote was announced as above recorded.

□ 1515

The SPEAKER. The question is on the conference report.

The conference report was agreed to.

A motion to reconsider was laid on the table.

The SPEAKER. The Clerk will designate the first amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 1: Page 2, line 9, after "Management," insert "including administrative expenses associated with the management of funds provided under the heads "Oregon and California Grant Lands" and "Acquisition, Construction, and Maintenance",".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 1 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 2: Page 2, line 10, strike out "$295,789,000" and insert "$367,631,000".

MOTION OFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 2 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$370,131,000".

The motion was agreed to.

The SPEAKER. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 4: Page 2, after lien 15, insert:

"PAYMENTS IN LIEU OF TAXES

"For expenses necessary to implement the Act of October 20, 1976 (31 U.S.C. 1601), $105,000,000, of which not to exceed $400,000 shall be available for administrative expenses: *Provided*, That this appropriation may be used to correct underpayments in the previous fiscal year to achieve equity among all qualified recipients."

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 4 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

"PAYMENTS IN LIEU OF TAXES

"For expenses necessary to implement the Act of October 20, 1976 (31 U.S.C. 1601), $99,500,000, of which not to exceed $400,000 shall be available for administrative expenses: *Provided*, That this appropriation may be used to correct underpayments in the previous fiscal year to achieve equity among all qualified recipients."

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore (Mr. MOAKLEY). The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 6: Page 2, line 20, strike out "$1,137,000" and insert "$2,300,000".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 6 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$3,137,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 8: Page 7, line 12, after "filed" insert ": *Provided further*, That, none of the funds provided in this Act to the Bureau of Land Management may be

expended to determine suitability or nonsuitability for wilderness or for any wilderness study area designation as directed in 43 U.S.C. 1782 of the Federal Land Policy and Management Act of the lands withdrawn by the Executive Order numbered 3767 of December 19, 1922, to be used by the United States Department of Agriculture for a sheep experiment station".

MOTION OFFERED BY MR. YATES

Mr. Yates. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 8 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 9: Page 7, strike out lines 13 to 20, inclusive.

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 9 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment amended to read as follows:

"OFFICE OF WATER RESEARCH AND TECHNOLOGY
"SALARIES AND EXPENSES

"For expenses necessary in carrying out the provisions of the Water Research and Developlment Act of 1978 (Public Law 95-467) and provisions of Public Law 95-84, as amended (42 U.S.C. 1959-1959i), $11,194,000 of which $2,955,000 shall remain available for obligation until September 30, 1983."

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 11: Page 8, line 5, after "Refuge," insert "including administrative expenses associated with the management of funds provided under the head 'Construction and Anadromous Fish',".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 11 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment amended to read as follows: "including administrative expenses associated with the managment of funds provided under the head "Construction and Anadromous Fish", and up to $3,000,000 but not less than $1,000,000 for high priority projects within the scope of the approved budget which shall be carried out by Youth Conservation Corps as if authorized by the Act of August 13, 1970, as amended by Public Law 93-408,".

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 12: Page 8, line 5, strike out "$207,235,000" and insert "$219,328,000".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 12 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$229,531,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 20: Page 11, line 2, after "Commission," insert including administrative expenses associated with the management of funds provided under the heads "Construction" and "John F. Kennedy Center for the Performing Arts",".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 20 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: "including administrative expenses associated with the management of funds provided under the heads "Construction" and "John F. Kennedy Center for the Performing Arts", and up to $3,000,000 but not less than $1,000,000 for high priority projects within the scope of the approved budget which shall be carried out by Youth Conservation Corps as if authorized by the Act of August 13, 1970, as amended by Public Law 94-408,".

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 21 Page 11, line 2, strike out "$527,606,000" and insert "$530,982,000".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 21 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$534,252,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 22; Page 11, line 16, after "States" insert *"Provided further,* That $85,000 shall be available for the National Park Service to assist the Town of Harpers Ferry, West Virginia, for police force use".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 22 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 25: Page 12, line 14, after "1983" insert ": *Provided,* That of the amount included in this head, not to exceed $1,500,000 shall be used to reimburse fiscal year 1981 costs of those nine States which did not receive their full survey and planning grants in that year".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 25 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 31: Page 14, line 13, after "owner" insert ": *Provided further,* That none of the funds appropriated to the National Park Service shall be used to phase out livestock grazing as provided for in section 3 of Public Law 92-207 (85 Stat. 739)".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 31 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 33: Page 15, line 6, strike "$45,596,000" and insert "$46,946,000".

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 33 and concur therein

with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$44,727,000".

The SPEAKER pro tempore. The gentleman from Illinois (Mr. YATES) is recognized for 30 minutes.

Mr. YATES. Mr. Speaker, I yield 5 minutes to the gentleman from Ohio (Mr. SEIBERLING).

Mr. SEIBERLING. Mr. Speaker, it was distressing to find language in the statement of managers accompanying this (Interior appropriations) bill which may not meet the terms of the Alaska Lands Act or the National Wildlife Refuge Administration Act.

The language appears in amendment 12, pertaining to the U.S. Fish and Wildlife Service:

Within available funds, the Service is . . . to provide $300,000 for the North Slope study for transfer to the Geological Survey. This will permit the Survey to discharge its duties *as the lead agency* in *assessment of* oil and gas exploration development and production on the Arctic Wildlife Refuge pursuant to Sec. 1002 of Public Law 96-487. *There is no objection to initial development on new Alaskan refuges while the refuge management plans are being prepared.*

The language is inaccurate and inappropriate in at least three aspects.

First, the legislative intent of section 1022 of Public Law 96-487 in combination with the title III of the act pertaining to the administration of the National Wildlife Refuge System, and the terms of the Refuge Administration Act itself clearly preclude the USGS from a "lead agency" role on a national wildlife refuge.

In fact, this very question was decided just 10 days ago in U.S. District Court, Alaska District. The judge found that a March 12 directive issued by Interior Secretary James Watt which stated:

This is to designate the Director of the USGS as the lead Federal agency for preparing the Arctic National Wildlife Refuge Oil and Gas Report required under Section 1002(h) and the exploration regulations required under 1002(d). . . .

It was a violation of both the Alaska Lands Act and the Refuge Administration Act:

From a review of the Refuge Act, ANILCA, and the legislative histories of both acts, the court holds that Secretary Watt's transfer of § 3142 (d) and (h) functions from FWS to USGS, and his assignment to USGS of lead responsibility for approving § 3142(e) plans, was a clear error of judgment beyond his statutory authority.

Accordingly, It is ordered: . . .

(4) That defendant James Watt re-assign and delegate to defendant Director of the U.S. Fish and Wildlife Service full responsibility for all of the requirements under § 1002(d), (e) and (h) of the Alaska National Interest Lands Conservation Act.

Second, the language fails to state correctly the purpose of section 1002, which is in part: "an analysis of the impacts of oil and gas exploration, development and production. * * *."

The assessment to be performed is of the impacts of oil and gas activities, not the activities themselves.

Third, the report makes reference to "initial development on new Alaskan refuges," suggesting erroneously that such activities may begin before management plans are complete.

While the report is unclear on the meaning of the term "development," in this context, it would appear to mean oil and gas development. Both the Alaska Lands Act and the Refuge Administration Act require a finding of compatibility with the legislatively determined purposes of a refuge before any such development is commenced. Findings of compatibility are to be based on a completed comprehensive management plan. Therefore, the report's suggestion that development could begin prior to the completion of plans for the new Alaskan refuges is contrary to law.

I would like to ask my distinguished colleague from Illinois whether there was any intent on the part of the conference committee to amend the Alaska Lands Act in any way, in these respects.

Mr. YATES. No, sir, there was not.

Mr. SEIBERLING. Was there any intent to amend the Refuge Administration Act in any way?

Mr. YATES. Certainly not.

Mr. SEIBERLING. I thank the gentleman from Illinois for assisting me in clarifying the record on these three matters.

I have prepared a few additional remarks on the legislative histories of these two acts and would ask unanimous consent that they be printed in full at this point.

As many of my colleagues will recall, the treatment given the coastal plain of the Arctic National Wildlife Refuge was one of the most hotly debated issues of the Alaska lands debate. The Senator from Washington, Mr. JACKSON, and our former colleague from Wisconsin, Senator Gaylord Nelson, discussed this very matter in floor debate, in which it was made clear that FWS would have lead responsibility in implementing section 1002.

Mr. NELSON. *I would assume that it is your intent that the Fish and Wildlife Service have the lead within the Department of the Interior in designing the criteria and guidelines to protect the caribou, other wildlife and their habitat.* Of course, other agencies would also be involved and consulted, but it seems to me appropriate that the FWS play the key role in this program. Does the Senator agree?

Mr. JACKSON. *Yes, I believe it is appropriate for the FWS to have the lead responsibility for developing the wildlife protection stipulations, in coordination with the appropriate offices of the Interior Department.* (Congressional Record, 96th Cong., 2nd Sess., August 18, 1980 at 21673 (emphasis added)).

However, this legislative history is merely a confirmation of a longstanding, congressionally established policy. I refer to the Refuge Administration Act, as amended in 1976. Congress explicitly forbid the administration of refuge lands by any agency other than the FWS.

The basic law governing the administration of units of the National Wildlife Refuge System is the National Wildlife Refuge System Administration Act of 1966, as amended, 16 U.S.C. §§ 668dd-668ee (hereinafter the "Refuge Act"). Section 4(a)(1) of the Refuge Act, 16 U.S.C. § 668dd(a)(1), requires that the National Wildlife Refuge System "be administered by the Secretary [of the Interior] through the United States Fish and Wildlife Service."

The requirement that wildlife refuges be administered only "through the United States Fish and Wildlife Service" was enacted by Congress in 1976 as an amendment to the Refuge Act. Public Law 94-223, 90 Stat. 199. This amendment stemmed from congressional dissatisfaction both with management of Refuge System units by agencies other than the U.S. Fish and Wildlife Service (hereinafter "USFWS") and with joint management by USFWS and other agencies.

The Senate report describes what is meant by subsection (a)(1) of the 1976 amendment in the following terms:

First, the Fish and Wildlife Service would be clearly designated as the agency through which the Secretary would be required to administer the units of the System, *thereby eliminating the possibility of the Secretary delegating this authority to* the Bureau of Land Management or *any other Interior agency.* Second, there will be *no joint administration* of any units within the System by the U.S. Fish and Wildlife Service and any other agency. (USCCAN at 293 (emphasis supplied)).

In the House of Representatives, Representative Sullivan, the chairman of the committee which reported the bill, described the primary purpose of the legislation was to make clear "that all units of the National Wildlife Refuge System are to be administered by the U.S. Fish and Wildlife Service." (CONGRESSIONAL RECORD, (page 36597, November 14, 1975).

Representative DINGELL, one of the cosponsors, said that the bill "finally lays to rest the question as to which agency will administer the refuges. They will be administered by the Fish and Wildlife Service by the legislation before us, which is the way the committee has always interpreted the existing law." (CONGRESSIONAL RECORD, page 36602, November 14, 1975).

The Arctic National Wildlife Refuge was established in 1960 and redesignated as a unit of the National Wildlife Refuge System by section 303(2) of the Alaska Lands Act in 1980. Section 304(a) of the act provides that each "refuge shall be administered by the Secretary, subject to valid existing rights, in accordance with the laws

governing the administration of units of the National Wildlife Refuge System, and this Act." Nothing in the Alaska Lands Act modified the requirements of the Refuge Administration Act. I trust that this discussion lays to rest any doubt that may have been created about the respective roles of the FWS and USGS in implementing section 1002 of the Alaska Lands Act.

Now, I would like to take up the sentence in the report which suggests that some unspecified form of "development" may begin before refuge management plans are completed.

If by "development," the conference committee included economic uses, such as timber harvesting, grazing, and oil and gas leasing, then the violation of another section of established law is being suggested. Such activities are allowed only if a "compatibility standard" is met. Section 4(d) of the National Wildlife Refuge System Administration Act of 1966 (16 U.S.C. 668dd) permits such uses:

> Whenever [the Secretary] determines that such uses are compatible with the major purposes for which such areas were established.

Section 304(b) of the Alaska Lands Act, Public Law 96-487, states that in applying section 4(d) of the Administration Act, "the Secretary may not permit any use, or grant easements for any purpose described in such section 4(d) unless such use (including but not limited to any oil and gas leasing permitted under paragraph (2)) or purpose is compatible with the purpose of the refuge."

A determination of compatibility is based on a refuge's comprehensive conservation plan. Section 304(g) of the act requires that the Secretary "prepare * * * a comprehensive conservation plan for each refuge." Before developing these plans, the Secretary is directed to "identify and describe" the wildlife and other values of the refuge (section 304(g)(2)). Section 304(g)(3) states that each plan shall:

> (iii) specify the uses within each such area which may be compatible with the major purposes of the refuge.

The terms of section 304, in combination with those of section 1008(a) clearly require that compatibility tests, based on comprehensive conservation plans, be completed prior to any decision to allow oil and gas leasing on refuge units in Alaska. This interpretation coincides with the legislative history of the act. In discussing this section of the law, the House Merchant Marine and Fisheries Committee states that:

> The committee expects that no uses disruptive of the natural habitat will be allowed before a [comprehensive conservation] plan is implemented (H. Rept. No. 96097, Part II, April 23, 1979, p. 177).

Mr. YATES. Mr. Speaker, I yield 3 minutes to the gentleman from Arizona (Mr. UDALL).

Mr. UDALL. Mr. Speaker, I rise to seek a clarification from the manager of the bill regarding the agreement reached by conferees on the procedure for future appropriation requests for Indian irrigation projects.

In their report, the conferees have directed the Bureau of Indian Affairs to continue to submit a complete justification of the funding required to the Appropriations Committees as a part of the budget submission. Additionally, and, for the first time, the BIA is similarly directed to submit a legislative package to the appropriate authorizing committees for any irrigation construction projects for which initial funding is being requested. The managers of the conference have further stated that no funds will be provided for any projects if these legislative packages are not submitted to the Congress in time to allow appropriate consideration by the committees involved.

Mr. Speaker, I understand that this procedure is intended to insure that sufficient authorization exists for new Indian irrigation projects as distinguished from requests for extension, modification or maintenance of systems on Indian lands when an irrigation project is already in existence. However, as chairman of the authorizing committee which would normally have jurisdiction over such matters as construction of Indian irrigation projects, I am somewhat puzzled as to why the conferees initiated this method of requesting funding. Of the 121 Indian irrigation projects constructed since 1867 only six have had separate authorizing laws enacted prior to appropriations being made available. Furthermore, it is my understanding that the Snyder Act, (25 U.S.C. 13), the general authorizing authority for BIA functions, has been regarded as sufficient authorization for initiating as well as continuing Indian irrigation projects for the past 60 years. If this Congress has amended the Snyder Act, I certainly am not aware of it.

Mr. YATES. Mr. Speaker, the gentleman from Arizona is correct. Since its enactment in 1921 the Snyder Act has served as general authority for Indian appropriations, including irrigation project construction. The report on the Conference has directed that submission be made to the authorizing committees for projects not already in existence to insure that sufficient authority does exist for all such future requests. A question had been raised in which the Appropriations Committees felt they could benefit by input from the Committees on Indian Affairs and Interior and Insular Affairs. This step was taken then, not because there had been any change in the law but simply to appraise the authorizing committees of such requests. If the authorizing committees conclude that any particular request needs additional authorization, we assume that they will take appropriate action and so notify the Appropriations Committees. If, on the contrary, the authorization committees conclude that sufficient authority already exists, either under the Snyder Act or any other law, then notice of such may also be provided.

Mr. BEREUTER. Will the gentleman yield?

Mr. UDALL. I would be pleased to yield to my colleague from Nebraska.

Mr. BEREUTER. Mr. Speaker, as the chairman of the Republican Task Force on Indian Affairs of the authorizing committee in question, I am very interested in seeking further clarification of this issue.

The distinguished gentleman from Illinois stated that the authorizing committees "may" notify the Appropriations Committees as to whether or not sufficient authority exists for new projects. My reading of this report language indicates that the authorizing committees are not required to respond to the legislative package but are required to be notified. Further, and more importantly, this language does not require that the Appropriations Committees must await an affirmative response from the authorizing committees prior to recommending funding for these types of projects, does it?

Mr. YATES. The gentleman is correct. This language clearly does not require action from the authorizing committees before the Appropriations Committees can report out bills.

Mr. BEREUTER. If the gentleman would further yield, I am concerned that in an era when we are looking toward increased economic development on Indian reservations to help deter the effects of program cutbacks, we not create any obstacles to such development. Section 383 of title 25 of the United States Code, enacted in 1910, sets forth a procedure for the BIA to follow when submitting requests for irrigation projects. This section of the code also requires the Congress to approve each individual project via appropriations bills, as opposed to the pre-1910 system when Congress just funded lump sums for irrigation project construction and maintenance and gave the Commissioner of the BIA discretion over what projects were funded. Does this report language amend 25 U.S.C. 383 and has the BIA been complying with the procedure set forth in that statute?

Mr. YATES. No, it does not change section 383 and; yes, in the fiscal year 1982 budget submission the BIA did strictly follow the procedure required

by that section of title 25 as they have for the years preceding it.

Mr. BEREUTER. If the gentleman from Arizona would yield again, I also hope we are not creating obstacles or additional burdens on the Federal agencies involved in this process. As the Snyder Act and section 383 set forth the authority and procedure for the BIA to request irrigation funding and since the authorizing committees are not required to act antecedent to the Appropriations Committees acting, would it not make sense to have the BIA and OMB simply submit the same funding justification to the authorizing committees as is normally submitted to the appropriating committees?

Mr. YATES. I would have no problem with what the gentleman suggests but I think the question should also be addressed to the chairman of the authorizing committee, for it is his committee which will have jurisdiction over whatever is submitted.

Mr. UDALL. As a proponent of reducing Federal paperwork I can see no reason for separate and distinct packages to be submitted to the two committees. My committee is not being asked to report out any new laws but to assist the Appropriations Committees in their reviews. What is good enough for my friend from Illinois is good enough for me.

Mr. BEREUTER. I thank the chairmen for this clarification.

Mr. UDALL. I thank the floor manager for answering these questions.

□ 1530

Mr. YATES. Mr. Speaker, I move the previous question on the motion.

The previous question was ordered.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 35: Page 16, line 20, strike out "$143,460,000" and insert "$151,539,000".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 35 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$151,964,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 36: Page 16, line 20, after "$143,460,000," insert "of which $9,629,000 shall be available to carry out the provisions of title III of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1221), and of which $850,000 shall be available for determining the limits of the Centralia, Pennsylvania fire, and".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 36 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: "of which $9,629,000 shall be available to carry out the provisions of title III of the Surface Mining Control and Reclamation Act of 1977 (30 U.S.C. 1221), and".

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 41: Page 19, line 3, strike out "$797,395,000" and insert "$814,742,581".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 41 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert the following: "$835,646,000, of which not to exceed $4,000,000 shall be available for grants to the Navajo Community College, pursuant to 25 U.S.C. 640C-1, as amended, and".

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 55: Page 21, line 25, after "Secretary" insert *"Provided further,* That (except in the case of funds held in trust for Indian tribes or individuals) the funds available for expenditure under the "Indian moneys, proceeds of labor" accounts authorized by the Act of May 17, 1926 (Chap. 309, 44 Stat. 560; 25 U.S.C. 155); the Act of March 3, 1883 (22 Stat. 582) in the fifth paragraph under the heading "INDIAN AFFAIRS" (22 Stat. at 590; 25 U.S.C. 155); and the Act of March 2, 1887 (24 Stat. 449) in the first paragraph under the heading "MISCELLANEOUS" (24 Stat. at 463; 25 U.S.C. 155) may be expended until September 30, 1982 for any purpose for which funds are appropriated under the subheading "Operation of Indian Programs". On September 30, 1982, the balance of such accounts (except for the funds held in trust for Indian tribes or individuals) shall be miscellaneous receipts of the Treasury to offset outlays of the Bureau of Indian Affairs, and thereafter no funds shall be deposited in such accounts other than funds held in trust for Indian tribes or individuals".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 55 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: *"Provided further,* That (except in the case of funds held in trust for Indian tribes or individuals) the funds available for expenditure under the "Indian moneys, proceeds of labor" accounts authorized by the Act of May 17, 1926 (Chap. 309, 44 Stat. 560, 25 U.S.C. 155); the Act of March 3, 1883 (22 Stat. 582) in the fifth paragraph under the heading "INDIAN AFFAIRS" (22 Stat. 590; 25 U.S.C. 155); and the Act of March 2, 1887 (24 Stat. 449) in the first paragraph under the heading "MISCELLANEOUS" (24 Stat. 463; 25 U.S.C. 155) may be expended until September 30, 1982 for any purpose for which funds are appropriated under the subheading "Operation of Indian Programs". On September 30, 1982, the balance of such accounts (except for the funds held in trust for Indian tribes or individuals, and not to exceed $10,000,000 which shall be available until expended by eligible tribes for purposes approved by the Bureau of Indian Affairs) shall be deposited into miscellaneous receipts of the Treasury to offset outlays of the Bureau of Indian Affairs and thereafter no funds shall be deposited in such accounts other than funds held in trust for Indian tribes or individuals".

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 64: Page 26, line 10, strike out "$36,194,000" and insert "$40,834,000".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 64 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$42,434,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 73: Page 30, line 25, insert:

"SEC. 110. Notwithstanding the provisions of section 6 of the Act of May 25, 1948 (62 Stat. 269, 273), appropriations of power revenues of the Flathead Irrigation Project on the Flathead Reservation, Montana, made pursuant to section 3 of the Act of August 7, 1946 (60 Stat. 895) shall hereafter be available in amount not exceeding 20 percent of the gross power revenues of said project for the preceding fiscal year, or $750,000, whichever is greater, for maintenance and operation of the dam: *Provided*, That no appropriations shall be made in excess of the Flathead Irrigation power revenues on deposit with Federal Government."

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 73 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

"SEC. 112. Notwithstanding the provisions of section 6 of the Act of May 25, 1948 (62 Stat. 269, 273), appropriations of power revenues of the Flathead Irrigation Project on the Flathead Reservation, Montana, made pursuant to Section 3 of the Act of August 7, 1946 (60 Stat. 895) shall hereafter be available in an amount not exceeding 20 percent of the gross power revenues of said project for the preceding fiscal year, or $750,000, whichever is greater, for improvements and extensions to the power system: *Provided*, That no appropriations shall be made in excess of the Flathead Irrigation power revenues on deposit with the Federal Government."

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 74: Page 31, line 6, strike out "$109,722,000" and insert "$103,168,000".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 74 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$114,992,000".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 77: Page 31, line 22, after "rehabilitation," insert "including administrative expenses associated with the management of funds provided under the heads "Forest Research", "State and Private Forestry", "National Forest System", and "Construction and Land Acquisition",".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 77 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: "including administrative expenses associated with the management of funds provided under the heads "Forest Research", "State and Private Forestry", "National Forest System", and "Construction and Land Acquisition", and up to $3,000,000 but not less than $1,000,000 for high priority projects within the scope of the approved budget which shall be carried out by Youth Conservation Corps as if authorized by the Act of August 13, 1970, as amended by Public Law 93-408," ".

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

PARLIAMENTARY INQUIRY

Mr. MILLER of Ohio. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER pro tempore. The gentleman will state his parliamentary inquiry.

Mr. MILLER of Ohio. I noticed the reading clerk is using the amendment numbers in disagreement with the Senate and calling a page number that does not match with the bill, H.R. 4035, or with the House conference report. Could we clarify why that is?

The SPEAKER pro tempore. The Chair will state that the page numbers refer to the Senate engrossed amendments to which the Clerk always refers.

Mr. MILLER of Ohio. We are using the Senate conference report page numbers?

The SPEAKER pro tempore. For the Senate amendments. The references are to the pages and lines of the original papers, the Senate engrossed amendments.

Mr. MILLER of Ohio. I thank the Chair.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 78: Page 31, line 23, strike out "$769,093,000" and insert "$996,410,000".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 78 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert "$1,007,074,000".

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 85: Page 32, line 13, after "States" insert ": *Provided further*, That $1,485,000 shall be available for construction of the Bald Mountain Road in the Siskiyou National Forest".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 85 and concur therein.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. YATES) is recognized for 30 minutes.

Mr. YATES. Mr. Speaker, I yield such time as he may consume to the gentleman from Oregon (Mr. WEAVER).

Mr. WEAVER. Mr. Speaker, I wish to point out that amendment 85, which is reported in technical disagreement, deals with a Siskiyou National Forest Road in my congressional district. I strongly oppose spending money on this road. Further, the construction of this road is specifically not authorized by Congress. The Omnibus Budget Reconciliation Act clearly states that "none of the funds authorized to be appropriated hereby may be used for carrying out the Bald Mountain Road in the Siskiyou National Forest."

Given the dramatic decline of timber harvests due to the collapse of the housing market, there is little immediate need for the small amount of timber that the construction of this road would make available. At the end of this fiscal year, it is projected that the Siskiyou National Forest will have over 730 million board feet of timber—nearly 4 years' supply—sold, but not harvested. At a time of dramatic efforts to cut Federal expenditures, it is incredible that we would be willing to commit such funds for a project of such questionable need. If this road is constructed, it will be at tremendous cost to the Treasury, and to sound forest land management planning.

It will also be constructed at great cost to the watershed through which it will pass. The road is planned to be built through extremely difficult terrain—the side of a steep ridge—and through extremely sensitive soils. If constructed, it will jeopardize the water quality and valuable fisheries production of one of Oregon's last remaining pure running rivers.

Yet, the value of this road to increased timber production is minimal.

After construction, the Forest Service plans to log only 10 to 12 million board feet of timber from this area over a 5-year period. At the most, this amount represents an annual contribution of less than 2 percent to the annual volume of timber harvested on the Siskiyou National Forest. In addition, the road is designed to access only 6,600 acres of the Siskiyou Forest—less than 1 percent of the forest's land area.

Both the timber and the expenditure are clearly not needed at this time, and it would be the purest folly for the Forest Service to waste time and effort on this road.

REASONS FOR NOT CONSTRUCTING THE BALD MOUNTAIN ROAD

First. The road would make available a small amount of timber at high dollar and environmental cost. On the first entry, the area the Bald Mountain road would access—the Silver and Indigo Creek drainages of the Illinois River—could provide only 11 to 12 mmbf of timber over a 5-year period. Thereafter, barring soil resource or watershed damage, the area is programed to provide about 10 mmbf per year. This represents only 5 percent of the Siskiyou's average programed harvest volume, which has been about 208 mmbf over the years 1966 to 1981. Programed harvests have ranged from 144 to 254 mmbf during this period.

Second. The need for this timber is very low due to depressed housing market and consequent harvest reductions. As the following figures demonstrate, since fiscal year 1979 there has been a dramatic reduction in volume actually cut.

SISKIYOU NATIONAL FOREST

Fiscal year	Sell	Actual cut	Under contract
79	208 mmbf	214 mmbf	500 mmbf (approximate).
80	218 mmbf	129 mmbf	500 mmbf (approximate).
81	201 mmbf	92 mmbf (projected).	620 mmbf.
82	203 mmbf (target).		730 mmbf (if sell target met).

Third. The road will be extremely difficult to build. It must be constructed on the north slope of a steep ridge, through sensitive and unstable soils, according to the USFS Environmental Analysis. The soils are described as having moderate to "very severe" erosion potential. In fact, the document states that the first mile of the roadway will involve reconstruction of an existing road undergoing "active erosion." Part of the road will have to be blasted through a major cliff zone, and will have to pass through extensive areas of loose rock.

Fourth. The road will be extremely expensive. The total costs projected for approximately 14 miles of access and logging road is approximately $2,030,000—about $145,000 per mile. This compares extremely unfavorably with the following figures developed for the Region 6 Forest Plan:

Average per mile costs for local and collector roads

Siskiyou National Forest:	
Local	$30,000
Collector	50,000
Olimpia National Forest:	
Local	95,000
Collector	105,000
Mt. Hood National Forest:	
Local	45,000
Collector	82,000
Eastside of Cascades:	
Local	20,000
Collector	35,000

(The Bald Mount road would be classified as a collector road. Associated logging roads would be local roads.)

Fifth. Because much of the area accessed by this road is of marginal timber value, the Bald Mount road will have to be built with appropriated funds, not timber-purchaser credits. The environmental costs of cutting sufficient timber to pay for the road are too high, according to the Forest Service.

Sixth. Road construction and logging within the Silver Creek and Indigo Creek drainages will jeopardize water temperatures and water quality in one of Oregon's last pure rivers. These creeks are major tributaries of the Illinois, and maintaining high water quality within them is critical to the Illinois salmon and steelhead production. This fishery has an estimated value of $17 million per year.

Seventh. Silver Creek, which lies directly below the proposed road, has an extremely high soil erosion potential. According to an earlier Forest Service study, much of this drainage is subject to: First, rapid runoff; second, high to very high surface erosion potential; and third, increased or greatly increased expectations of mass soil movement due to man's activities (logging and road construction). This drainage provides 30 percent of the total flow of the Illinois during low water periods.

Eighth. The timber could also be accessed from the north or logged by helicopters, even if the Bald Mountain road was prohibited.

Ninth. Providing funds for the construction of this road will amend existing law (the Omnibus Budget Reconciliation Act of 1981) which prohibited such funding.

Tenth. There is strong public opposition to construction. It is now under administrative appeal to the Chief. Indications are that this appeal will continue past the Chief's level, if relief is not obtained by appellants.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate Amendment No. 86: Page 32, line 13, after "States" insert ": *Provided further,* That section 10(a) of the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended (16 U.S.C. 1608) is amended by deleting all of the sentence after the word 'benefits': *Provided further,* That no more than $242,542,000 shall be obligated for the construction of forest roads by timber purchasers".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 86 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: "*Provided further,* That section 9 of the Forest and Rangeland Renewable Resources Planning Act of 1974 (Public Law 93-378 as amended), is amended by deleting all of the sentence after the word "benefits" and inserting in lieu thereof, the following: "*Provided,* That limitations on the level of obligations for construction of forest roads by timber purchasers shall be established in annual appropriation acts": *Provided further,* That no more than $242,542,000 shall be obligated for the construction of forest roads by timber purchasers".

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The SPEAKER pro tempore. The gentleman from Illinois (Mr. YATES) is recognized for 30 minutes.

Mr. YATES. Mr. Speaker, I yield 3 minutes to the gentleman from Wisconsin (Mr. ASPIN).

Mr. ASPIN. Mr. Speaker, I rise in support of the committee amendment to require annual appropriations review of the financing system of forest development roads by timber purchasers.

Also, I would like to clarify the budgetary status of this activity. Regardless of whether the amendment is adopted, the activity is reflected in the unified budget. It is an on-budget activity. The committee amendment insures that the activity is subject to the appropriations process without altering the on-budget nature of the activity.

Mr. YATES. Mr. Speaker, I yield such time as he may consume to the gentleman from Oregon (Mr. WEAVER).

Mr. WEAVER. Mr. Speaker, I wish to point out to the committee that amendment No. 86, which is reported in technical disagreement, would amend existing law under the jurisdiction of the Agriculture Committee and my Forests Subcommittee. It would do this even as it is proposed to be amended by the managers on the part of the House.

Without any hearings whatsoever, the Resources Planning Act of 1974 is being substantially amended. If this

action is taken we will simply move an expenditure—one now clearly accounted for in the appropriations process—off-budget.

There is no savings or real reduction of the budget through this action. Regardless of the language limiting obligations proposed by the managers, the construction of forest roads by timber purchasers, in lieu of paying cash for their timber, represents revenue lost to the Government. It does have an effect on the budget. Regardless of the budgetary mirrors we use, $242,542,000 will still be spent by the Treasury.

Mr. YATES. Mr. Speaker, I move the previous question on the motion.

The previous question was ordered.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 92: Page 34, line 6, after "year" insert ", and not less than $1,000,000 of unexpended balances from prior year receipts,".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 92 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 93: Page 36, after line 12, insert:

"ALTERNATIVE FUELS PRODUCTION

"The provisions in the next to last paragraph under this head in the Supplemental Appropriations and Rescission Act, 1980 (Public Law 96-304) regarding transfer of projects to the Synthetic Fuel Corporation from the Department of Energy shall not apply to any demonstration projects authorized pursuant to the Federal Nonnuclear Energy Research and Development Act, as amended (Public Law 93-577)."

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 93 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 95: Page 36, line 18, strike out "$463,750,000" and insert "$408,490,000".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 95 and concur therein with an amendment, as follows: In lieu of the sum proposed by said amendment, insert the following: "sections 302. (b), 302. (c), and 303. (c) of which are hereby repealed, $431,100,000".

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 97: Page 36, after line 23, insert:

"FOSSIL ENERGY CONSTRUCTION

"For necessary expenses in connection with the purchase and construction of fossil energy plans, including the acquisition of interests, including defeasible and equitable interests in any real property or any facility or for plant or facility acquisition or expansion, $4,000,000, to remain until expended: *Provided*, That of the funds deferred under this head in the Supplemental Appropriations and Recession Act, 1981, (Public Law 97-12) $135,000,000 shall be available for continuing design of the Solvent Refined Coal-I (SRC-I) demonstration facility (Project No. 78-2-d)."

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 97 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

"FOSSIL ENERGY CONSTRUCTION

"For necessary expenses in connection with the purchase and construction of fossil energy plants, including the acquisition of interests, including defeasible and equitable interests in any real property or any facility or for plant or facility acquisition or expansion, $4,000,000, to remain available until expended: *Provided*, That funds deferred under this head in the Supplemental Appropriations and Rescission Act, 1981 (Public Law 97-12) and further deferred (D82-9) in the special message transmitted by the President to the Congress on October 1, 1981 under section 1013 of the Impoundment Control Act of 1974 (Public Law 93-344), shall be used for continuing design of the Solvent Refined Coal-I (SRC-I) demonstration facility (Project No. 78-2-d) and that deferral (D82-9) is hereby disapproved."

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 101: Page 37, line 10, after "Energy," insert "and $400,000 to be derived from "Energy production, demonstration, and distribution," Department of Energy,".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 101 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 104: Page 37, line 22, after "Administration" insert ": *Provided further*, That of the funds deferred under this head in the Supplemental Appropriations and Rescission Act, 1981 (Public Law 97-12), $5,000,000 shall be available for the Federal coal conversion program, of which $4,500,000 shall be available only for expenses in issuing prohibition orders under the Powerplant and Industrial Fuel Use Act and other related laws, to remain available until expended.".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 104 and concur therein with an amendment as follows: In lieu of the matter proposed by said amendment, insert the following: *"Provided further*, That of the funds deferred under this head in the Supplemental Appropriations and Rescission Act, 1981 (Public Law 97-12), $5,000,000 shall be available for the Federal coal conversion program, of which $4,500,000 shall be available only for expenses in issuing prohibition orders under the Powerplant and Industrial Fuel Use Act and other related laws".

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

□ 1545

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 106: Page 38, after line 2, insert:

"PETROLEUM ACQUISITION AND TRANSPORTATION

"The limitation on the aggregate amount that may be obligated under section 167 of the Energy Policy and Conservation Act of 1975 (Public Law 94-163), as amended by the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35), for the acquisition and transportation of petroleum, and for other necessary expenses, is hereby established at $3,684,000,000, to remain until expended."

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 106 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

"SPR PETROLEUM ACCOUNT

"The aggregate amount that may be obligated under section 167 of the Energy Policy and Conservation Act of 1975 (Public Law 94-163), as amended by the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-35), for the acquisition and transportation of petroleum, and for other necessary expenses, is $3,684,000,000, to remain available until expended."

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 111: Page 42, line 6, after "facilities)" insert ": *Provided further,* That funding herein, and in any earlier appropriations Act, for scholarship programs under section 103 of the Indian Health Care Improvement Act and section 757 of the Public Health Service Act shall remain available until expended".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 111 and concur therein with an amendment, as follows:

In lieu of the matter proposed by said amendment, insert the following: ": *Provided further,* That funding contained herein, and in any earlier appropriations Act, for scholarship programs under section 103 of the Indian Health Care Improvement Act and section 757 of the Public Health Service Act shall remain available for expenditure until September 30, 1983".

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 112: Page 42, line 16, strike out "$46,739,000" and insert "$46,617,000".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 112 and concur therein with an amendment as follows: In lieu of the sum proposed by said amendment, insert "$49,117,000".

The motion was agreed to.

The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 114: Page 43, line 22, after "tation" insert ": *Provided further,* That employment funded by this Act shall not be subject to any personnel ceiling or other personnel restriction for permanent or other than permanent employment".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 114 and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The amendment reads as follows:

Senate amendment No. 117: Page 44, line 7, after "$82,096,000" insert ": *Provided,* That none of such funds shall be obligated until the Secretary of Education has certified to the Congress that he has implemented effective procedures and requirements to verify and assure that the individuals benefiting from such funds on the basis of their Indian status actually are Indians within the meaning of section 453 of the Indian Education Act (86 Stat. 345), as amended (20 U.S.C. 1221h): *Provided further,* That none of such funds shall be obligated until the Secretary of Education has submitted to the Congress his report on the study and analysis of such definition of the term 'Indian' which said section 453 required be submitted to the Congress by January 1, 1980".

MOTION OFFERED BY MR. YATES

Mr. YATES. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. YATES moves that the House recede from its disagreement to the amendment of the Senate numbered 117 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: ": *Provided,* That no funds shall be obligated for expenses of the Office of the Director of Indian Education after March 1, 1982 until the Secretary of Education has submitted to the Congress his report and recommendations on the study and analysis of the definition of the term 'Indian' as required by section 453 of the Indian Education Act (86 Stat. 345), as amended (20 U.S.C. 1221h)".

Mr. YATES (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

The motion was agreed to.

GENERAL LEAVE

Mr. YATES. Mr. Speaker, I ask unanimous consent that I may be permitted to revise and extend my own remarks and that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous material and tabular information on the conference report on H.R. 4035, just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

A motion to reconsider the votes by which action was taken on the conference report and on the several motions was laid on the table.

COMMUNICATION FROM CHAIRMAN OF COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION

The SPEAKER pro tempore laid before the House the following communication from the chairman of the Committee on Public Works and Transportation; which was read and, without objection, referred to the Committee on Appropriations:

COMMITTEE ON PUBLIC WORKS AND TRANSPORTATION,
Washington, D.C., November 5, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the provisions of the Public Buildings Act of 1959, as amended, the House Committee on Public Works and Transportation approved the following projects on November 5, 1981:

REPAIR AND ALTERATIONS

Norfolk, Virginia: U.S. Post Office and Courthouse.

Alameda, California: Federal Center Building, Building 1, 620 Central Avenue.

LEASE CONSTRUCTION

Tallahassee, Florida.

FEDERAL CONSTRUCTION

Ashland, Kentucky.

The original and one copy of the authorizing resolutions are enclosed.

Sincerely,

JAMES J. HOWARD,
Chairman.

CONTINUATION OF DECLARED EMERGENCY WITH RESPECT TO IRAN—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 109)

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, without objection, referred to the Committee on Foreign Affairs and ordered to be printed:

(For message, see proceedings of the Senate of today, November 12, 1981.)

GAO REPORTS THAT RAISING THE PAY CAP WOULD BE COST EFFECTIVE

(Mr. WOLF asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. WOLF. Mr. Speaker, the GAO placed in my hands today a letter report which indicates that raising the pay cap would be cost effective.

The current appropriation restriction on the payment of the legal salaries of career executives and other top Federal officials expires on November 20, 1981. The Congress has a golden opportunity to protect its finest investment—its senior executives—the FBI agents, the CIA agents—the people who have worked on the Space Shuttle—the men and women who provide for our national security. They are leaving in alarming numbers.

Now is the time to begin facing up to executive pay compression and its related problems. The exodus of valuable and able executives is costly as the GAO letter points out. In today's environment when the Government is being asked to do more with less, experienced executives with the knowledge and know-how are in a much better position than new, inexperienced executives, to run the Government and keep costs down.

I insert the text of the GAO letter of November 11 at this point in the RECORD.

I urge my colleagues to take the initiative now to address the salary dilemma which has plagued the Government for too long. We can no longer afford to ignore this critical problem.

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C., November 11, 1981.

Hon. FRANK R. WOLF,
House of Representatives.

DEAR MR. WOLF: We are providing you a copy of a letter we are sending to the Chairman, Subcommittee on Civil Service, Post Office, and General Services, Senate Committee on Governmental Affairs, on the merits and cost effectiveness of his proposal to raise the existing $50,112.50 executive pay cap to $57,500.

One of the most critical but perhaps least understood and appreciated problems facing the Government today is the executive pay dilemma. The problem stems from inadequate salary levels, irregular pay adjustments, distorted pay interrelationships, and the linkage of Federal executives' salaries with those for Members of Congress. In the last 3 years, Federal executives have been denied scheduled pay increases totaling 22.4 percent.

The current appropriation restriction on the payment of the legal salaries of career executives and other top Federal officials expires on November 20, 1981. Thus, the Congress has another opportunity to address the executive pay problem.

Raising the pay cap would relieve some of the pay compression and its resulting adverse effects. Moreover, our analysis shows that it would be cost effective.

We are also sending copies of this letter to the President of the United States; the President of the Senate; the Speaker of the House of Representatives; the Director, Office of Management and Budget; and to key House and Senate committees having a responsibility or interest in this critical matter.

Sincerely yours,

CHARLES A. BOWSHER,
Comptroller General
of the United States.

Enclosure.

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C., November 10, 1981.

Hon. TED STEVENS,
Chairman, Subcommittee on Civil Service, Post Office, and General Services, U.S. Senate

DEAR MR. CHAIRMAN: This letter is in response to your request that we evaluate your proposal to raise the "pay cap" for Federal career executives by 14.7 percent to $57,500. Your proposal also would raise the pay limitations for Executive Level III and IV positions to $59,500 and $58,500, respectively. Salary levels for Members of Congress, Cabinet officials, and equivalent positions in the executive, legislative, and judicial branches would not be changed.

While your proposal to raise but not lift entirely the pay restrictions for career executives and certain other Federal executives, excluding Members of Congress, would not fully alleviate the critical pay compression problem, it would provide a much-needed measure of relief. Moreover, if it encourages affected executives to delay their retirements for 3 years, the savings would offset virtually all of the additional salary costs involved.

The proposed raise would relieve some of the existing pay compression among career executives and senior managers, provide needed pay increases to most Federal executives, and preserve the small but important pay distinctions among the various executive levels. Raising the pay limitations and allowing a portion of the scheduled pay increases to become effective should have a positive effect on the Senior Executive Service (SES); the recruitment, retention, and morale of Federal executives and senior managers; and, ultimately, the management and operation of Government programs.

In our opinion, the executive pay dilemma is one of the most critical but perhaps least understood and appreciated problems facing the Government today. Since March 1977, the executive pay ceiling has been increased by only 5.5 percent. During that same period, retired Federal executives received annuity cost-of-living adjustments totaling 55 percent; Federal white-collar pay rates have been increased by 38 percent; and private sector executive pay has gone up about 40 percent.

Federal executives have been denied scheduled increases totaling 22.4 percent in the last 3 years. Executives were due pay raises of 7.02 percent, 9.1 percent, and 4.8 percent in October 1979, October 1980, and October 1981, respectively, but appropriation act language prohibited payment of these scheduled increases. The current appropriation restriction on the payment of the legal salaries of career executives and other top Federal officials expires on November 20, 1981. If the restriction is not reimposed, executive salaries, including those for Members of Congress, will rise by 22.4 percent to their legal levels.

Because of appropriation act pay restrictions, about 46,000 career executives at eight different levels of responsibility now receive the same salary—$50,112.50. As we stated at your Subcommittee's September 14, 1981, hearing on the "Government Brain Drain," this absurd situation creates a multitude of recruitment, retention, morale, and other problems. If allowed to continue, executive pay compression and its resulting adverse effects threaten to undermine the SES and other important reforms the Congress mandated in the Civil Service Reform Act of 1978. More critically, the effective management and operation of Government programs is at stake.

The Government is losing its most valuable, experienced career executives at a time when our country can least afford it. Experienced Federal executives at the peak of their managerial career are retiring at alarmingly high rates; 3,137 top executives retired in 1980, compared with only 508 in 1977. Besides the lost expertise and continuity, such retirements are very expensive. Not only must executives' retirement annuities be paid for a longer period, but salaries must be paid to their replacements as well. Thus, for each executive who retires, the Government must actually pay two persons—the retiree and his or her replacement—to get one job done.

We estimated the cost effects of raising the pay cap for the 34,000 Federal executives and senior managers who at September 30, 1981, were at the $50,112.50 pay ceiling. Raising the pay cap from $50,112.50 to $57,500 would result in a pay raise averaging about 11 percent for that group. A basic premise was that an 11 percent pay increase would cause executives to defer their retirements for 3 years. Conversely, with no immediate pay raise, we assumed that retirement-eligible executives would retire and be replaced.

According to our analysis, raising the pay cap to $57,500 would be cost effective. The net estimated present value of the additional salaries and retirement annuities, including income tax considerations, that would be paid over the remaining lifespans of the 34,000 executives and their replacements would be only about $230 million. The net additional long-range cost would represent an increase of less than 1 percent over the total cost if the cap is not raised. Granting the raise would reduce Federal outlays for the first 3 years because executives at the pay cap would not retire and replacement salary costs would be avoided.

Our analysis did not consider several other important factors such as the value of executives' experience, training, and morale, but if quantifiable, they would serve to enhance the cost effectiveness of raising the pay cap.

We trust that this letter is responsive to your request and will assist the Congress in evaluating the merits and cost effectiveness of lifting or raising the executive pay cap.

Sincerely yours,

CHARLES A. BOWSHER,
Comptroller General
of the United States.

MOBIL CORP'S TAKEOVER ATTEMPT OF MARATHON OIL CO.

(Mr. OXLEY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. OXLEY. Mr. Speaker, as the Representative from Ohio's Fourth District, I am very concerned about Mobil Corp.'s recently announced takeover attempt of Marathon Oil Co. Marathon Oil is headquartered in my hometown of Findlay, Ohio, and has been a good corporate citizen of the State of Ohio for almost a century, playing a significant role in the petroleum market in Ohio.

Marathon employs more than 5,000 people statewide, most of those in my district, with a payroll of close to $100 million. Perhaps as significant, Marathon has a tradition of commitment that the multinational oil companies such as Mobil have not shown. Marathon has historically shown a deep commitment to Ohio to keep the flow of oil stable during times of supply interruptions. During the oil crisis of 1979, for example, Marathon maintained a 100-percent allocation to customers while other larger companies cut allocations in Ohio by an average of 20 percent.

Mr. Speaker, I am deeply disturbed about the loss of vigorous competition if these two oil companies are allowed to merge. The chilling fact of this proposed merger is clear—the Mobil Corp. would rather explore for oil on the floor of the New York Stock Exchange than searching for new oil in the ground. Even worse, the merger of these two companies would actually decrease the competition in the energy marketplace. Combined, a Marathon/Mobil Oil Co. would rank No. 1 in terms of gasoline sales and No. 1 in terms of crude oil delivered over U.S. oil pipelines. It would also rank second in terms of total refining capacity and refined petroleum product sales.

Everybody who suffered through the oil crisis of this past decade must question whether such a merger serves the best interest of the country. By taking over Marathon, Mobil will severely curtail all competitive aspects of the Marathon operation, including the shipping, production, exploration, refining, and marketing.

These consequences lead me to believe that such an acquisition would violate section 7 of the Clayton Act.

I have written a letter to Federal Trade Commission Chairman, James Miller, cosigned by the entire Ohio congressional delegation, requesting that the FTC conduct an immediate and thorough examination of all information necessary to determine whether Mobil's acquisition of Marathon Oil would be consistent with antitrust laws and public policy considerations.

I have also called upon the distinguished chairman of the House Judiciary Committee, Mr. RODINO, and the chairman of the Senate Judiciary Committee, Mr. THURMOND, to convene hearings as soon as possible to consider the antitrust implications of the acquisition.

I believe serious antitrust implications must be considered when the second largest oil company, Mobil Corp., attempts to purchase controlling interest in the 17th largest oil company, Marathon Oil, in the country. It seems fairly obvious to me that such a merger would not promote free and vigorous competition.

Most important, I am gravely concerned about the impact such a merger would have on the job market in my district and throughout Ohio. Just yesterday, the Hold Separate Agreement proposed by Mobil would give Marathon employees only a 72-hour notice of employment termination. I hardly consider this a good faith effort to protect the employees of Marathon Oil. With over 5,000 jobs at stake, I shudder to think of the ramifications if Marathon headquarters left Findlay. Such a move would go far beyond the dollar loss—it would deal a severe blow to the community.

I would hope that the Federal Trade Commission would rule favorably in this case, thereby maintaining free and vigorous competition between these two oil companies.

CONGRESSMAN STRATTON MAKES THE ANNUAL RELEASE OF HIS FEDERAL INCOME TAX RETURNS AS WELL AS HIS NET WORTH

(Mr. STRATTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. STRATTON. Mr. Speaker, today I am making public, as I have done ever since 1974, a copy of the joint income tax return of my wife and myself for the current year, 1980, together with a detailed statement of our estimated net worth.

Although some of the information contained in this release has been made public in accordance with the provisions of the Federal Disclosure Act, my annual report continues to go into far more detail than is required either by the Disclosure Act or the rules of the House.

The information follows:

The 1980 Joint Federal Tax Return[1] of Samuel S. and Joan H. Stratton

Line:	
7 Total exemptions: 2 (self and spouse)	
8 Wages (congressional salary)	$60,662.50
9 Interest income (U.S. Government bonds and savings accounts)	230.84
10a Dividends	(2)
17 Fully taxable pensions and annuities (Naval Reserve retirement)	10,834.25
22 Total income	71,727.60
30 Total adjustments (D.C. cost-of-living adjustment)	3,000.00
31 Adjusted gross income	68,727.60
33 Itemized deductions[3]

Total liabilities	28,468.15
Net worth	209,452.07

[1] Note on assets:
1. Bethesda residence—purchased in 1965 for $42,600.
2. Amsterdam residence is a rented apartment.
3. Total term life insurance held: $89,600.

VETERANS DAY—VIETNAM VETERANS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from South Dakota (Mr. DASCHLE) is recognized for 60 minutes.

GENERAL LEAVE

Mr. DASCHLE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

Mr. DASCHLE. Mr. Speaker, yesterday was Veterans Day and since it was a holiday I called this special order so that we might recognize a special group of veterans, the Vietnam veterans.

Mr. DAUB. Mr. Speaker, will the gentleman yield?

Mr. DASCHLE. I yield to the gentleman from Nebraska.

Mr. DAUB. Mr. Speaker, I thank the gentleman from South Dakota for his insight and leadership and for making this opportunity possible for all of us to speak with respect to Veterans Day. Because of the history of this particular matter, and because of the concern that I know the gentleman and I both share, I would like these remarks to be entered into the RECORD and made a part of this special order.

Mr. Speaker, throughout our history, over 38 million Americans have entered military service in the defense of our Nation. The number of living veterans today totals over 30 million with more than 26 million who are veterans of wartime eras.

The present veteran population is the largest in the Nation's history. It represents a sixfold increase since the Veterans' Administration was created more than 50 years ago. Today, 93 million individuals who are either veterans, dependents, or survivors of deceased veterans, are potentially eligible for VA benefits and services. With this rising number of citizens, the VA has grown to meet the changing needs of veterans.

Yesterday, Veterans Day, many of us spent the day in our home districts taking part in ceremonies to commemorate the sacrifices all veterans have made to this country. It was a day to reaffirm this Nation's historic commitment to honor and care for those who have borne arms in service to the country, in times of war and peace.

We owe a debt to recent veterans which we are just beginning to repay. At the same time our obligations to veterans of other eras remains as compelling as ever. No Government has a more legitimate function than to honor and provide for those who have selflessly defended its citizens.

Mr. Speaker, Veterans Day is one way Americans demonstrate their respect for those men and women who have endured hardship and sacrifice in the service of this country. It is my hope that many citizens paused yesterday to honor, to remember, and to care for him who shall have borne the battle.

Mr. DASCHLE. Mr. Speaker, it was a day off for most of us; many of us who cared deeply about this particular group of veterans had no opportunity really to express ourselves on the floor of this House. It was a day I think for many of us to reflect on the contribution made in past wars by all of those veterans who were called to service. While it is a time which is actually set aside for all veterans, as it should be, this year in particular I think it was a day for which we could give special recognition to the Vietnam veterans in our country.

This has been a special year for 8.5 million veterans who served in Vietnam, for it was before 1981 that those who served during the period in our history, that very troubled and confused period in our history, that those veterans who came back had a very difficult time and suffered the most grievous problems. It was before 1981 that those who served were hardly recognized for those problems, and yet it was that those problems would not go away. They were problems of acceptance, problems of adjustment, problems of orientation, and special problems unique to their own experience in Vietnam.

We had agent orange where we saw for the first time 10.5 million gallons of a most toxic substance, some call it the most toxic substance known to man, dumped on 6 million square miles, an incredible experience, the likes of which had not been seen, and the nightmares still persist for those who were subjected to that kind of exposure. Agent orange was something we had never heard anything about prior to the days of Vietnam.

There was another problem called delayed stress that no one heard anything about before Vietnam, a problem we are only now recognizing for its gravity, for the incredible complexity that it has, and the ramifications it has on people's minds.

I have talked to many of those veterans who were so plagued with delayed stress, problems that they still cannot recognize in many cases, problems that plague them in their nightmarish experiences that they go through yet today. They are problems, too, that their families have to contend with night after night. I have met so many of those veterans and, indeed, they do leave a lasting memory and an imprint on the minds of those that have had the same experiences that I have had in dealing with these veterans.

Drug abuse, too, became a critical problem for veterans coming home from Vietnam, drug abuse that was largely ignored because we did not want to recognize the fact that for the first time our veterans were having serious drug problems in a war that they did not want to be in.

For more than a decade these problems persisted. They were ignored. They were belittled, and they were even challenged as legitimate problems suffered by those in Vietnam. For more than a decade they were problems which many thought would go away and never went away at all. They only got worse. But because those veterans got organized, and because there were many in Congress long before I got here that had the courage and the conviction to recognize those veterans and the problems that they were experiencing, and the courage to do something about it, and because there were many in the media who recognized those problems and brought those problems forward to the people of our land, a growing realization developed in this country to resolve those problems, to do something about it and to finally put to rest the nightmarish experiences that so many of these veterans were having. But really it was not until 1981, this year, that the fruits of that effort became reality. It was only on November 3 of this year, 1981, that the President, very reluctantly, I understand, signed into law the Veterans Health Care Training and Small Business Loan Act of 1981.

As a result of that legislation veterans for the first time can walk into the doors of any veterans hospital, anywhere in the country, and be treated for agent orange. Veterans for the first time will have an on-the-job training program so they, too, can adjust to society and the demand of employment today.

□ 1600

Again, they can be reassured that for 3 more years we are going to have psychological readjustment and training, counseling that so many so desperately need in this country. So indeed, it has been a year of accomplishment and indeed we can relax and in a somewhat unusual fashion be jubilant about the way in which Vietnam veterans are finally being recognized in this country.

But if we are to be complacent, we are to lose, complacency is not going to resolve the problems that lie ahead, problems with what we do with veteran centers in the years ahead, problems with how we resolve still many of the complex issues on agent orange, problems that deal with the GI bill which is totally inadequate, problems now with contracting out many of the services that we have so long taken for granted in the Veterans' Administration.

Much yet needs to be done and so it is today that the day after Veterans Day that we call upon our country, that we call upon those Members in Congress for a recommitment, a renewal of our efforts, and we certainly must do that within ourselves.

So we renew our promise to those veterans who have waited so long, and we renew our commitment to those who gave so much.

Senator Robert Kennedy probably said it better than anybody has when he looked at the problems those of us face, and the way in which we must resolve to solve them. He said:

You know so many people see things as they are and ask why, but rather we should dream of things as they might be and ask why not.

For too many years Vietnam veterans have asked why not and at long last we are providing them with the answers.

Mr. Speaker, I would also like to take this opportunity to recognize the outstanding service five disabled Vietnam combat veterans have provided their fellow veterans in South Dakota. I have had the pleasure and privilege of working with all of these men.

Roger Andal has for years been a watchdog on behalf of veterans first as an employee of the VA, then as national service officer for the disabled veterans. I was honored to have Roger as my field director until he went into private business where he continues to advocate for his fellow veterans.

Larry Bouska assumed Roger's duties as service officer for the DAV and has continued to serve veterans in the mold Roger first established. Larry has had outstanding success in presenting and appealing veterans claims and South Dakota veterans are fortunate to have his expertise and knowledge behind them.

Chris Johnson, founder and president of Vietnam Veterans of South Dakota has been of immeasureable service to Vietnam veterans in South Dakota suffering from the doubt and uncertainty of exposure to agent orange. Chris also founded a self-help counseling group in Rapid City and is recognized throughout South Dakota as a champion for Vietnam veterans and their families.

Gene Murphy is the current DAV chapter president in Sioux Falls and past three-State commander of the Paralyzed Veterans of America. Gene continues to serve on the board of directors of PVA and is well known throughout South Dakota for his work with disabled and paralyzed veterans.

Last but not least is Earl Schultz. Earl is currently State director for the Veterans Employment Service in the Department of Labor. Earl has done a great deal for veterans in this area as South Dakota continues to have one of the best placement records for veterans seeking employment in the Nation. Earl has been the recipient of several awards for his achievements in this area.

All together, South Dakota veterans, especially Vietnam veterans, are fortunate to have these men behind them.

Mr. Speaker, I feel it is also important to note that the Justice Department recently announced that veterans were less likely to be in prison than nonveterans. Combat Vietnam veterans make up less than 5 percent of all State prison inmates as of late 1979. This is certainly encouraging news and is indicative of the quality of people who served in our Nation's Armed Forces during this bitter and divisive conflict.

Mr. RATCHFORD. Mr. Speaker, will the gentleman yield?

Mr. DASCHLE. I yield to the gentleman from Connecticut.

Mr. RATCHFORD. Mr. Speaker, as we pause to reflect on the courage and dedication of the millions of men and women that have served in defense of this great country, and as we proceed in this very body to shape the largest peacetime defense budget in our history, let us not lose sight of the tragic human consequences of the Vietnam war—a conflict that far too many Americans would prefer to think never happened.

Indeed Veterans' Day serves as a solemn reminder of those Americans that fought so bravely and the many that lost their lives in defense of the Nation in wartime. In paying tribute in this fashion we come to recognize the importance of our free and democratic society. What we so often fail to do on this day of remembrance, however, is to assess the state of veterans who still bear the scars of conflict.

Despite an administration that would have terminated the Vietnam Veterans' Outreach and Counseling Center program, an administration that would limit the level of health care services available through the VA hospitals, and an administration bent on across-the-board budget cuts that cannot but harm critical veterans programs—yes, despite all this, this Congress has made great strides this session in assuring that key programs are not adversely impacted and that essential new programs are put into place.

VA hospital facilities and services have been dramatically improved by this Congress, administration efforts to force the VA to contract out for services have been stymied, compensation and pension cases are being handled in a more timely and compassionate manner than in the past, and a sweeping new program to assist the Vietnam veteran still experiencing readjustment problems has become law. The record is impressive. After a decade of sweeping the special problems of the Vietnam vet under the rug, we are beginning to take meaningful steps to address the psychological and health problems that linger for so many.

Far more must be done though, because of the 9 million men and women who served this country during the Vietnam war as many as one-fifth, or 500,000, still suffer from the psychological effects of delayed stress syndrome. Nearly the same number are still unemployed, and new information leads us to believe that some 2.5 million may have been exposed to the dangerous herbicide agent orange. It is my hope that when we proudly dedicate the new Vietnam Veterans Memorial next year at this time that we can point to significant new advances in addressing these horrible problems. In our haste to prepare the Nation's defenses for possible conflict in some remote corner of the world at some future time, let us not forget the tragic personal war that far too many Vietnam vets must still wage in order to once again gain full acceptance by our society and to secure much needed attention to their special health and psychological needs.

Last week I was joined in my district by a Member of this House that has done more to raise the level of the American conscience with regard to our Vietnam experience and the problems that remain. Congressman TOM DASCHLE and I conducted a number of activities on the subject of agent orange and other matters that were quite enlightening to us, and we hope of some help to the many Vietnam vets that attended. I submit for the RECORD the following article that I prepared in reflecting upon these activities and my special thoughts on this Veterans Day, 1981:

A VETERANS DAY COMMITMENT

(By BILL RATCHFORD, Member of Congress, Fifth District, Connecticut)

WASHINGTON.—Too slowly, the American government is beginning at last to acknowledge our nation's responsibility to the men and women who served in Vietnam.

It has been difficult to move our institutions as far as we have; it is essential that we not rest, satisfied with our significant yet incomplete gains, but press on for a square deal for the veterans of that unpopular war.

Two events just last week demonstrated both the progress we've made to date and the work that lies ahead.

One was the signing on Tuesday by President Reagan of a bill I'd cosponsored in Congress to extend veterans benefits to those who have been exposed to the highly toxic herbicide Agent Orange.

The other was the Vietnam Veterans Forum I sponsored the night before in Waterbury with a Vietnam-era veteran, Congressman TOM DASCHLE of South Dakota.

What I saw on Monday night was the anger of Vietnam veterans who have been denied the full benefits they earned on the battlefield, the unity of veterans of Korea and World War II standing by their fellow vets as they seek redress of government wrongs toward Vietnam combatants, and a growing public awareness of the shabby official treatment that has generally been accorded the Vietnam veteran.

More than 250 people, most of them veterans or members of their families, crowded into an upstairs meeting hall at the American Legion Post that night to discuss some of the problems still faced by the men and women who returned from Vietnam. They talked about Veterans Administration rules that overlook disabilities related to conditions unique to our nation's involvement in Vietnam—like Agent Orange poisoning, delayed stress syndrome, a host of rare medi-

cal disorders and acute emotional disorders. They talked about VA hospitals where the staff was generally concerned but so ill-equipped and overworked that the individual vet got little special attention.

Congressman Daschle and I reported on the slow but steady progress in Washington of legislation designed to aid Vietnam and Vietnam-era vets—including the symbolic law that deeded two acres of federal land near the Lincoln Memorial to a non-profit group for a Vietnam Veterans Memorial, due to be dedicated on Veterans Day 1982. And we came away from the three-hour forum saddened by the truly painful personal stories some of the Vietnam veterans had to tell, and more determined than ever to work to convince our colleagues in Congress of the need to right the wrongs that have been done to those who paid and continue to pay the price of service in Vietnam.

The Viet vet really has gotten a raw deal. No marching band met him when he got off the plane. No job, in so many cases, was waiting for him when his discharge came through. If he'd been exposed to some of the deadly chemicals we sprayed all over the countryside there—and even, our government has now admitted, on our own troop concentrations—and was suffering from numbness or dizziness, ugly rashes or other unusual medical conditions, the VA doctors and administrators couldn't give him the benefits and treatment that would be automatic in the case of a veteran with more physically obvious wounds. If the wounds he suffered in maddening jungle warfare were more psychological, his government offered little help in setting him on a path that would restore his place in society and his self-esteem. America had not only lost interest in its war in Southeast Asia; it lost compassion for its warriors.

Little by little, but years too late, we're coming to realize how badly our nation has treated the more than 2.5 million men and women who bore arms in Vietnam. The bill just passed by Congress and signed into law by the President starts the government on a more compassionate, responsible road. It mandates that the VA provide treatment for disabilities linked to exposure to toxic chemicals such as the defoliant Agent Orange; that the readjustment counseling centers for Viet vets remain in business for another three years; that educational benefits under the GI bill be extended; that the government help disabled and Vietnam-era vets get started in their own businesses.

We've made real progress in the past year. Let's pledge that next Veterans Day we'll be able to look back and say the same thing, ensuring justice for those who sacrificed to preserve it.

Mr. BAILEY of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. DASCHLE. I yield to the gentleman from Pennsylvania.

Mr. BAILEY of Pennsylvania. Mr. Speaker, I just would like to take this opportunity to thank the gentleman in the well, the gentleman from South Dakota (Mr. DASCHLE), for requesting this special order.

I have seen him in my brief tenure down here—we came to the Congress together—work unceasingly, tirelessly, with veterans from all eras, representing all of our wars, those who had fought in all of those wars, and I have also seen him concentrate with his heart and soul on programs to help, and benefit, and deal with the problems facing and help confront and help solve the difficulties faced by Vietnam veterans.

I am convinced, I am not afraid history will address the ultimate question, it is one of pride, one of respectability, and one I suppose of historic accounting, for policy decisions that the Nation made, for the reasons why the Nation was involved and most importantly to the individuals that fought there, the reasons why they were involved. That is an ultimate question and time will tell how that will come out.

Meanwhile this country is full of compassion, caring, loving people, whose kindness and generosity and honest concern is evident here, like the gentleman from Connecticut, who really do care. I hope all veterans who have an opportunity to read the CONGRESSIONAL RECORD and witness this special order here today understand those very important opinions about the war, as ultimate as they might be, that they will be resolved, they will be addressed.

Meanwhile there is a nation that cares, that is concerned, that wants to help, and very much wants to see justice done to them, for them and with them.

Mr. COATS. Mr. Speaker, will the gentleman yield?

Mr. DASCHLE. I yield to the gentleman from Indiana.

Mr. COATS. Mr. Speaker, I also want to commend the gentleman for calling for this special order and for his work. I am a new Member here and as a member of the Veterans' Caucus, Vietnam Veterans' Caucus, followed more in the record than participation, but the gentleman's work is to be commended and his interests and efforts in behalf of our veterans.

I have taken the occasion in my district to meet with many of our Vietnam veterans in the outreach centers and in other areas and have listened to the stories and have heard of their struggles.

I was one of the fortunate ones that while serving during that period was serving in the States and not in Vietnam, and I know that difficult as it was for a young person just out of school, trying to raise a family, and give time to the service of our country, that pales by comparison with those who had to face the question of life or death, the warfare, the horrors that Vietnam was, and I think that this Nation instead of welcoming those people back who, not by their choice, but in a sense of duty to their country, did not ask where we are going and why we are going but went out of a sense of duty, instead of being welcomed back by bands and community turnouts, as all of our other veterans in many of our previous wars, came back in humiliation and shame and unable to get meaningful employment, meaningful employment for some of their injuries, whether psychological or physical, I am sorry we had to go through that period in the history of our country.

I am glad that I think we had at least turned the corner, the attitude has changed, events have changed those attitudes, and partly through the gentleman's efforts and others in that caucus, that attitude is changing and I hope this is the beginning, not the ending of the beginning of a recognition so long overdue.

□ 1610

Mr. GONZALEZ. Mr. Speaker, will the gentleman yield?

Mr. DASCHLE. I would be happy to yield to the gentleman from Texas.

Mr. GONZALEZ. First, I wish to add my voice to those who preceded me in acknowledging the great contribution of the gentleman that sponsors this special order, as well as the gentleman from Pennsylvania (Mr. BAILEY) who had a prior special order with respect to the Vietnam veterans. Every one, in fact, that has participated here I have noticed they have taken the leadership in this most important concern.

The reason I rise is not only to compliment the gentleman and to thank him, but to ask two questions. The gentleman stated that now any veteran that is otherwise eligible would be received by a Veterans Hospital. I have one in my district.

I have also had occasion to be in pretty intimate contact. My district had the first man to fall in Vietnam, as well as Korea, came from my district. We had a greater proportion of volunteers in both wars from my district than any other single district in the country; so there is quite a bit of association with the plight of the Vietnam veteran.

Just 2 weeks ago I had a veteran complain that he felt he had been exposed to agent orange, but was having difficulty in being recognized for admission in that respect.

Can the gentleman tell me if there is no difficulty in effect; in other words, can a veteran really look to a VA hospital for consideration of treatment or at least examination?

Mr. DASCHLE. Well, I might tell the gentleman that right now the law has not yet been implemented. It was signed on the 3d of November. It will probably take about 6 weeks or perhaps as much as 2 months for the full implementation and then we, of course, have to be vigilant. I intend to pursue some vigilance on this. I want to make sure that the bill is being implemented to its complete intent. That will be up to us to insure that it gets done; but the law will now stipulate for the first time that they will be provided service-connected disability

treatment on a priority basis within a hospital. This is, of course, quite a turnabout from what it was in the past. They will be given a presumption of benefits here, just like in many cases we have so many other presumptive disabilities; so it is a major change, but we will have to wait as much as 2 months before the implementation can begin.

Mr. GONZALEZ. The second question begins with this. I notice that in the formulation, and I do not know that it is so specific at this point, but I thought it had been; in the administration's request for the second budgetary round, it reflects some cutbacks in the VA hospitals, which I think would impact on the ability to serve the victims of agent orange.

Can the gentleman explain, if he has that knowledge, what it is we will be confronting pretty soon with respect to the second budget, so that we can use this forum now to alert our Members to the need to stand fast.

Mr. DASCHLE. I appreciate the gentleman raising the issue. It is a major concern, because I think it will have a dramatic impact on the ability of the Veterans' Administration to provide these benefits.

The administration has suggested and proposed that $450 million in additional cuts be made within the Veterans' Administration. I do not know where those cuts are going to be made. They have indicated specifically where they will be made.

I think that it would be a real detriment.

Right along with that, in line with that, they have recommended that we begin contracting out many of the services within the Administration. That, too, is a major concern, because there is no way one can continue the service and the continuity of benefits that we have continued to depend upon within the Veterans' Administration, so both of those concerns, I think, will be met in the committee and certainly by a lot of Members in the House.

Mr. GONZALEZ. I thank the gentleman very much.

Mr. PANETTA. Mr. Speaker, will the gentleman yield?

Mr. DASCHLE. I yield to the gentleman from California.

Mr. PANETTA. I thank the gentleman for yielding.

As vice chairman of the Vietnam-Era Caucus here in the Congress, I want to commend the gentleman for his leadership in that caucus.

It is said that the true strength and compassion of a nation can best be measured by how that nation treats its children, its elderly, and its veterans.

On this Veterans Day of 1981, America must ask itself if it has abided by its commitment to those who have served and sacrificed for their nation, especially the more than 9 million veterans of our most recent conflict in Vietnam.

For many of our veterans from past conflicts, victory in battle has been rewarded by the just recognition and benefits of a grateful nation. Although these veterans must often still fight for full compensation in health care and retirement benefits, they enjoy the deep appreciation of their country for a job well done.

For the Vietnam veteran, the tragedy of war and sacrifice continues. It is a sad irony that the soldiers who returned from this tragic and unpopular war, having risked life, limb, and in some cases sanity, were hailed neither as patriots nor as heroes. In a collective expression of shame and embarrassment over a costly and futile war, this Nation closed its eyes to its returning fighting men and women, preferring to keep them out of sight and out of mind.

It has been over 6 years since our Vietnam involvement came to an end, but the war still goes on for its veterans. Almost half a million are unemployed; another 300,000 suffer from psychological effects of one kind or another; half a million are in criminal custody; and some 100,000 have committed suicide.

Only this past summer, a number of veterans felt compelled to turn to a hunger strike which lasted several weeks in order to draw attention to the inadequacy of their treatment by the Veterans' Administration.

Because of veterans like these, because of veterans organizations both new and old, because of the Vietnam-era Veterans in Congress, there is a growing awareness in this country of the plight of these dedicated Americans. In this session of Congress alone, steps have been taken to continue funding for counseling centers, to make veterans suffering from agent orange-related health problems eligible for VA health benefits, to provide for a 2-year extension of GI bill benefits, to authorize funding for veterans who own or are beginning a small business, and to provide an 11-percent benefit increase for veterans with service-connected disabilities.

There is obviously more that needs to be done. As an example, as vice chairman of the Vietnam-era Veterans in Congress, I have introduced legislation to establish patient ombudsmen at all VA medical facilities to improve essential services.

But a thousand new laws will never be worth very much unless there is a public consensus that these veterans have indeed earned the commitment of this Nation. That consensus—that change in public attitude—is essential not just for the veteran of today or yesterday but for the veteran of tomorrow as well.

We spend a great deal of time these days debating how the military strength of America can best be served by the newest in expensive war technology and equipment. But frankly, the finest in MX missiles or B-1 bombers is not worth very much if this Nation does not have dedicated and qualified men and women willing to serve their country.

The investment we make in recognizing and living up to our commitment to our veterans is an investment not only in the simple human justice of rewarding a sacrifice rendered but also in the arsenal of democracy that is essential to preserving mankind itself. The very strength and compassion of our Nation and our world is at stake. The judgment of future generations must be that the America of the 1980's served its veterans well. Let us as Americans in 1981 rededicate ourselves to that goal on this Veterans Day.

Mr. DASCHLE. Well, I thank the gentleman very much. His eloquence is only exceeded by the rationality of his argument.

There is absolutely no question that we can pass billions of dollars in additional defense spending and without question it is worthless unless we have good people that will help us implement that policy.

I want to commend the gentleman for the tremendous leadership he has shown, without which Vietnam veterans would have been far worse off and without which I doubt very much that we would have had the kind of accomplishment this year that we can look back to with some pride.

I thank the gentleman very much.

Mr. SMITH of New Jersey. Mr. Speaker, will the gentleman yield?

Mr. DASCHLE. Yes, I would be happy to yield to the gentleman from New Jersey.

Mr. SMITH of New Jersey. Mr. Speaker, I thank the gentleman for yielding.

I would like to begin by commending the gentleman for his outstanding leadership on behalf of Vietnam veterans. We both serve on the Veterans' Affairs Committee. I have seen time and time again where the gentleman has stood up and pushed the cause of the Vietnam veteran. I just would like to commend the gentleman for that, as well as for this special order.

Mr. Speaker, all of us who live in freedom in this great land are indebted to those Americans who served in the defense of peace and freedom for this Nation and for the world.

This year marks the fourth anniversary of the return of Veterans Day to the armistice date of our First World War, and is an occasion to pay tribute to the 1,081,000 Americans who have died in the defense of their country in all American wars since 1776, and to the more than 30 million living former servicemen who served during both war and peace.

While I believe that all of our Nation's veterans are equally deserving of our gratitude, I am pleased to join today with the Vietnam Veterans in Congress Caucus to honor the 9 million men and women who served this country during the Vietnam war.

Some 2½ million men passed through the crucible of Vietnam. Over 57,000 of them did not make it back. As many as one-fifth, or 500,000 of those who served in Vietnam may suffer from the psychological effects of posttraumatic delayed stress syndrome. Countless others were exposed to the hazards and uncertainty of agent orange and other toxic chemicals.

As a member of the Veterans' Affairs Committee, I am pleased and proud that the 97th Congress has responded favorably to some of these concerns, and passed legislation to help those veterans who are still having readjustment problems. On Tuesday, November 3, President Reagan signed into law the Veterans' Health Care, Training and Small Business Loan Act of 1981. This important legislation establishes eligibility for medical, hospital, or nursing home care for Vietnam veterans who were exposed to toxic herbicides or defoliants. This is intended as an interim measure while the full investigation of the effects of agent orange is going forward.

In addition, this bill extends Operation Outreach, the readjustment counseling program. This has been one of the best and most cost-effective programs ever and helps Vietnam-era vets readjust to civilian life. This legislation provides funding for 42 additional vet centers to be established nationwide, bringing the total to 133 facilities. These centers provide first-rate psychological counseling to veterans who did not receive a heroes welcome when they returned home—but were often maligned or forgotten. I am especially proud that one of these new vet centers will be located in my congressional district, in Trenton, N.J.

Under this recently passed legislation, educational, and vocational training programs for veterans will be extended. Another provision of the bill is a special small business loan program for disabled and Vietnam-era veterans.

Mr. Speaker, on April 26, we commemorated Vietnam Veterans Remembrance Day. July 18 was POW-MIA Memorial Day—a day on which we recalled and honored those of our servicemen who suffered the anguish, heartbreak, and cruelty of captivity. We also remembered those who are missing—of whom we know little or nothing.

More than 2,500 servicemen are not accounted for from the Vietnam conflict. For the wives, families, and friends of these men, this situation is a continuing nightmare.

Since 1973, there have been over 300 separate reports and sightings of American POW's and MIA's. Our Nation must use every means available—and not leave a stone unturned—to return the dead and repatriate the living.

Several months ago, the Vietnamese Government released the bodies of Navy Lts. Ronald Dodge and Steve Musselman, and Air Force Capt. Richard Van Dyke.

This action followed repeated denials by Vietnamese officials that these men were ever POW's. Despite the overwhelming evidence that these men had been taken alive, the Vietnamese Government denied that they ever heard of them until they sent home their remains.

Since 1973, the Vietnamese Government has desired American foreign aid to rebuild its war-ravaged land. The terms of the 1973 Paris peace accord, however, stipulates that any assistance hinges on the return of all POW's and MIA's. The Vietnamese and Laotion authorities owe us a full accounting, including all the records they have on these men. I urge all of my colleagues to join me in pressing for a full accounting—let us not forget this matter until all the facts are in and all of these men are accounted for.

I would like to commend the Vietnam Veterans in Congress Caucus for taking this occasion to honor our Vietnam veterans. Those who have given their lives for peace and freedom, those who suffered disabling war injuries, and those who survived the ordeal of combat are all deserving of the highest tribute from their fellow Americans. Without the sacrifices that have been made by the men and women who have served in our Nation's armed services, we today would not be living in the freest and strongest country on the face of the Earth.

□ 1620

Mr. DASCHLE. I thank the gentleman from New Jersey. He has demonstrated throughout this year to be one of the most effective new members on the Veterans' Committee. It has been a tremendous honor for me to work with him on these issues. I appreciate his contribution this afternoon.

Mr. WILLIAMS of Montana. Mr. Speaker, will the gentleman yield?

Mr. DASCHLE. I would be happy to yield to the gentleman from Montana.

Mr. WILLIAMS of Montana. I thank the gentleman for his leadership on behalf of veterans, and most particularly on behalf of Vietnam veterans.

Mr. Speaker, yesterday morning I was back home in Helena, Mont., and many of my veteran friends, most particularly Vietnam veteran friends, and I sat down for breakfast together. This morning's newspapers in Montana carry a short story about that breakfast, which I will submit for the RECORD. However, I would like to read to the gentleman and the House from the first few paragraphs of that story.

The heavyset Vietnam veteran sobbed uncontrollably as his psychiatrist explained that the veteran was being harassed by bureaucrats and was on the "verge of self destructing" because of psychological problems.

Tears streaking his face, the veteran got up and pushed his way from the room where he and other former servicemen explained their problems Wednesday—Veterans Day—to Congressman Pat Williams.

After the emotionally wrought veteran left, Marciana Garay of Helena, the wife of a Vietnam veteran, jumped to her feet and turned to face Williams.

"We go through this on a day-to-day basis and you can't imagine how hurt we get to see this happen to our husbands," she said, her voice shaking.

The veterans themselves told Williams that many of them suffer from psychological problems brought on by the Vietnam War and that they haven't gotten adequate help from the Veterans Administration. Some said they have turned to drugs and alcohol; others said they have come close to killing themselves and members of their families.

The full article follows:

[From the Missoulian, Nov. 12, 1981]

VIETNAM VETS TELL WILLIAMS OF VA'S ILLS

(By Steve Shirley)

HELENA.—The heavyset Vietnam veteran sobbed uncontrollably as his psychiatrist explained that the veteran was being harassed by bureaucrats and was on the "verge of self destructing" because of psychological problems.

Tears streaking his face, the veteran got up and pushed his way from the room where he and other former servicemen explained their problems Wednesday—Veterans Day—to Congressman Pat Williams.

After the emotionally wrought veteran left, Marciana Garay of Helena, the wife of a Vietnam veteran, jumped to her feet and turned to face Williams.

"We go through this on a day-to-day basis and you can't imagine how hurt we get to see this happen to our husbands," she said, her voice shaking.

The veterans themselves told Williams that many of them suffer from psychological problems brought on by the Vietnam War and that they haven't gotten adequate help from the Veterans Administration. Some said they have turned to drugs and alcohol; others said they have come close to killing themselves and members of their families.

Several also complained that the VA is doing a poor job of examining veterans exposed to Agent Orange, the toxic chemical that was used to defoliate Vietnam's jungles.

"Guys shouldn't have to blow their brains out to have people recognize, yes, he's got a problem," said veteran Tim McBride.

"You guys in the government have got to get your shit together," said Mike Smith of St. Marys. "What do you want—us to get down on our hands and knees to beg? We just want what is ours, what we deserve."

Rep. Williams, obviously moved by the litany of complaints, prompted loud applause when he promised to bring the U.S.

House Veterans Affairs Committee to Montana to hear the veterans.

Williams said Congress has taken some steps in recent weeks to help veterans, but added that it hasn't done all that it can as fast as it can.

"A balanced life is more important than a balanced budget," he added.

Meanwhile, Frank Caldwell, director of the Veterans Administration Center at Fort Harrison, said he wasn't aware of some of the problems mentioned, and he promised to look into them.

Most of the talking at the meeting was done by veterans, their friends and families.

Max Weiss, a paralegal who helps student-veterans at the University of Montana, said one of his clients was wounded 11 times in the Vietnam War and is severely handicapped. To get help from the VA, Weiss said, the wounded veteran has had to produce "upwards of 4,000 pages of documentation of his claims."

Weiss also indicated that Montana veterans are collecting evidence to document malfeasance by VA officials. "Our intention is to launch a massive effort and sue them personally," he said.

Phillip Burgess, president of Vietnam Veterans of Montana, said some veterans feel VA doctors and nurses aren't responding as they should. "They feel they're not getting individual attention to individual complaints," he said.

Burgess also accused VA officials of discouraging some veterans from coming in for help.

Dr. Brian Davis, a Helena psychiatrist, said veterans make progress through therapy and then lose ground when they encounter bureaucratic hassles. Ted Koneski, a Helena veteran suffering from post-traumatic stress, said 60,000 to 100,000 veterans have committed suicide since the war.

"I wonder how many of those suicides were precipitated by a form letter," Davis said.

One veteran said most Americans don't understand the intensity of the psychological problems, and warned that some Vietnam vets are dangerous if not helped.

"It wouldn't bother me at all to take this knife and cut this guy's guts open," he said, motioning to the man sitting across the table. The veteran added that he can control his psychological problems, but others cannot.

"I don't want to hurt anybody. I want to get along," he said.

Mr. WILLIAMS of Montana. Mr. Daschle, I do not know what it was about the war in Vietnam that made it so inevitable that many of those who fought in that war and are now home carrying with them scars apparently unlike veterans of any other war have had to carry. But I do know from visiting with the gentleman, the other Vietnam veterans who serve here in the Congress, Vietnam veterans who are my constituents, that this Nation, more than just this body, this U.S. House of Representatives, has to pull together to do what they can to assist their brothers and sisters and neighbors who are Vietnam veterans, and who live with terror and quiet desperation seemingly every hour of the day.

I promised these veterans that I would again bring their message back to Congress, that I would do what I could do to convince the Members of this House and the administration that in this instance a balanced life is more important than a balanced budget, and that we must expand our efforts to help these men and to help their families.

I say to the gentleman, without asking for a commitment at this moment, that I also told these veterans, and it is reported in this article, that I would do what I could to bring an official meeting of the Veterans' Affairs Committee of the House to Montana, perhaps next spring, where hopefully the gentleman and others could listen firsthand to what I have tried to bring you today secondhand.

I thank the gentleman for the time.

Mr. DASCHLE. I thank the gentleman from Montana for his typically very eloquent address.

Mr. Speaker, I cannot speak for the Veterans' Committee. I can speak as a member of the committee in saying that, No. 1, from that position I would be more than interested in pursuing a trip to Montana to hear these people personally, and as chairman of the Vietnam Veterans in Congress, I can assure you that that group in particular would be represented at such a meeting, at such a time as we could mutually schedule.

I think that if there is a message that we could finally take back to some of those veterans, it would be that for once we are hearing them; we are hearing them in a way that no one heard them before, and that is going to make a difference in the short months ahead. I think they are going to hear a new voice when it comes to the realization that some of the issues that they have had to contend with for so long are now finally being dealt with. And it certainly is to our credit that the gentleman from Montana can bring forth the kind of sentiment that is being expressed in Montana, which in chorus with the rest of the country, calls out for this Congress to act, and I appreciate that very much.

● Mr. ROE. Mr. Speaker, Veterans Day is a time of remembrance of those who served their country and who have given their lives in the defense of this great Nation. The theme of this year's observance was "A Most Grateful Nation Remembers." I believe that to be a most appropriate expression of our thankfulness to the millions of Americans who have fallen on battlefields both here and abroad over the past 205 years.

With one unique exception, from the time of Bunker Hill, Americans have always given full support to our military forces in battle. That exception of course was the Vietnam war. Political dissent in the United States concerning that conflict reached unprecedented levels that resulted in some of the most violent public demonstrations in the history of our Nation.

While the battles in the rice paddies of that faraway land have long since ended, there is still much concern being expressed over our involvement in that war.

I say it is time to end our political dispute over the comparative values of our involvement there and to recognize one common fact: Some 214,000 American soldiers were either killed or wounded in Vietnam.

That total represents 58,000 more dead and wounded than the United States suffered in the Korean war. Yet the Korean veteran, as well as his counterparts from both our World Wars are held in the highest esteem.

It is shameful to say that the same has not been true for the Vietnam vet. While his mind too was tortured by war and his blood flowed, he did not come home to marching bands and flying flags.

Those who escaped injury in Vietnam, came home to face unique and difficult circumstances. As many as 500,000 of the Americans who served in Vietnam still suffer from the psychological effects of posttraumatic delayed stress syndrome.

Others suffered from previously unknown disabilities and diseases incurred by exposure to the chemical herbicide known as agent orange and other toxic chemicals.

In addition, the unemployment rate for the Vietnam veteran is still at a record 500,000 persons.

I am most pleased to note that this legislative body has approved a bill I sponsored to continue Federal aid to those veterans still suffering from readjustment problems. President Reagan signed that measure into law earlier this week.

Plans are currently underway to construct a monument to the Vietnam veteran on the grassy mall area between the Capitol Building and the Lincoln Memorial.

It is a tribute that is long overdue. I hope it will serve as a focal point to remind all Americans of the bravery on the battlefield and at home of the Vietnam veteran.●

● Mr. FORD of Michigan. Mr. Speaker, Wednesday, the House was not in session in order to commemorate Veterans Day. The United States has a historic commitment to honor those who have served in our Armed Forces. Today there are over 30 million living American veterans who have served our country from the Spanish-American War to date.

We are just beginning to pay the debt we owe to our recent Vietnam veterans. At the same time, we owe a continuing debt of gratitude to our veterans of other eras. Each and every one of these individuals has endured hardship and sacrifice to safeguard our freedom and preserve the peace.

Veterans Day is one way Americans can demonstrate their appreciation to this outstanding group of men and women. They truly deserve this special day of recognition.●

● Mrs. HECKLER. Mr. Speaker, Veterans Day 1981 is a special and historic Veterans Day. For reasons I shall discuss. This particular day stands out in its significance from all Veterans Days since the Vietnam war began in 1964.

It is on this day that the Vietnam veteran can be considered as finally coming into his own. He has become recognized as a true American veteran, both by his veteran peers and the American people.

As I shall point out, no longer is the Vietnam veteran considered a second class citizen and as less than a full veteran. No longer is the Vietnam veteran considered as the reason the United States did not successfully conclude the Vietnam war. America, at long last, has begun to separate the soldier from the war. It has begun to respect, honor, and appreciate the saçrifice and the faithful performance of duty of the Vietnam veteran.

Last night, Mr. Speaker, the Public Broadcasting System presented 2 hours of special programing about veterans of the Vietnam war, and about the little-known and special difficulties their wives and loved ones have experienced in adjusting to their husband's readjustment difficulties. I regard this special program, produced originally by WGBH, channel 2, in my State, as programing of exceptional quality; it is programing which contributes enormously to the public debate over Vietnam and its consequences. The documentary on Vietnam wives, while produced elsewhere, was especially informative and poignant.

The broadcast of this special programing is but the latest event in a series of events and developments during the past year that have led to changing views, attitudes and perceptions regarding the Vietnam veteran, for whom I long have had special concern and commitment. The events which most recently have led us to rethink and reconsider our attitudes about the Vietnam veteran began early this year, with the release of the American hostages by Iran. The tumultuous welcome given to these Americans, including a tickertape parade in New York City, shocked and stunned Vietnam veterans. Vietnam veterans did not particularly begrudge or demean the suffering of the hostages and their great welcome, but compared it to their own bleak homecoming. Vietnam veterans went to Vietnam and came home alone at best to an idling taxicab outside the airport terminal. There simply were not thank yous, no concern, precious little appreciation.

Vietnam veterans came forward to protest, and to force Americans to rethink their priorities and values. In this context, the recency of the failed rescue mission in Iran served as a reminder to Americans that military service is indeed a life and death business.

Simultaneously, the highly successful but spanking new Operation Outreach readjustment counseling program for Vietnam veterans was placed squarely under the budget ax by the Office of Management and Budget. Vietnam veterans were absolutely dejected. The mail I received on this matter from throughout the country was unprecedented for a Vietnam veteran issue. Vietnam veterans literally were coming out of the woodwork and their countrymen were taking notice. Less than a year old, Operation Outreach was working wonders. Vietnam veterans for the first time were talking about their pent-up experiences, and doing this with peers who had the same experiences and who were coping successfully. Vietnam veterans agree that they cannot get their war experience behind them until they are able to talk about it. For the first time Operation Outreach made this possible. But because of budget considerations, Vietnam veterans were on the verge of being dealt a severe blow. I spoke personally about this with President Reagan. He personally looked into the program. In a phone call to me in my home in Wellesley, Mass., President Reagan told me his review of Operation Outreach found it to be of such vital consequence to our Vietnam veterans that he would continue it. Congress now has authorized Operation Outreach for an additional 3 years.

Retaining Operation Outreach, so important to Vietnam veterans, was the first real victory for Vietnam veterans in their many years of frustrating efforts to obtain the readjustment assistance they so sorely have needed. Academy award winning films such as "The Deer Hunter," and "Coming Home," at a minimum contributed to the dialog, but were not singularly breakthrough events. The victory in retaining and expanding Operation Outreach was the great breakthrough. It was the singular great event.

The results of a congressionally mandated Louis Harris survey of public attitudes toward Vietnam veterans was completed and released approximately during this time. A wealth of information had been garnered, but two striking findings emerged. First, two thirds of the American public said they felt the American Government should do more for the Vietnam veteran. This revealed an important development: For the first time the Vietnam veteran was sympathetically on the minds of the American people who, as a priority public policy matter, said they specifically wanted a portion of their tax dollars to be invested in assisting the Vietnam veteran to readjust to civilian life. Second, among Vietnam veterans themselves, 90 percent said they were glad they served, and the majority said they would do it again if needed. That sentiment is summed up in one word: "patriotism." These veterans had acted out of the same motive as had previous veterans.

Vietnam veterans themselves during the past 2 years have become more active and involved in the political process. For the longest time with only a few exceptions, the Vietnam veteran had remained silent and sometimes brooding about his plight. But Vietnam veterans now have become involved in numbers enough and on a sustained enough basis to have produced an impact on public policy, nationally and in their respective States. Their involvement has generated new interest in the Vietnam veterans and created an air of activity, expectation, action and initiative. As a result Congress this year, acting on the recommendation of the Veterans' Committee on which I serve, has passed legislation that I and a handful of my colleagues for years have been advocating. We have had the support of the Vietnam veterans in Congress. In addition to saving and extending Operation Outreach, we have legislated for research into exposure to agent orange and other herbicides used in Vietnam. We have authorized VA treatment of agent orange and herbicide poisoning victims. We created in the VA a small business loan program to assist these young veterans in establishing business enterprise. We extended the on-the-job-training program to help veterans cope with economic conditions we are working to correct. There are many more provisions. They have been passed because of the work and stature of such members of the Veterans' Committee as Messrs. MONTGOMERY, HAMMERSCHMIDT, EDWARDS, MOTTL, EDGAR, DASCHLE, and Vietnam veterans in Congress Messrs. BONIOR and PANETTA.

This Veterans Day also marks a time of more active involvement and openness toward the Vietnam veteran by the traditional veterans' organizations, such as the Disabled American Veterans, VFW, American Legion. The DAV long has had an outreach program similar to that developed by the VA and is the distinctive leader in this effort. In my own State, such traditional organizations have joined with the Massachusetts Vietnam-Era Veterans Association (VEVA) to obtain office space in the statehouse, as the traditional groups always have had. The general court is moving toward establishing an agent orange Commission. These kinds of actions reflect a recognition and elevation of status for

VEVA and all of Massachusetts' 250,000 Vietnam era veterans. Jim Fitzpatrick has done an outstanding job in leading VEVA. Much of the impetus for recognizing the problems and needs of Vietnam veterans in Massachusetts derives from the tragic suicide of a VEVA founder, Brad Burns, who last December 14 shocked and deeply saddened us all. There have been many Brad Burns throughout the Nation, and I grieve deeply that we could not have helped them more when they needed our help.

But, again, without precedent, Congress declared a National Vietnam Veterans Day, April 26. In the 96th Congress, I became the first ever to introduce such legislation, however not to observe such a day on a one time only basis, but annually. I shall continue to pursue this goal.

But we have not yet arrived. We still need to pursue the serious health questions raised by agent orange. The congressional mandated study of Vietnam veterans by the Center For Policy Research at the City University of New York has documented the difficulties Vietnam veterans experience with a new disorder, delayed stress syndrome, which produces what was once known as combat fatigue long after the experience of war rather than simultaneously or immediately afterward, as in the instances of previous wars. We still need employment programs for the youngest veterans ever to fight any of our wars, veterans who had not begun careers and had no jobs to which they could return. Half a million Vietnam veterans remain chronically unemployed.

But the Vietnam veteran finally has become a veteran. He is becoming respected and appreciated both by his veteran peers and the American people. As I have noted before, we are all Vietnam veterans. We all experienced that time, and now we all want to put the war behind us and bind and heal the wounds.

Dr. Arthur Eggendorf of the Center For Policy Research has said that Americans are now separating the Vietnam veteran from the Vietnam war, and that the Vietnam war, ultimately, was a war we as a people chose to lose. If so, and it appears we are making this separation, it is time to get to know and help each other again.●

● Mrs. CHISHOLM. Mr. Speaker, yesterday this country, and her people, honored, in ceremonies around the Nation, those men and women who served, and in many cases died, as members of the Armed Forces. These commemorative activities reminded us, once again, of the sacrifices that were made by those Americans we now call veterans. These ceremonies also served, unfortunately, to highlight the fact that the Vietnam-era veteran still is not accorded the same respect and honor given to other veterans.

In the years since the end of America's involvement in Vietnam we have seen that, although the Vietnam veteran may have come home, he is yet to be welcomed home. For example, we are told in a minority report by the Vietnam Veterans of America, 8.6 percent of the Vietnam era veterans were unemployed as of the third quarter of 1981. These statistics indicate that 500,000 young men and women, are not in a financial position to support their families or themselves.

When we look at the minority Vietnam veteran the statistics are even more disheartening. We find that, although only 11 percent of the American population is black, 22 percent of all combat troops in Vietnam were black. Yet when these veterans applied for jobs after they were discharged, they found that they were prevented from reaping the benefits of service and sacrifice normally accorded to veterans. We also learn that of all the bad discharges given, during the Vietnam war, 650,000 were given to black service members. Needless to say these discharges restrict and inhibit employment opportunities for many young men, and women, who remain on the bottom rung of the social ladder.

As we consider the aforementioned information, we can see that the treatment afforded minority Vietnam veterans has had tragic consequences. At the present time between 25 and 33 percent of the entire prison population, are black Vietnam veterans. The unemployment picture, which is heightened by the bad discharges, could be a leading cause of black Vietnam veterans involvement with the criminal justice system. Recent revelations about the effects of agent orange and the lingering psychological problems of adjustment further complicate the plight of the Vietnam veterans.

What does this situation suggest as we continue to formulate ideas for assisting Vietnam veterans? In short we must, regardless of any policy formulation, in this area, develop holistic approaches to the problems of the Vietnam veteran. We must be concerned about the emotional, psychological, educational, familial security, and well-being of these veterans.

In a very short time we will unveil a memorial to the Vietnam veterans, here in Washington, D.C. This memorial will bear the names of all of the services members who gave their lives for America. This memorial is long over due. We can, however, take additional steps to aid this memorial. We can finally welcome home the Vietnam veterans and let them know that they did not serve, and sacrifice so much, in vain.●

● Mr. MONTGOMERY. Mr. Speaker, it is my distinct honor to join my colleagues on the House floor today in proud recognition of the sacrifices made by the Vietnam veteran as well as the extraordinary blend of courage, patriotism, and fortitude that misunderstood war demanded of him.

Over the last decade, the Congress has made special efforts to address these veterans' particular concerns and difficulties and has approved a large number of programs and benefits aimed at alleviating them.

The psychological readjustment counseling program is one such program established to aid Vietnam veterans in their adjustment to civilian life, and is directed at that small but significant element suffering psychological difficulties. Established pursuant to Public Law 96-22, it has been very successful and has elicited great support from the Congress, veterans, and many community organizations. A 3-year extension of this program was recently authorized in Public Law 97-72.

The Outreach program, however, is only one of many beneficial programs designed to assist this deserving group. Further examples of progress made in providing Vietnam-era veterans with a proper level of benefits and services are as follows:

First. Dramatic improvements in VA hospital staffing, facilities, and services. Since 1970, six new VA hospitals have been built; the staff-patient ratio has been increased from 157 FTEE's to 100 patients in 1974 to 200 FTEE's to 100 patients. The health care staff has been increased by 50,000 since 1970. The number of outpatient clinics has been increased from 209 to 226 in the last 5 years. Vietnam-era veterans accounted for 13.9 percent of all patients in VA hospitals on the 1979 census day—September 16. They accounted for 23.2 percent of psychiatric and 20 percent of psychotic patients, and 8.1 percent of general medical and surgical patients.

There were 3.6 million total outpatient visits by Vietnam-era veterans during fiscal year 1979. This represented 21 percent of all outpatient visits during that year.

Second. There were 663,000 active compensation and pension cases concerning Vietnam-era veterans as of September 1980.

Third. Through September 1980, more than 2,167,000 guaranteed or insured loans had been made to Vietnam-era veterans and service personnel. The amount of these loans is in excess of $63 billion. Over 20,000 direct loans, amounting to almost $370 million, have been made to qualifying veterans and service personnel of the Vietnam-era.

Fourth. Through the month of September 1980, application had been received from 6,625,000 Vietnam-era veterans and service personnel for GI bill education and training assistance. Of

these, 6,284,000 or 70 percent of the total Vietnam-era veteran population had entered training, compared with a 50.5 percent and 43.4 percent participation rate for World War II and Korean conflict veterans, respectively.

Fifth. As of September 30, 1980, a total of 117,500 service-connected disabled Vietnam-era veterans had entered vocational rehabilitation training.

Sixth. Unemployment rates not seasonally adjusted for Vietnam-era veterans reached a maximum of 11 percent in February 1975. The August 1981 rate was 5.1 percent.

Seventh. Vietnam veterans who have not completed the eighth grade may receive educational assistance allowance without charge against their basic entitlement.

Eighth. Vietnam veterans training at educational institutions on a half-time or more basis who need tutorial assistance may qualify for tutorial payments not to exceed $76 a month for a maximum amount of $911 with no charge against basic entitlement.

Ninth. Vietnam veterans enrolled as full-time students may receive additional educational allowances under VA's work-study program. A student who agrees to work 250 hours receives $837.50.

Tenth. Certain Vietnam veterans whose 10-year delimiting period has expired are eligible to borrow up to $2,500 per academic year under VA's education loan program.

Eleventh. To date, approximately 62,000 Vietnam veterans have received medical screening and counseling in VA medical facilities for physical conditions suspected to be attributed to exposure to the herbicide agent orange during Vietnam service. The results of these examinations are made part of the veteran's permanent record. The information is also used in conjunction with VA's on-going epidemiological study mandated by the Congress in Public Law 96-151 designed to isolate any possible link between exposure to herbicide and long-term adverse effects within the Vietnam veteran population. A major provision of Public Law 97-72, signed into law November 3, provides certain Vietnam veterans inpatient treatment for disabilities that may have been caused by exposure to agent orange.

Passage of this law, the veterans' health care, training, and small business loan program, may prove to be the single most significant legislative step taken for Vietnam-era veterans by the Congress in recent years. In addition to the two major provisions mentioned earlier, the measure will:

First. Create a new small business loan program specifically for Vietnam veterans.

Second. Expand the current epidemiological agent orange study.

Third. Extend for 3 years the Vietnam Veterans Reappointment Authority wherein Federal departments and agencies may appoint Vietnam veterans to positions without having to compete with other nonveterans.

Fourth. Extend for 2 years the time Vietnam veterans may participate in on-the-job, apprenticeship and secondary school training programs.

Mr. Speaker, we on the House Committee on Veterans' Affairs remain committed to the assurance that Vietnam veterans are accorded the dignity they strongly deserve by continuing the most tangible form of appreciation for them and their beneficiaries.

In closing, I would like to once again express my praise for our Vietnam veterans. Based on 12 trips I personally made to Vietnam, I can say without hesitation that those young men who served in combat in Southeast Asia fought under the most difficult of circumstances, and as hard and in most cases better than their fathers and uncles who served in World War II and Korea. I have a great deal of admiration for our Vietnam veterans, and I am pleased to join with my colleagues today in paying a special tribute to them.●

● Mr. DE LA GARZA. Mr. Speaker, we are assembled today, the day after Veterans Day, to give honor to those who served and sacrificed in our behalf in Vietnam.

Veterans of Vietnam, who make up a third of all surviving war veterans, have not received the recognition they deserve, from the media, from the Government, or from the public at large. It is good to see that this situation is finally changing.

No matter whether one agreed or disagreed with our Government's involvement in Vietnam, and however much we would like to put this period of our history behind us, we have been unfair to those who sacrificed for our country by serving in Vietnam.

Close to 9 million persons served in Vietnam during the many years we were involved there. Almost 57,700 died. Countless others were injured. Many came home with permanent disabilities. Returning after a year or more in Southeast Asia, they were met by a cold and stony silence. There were no parades, no public welcome home ceremonies for those who gave up a part of their lives in service to their country. Many, in fact, were told they should feel guilty for their activities. It should have come as no surprise that many Vietnam veterans expressed resentment over the tumultuous welcome given the hostages' return from Iran earlier this year.

The media has given much attention to the problems of the Vietnam veteran, whether it be the psychologial effects of "post traumatic delayed stress syndrome," chronic unemployment, or the physical effects of exposure to agent orange and other toxic chemcials. We in Congress have only begun to address ourselves to these problems, and must continue to use our resources to help the Vietnam veterans who suffer from them.

Let us not forget, however, the millions of veterans who returned and were able to pick up their lives where they left off, for they are truly the forgotten ones. We rarely hear of the Vietnam veteran who returned home to finish school, or to a job, and maybe rejoin or start a family. They too deserve our recognition.

One year from now, the Vietnam Veterans' Memorial will be dedicated here in Washington. The names of those who died there will be carved in stone to remind us of their ultimate sacrifice for their country. The building and dedication of this memorial provide an opportune time to give due recognition, honor, and respect to all who served in Vietnam. We must not continue to ignore those who fought in Vietnam as a result of unpopular Government policy, for to do so is only to perpetuate the disservice we have done them.●

● Mr. DINGELL. Mr. Speaker, today, I join my colleagues in tribute to America's veterans. The price of freedom is high. America owes a great deal to the courageous men and women who have unselfishly served their nation for freedom and peace. From the soldiers of World War I, to those who served in Vietnam, and, most recently, those eight who gave their lives in the Great Salt Desert in Iran, history has witnessed not only the valiant deeds and bravery of servicemen and women, but the commitment of our Nation to the principles of freedom, liberty, and justice. On this day, we stand together in lasting gratitude to our veterans for their sacrifices on the battlefield and their service as guardians of peace. We are proud of them as honored veterans and citizens.●

● Mr. SAM B. HALL, JR. Mr. Speaker, our colleagues from South Dakota, TOM DASCHLE, and from California, LEON PANETTA, are to be commended for securing this special order to honor the 9 million men and women who served their country during the Vietnam war.

When in 1961 John F. Kennedy said:

> Let every nation know, whether it wish us well or ill, we shall pay any price, bear any burden, meet any hardship, support any friend, oppose any foe to assure the survival and the success of liberty.

The applause came from all Americans, from all regions of the country, and from those representing a wide range of political persuasions. His words contributed to the mood of the country and to the sense of national purpose and mission as we entered the Vietnam-era. Further, his rhetoric

reenforced a national commitment initiated by the late Harry Truman to contain communism in the world. It was this sense of purpose which American soldiers carried with them to Southeast Asia and, more specifically, to Vietnam.

Vietnam veterans performed their duty to the end, and made every sacrifice demanded of them. These were America's sons. Yet they became outcasts fighting a cause that many of their countrymen denied. They became orphans of the storm. For many the journey home seemed longer than their travels to the war, and for some it must have proved longer than they might ever have imagined.

One must go back over 100 years in U.S. history to find a similar fate greeting American soldiers. In many respects, the War Between the States was similar to the Vietnam experience. Both wars divided the country and engendered a bitterness where friends and families divided against one another. At the outset of the hostilities in 1861, Kentuckians supportive of the secessionist movement joined the fighting for a cause their State denied and, in effect, became outcasts of Kentucky unable to see their homeland or visit their firesides. This, the 1st Kentucky Brigade, became known in annals of American military history as the "Orphan Brigade."

In a very real sense, our Vietnam veterans can be considered orphans. Four times during the 20th century, large numbers of American servicemen have returned home from a war overseas. The last homecoming—the return of servicemen from Vietnam—was different from earlier wars. There were few parades, no ticker tape, no hero's welcome for the men and women who served their country during the Vietnam war. Under these circumstances, one would reasonably expect to find veterans who rejected their military service just as Americans rejected the war in which their fellow citizens served. It is of considerable significance that the greatest majority of veterans having served in Vietnam look back on their service with pride and a high sense of patriotism and commitment to country. In spite of the Nation's disillusionment with the war, in spite of the disillusionment of the Nation's political leaders, and the manner in which this disillusionment was projected as a burden for our Vietnam veterans to bear, those who served in Southeast Asia maintain a very real and lasting love of country and appreciation for the principles for which it stands.

Six years after the end of the longest and least popular foreign war in American history, we today honor those Americans who honorably served in Vietnam. The public's sense that Vietnam veterans were received at home in a manner unappreciative of the duty that they performed and in a manner not in keeping with the receptions veterans of previous wars received has grown substantially. In observing Veterans Day 1981, Americans, more than ever before, want to recognize the sacrifices made of our Vietnam veterans and to thank them for a job well done. At the conclusion of the U.S. presence in Vietnam, when thinking of the impact of the war on this country, Americans most often noted the loss of public confidence in the country's major institutions. Today, when we think of the effect of the war on American society, our prime concern is over the personal price paid by the veterans who served in that war.

In a war in which individual courage was a constant requirement and acts of heroism occurred daily, this Nation could not be too proud of the American men and women who served our Nation in Vietnam. In war they were fighters and doers who displayed amazing ingenuity. In the words of Gen. William C. Westmoreland.

> The ingenuity of the American soldier and his compassion for the Vietnamese was only exceeded by the diversity of the jobs he performed: computer expert, stevedore, bridge builder, aircraft, boat, or helicopter pilot, rifleman, artilleryman, door gunner, radiotelephone operator, bulldozer operator, and the entire range of military specialties. The soldier did his job in a foreign, tropical, hostile environment in a war that was at once the most sophisticated in history and a return to the primitive, man pitted against man in a contest where wile and stamina might determine who would prevail.

The service of American soldiers in Vietnam was both long and exemplary. To observe the history of the American soldier in Vietnam is to be impressed with the dedication, determination, and day-to-day courage that he displayed. Though it is impossible to know all of those whose acts deserve recognition, a review of the deeds of those 215 men who during the course of the war received the Nation's highest award for valor, the Medal of Honor, presents some very stirring memories. How short the memory of those who will not remember.

The Vietnam cause was a noble cause, and one for which nearly 50,000 Americans paid the ultimate sacrifice in battle. The fighting could have stopped before it began in the 1950's had the people of South Vietnam preferred to foresake freedom for communism. The fighting began because the North Vietnamese continued their aggression and because millions of South Vietnamese fought communism to their death. Since the signing of the Geneva accords in 1954, the refugees had always flowed south, not north. Today, in the absence of a free Vietnam, the refugees flow west to the U.S. mainland by the millions.

The Nation and Congress should take every opportunity to pay public tribute to those highly deserving men and women who served the United States honorably in Vietnam. The Vietnam veterans should bask in the glory of having served. We should all teach our children and grandchildren those men of Vietnam—the "Orphan Brigade" of 20th century American military history—and point to them as men on whom this country can depend in time of need.

Vietnam veterans have a unique place in our history. Their's is a story worth remembering and worth repeating. Their example must be preserved and I thank my colleagues for presenting this opportunity to Members of the House of Representatives to stand in recognition of this proud heritage that must not be forgotten.●

● Mr. DREIER. Mr. Speaker, today, I rise to pay tribute to the thousands of men and women who served with honor and dignity in this Nation's Armed Forces throughout the Vietnam war.

Mr. Speaker, this Congress has done much to provide Vietnam-era veterans with the education, health, and pension benefits they so richly deserve. Yet, much more remains to be done before these veterans are accorded the same privileges and honors as those who have served our Nation in previous conflicts.

By far, the best we can do for America's Vietnam veterans is to insure that the flag under which they served continues to fly high. We must never again enter a conflict which we do not intend to win. And above all, we must be sure to maintain as strong a defense posture as possible. If we do this, Mr. Speaker, than no nation on Earth will dare to threaten our safety and integrity and we may eventually bring an end to the bittersweet ritual of honoring wartime veterans.●

● Mr. BARNES. Mr. Speaker, I am pleased to participate today in honoring a group of courageous and patriotic Americans—the men and women who served in the Vietnam war. Adlai Stevenson defined patriotism in our times as "a patriotism which is not short, frenzied outbursts of emotions, but the tranquil, steady dedication of a lifetime." This is the patriotism which these individuals have shown, and it is the patriotism that they deserve from us as a nation. Americans have a propensity for the "short, frenzied" kind of patriotism, and a tendency as well to try to shut out the darker and less glorious chapters of our past. But the contributions and sacrifices that were made by Vietnam veterans demand from us a more honorable response. As Theodore Roosevelt said, "A man who is good enough to shed his blood for his country is good enough to be given square deal afterwards."

Today, Vietnam veterans are finally beginning to get a "square deal." The 97th Congress has enacted legislation which will extend the Vietnam veterans counseling program for 3 years; allow Vietnam veterans to qualify for treatment at VA hospitals for physical problems associated with agent orange; make qualified Vietnam-era veterans eligible for low-cost SBA loans; and extend for 2 years the GI bill's vocational and on-the-job training. But this progress can only make a dent in the sense of exclusion that many of these veterans feel and in their conviction that their country does not care. It should be the responsibility of the Federal Government to at least listen to the anger, bitterness, pride, and loss which only those who served in the Vietnam war feel and which only they fully understand.

Walt Whitman said, "The real war will never get in the books." This is as true of the Vietnam war as any other—but the real Vietnam war does live on in the men and women who served in Vietnam and who bear the scars of that conflict. To forget that is to deny these individuals the right to a fulfilling and productive life which they so richly deserve.●

● Mr. FORSYTHE. Mr. Speaker, I am pleased to have the opportunity to participate in this special order commemorating the 9 million men and women who served this country during the Vietnam conflict.

One of my primary concerns as a Member of Congress has been meeting the needs of our Nation's veterans. The men and women who have defended our Nation in the past rightfully deserve our thanks and gratitude. While I have long advocated slowing the growth of Federal spending, I have always sought to provide needed benefits to our veterans.

Many of our Vietnam-era veterans have faced special problems in the job market and in readjusting to civilian life. No other group of veterans fought a war which caused such severe domestic upheaval. In our haste to put the Vietnam conflict behind us, we have generally ignored the Vietnam-era veteran as a society. Recently, however, Congress has moved to recognize those Americans who fought so bravely in Vietnam.

Vietnam veterans received some good news for Veterans Day when President Reagan signed into law the Veterans' Health Care, Training and Small Business Loan Act of 1981 on November 3. The act makes veterans who served in Vietnam eligible for Veterans' Administration health care and the treatment of ailments linked to agent orange exposure, the toxic herbicide used to defoliate the jungles in Vietnam. It also continues the "storefront" readjustment counseling centers for Vietnam veterans.

The act will also require the VA to maintain about 10,000 more beds in its hospitals and nursing homes, and will create a special small business loan program for disabled and Vietnam-era veterans.

Mr. Speaker, I recognize the very special sacrifice of those who served in our Nation's Armed Forces during the Vietnam conflict. Individual rights and societal values are only as strong as a nation's commitment to defend them. Because of this, our Nation must never forget its appreciation of and obligation to our veterans.●

● Mr. SANTINI. Mr. Speaker, we all owe a special debt of gratitude to our veterans. Veterans Day marks a day of honor for all veterans—living and dead. It is a day on which we remember the heroic deeds performed by American men and women who fought to keep this Nation free. It is also a day on which we remember all the nonheroic deeds performed by American men and women—who did nothing so noteworthy other than simply to come when called and to do their best for their country. Whether their names make the history texts, whether we learn each and every one of them, these are the persons to whom we say thank you on Veterans Day.

This day is rightly set aside as a day of solitude and memorial. It is therefore with sadness that I look at our society today and see the tragic commercialization of this solemn occasion. Instead of the plethora of parades that used to line our streets paying tribute to our brave soldiers, we now have parades of people racing to shopping malls, stores full of sales and bargains to twist and change the meaning of this national veterans holiday and turn it into nothing more than another shopping spree.

What has happened to the American sense of solemnity? We proclaim a special day of tribute for our veterans, then tarnish the day by paying more attention to bargain-hunting than meditating on what it means to live freely, in a country unhindered by totalitarianism, or how and why we have managed to maintain this freedom for over 200 years, growing to be the most powerful nation on the face of the Earth. Our veterans have made this possible and I for one, did not spend this special day careening through shopping centers, but spent it properly, in the midst of veterans and their families saying, "Thanks for your contribution in keeping this land free."●

● Mr. DWYER. Mr. Speaker, it is an honor for me to rise today and join in honoring those Americans who served their country during wartime. Yesterday, Veterans Day, veterans across the country were remembered and honored. For one group of veterans, however, the Vietnam veterans, the events of the war they participated in and the issues surrounding that conflict remain undigested in a social and psychological sense. It is to this group of men and women that my colleagues and I would like to pay special tribute.

The Vietnam war was ended by Presidential proclamation on May 7, 1975. Because this war was a divisive and painful period for all Americans, we are tempted to put it out of our minds. But it is important that we remember—honestly and realistically. As the longest and one of the most controversial wars in the U.S. history. The Vietnam war will continue to take on new meanings as Americans periodically evaluate the war and its after effects. It is in this context that we must not only acknowledge the fact that studies reveal that close to 20 percent of Vietnam veterans—some 700,000 people are markedly impaired by the after effects; that nearly 500,000 are also unemployed; and countless others were exposed to the hazards and uncertainty of agent orange and other and other toxic chemicals, but we must also provide these men and women with an environment which will enable them to resolve these effects.

I am please that the 97th Congress has responded favorably to these concerns and the plight of the Vietnam veteran. Legislation providing additional health care benefits, to research on the effects and remedies of agent orange, to continuing the very successful readjustment counseling centers has been passed.

We must also take time to honor those who have died in this conflict. To them we offer our respect and gratitude. To the loved ones left behind, we offer our concern and understanding and our help to build lives.

To all of the million of Americans who served in Southest Asia, and to all who have suffered because of that war, we must give our solemn pledge to pursue all honorable means to establish a just and lasting peace in the world, that no future generation need suffer in this way again.

Finally, let us express our sincere thanks for the service of all Vietnam-era veterans.●

● Mr. BINGHAM. Mr. Speaker, I am pleased to join with my colleagues in paying special tribute to the millions of men and women who have unselfishly served in the Armed Forces of the United States.

Yesterday marked the fourth anniversary of the return of the observance of Veterans Day to November 11. It was a day in which this Nation participated in appropriate parades and ceremonies honoring our veterans. Whether they served in time of war or in peace, their common commitment was service to their country.

Let us remember and pay special tribute to our Vietnam veterans who made the supreme sacrifice of laying down their lives in an unpopular war.

Let us not forget those who are still unaccounted for in Southeast Asia. Let us not forget our personal responsibility to our Vietnam living veterans, many of whom have lost their limbs or carry deep psychological scars from the incomparable horrors of combat. I am proud that this Congress has demonstrated our Nation's commitment to these veterans, even in these times of austerity, by preserving many of the essential benefits and services which are rightfully theirs for having served their country. I am particularly glad that this Congress has provided medical care for veterans suffering from exposure in Vietnam to the herbicide, agent orange. We have also extended until 1984, the psychological readjustment program, and have provided an average increase of 11.2 percent in the veterans' disability, dependency, and indemnity compensation program, to name a few. I would like, however, to see this Congress pass legislation to grant our veterans judicial review of their claims, a right which is guaranteed by the Constitution. As a sponsor of such legislation, I feel strongly that veterans' benefits are legal entitlements and denial of such entitlements should no longer be exempted from judicial scrutiny.

I am disappointed in the administration's proposal calling for an across-the-board cut in veterans' programs. We must remain aware of the great debt of gratitude we owe to the men and women who have served their country. Accordingly, I ask my colleagues to join with me in doing all we can to maintain and improve the various services available to our veterans.●

NINETIETH BIRTHDAY TRIBUTES TO W. AVERELL HARRIMAN

The SPEAKER pro tempore (Mr. GONZALEZ). Under a previous order of the House, the gentleman from New York (Mr. BINGHAM) is recognized for 60 minutes.

GENERAL LEAVE

Mr. BINGHAM. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the subject matter of the special order.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BINGHAM. Mr. Speaker, this coming Sunday, November 15, 1981, a noted world citizen and universally admired American, W. Averell Harriman, will celebrate the 90th anniversary of his birth.

Since the House will not be in session on Sunday and will have an abbreviated session tomorrow, I thought it appropriate to take this special order today so that we might have the opportunity of joining in the celebration of this memorable occasion.

Last evening, as many of you know from having been there and as others will have read in this morning's Washington Post, there was a great outpouring of affection and admiration for "the Governor." But that was a Democratic Party affair, and hence not too many of the Governor's friends on the Republican side of the aisle were there.

The dinner last night was held in what those of us on the Democratic side consider a vital cause, and it is characteristic of the Governor's devotion to his party that he should have agreed to have his birthday party a Democratic Party event. But the fact remains—and it is one of many remarkable facts about this man—that, although he is an active partisan, the admiration and affection that are felt for him throughout this country totally transcend party lines.

As the organizer of this special order, I should like to begin by briefly recounting some of the bare facts of Averell Harriman's extraordinary life. For 33 years, following his graduation from Yale College in 1913, Mr. Harriman played a major role in the world of railroads, business, and investment banking; he was, at various times, chairman of the board of the Union Pacific Railroad, chairman of the board of Merchant Shipbuilding Corp., and leading partner in Brown Brothers Harriman & Co. Having supported Al Smith and then Franklin D. Roosevelt for President, he became actively involved in Roosevelt's New Deal, holding various positions in the NRA and in the Office of Production Management, and serving first as a member and then as Chairman of the Business Advisory Council for the Department of Commerce.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. BINGHAM. I am happy to yield to my colleague, the dean of the New York delegation.

Mr. STRATTON. Mr. Speaker, I do not want to interrupt the gentleman's thought, but I want to commend him for taking this special order to pay tribute to Governor Harriman. I do not think any person in America today is perhaps more qualified to comment on the life and achievements of Averell Harriman, not only as Governor of New York State, but in his other capacities, than the gentleman from New York (Mr. BINGHAM).

I had the pleasure of serving as a city councilman and later as mayor of Schenectady when Governor Harriman was Governor of New York. I remember the gentleman from New York (Mr. BINGHAM) serving at that time as Governor Harriman's secretary, and in fact a very young assistant to the gentleman from New York (Mr. BINGHAM) was a fellow by the name of PAT MOYNIHAN, who is presently a Member of the other body. They learned a great deal of political insight and appreciation of the political structure, not only in the United States but abroad, under the leadership of Averell Harriman. He was a great Governor of New York, and he went on, of course, to serve in other capacities as well.

It is really incredible, at the age of 90, that Averell Harriman should still be concerned with the American political processes, and he and his lovely wife should be working so hard to provide financial support for the Democratic Party, to which he was converted at a relatively early age. He was originally a member of the Republican Party, but under the leadership of Franklin Roosevelt he switched to the Democratic Party. He used to say, "You have more fun if you are a Democrat."

So, I certainly want to join in paying tribute to Averell Harriman. I appreciate the gentleman from New York yielding to give me the opportunity to make these small remarks.

Mr. BINGHAM. I thank the gentleman very much for his contribution. I, too, recall very well our days in Albany together.

In March of 1941, F. D. R. sent him to Britain as the President's Special Representative; in that role he saw a great deal of Prime Minister Churchill and won his friendship and confidence. In August of the same year he headed a special mission to the Soviet Union and later served there as Ambassador from 1943 to 1946, when he was appointed Ambassador to the United Kingdom. Shortly thereafter, President Truman brought Mr. Harriman back to Washington to be Secretary of Commerce. Two years later Harriman was off to Europe again, to head the Economic Cooperation Administration, and Marshall Plan Agency in Paris. In 1951 he was the American representative on the NATO commission to study Western defense plans, and then for 2 years he served in the Truman White House as Director for Mutual Security. Returning home to New York, he was elected in 1954 to a 4-year term as Governor of New York State and was a prominent candidate for the Democratic nomination for President in 1956, enjoying the support of former President Truman. Later, under Presidents Kennedy and Johnson, Governor Harriman served as Assistant Secretary of State for Far Eastern Affairs, Under Secretary for Political Affairs, Ambassador at Large, and finally as the President's personal representative to the Vietnam peace talks in Paris. During the presidences of Richard Nixon, Gerald Ford, and Jimmy Carter, Governor Harriman was active behind the scenes and was frequently

consulted by executive branch and congressional leaders, including especially two Secretaries of State, Henry Kissinger and Cyrus Vance (who had been Harriman's deputy in the Vietnam talks in Paris). So far as I know, Governor Harriman has not been sought out by President Reagan (more is the pity), but his advice continues to be sought by the government leaders, both here and abroad.

It is a great pity that no adequate biography of Averell Harriman has yet appeared and that he himself has not chosen to write his own memoirs. But for those of my colleagues who are not familiar with it, I do most warmly recommend "Special Envoy to Churchill and Stalin 1941-46" by Harriman and Elie Abel. While covering only a portion of his life, it does describe vividly some of the most dramatic episodes of the war years, including his dealings with Churchill and Stalin.

I did not know Ambassador Harriman during those years, although, of course, I knew about him. I saw him once at the National Airport. My impression was that of a man going at high speed and under great tension, never resting. His face was green with strain and fatigue.

My first real contact with him was in the early 1950's when, as Director of Mutual Security, he was the coordinator for all the foreign aid programs, military, economic and technical, and I was Deputy (and for a while acting) Administrator of the Technical Assistance "Point Four" Administration. As a way of getting to know his associates and to learn about their activities, it was Harriman's custom to invite them to breakfast, one at a time, at this home on Foxhall Road. My principal recollection of the occasion was that it was a delicious meal, elegantly served, and that Mr. Harriman demonstrated his wide-ranging curiosity by asking a series of rapid-fire questions about our program, how we were faring on the Hill, what problems we had, et cetera, et cetera. He saw me out the door with a characteristic "Keep in touch."

During this period, I also had occasion to visit Mr. Harriman's outer office when a major speech was in preparation. I think it was one he delivered to a Democratic gathering in Texas in which he said that Senator Taft's brand of isolationism was in effect serving the interests of the Communists. That speech caused a national stir and was a kind of opening gun in Mr. Harriman's quest for the Presidency in 1952.

In any case, my recollection is that there were pages of the speech all over the outer office, on tables, chairs, desks, et cetera, waiting to be collated. Periodically, Mr. Harriman would emerge from his own office, rather frantically looking for a page that he wanted to change. He was never satisfied with speech drafts and, being a perfectionist at heart, he would continue to make changes, some of them seemingly insignificant, until the very last moment. This habit, of course, caused him and his staffers all kinds of problems when, during campaigns, he had to give several speeches in a day. Eventually, he learned to reduce the written material for each speech to a one-page press release, containing his main idea; for the balance, he would talk off the cuff; he was much more at ease winging it than he was reading from a text or a teleprompter.

In 1954, W. Averell Harriman, raised as a staunch Republican by his father, E. H. Harriman, the famous railroad magnate, won the Democratic nomination for Governor of New York, seizing that prize away from Congressman Franklin D. Roosevelt, Jr. Roosevelt was persuaded to accept the nomination for Attorney General, in order to strengthen the ticket, but in the end Roosevelt lost to Jacob Javits, and Harriman won.

I had worked with Harriman in the development of issues and policy proposals during the fall campaign, and after his victory he invited me to join him in Albany (he actually moved there and insisted that his top staff do likewise) as secretary to the Governor. In that capacity I had 4 wonderful years. Governor Harriman tackled the problems of New York State with the same vigor and enthusiasm he had devoted to international and national concerns, and he was always in search of fresh ideas, some of which he gave reality to. For example, at a time when State and local programs keyed to the needs of older people and consumers were virtually unknown, Governor Harriman say how much needed to be done in those areas and appointed special assistants to help him get the job done. Long before President Johnson used the phrase, Harriman launched a "war on poverty," thus confronting the sad reality that there were tens of thousands of people, even in the richest State of the Union, who had been left behind as the standard of living went steadily up in the postwar years. He chose his distinguished industrial commissioner, Isador Lubin, to coordinate the effort. In the field of mental health, he made a radical departure from past practice by appointing a research scientist instead of a professional administrator as commissioner and fully supported Dr. Paul Hoch's successful drive to broaden and intensify the therapy provided to the patients in State hospitals.

As always, Harriman gave himself heart and soul to the task at hand and expected the same of his subordinates. Vigorous was an adjective he constantly used to describe the kind of action he wanted.

Although he was good at delegating, he was also attentive to detail and frequently confounded his budget director and commissioners by his in-depth knowledge of the problems and his probing questions

Although both houses of the legislature were under Republican control at that time, Harriman got along well with the legislative leaders and showed himself adept at getting the bulk of his program through by way of negotiation, compromise and consensus.

Harriman was sometimes hard on his staff, but his outbursts were almost always over minor matters; if a staffer came to the Governor to report a major goof, Harriman took the news in a totally matter-of-fact way, never adding to the staffer's already acute sense of embarrassment. When he did use sharp words, it was not his way to apologize explicitly afterward; instead, he would go out of his way at the next contact to bestow a verbal pat on the back. For all that he later earned the nickname of "crocodile", he never really wanted to hurt anybody's feelings. Like Roosevelt, if he had an unpleasant message to convey, he always asked a staff member to make a call.

When he first appeared on the national stage, Averell Harriman was often described as shy, reserved and inarticulate. I found him to be none of these things. He positively loved the hurly-burly of campaigning, and, even when he was not campaigning, as he moved about the State, he would frequently stop the Governor's big car to shake hands and chat with startled passers-by.

The reporters liked him and gave him generally good coverage. I remember particularly the first legislative correspondents association dinner he had to address. The LCA dinner is a big event in Albany, involving an elaborate musical review making fun of all the State officials, followed by two or three speeches late in the evening which are expected to be hilarious. Harriman, who was not thought to be long on humor, was obviously nervous about the assignment, as were the members of his staff. We had seen other well-known figures in New York politics failing to be funny at 1 a.m. after a long evening. Harriman asked for suggestions, but he wrote the speech almost entirely himself. He had to follow a show-stopper by the then speaker of the assembly, Oswald "Ozzie" Heck. Much to the surprise of, I think everyone in the room, Harriman topped Heck. He had the reporters and the members of the legislature falling off their chairs with his barbs and his wit. It was a masterful performance.

With all these assets, with his acknowledged record of being a good Governor, with the midyear polls in 1958 showing him to be unbeatable, how could Harriman have been defeated for reelection?

In my view, he made two major mistakes. The first, for which I have to accept part of the blame, was that he gave his consent to the naming of Nelson Rockefeller as chairman of a commission established in 1956 to study the issues that would confront a possible State constitutional convention. Rockefeller had just left the Eisenhower administration and was not yet considered an active Republican Party man, having served with some distinction in the Roosevelt administration. Harriman, who shared responsibility for the commission chairman's appointment with the Republican legislative leaders, thought that Rockefeller, an old friend, would do a good, nonpartisan job. He asked my advice, and I concurred. What a mistake. Rockefeller stayed clear of the difficult issues, but held hearings all over the State, thus building himself up as an expert on State issues, and then secured the GOP nomination to run for Governor.

The other mistake Harriman made was to be insufficiently forceful at the 1958 Democratic State convention in insisting on his own choice for the Democratic nomination for Senator. Suffice it to say that he lost control of the convention on this matter, and handed Nelson Rockefeller the issue of "bossism." Rockefeller made the most of the issue and rode it to victory, in the process demonstrating what a formidable campaigner he was. Harriman's campaign, as he now admits, was lackluster.

Although hard hit by the loss, Harriman snapped back fast and soon became immersed again in Presidential politics. He campaigned hard for John F. Kennedy.

In 1961, Averell Harriman demonstrated his true dedication to his country when he accepted from Kennedy the post of Assistant Secretary of State for Far Eastern Affairs. To be sure, this was an important job, especially in view of the growing conflict in Vietnam, but a lesser man would have found it beneath his dignity to accept such a relatively lowly post when he had previously served in the Cabinet. Harriman took on the assignment with his unusual zest and soon proved his truly extraordinary talents to both Kennedy and L. B. J.

These remarks are already long enough, and I will not dwell on the many other facets of Harriman's remarkable life: his visits to the Soviet Union in the early 1920's; his championship skills at polo and a fiendish form of croquet; his railroadman's habit of being on time even when he was supposed to be late; his patronage of the arts (especially in partnership with his wonderful wife of many years, Marie Norton Harriman); his interest in parks (especially the Palisades Interstate Parks Commission); his generosity in turning over the great Harriman mansion, Arden House, to Columbia University as the headquarters of the American Assembly and for other purposes; his interest in skiing, culminating in the establishment of the Sun Valley complex and, while Governor, the Whiteface Mountain Ski Center; his childlike delight in small gifts; his loyalty to his friends and family—Peter Duchin, the noted musician, being in the latter category—and on and on.

For myself, let me just say that it has been one of the great privileges of my life to know Averell Harriman as a friend.●

● Mr. O'NEILL. Mr. Speaker, for more than half a century, America has been blessed by the extraordinary talents of Averell Harriman.

As his insights and advice continue to be priceless, his patriotism and dedication to public service inspire and enlighten us.

With gratitude and affection, Millie and I extend special good wishes to the Governor as he celebrates his 90th birthday.●

● Mr. ALEXANDER. Mr. Speaker, a great deal has been written and said about the enduring qualities of American institutions, their persistence in the face of adversity and their adaptability to the dynamic forces that have changed and are changing the world.

Yet, institutions are merely the manifestations of the ideas of the men and women who gave them birth and infuse them with life. Further, our institutions are defined for other people of the world by Americans from all walks of life by their actions and deeds but especially by a few individuals whose characters, personalities and, indeed, their very lives are accurate reflections of the ideals represented by our American institutions.

Averell Harriman is one of those rare individuals.

For more than six decades, Averell Harriman has devoted his time, energy and intelligence to the service of America. For the people he served as an elected official, he was both a leader and a reflection of their democratic aspirations. For those Presidents he advised, he has been both a source of innovation and a balance wheel for stability. For the foreign leaders with whom he has so ably and thoughtfully related, he has been both a clear channel link of communication with the United States and a resolute and courageous conveyor of American intentions. For Democrats, he has been a living nexus between the historical traditions of our Party and the challenges facing it today.

I am grateful for this opportunity to join my colleagues in paying tribute to Averell Harriman—an American who made a difference.●

● Mr. BOLAND. Mr. Speaker, on November 15, Averell Harriman will celebrate his 90th birthday. It is a celebration in which all Americans should join.

Averell Harriman has been one of the most distinguished public servants of the twentieth century. For more than half of his life, he has served the interests of his country in the pursuit of peace in a variety of important positions. In each of those positions, his efforts were characterized by an uncommon zeal, a willingness to undertake extraordinarily difficult tasks, and an independence of mind and spirit.

As a trusted adviser to five Presidents, Averell Harriman has had an opportunity to deal with some of the most challenging problems of our time. His experience as Abassador to the Soviet Union and Great Britain provided an insight into the terrible destruction brought by war; and the remainder of his public life has been devoted to the peaceful resolution of international conflicts. His administration of the Marshall plan and his negotiation of the Nuclear Test Ban Treaty are testaments to the depth of his commitment to reducing the risks of war.

Mr. Speaker, Averell Harriman's stature as a statesman is unquestioned. We are fortunate that he chose to devote his life to public service and we are especially fortunate that he is willing and able to continue to make himself available to those seeking to benefit from his wisdom and experience. Averell Harriman is a truly remarkable man and I wish him many more years of health and happiness.●

● Mr. FORD of Michigan. Mr. Speaker, I am proud to congratulate Gov. Averell Harriman on his 90th birthday. Senator Kennedy summed it up perfectly when he stated that "we couldn't have held the 20th century without him."

Often we are called upon to honor individuals who have served their country well, but I can think of no single individual who has served in so many vital capacities as Governor Harriman.

The Governor has been making and molding world history for decades. I feel certain that his work and achievements, carried on throughout the world, will be recorded carefully by the historians who will chronicle these past years. I want people across this country to know and understand the greatness of this man who I have had the privilege of knowing.

My hearty congratulations to Averell Harriman on his 90th birthday. He is an awesome gentleman who still continues to have a brilliant career in public service.●

● Mr. GUARINI. Mr. Speaker, on Sunday, November 15, Gov. W. Averell Harriman will celebrate his 90th birthday. Governor Harriman has played a central role in world events for well

over half a century. His career of banker, railroad director, nonelective Government official, Ambassador, statesman, author, and Governor has served as a model for many of this country's top business and governmental leaders.

W. Averell Harriman's world standing is so high that C. L. Sulzberger once called him the "most experienced" negotiator on Earth. President after President did not hesitate to request his involvement in the most diplomatically complex situations in the prewar, World War II, and postwar eras. He has been the envoy of Presidents, Ambassador to both Russia and Great Britain, Secretary of Commerce, and Governor of New York. His broad experience in dealing with the Soviet Union makes him one of this country's foremost experts on dealing with the Russians.

He has served this country, his State, and his party unhesitantly for all these years. At age 90, he is the eldest senior statesman in the Nation. However, even with all those years of achievements to reflect upon, Governor Harriman prefers to remain as active as possible. His voice is still one of clarity and his opinions should be reviewed in all debates of policy. We owe him a great debt for his years of unselfish service.●

● Mr. BARNES. Mr. Speaker, this Sunday, November 15, W. Averell Harriman, banker, railroad magnate, NRA Administrator, Lend-Lease Coordinator, Ambassador to Russia and to Great Britain, Secretary of Commerce, Under Secretary of State, Governor of New York, and adviser to five Presidents, will be 90 years old. As John F. Kennedy said of Harriman, except for John Quincy Adams, he held "as many important jobs as any American in our history."

Having worked with Harriman on the Foreign Affairs Task Force of the Democratic Advisory Council in the early 1970's, I have had the pleasure of observing the characteristics that have contributed to his enormously successful career: hard work, loyalty, forcefulness combined with restraint, an instinct for getting close to the source of power, and a legendary cunning. Harriman himself once said, however, that this toughness was merely put on for effect. "I'm really not all that tough," he said. "But it gets results."

There can be no question that his extraordinary negotiating skill got results, especially in dealing with the Soviet Union. Harriman was never intimidated by the Russians, or by the reactions at home to his dealings with the Kremlin. One former White House official who accompanied Harriman to Moscow said that the secret lay in his ability to keep on talking in that low monotone—"Nothing scares him," he said.

One of his greatest contributions was his negotiations of the Test Ban Treaty with the Soviet Union. Apparently, he thought so too—when a reporter once asked him whether the treaty was not worthless because of the Russians' history of breaking agreements, Harriman responded, "That is a typical question of a semi-informed person," adding, "If I offended anybody, I'm delighted."

The Test Ban Treaty discussions followed President Kennedy's speech at American University during which the President proclaimed that "If we cannot end now all our differences, at least we can help make the world safe for diversity" a speech which Khrushchev himself later told Harriman was "the greatest speech by any American President since Roosevelt." Several issues arose at the talks which demanded Harriman's hard style of negotiating. One was the inclusion of a withdrawal clause, which the Russians resisted as being implicit in all treaties, but which Harriman knew that the Senate would insist upon if China were to be included. (The result was a curious compromise phraseology granting the right to withdraw because of "extraordinary events.") Another problem arose regarding accession to the treaty, which provoked long and difficult discussions, dominated by Harriman who refused to give ground, although the British began complaining that his stubbornness might lose the whole treaty. Again, Harriman prevailed—he was "the great man of the meeting," said one of those present—and the treaty was signed.

Arthur Schlesinger, Jr., writing of the aftermath of the negotiations, in his book "A Thousand Days," described Harriman's return to Washington where his neighbors staged a welcoming celebration for him:

> Bearing torches and candles, they marched to his house on P Street, serenading him with "For He's a Jolly Good Fellow" and then one of his old campaign songs, adapted from George M. Cohan, "H-A-double-R-I-M-A-N spells Harriman." Finally Averell, tieless and in shirtsleeves, came out on his front steps and spoke a few quiet words of thanks. One girl with a very small baby in her arms said to him, "I brought my baby because what you did in Moscow will make it possible for him to look ahead to a full and happy life."

It is a privilege to honor Governor Harriman here today, and to wish him a continued full and happy life.●

● Mr. FASCELL. Mr. Speaker, I am honored to join in this tribute to William Averell Harriman, a man whose career in service to the United States exemplifies a dedication to the founding principles of this country.

How easy it would have been for a man of his status at an early age to simply be content with his lot. Rather, Averell Harriman chose to use his vast reservoir of talents in service to his Government and to an impressive list of Presidents.

Beginning in the 1930's, the presence of Averell Harriman weaves its way steadily through the patchwork of international events. Choose an important event in international affairs and the efficient, respected presence of Averell Harriman is bound to appear. Photographs are hardly needed to recall the images of Averell Harriman with Stalin, Averell Harriman with Churchill, Averell Harriman with Roosevelt, and Averell Harriman with Kennedy.

His efforts as America's point man in Britain during World War II and his mediations with Stalin and the Soviet Union at the birth of the cold war resulted in his reputation as an outspoken and insightful diplomat whose personal style radiated confidence, integrity, and vitality.

That reputation has stayed with Averell Harriman throughout his years—a man who never hesitated to go to the top.

As one who is intensely interested in international affairs and as a fellow Democrat, I am proud to honor this man on his 90th birthday for his service in international affairs, for his commitment to peace, and for his refreshing and unyielding service and loyalty to his country, his party, and his principles.●

● Mr. CORRADA. Mr. Speaker, it is a pleasure to join this tribute to a distinguished American, W. Averell Harriman, who celebrates his 90th birthday this Sunday.

As we pay honor to Averell Harriman, we pay honor to an individual who stands exceedingly tall on the American landscape of history in this century, an individual who heeded—with considerable zeal and fervor—his father's reported advice to "be something and somebody."

Arnold Toynbee wrote that civilization is a movement, not a condition, a voyage and not a harbor. This expression sums up the life of Averell Harriman.

An ambassador, statesman for peace, a former Governor, Averell Harriman has—all of his life—pursued the goals of excellence in public service, and most of all, that of peace in a troubled era.

During the critical period of World War II and the years immediately afterward, Averell Harriman, Ambassador to the Soviet Union during World War II, knew the long-range dangers of the Soviet aggression, and he has never wavered from that prescient understanding of the forces that shaped post-World War II history.

We were fortunate then, and in subsequent years equally fortunate, to have Averell Harriman at the service of his country. As we pay tribute to

him today, I wish the best for Averell and his wife, Pamela.●

● Mr. RICHMOND. Mr. Speaker, it is a privilege and a pleasure to join my colleagues today in honoring a great American, W. Averell Harriman, on the occasion of his 90th birthday.

On such an occasion it is, of course, customary to refer to a distinguished senior statesman as a great American. But, Mr. Speaker, few living Americans are more worthy of this accolade than W. Averell Harriman, whose extraordinary life and career of devoted public service have meant so much to our Nation and the world.

W. Averell Harriman has served as a close adviser to five Presidents. Among his many significant achievements in public life are service as Administrator of the NRA during the 1930's; Ambassador to Great Britain and to the Soviet Union during the war years; Secretary of Commerce in the postwar period; architect of the Marshall plan; negotiator of the Nuclear Test Ban Treaty in 1963; top negotiator at the Paris peace talks in 1968; and, "Ambassador to the World."

The post that Mr. Harriman recalls most fondly is his service as Governor of our beloved State of New York, the position he held when I worked most closely with him. I feel most enriched, in mind and spirit from having that opportunity to know and work with this unique individual.

"The Governor" inspires devotion in those around him. His integrity, diligence, and intelligence set a standard of excellence for public service

Today, Mr. Speaker, as we review the remarkable career and attainments of W. Averell Harriman, we recognize him as the living embodiment of all that we believe our Nation stands for—wisdom, compassion, commitment, and leadership.

Today we honor W. Averell Harriman, a man who has dedicated his long life to helping the poor and downtrodden in our society as well as overseas; a man engaged in a passionate, lifelong quest for world peace; a man whose tirelessness and resourcefulness have successfully met myriad challenges and, thereby, benefited so many—in short, a great American.●

● Mr. ADDABBO. Mr. Speaker, I am honored to be joining my colleagues in extending to Averell Harriman—one of this country's great treasures and a personal friend of mine—our best wishes on his approaching 90th birthday. Harriman helped to make our Nation the world leader it is today with his perseverance, humility, ingenuity, and sense of humor. He reminds me of a great composer or artist; his accomplishments, like their works of art, will never fade from the public eye.

I am humbled in the face of those accomplishments. Harriman won the esteem of every President since Calvin Coolidge, and most of the world's greatest leaders. He played an important role in decisions and negotiations on the New Deal, lend lease, the Yalta Conference, the Marshall plan, the Korean and Vietnam wars, and the Nuclear Non-Proliferation Treaty. And not least of all, he served as Governor of the great State of New York. Harriman is truly a figure whose experience spans the development of the modern world, and whose skill has taken us successfully through many highly sensitive national crises.

Lyndon Johnson once said that if the word patriotic did not exist, it would have to be invented to describe Averell Harriman. I take this opportunity to express my thanks for his devotion, and offer my best wishes for another 90 years.●

● Mr. SCHEUER. Mr. Speaker, I am delighted to join my colleagues in paying tribute to this dynamic man on his 90th birthday. It is impossible to conceive Averill Harriman of being old, young as he has always been and remains today—in heart, mind, and spirit.

I had the honor of working with Ambassador Harriman on several occasions. I was a campaign worker and speech writer when he campaigned for Governor; he honored me by giving me my first experience in public life by appointing me as chairman of the Housing Advisory Council for the New York State Commission on Human Rights during his stint as Governor; and I worked as an advance man and organizer in the Southwest in his campaign for the Presidency. In all of these experiences I developed an enormous respect and warm affection for this fine human being.

Coming from a traditional Republican background, he was first and foremost unshakeably liberal and enlightened in his views on all matters of public policy. I remember the pleasure and satisfaction he exhibited in describing how, as Secretary of Commerce in 1946-48, he insisted on desegregating restrooms and water fountains in the Nation's airports—and without relying on legislation which undoubtedly would not have been forthcoming during those years. So he did it by Executive order, with the result that at least in these small Federal enclaves the signs for separate drinking fountains and restrooms were eliminated, along with the squalid symbolism that they portrayed.

I remember how he recalled fighting for the Fair Employment Practices Act (FEPA), long before it was to be chic and acceptable to strive for human rights for all. And I remember how during his Governorship, he unhesitatingly backed me in support of a series of nondiscrimination-in-housing laws which successively covered public housing, publicly assisted private housing, and finally private housing.

And above all, I remember how he had faith and confidence in young people. I remember with admiration the start he gave in public life to such outstanding public servants as Congressman JONATHAN BINGHAM, who served as his Secretary in Albany; and Senator PAT MOYNIHAN, who worked with Congressman BINGHAM; James S. Lanigan, who subsequently defeated Carmin DeSapio and started a revolution in the New York political power structure; Lou Harris, the famed pollister who worked with him as a comparative unknown during the Presidental campaign; Blair Clark, now a distinguished writer and publisher, who served him as press secretary in charge of press and public relations during his Presidential campaign; Senator CLAIBORNE PELL, who worked valiently on his Presidential campaign; and Judge Theodore Tanenwald of the U.S. Tax Court. I remember with pride and gratitude the opportunity he gave me to taste the challenges, rewards, and occasional frustrations, of public life.

Successive generations of Americans whose lives he touched personnally benefited from his warm and compassionate spirit and his wise counsel. And our whole Nation has benefited immeasurably from half a century of uncompromising commitment to the best ideals of our founding fathers and the Judeo-Christian ethic.

Averill, we salute you with affection and respect, and wish you and Pamela many years of health and happiness together.●

● Mr. LONG of Louisiana. Mr. Speaker, I want to extend my congratulations and heartfelt best wishes to Averell Harriman on his 90th birthday.

For half a century this great American has been a catalytic and creative force in international affairs. Governor Harriman has served his country in many capacities, with flair and exemplary substance.

The Governor's historic roles—adviser to Presidents and world leaders, ambassador, Governor, a developer of the Marshall plan and the Western alliance, an expert on negotiating with the Soviet Union, and a brilliant diplomat with a paradoxical capacity for bluntness—mark him as an outstanding human being, not only of his generation, but of the century, for his life has been blessedly long and fruitful.

I am proud that Governor Harriman represents not only our great Nation, but the Democratic Party as well.●

● Mr. HUGHES. Mr. Speaker, it gives me great pleasure to pay tribute to a patriotic American and a champion of constitutional government, Gov. Averell Harriman. He has served and advised American Presidents for nearly half a century. I can say unequivocally that I know of no other American who

has served the Republic with more patriotism, wisdom, and honor. The Governor is indeed an exemplar of courageous public service based on honest convictions. Personal experience has taught him the futility of war, but also the urgency and wisdom of being constantly prepared for war so that it can be prevented. He knows that our strength and the maintenance of peace go hand and glove together. Over the years, the Governor has made a tremendous contribution to the welfare and security of our great country.

The Governor is a fine statesman, a man of singular characteristics—great ability, independent mind, and deep convictions—whose talents have been prized by American Presidents for nearly 50 years.

He has served his country well during his tenure as a State and Federal official. He has worked tirelessly and continues to do so, and now works even harder toward a strong democracy and free America.

I feel honored to be able to state that the Governor is my personal friend. He is a dedicated public servant and a sincere man of strong character, intense convictions, and great tenacity in pursuit of those convictions.

I wish him continued good health, happiness, and success over the years ahead, and a very, very happy birthday.●

● Mr. FLORIO. Mr. Speaker, for over 50 years this Nation has been graced with the skill and wisdom of a consummate diplomat, W. Averell Harriman. Governor Harriman is one of the great men of the 20th century and I am pleased to share in his birthday celebration today. His dedication to this country has been exemplary and his integrity in the performance of his duties has been inspiring.

As one of this Nation's leading internationalists, Averell Harriman has, as President Kennedy aptly stated, held "as many important jobs as any American in our history." From Ambassador to Great Britain for President Franklin Roosevelt to Secretary of Commerce for President Truman to Governor of the great State of New York and on to Assistant Secretary of State for President Kennedy, Averell Harriman has exhibited an omniscient ability to understand our world and implement appropriate policies for the public good.

We cannot forget that W. Averell Harriman was one of the first to proclaim to President Truman that "we must recognize that our objectives and the Kremlin's objectives are irreconcilable," a reality which has guided our foreign policy ever since.

In closing, I offer my heartfelt appreciation to Governor Harriman for his ceaseless devotion to the greatness of this Nation. Best wishes in all future endeavors.●

● Mr. CONTE. Mr. Speaker, on Sunday, November 15, W. Averell Harriman, former Governor of New York, will be 90 years old. I am honored to have the privilege to stand before my colleagues today and speak on behalf of this truly remarkable man.

Bill once described himself as "a hell of a good Governor." He was. He was also a hell of a great man, one who truly represents this great Nation and the American dream. He became a self-made man because of the American dream, but he never became corrupted by the dream. His father once told him that men of wealth must use their money for the public welfare, or it would be taken away from them. Bill never forgot that lesson—he always did all that he could to help his fellow man.

He became Winston Churchill's confidant and Franklin Roosevelt's trusted man in Britain. He was with the Prime Minister at Chequers when the word arrived on December 7, 1941. President Jack Kennedy said of him, "Bill has held as many important jobs as any American in our history, with the possible exception of John Quincy Adams." Bill served as an unofficial adviser to Jimmy Carter—at the ripe old age of 87.

It has been said that "until he has been a part of a cause larger than himself, no man is truly whole." If that quotation applies to any one human being, it is Bill Harriman. He is undoubtedly one of the greatest men of the 20th century. He was one hell of a Governor. He is one hell of a man. Happy birthday, Bill.●

Mr. BINGHAM. And now, let me just say, on behalf of all my other colleagues in the House of Representatives and many thousands of staff members here on the Hill, that we wish for Averell Harriman a happy birthday and for him and his beauteous wife, Pamela, many years of happiness and productive life together. America is proud of you, Governor, and America loves you.

As an example of Governor Harriman's clear and cogent current thinking, I should like to comment to my colleagues and to the administration the following article by him which appeared in the Washington Post of November 4, 1981:

THE WINDOW OF OPPORTUNITY

(By W. Averell Harriman)

We are in danger of ceding our destiny to the whims of nuclear weapons, trusting to good fortune to see us through the nuclear arms race when we should be trusting to ourselves.

The strategic forces of the United States and the Soviet Union carry explosive power more than 100,000 times greater than the Hiroshima bomb. Far from saying "enough," both nations are increasing these forces.

We are moving to deploy thousands of nuclear-armed cruise missiles, by their nature difficult to count because of their small size. These missiles—unverifiable—will make existing agreements to reduce the numbers of nuclear arms obsolete and future agreements impossible. We are allowing the seduction of a momentary technological advantage to foreclose future limits on Soviet forces.

Today there are five nations that have tested nuclear weapons; in 10 years there could be 10 more, as well as terrorists adding nuclear explosives to their menace. Yet our policy to prevent the spread of these weapons now features promotion of the exports and technologies that could be fashioned to destroy us.

The SALT II treaty, which put a cap on the strategic arms race and placed significant limits on Soviet military power, has been abandoned. In place of "real arms control" we were promised a year ago, we have only the promise of endless talks on nuclear arms in Europe and no talks at all on strategic arms until next year.

The results: a restive, divided NATO alliance that questions our competence to lead in a nuclear world, a progressive weakening of the negotiated restraints that can bound Soviet nuclear power and an emphasis on nuclear forces that are unusable in countering the Soviet challenge around the globe.

As we become more remote from the horrors of Hiroshima, there are doctrines of war fighting based on the fantasy of using nuclear destruction for some "rational" end. These doctrines blur the vital distinction between nuclear and non-nuclear weapons. And they encourage the nuclear choice by telling all nations that nuclear weapons are just another instrument of military power.

The truth is that nuclear weapons exist for one purpose only—to deter nuclear war. Once used, they will be instruments of mass destruction, consuming the destroyer as well as the destroyed.

If all Americans should be concerned about these developments, so should we be angered by those who weave a myth of America as a second-rate nuclear power, inferior to the Soviet Union. This myth demoralizes our friends, and it could tempt the Soviet Union to test our power when testing that power could have catastrophic consequences.

The nuclear arms race has a simple, unchanging rule: without limits, without verifiable negotiated restrictions, the United States can add to its nuclear forces, but so can the Soviet Union. For this reason, the MX missile and the B1 bomber are inadequate measures for American security. They merely attempt to match the Soviet military threat; they cannot reduce it. And they do nothing to reduce the risk of nuclear war.

Rather than seeking to close a false "window of vulnerability," America must take advantage of the window of opportunity it now has to limit nuclear arms. Without decisive leadership, suspicion and the weapons both nations are developing will see that this opportunity recedes perhaps forever beyond the reach of humanity. This means serious negotiations with the Soviet Union and mutual restraint while we negotiate. The objective should be major, equitable and verifiable reductions of nuclear arms, coupled with limits on the introduction of new weapons systems.

I emphasize the word "serious," for many in both nations will counsel proposals designed to be rejected by the other side but useful as an excuse for doing nothing.

Negotiations to limit nuclear arms and reduce the risk of war are hard-headed exer-

cises to improve our national security. They signal no approval of other Soviet actions, such as Afghanistan—no more than do sales of American grain to the Soviet Union. They seek, despite the irreconcilable ideologies of our two nations, the common goal that nuclear weapons have made a necessity—the prevention of nuclear war.

In our short time on Earth, we have a choice about the kind of world we leave behind. With nuclear weapons in our custody, our generation carries a heavy obligation. There will be no historian to record one day that we failed on our watch.

A TRIBUTE TO EDWARD CABRAL

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Massachusetts (Mrs. HECKLER) is recognized for 10 minutes.

● Mrs. HECKLER. Mr. Speaker, it is with great personal pleasure that I rise today to pay tribute to a very special man—a dear friend and trusted adviser who has worked with me for most of my congressional career, mixing wit with wisdom, commonsense with uncommon loyalty—Edward Cabral of Fall River, Mass.

This week the Prudential Insurance Co. of America will honor Eddie Cabral on this 30 years as one of the company's most dedicated, energetic and effective sales agents. In doing so, they will pay tribute to three decades of distinguished service not only to his company, but to the people of the city of Fall River.

The Prudential Insurance Co. has learned what I have also known for many years: that Eddie Cabral is a prized possession. He is indeed a rare human being—one who sees only the good in others and, even more important, is able to bring out that good in what they do, his generosity and friendship are unceasing, and they touch all of us who are so lucky to know him.

On more than one occasion I have had the chance to travel with Eddie to the Azores and Portugal, the land of his heritage. One of those visits occurred during the happy time of the Feast of Santo Christo: another came in the aftermath of a devastating earthquake. On all those occasions I was struck by the almost universal traits of the Portuguese people I met: Their deep religious faith, their unshakeable bravery and pride, their contagious warmth. And through those visists I came to understand Eddie Cabral better, because he personifies all of these qualities, and more.

Eddie Cabral has proven himself a success in every sense of the word. Together with his lovely wife, Lil, and their fine children, Eddie has shown that the American family is a source of strength and joy; their life together is an enduring example for others to follows.

This week Eddie Cabral will be honored as a great salesman, and that is certainly the truth. I know that he has sold me on the lesson that nice guys can—and do—finish first. And the only insurance that I need is the assurance that Edward Cabral's success will continue for many years to come. I am proud to take this opportunity to honor this outstanding man, and I ask all my colleagues in this House to join me in this tribute.●

WILL THE WHALE SWALLOW THE SHARK?

The SPEAKER pro tempore. Under a previous order of the House, the gentlemen from Iowa (Mr. BEDELL) is recognized for 5 minutes.

● Mr. BEDELL. Mr. Speaker, we all are familiar with the illustration of the small fish being swallowed up by a larger fish which in turn is to be eaten by a still larger one. This picture comes to mind as we follow developments in the proposed takover of Marathon Oil by Mobil.

Perhaps the analogy to the big fish and the little fish, is too kind to the companies in question. A takover of Marathon Oil, which ranks No. 39 on the Fortune 500 list, by Mobil, the Nation's second largest oil company, would be more like the shark being swallowed by the whale.

In fact, only 2 days before Mobil made its $5 billion-plus bid for Marathon, Marathon itself had announced the completion of a $650 million takover of the U.S. holdings of Husky Oil. Marathon barely had time to swallow, though, before Mobil moved to put the bite on them.

Under any previous administration, Republican or Democratic, this proposed merger would have been questioned immediately. But now we have an Assistant Attorney General in charge of antitrust who proclaims:

> There is nothing written in the sky that says the world would not be a perfectly satisfactory place if their were only 100 companies.

Fortunately, this merger is being reviewed by the Federal Trade Commission and not the Justice Department. This is the first big merger review to be done by the FTC under its new Chairman. Those of us who believe there is a useful purpose to be served by enforcement of our Nation's antitrust laws will be following this case very closely.●

A BILL TO IMPROVE THE FEDERAL EMPLOYEES COMPENSATION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. JONES) is recognized for 5 minutes.

● Mr. JONES of North Carolina. Mr. Speaker, I am today introducing legislation to provide for certain widows, widowers, and orphans of Federal employees who have sustained a permanent and total job-related disability for a period of 20 years or more.

Chapter 81 of title 5 of the United States Code, currently provides a monthly compensation benefit to employees who are totally and permanently disabled and who cannot engage in substantial productive work because of an injury incurred in the line of duty. The law also provides compensation for widows, widowers, and orphans of Federal employees in certain circumstances where the employee dies of injuries sustained in the performance of duty. This compensation is based on the percentage of monthly pay of the deceased employee. For example, a widow of a Federal employee killed in the line of duty may receive a monthly benefit equal to 50 percent of the monthly salary of her deceased husband until such time as she dies or remarries before reaching the age of 60.

The legislation which I am introducing concerns another situation which I think in all fairness, should be addressed in order to protect certain other widows, widowers, and orphans. The situation which I refer to occurs when an employee sustains an injury in the line of duty resulting in a total and permanent disability of a period of more than 20 years and, thereafter, dies without recovering from his or her disability. In one case, of which I have personal knowledge, the wife of a disabled employee has stood by her husband's side for 30 years or more, tending to his needs and offering support in the most noble tradition of the marital vows. Although a compensation benefit has provided a means of sustenance for the family and will continue to do so while the husband lives, if the husband should predecease his wife, she would be left without any substantial source of income. I also know, from reports I have received, that similar cases exist.

In a case such as the one I have described, a widow would have no substantial social security benefit or pension benefit to fall back on because she has not been in the work force. Instead, she has been a companion and an aid to her disabled husband. Such a widow normally has no assurance of a survivors benefit from social security as it is unlikely that her husband has participated to any substantial extent in the social security system. In almost all cases such as the one I have described, the widow will be in her later years of life and, in most cases, beyond normal retirement age. It is certainly unreasonable to expect such a person to obtain employment in this situation; yet, we have provided no provision for her maintenance. It is also no answer to say that a widow in this instance should have participated in the work force and provided her own pen-

sion instead of opting to stay with her spouse. First, she was needed by her husband. Also, had the husband not been injured and been able to participate in the work force for the 20 or more years during which he was disabled, the wife would have been provided for, either with a social security survivors benefit or Federal retirement benefit.

I understand the need to restrict the creation of any new Federal entitlements in this period of Federal budget austerity. I have addressed this problem in my legislation. First, only a very few deserving widows, widowers and orphans would be eligible for this benefit. The legislation requires that the employee be totally and permanently disabled for a period of 20 years and that a widow or widower claiming benefits under this provision have been dependent on that employee for at least 10 years prior to the employee's death. Furthermore, the legislation authorizes the Secretary of Labor to promulgate regulations to alter the amount of such benefit in order to achieve fair and equitable result after considering such factors as the degree of dependency of the spouse on the employee, the duration of the dependency, the age of the widow, widower or orphan, and the availability of other sources of income to the widow, widower or orphan. In addition, all restrictions normally applicable to the receipt of survivors' benefits under current law are applicable.

Mr. Speaker, I recommend this legislation to my colleagues.●

A VICTORY FOR HUMAN RIGHTS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. PEASE) is recognized for 5 minutes.

● Mr. PEASE. Mr. Speaker, as the chairman of the Human Rights Committee of Members of Congress for Peace Through Law, I would like to call the attention of my colleagues to excerpts from a State Department memorandum on human rights policy which appeared in the New York Times of November 5, 1981. The memorandum was prepared by Deputy Secretary of State William P. Clark and Richard T. Kennedy, Under Secretary of State for Management, and approved by Secretary of State Alexander M. Haig, Jr.

The memorandum's assertion that "human rights is at the core of our foreign policy" stands in stark contrast to the earlier pronouncements by Secretary Haig that the fight against international terrorism and the rearmament of the free world are the principal foreign policy objectives of the Reagan administration. I must say it has taken many months, and many false starts, for this administration to come around to the view—as expressed in the memorandum—that we will have to speak honestly about the human rights violations of our friends as well as our foes and that an effective human rights policy will entail hard choices which may adversely affect certain bilateral relationships.

The administration is, however, to be congratulated on its nomination of Elliott Abrams as the next Assistant Secretary of State for Human Rights and Humanitarian Affairs and for its human rights policy statement which, for the first time in the past 10 months, puts human rights back in its rightful place, at the forefront of our foreign policy concerns.

Following is the text of the memorandum:

[From the New York Times, Nov. 5, 1981]

WASHINGTON, NOVEMBER 4.—Following are excerpts from a State Department memorandum on human rights policy that was prepared by Deputy Secretary of State William P. Clark and Richard T. Kennedy, Under Secretary of State for Management, and approved by Secretary of State Alexander M. Haig, Jr.:

Human rights is at the core of our foreign policy because it is central to what America is and stands for. "Human rights" is not something we tack on to our foreign policy but is its very purpose: the defense and promotion of freedom in the world. This is not merely a rhetorical point. We will never maintain wide public support for our foreign policy unless we can relate it to American ideals and to the defense of freedom. Congressional belief that we have no consistent human rights policy threatens to disrupt important foreign policy initiatives. Human rights has been one of the main avenues for domestic attack on the Administration's foreign policy.

"Human rights"—meaning political rights and civil liberties—conveys what is ultimately at issue in our contest with the Soviet bloc. The fundamental distinction is our respective attitudes toward freedom. Our ability to resist the Soviets around the world depends in part on our ability to draw this distinction and to persuade others of it.

Neutralism abroad and a sagging domestic spirit partially are caused by fear of Soviet military might and our perceived inability or lack of desire to resist it. Perhaps even a more significant cause lies in the notion of "relativism"—why arm, and why fight, if the two superpowers are morally equal? Our human rights policy must be at the center of our response. Our audience is not only at home but in Western Europe and Japan and among electorates elsewhere. We must continue to draw the central distinction in international politics between free nations and those that are not free. To fail at this will ultimately mean failure in staving off movement toward neutralism in many parts of the West. That is why a credible U.S. policy in this area is so vitally important. Overall U.S. foreign policy, based on a strong human rights policy, will be perceived as a postive force for freedom and decency.

A TWO-TRACK POLICY

We recommend a two-track policy, positive as well as negative, to guide our rhetoric and our policy choices. On the positive track we should take the offensive:

Expounding our beliefs and affirmatively opposing the U.S.S.R. in the U.N., C.S.C.E. [Conference on Security and Cooperation in Europe] and other bodies.

Hitting hard at abuses of freedom and decency.

Reinforcing international moral and legal standards, including strong responses to outrages against diplomats and acts of terrorism.

Maintaining our reputation as a reliable partner for our friends so as to maximize the influence of our quiet diplomacy.

On the negative track, we must reconsider our relations in light of serious abuses. However, the human rights element in making decisions affecting bilateral relations must be balanced against U.S. economic, security and other interests. We must take into account the pressures a regime faces and the nature of its enemies. This policy must be applied evenhandedly. If a nation, friendly or not, abridges freedom, we should acknowledge it, stating that we regret and oppose it. However, our response or retaliatory actions should result from a balancing of all pertinent interests. Human rights is not advanced by replacing a bad regime with a worse one, or a corrupt dictator with a zealous Communist politburo.

In practice, we must, for instance, abstain from supporting or vote against friendly countries in the M.D.B.'s [multilateral development banks] on human rights grounds if their conduct merits it. We should, however, motivate improvement in human rights by voting "yes" when there has been substantial progress. In highly controversial areas such as crime control equipment, we should not issue licenses in questionable cases. The cost for such a decision would be minimal—this equipment is readily available from other sources. Thus, our decision will not damage another nation's security. On the other hand, failure to make such a decision would undercut our human rights policy.

COSTS OF THE POLICY

Any significant improvement in U.S.-Soviet relations must include demonstrable Soviet movement toward greater freedom.

A human rights policy means trouble, for it means hard choices which may adversely affect certain bilateral relations. At the very least, we will have to speak honestly about our friends' human rights violations and justify any decision wherein other considerations (economic, military etc.) are determinative. There is no escaping this without destroying the credibility of our policy, for otherwise we would be simply codding friends and criticizing foes. Despite the costs of such a human rights policy, it is essential. While we need a military response to the Soviets to reassure our friends and allies, we also need an ideological response. Our struggle is for political liberty. We seek to improve human rights performance whenever we reasonably can. We desire to demonstrate, by acting to defend liberty and identifying its enemies, that the difference between East and West is the crucial political distinction of our times.

RECOMMENDATIONS

1. Abrams [Elliott Abrams, nominee to be Assistant Secretary for Human Rights and Humanitarian Affairs] must be afforded the opportunity to appoint three new D.A.S.'s [deputy assistant secretaries] and make other personnel changes, if he finds it necessary. We have promised him our help in implementing personnel changes as fast as possible and in persuading F.S.O.'s [Foreign

Service Officers] to join this bureau. To have H.A. [Bureau of Human Rights and Humanitarian Affairs] successfully wage the "battle of ideas," internal restructuring may be necessary, as may be addition of a public affairs office to the bureau. We have told Abrams we will look sympathetically at reasonable requests for specific new positions.

2. Name of the Bureau. We propose the name of the H.A. Bureau remain as it is, so that we not create needless controversy which might even harm our nominee and undercut our policy. However, we should move away from "human rights" as a term, and begin to speak of "individual rights," "political rights" and "civil liberties." We can move on a name change at another time.

3. Policy Management. A new Assistant Secretary will need credibility before Congress and the public in stating, when necessary, that human rights issues have been raised at the highest levels. He should therefore be able to raise particularly crucial issues with you. The usual reporting relationship will be to the Deputy Secretary.

H.A. should be designated the lead agency on human rights not only for the department but also for the Government, with a specific role providing policy guidance on human rights issues to I.C.A. [International Communication Agency] and to all U.S. representatives to international organizations such as the U.N. and the M.D.B.'s H.A. should also be able, with proper approval, to involve other governmental agencies in implementing human rights policies—for example, by using defense attachés in some cases as part of our "quiet diplomacy."

FBI IS VINDICATED

(Mr. DAN DANIEL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DAN DANIEL. Mr. Speaker, a lot of people are walking around these days thinking, if not actually saying, "I told you so."

For years, those who have worked diligently for the exposure and conviction of individuals who actively sought the destruction of our Government and our society have been subjected to the worst kind of harassment and ridicule—none more so than the FBI. Now they are vindicated.

The enclosed editorial comment from the October 26 issue of Barron's does an excellent job of setting things in perspective and I commend it to the reading of our colleagues.

Let us now get on with the work of protecting our Nation from those who would subvert and destroy it. The editorial follows:

REAP THE WHIRLWIND—EVENTS HAVE DISCREDITED THE CRITICS OF THE FBI

"September 30, 1981, was not merely the close of the fiscal year of the Defense Fund, but it was a day of deep pride and happiness for the entire FBI family—present Bureau agents, Society members and all their friends in and out of law enforcement, who had been so responsive to the Fund's appeals. It was apparent on that day . . . that the Fund had at long last become solvent.

"In summary and rounded figures, contributions of $1,633,078 were received and $22,096 of interest was earned, making available funds of $1,655,274. Legal fees for about 140 individuals in the amount of $1,606,020 have been paid, with a payment still in process of an additional $3,916, for a total of $1,609,936. Administrative expenses for five years totaled $44,293, resulting in total expenditures for legal services and expenses of $1,654,229. The Fund has, thus, an excess of funds received above funds paid and payable of $945 before September interest and tax reserves. . . .

"The Fund was a sublime Society team effort. The result was a superb accomplishment against the insuperable. This is one of the Society's finest hours."

As annual reports go these days, here's something a little bit different. No slick brochure, complete with President's message and glass-eyed photos of top management; just a one-page letter to interested parties. And in a difficult year for many enterprises, when heavy deficits are by no means uncommon, this one is solidly, if modestly, in the black. However, for the Society of Former Special Agents of the FBI, the income and outgo of which are cited above, numbers aren't what count. For the Society—and its offshoot, the Defense Fund—have just closed the books on one of the most infamous chapters in U.S. judicial history.

Several years ago, at the behest of a gaggle of rabble-rousing journalists and leftwing politicians, the quaintly named Department of Justice brought charges against several top officials of the FBI for criminal conspiracy in violation of others' civil rights. Last autumn, they were found guilty in U.S. District Court; a few months ago, President Reagan granted them a full pardon. "Their convictions," stated the Chief Executive, "grew out of their good faith belief that their actions were necessary to preserve the security interests of our country. The record demonstrates that they acted not with criminal intent but in the belief that they had grants of authority reaching to the highest levels of government." All the funds raised by their colleagues and friends went to defend their good names.

Money well spent. For barely three weeks after the Defense Fund closed out its fiscal year, events at long last caught up with it. Last Tuesday, in Rockland County, New York, a Brink's guard and two local police officers were shot to death during the attempted hold-up of an armored car. Seized at the scene—with, so to speak, a smoking gun—were Katherine Boudin and Judith A. Clark, both original members of the Weather Underground Organization, a terrorist group dating back to the late 1960s, and one fugitive from justice (small j). According to The New York Times: "Another getaway car was traced to a former Barnard College student active in radical causes in the Sixties. She was being sought for questioning."

Subsequent investigation led police to a house in East Orange, N.J., where they found detailed diagrams of Manhattan courthouses and police stations, materials for making bombs and an arsenal of other weapons. "Killers Were Armed," ran a newspaper headline, "For War on Cops." What the story failed to disclose is that those whose civil rights the FBI agents were convicted of violating were also members of the Weather Underground. "They immobilized the investigations by the FBI," a former Special Agent told Barron's, "which might have resulted in the apprehension of the members of the Weather Underground and prevented the slayings."

That's not all they've done. Since the mid-'Seventies, under a ceaseless barrage of leftist propaganda, the nation's intelligence agencies have been all but destroyed. Throughout the country, files on subversive and violence-prone organizations, carefully built up over decades, have been systematically impounded, locked up or shredded (perhaps a better word is liquidated). Law enforcement bodies by and large now are barred from penetrating Marxist-Leninist cells or even avowedly terrorist groups. The House UnAmerican Activities Committee was abolished half a decade ago, the Senate Intelligence (Internal Security) Subcommittee in the following year. During recent public hearings on international terrorism and its probable link to Moscow, the newly constituted Senate Subcommittee on Security and Terrorism, headed by Sen. Jeremiah Denton, (R., Ala.), found itself confronted by a hostile, disbelieving press, which, in its biased accounts of the proceedings, relentlessly sniped at McCarthyism and witch-hunts. All very radical chic, no doubt, and good anytime for a laugh in the Hamptons. But not much help to the three who were gunned down on Tuesday, or the casualties to come. When you're naked to your enemies, you're easy prey.

And for more than a decade, the Weather Underground has been a dangerous enemy. Since 1969, the terrorist group, which calls itself "a revolutionary organization of communist men and women," has been waging open war on America. Among other acts of violence, it has claimed credit for blowing up police cars in Chicago, detonating a bomb which killed and injured a number of officers at a San Francisco police station and triggering explosions at other government and corporate buildings throughout the country. Despite efforts by the Carter Administration to pretend otherwise, Weathermen have always boasted curious foreign conncetions. Katherine Boudin—a daughter, by the way, of attorney Leonard Boudin, prominent figure in the National Emergency Civil Liberties Committee, once officially described as a Communist front—who disappeared in 1970 after a bomb factory blew up in Greenwich Village, reportedly spent much of her time in Moscow. According to a Canadian documentary (cited on Friday in *The Wall Street Journal*), members of the Weather Underground kept in touch with each other by phoning the Cuban Embassy and using a special code name. Reds under the Bed? perhaps not, but in lots of other strategic places.

After last week's murderous hold-up, fresh evidence of sinister linkages has begun to surface. One of the gang's getaway cars was registered in the name of Marilyn Jean Buck, a 34-year-old fugitive who in 1973 was sentenced to 10 years in jail as a gun-runner for the Black Liberation Army. That was the year Joanne Chesimard, BLO leader, murdered a New Jersey state trooper, a crime for which she was serving a life sentence until 1979, when three heavily armed men broke into a state prison and freed her. The owner of another car allegedly used in the robbery and ambush has just been arraigned on charges of riot and assault—a policeman was blinded—stemming from a violent protest last month against the Springboks, the South African rugby team. "Safe houses" and arms caches reportedly have turned up in cities throughout the country.

These were the people whom the FBI was desperately trying to keep tabs on in the late Sixties and early Seventies, when a handful of courageous journalists like Alice

Widener, in her own publication, U.S.A., as well as in the pages of Barron's, sought to sound the alarm. These were the subversives whose civil rights were found to be violated. To arrive at the findings, however, the Justice Department, then headed by Attorney General Benjamin R. Civiletti (who took a remarkably lenient view of the failure of Billy Carter to register as a Libyan agent) had to go to extraordinary lengths. In particular, it steered the case away from New York City, where it should have been heard, to Washington, D.C., where a sympathetic judge, in his charge to the jury, allowed the prosecution, for "security reasons," to omit all references to material that might have established the now-incontrovertible ties between the Weathermen and foreign powers. What might be called a travesty of Justice, now finally set to rights.

A good start, but no more. For as Sen. James O. Eastland (D., Miss.), who once headed the Judiciary Committee, has warned, the U.S. has become a land of "zero security." For this dangerous turn of events, the lawmaker (writing in U.S.A.) lays the blame squarely on "the widespread anti-intelligence hysteria in the wake of Watergate; the tendency of the media to take up the cudgels against law enforcement intelligence; the Fair Credit Reporting Act, Freedom of Information Act, Privacy Act—or to be more precise, certain provisions of these Acts and excessive interpretation of these provisions; recent restrictions, at every level, on the use of third party records; actions directed against law enforcement intelligence activities by organizations such as the American Civil Liberties Union, the National Lawyers Guild and the Alliance to End Repression." (Judith Clark, who was also arrested at the scene of the crime last week, is a plaintiff in a similar suit.) In a war for survival, the U.S. has tied its own hands.

REVENUE SHARING AND VOLUNTARISM

(Mr. DAN DANIEL asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. DAN DANIEL. Mr. Speaker, I have always said that I represent the finest people in the world—people who care for each other, who are concerned about their neighbors, and who believe in responsible government.

In the past few days, we have received resolutions from Halifax and Patrick Counties, Va. The first is a commentary on revenue sharing and the second on voluntarism.

I would like the Members of this body to be aware of the fine sentiments expressed in these resolutions and I include them in the RECORD at this point:

RESOLUTION

Whereas, Halifax County recognizes the need for cutbacks in Federal spending; and

Whereas, Halifax County expects to share its part of the burden as a result of funding cutbacks.

Now, therefore, be it resolved: by the Halifax County Board of Supervisors that the County petition the Reagan Administration to time any cutbacks in Revenue Sharing funds to begin June 30, 1982, instead of January, 1982 as reported. This change in timing would allow the County to plan for reductions in the normal budget cycle.

This is the 5th day of October, 1981.

RESOLUTION

On motion made and duly seconded:

Whereas, voluntarism has traditionally been an important part of American life, as neighbors, family members, churches, and other community organizations, unselfishly rendered services to the poor, the needy, and the handicapped, and

Whereas, government has over the year's increasingly assumed the role previously fulfilled by families and communities, whereby citizens began to lose sight of their duty to care for their families and to assist their neighbors in time of need, and

Whereas, government can no longer be the sole source of assistance for the poor and needy, and a greater part of such assistance must be assumed by private individuals and organizations, and

Whereas, the President has called for increased participation in voluntarism to sustain programs of assistance previously provided by government;

Now, therefore, be it resolved that the Patrick County Board of Supervisors does hereby support national, state and local efforts to return voluntarism to its traditional role of caring for family members and providing services to the poor and needy, and the handicapped through efforts exemplified by the Telephone Reassurance Program for the Elderly, the Patrick County Multi-Discipline Team for Child Abuse and Neglect, efforts to maintain elderly citizens in their own homes and in the homes of relatives, and efforts to provide emergency services to families in need.

Be it further resolved that copies of this resolution be forwarded to the Honorable Harry F. Byrd and the Honorable John W. Warner, United States Senate; the Honorable Dan Daniel representing the 5th Congressional District; the Honorable John N. Dalton, Governor of Virginia; the Honorable A. L. Philpott, Speaker of the House of Delegates; the Honorable Mary Sue Terry, Member of the House of Delegates; and the Honorable Virgil H. Goode, Jr., Virginia State Senate; the Director, Virginia Department of Welfare; and the Virginia Office of Voluntarism.

CONFERENCE REPORT ON H.R. 4522

Mr. DIXON submitted the following conference report and statement on the bill (H.R. 4522) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1982, and for other purposes.

CONFERENCE REPORT (H. REPT. No. 97-327)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4522) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1982, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 6, 17, 20, 21, 23, 24, 28, 29, 31, 32, 33, 34, 35, 36, 37, 38, and 39.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 3, 9, 10, 13, 15, 18, and 40, and agree to the same.

Amendment numbered 2:

That the House recede from its disagreement to the amendment of the Senate numbered 2, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$85,234,300*; and the Senate agree to the same.

Amendment numbered 8:

That the House recede from its disagreement to the amendment of the Senate numbered 8, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$29,096,100*; and the Senate agree to the same.

Amendment numbered 14:

That the House recede from its disagreement to the amendment of the Senate numbered 14, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$377,921,300*; and the Senate agree to the same.

Amendment numbered 16:

That the House recede from its disagreement to the amendment of the Senate numbered 16, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$784,100*; and the Senate agree to the same.

Amendment numbered 19:

That the House recede from its disagreement to the amendment of the Senate numbered 19, and agree to the same with an amendment, as follows:

In lieu of the sum proposed by said amendment insert *$397,313,100*; and the Senate agree to the same.

Amendment numbered 25:

That the House recede from its disagreement to the amendment of the Senate numbered 25, and agree to the same with an amendment, as follows:

In lieu of the number proposed by said amendment insert *32,950*; and the Senate agree to the same.

Amendment numbered 26:

That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment, as follows:

In lieu of the number proposed by said amendment insert *31,991*; and the Senate agree to the same.

Amendment numbered 27:

That the House recede from its disagreement to the amendment of the Senate numbered 27, and agree to the same with an amendment, as follows:

In lieu of the number proposed by said amendment, insert *28,857*; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 4, 5, 7, 11, 12, 22, 30, 41, and 42.

Managers on the Part of the Senate.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the Conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4522) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1982, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report.

FEDERAL PAYMENT TO THE DISTRICT OF COLUMBIA

Amendment No. 1: Appropriates $336,600,000 as proposed by the Senate instead of $300,000,000 as proposed by the House.

GOVERNMENTAL DIRECTION AND SUPPORT

Amendment No. 2: Appropriates $85,234,300 instead of $84,742,900 as proposed by the House and $86,747,400 as proposed by the Senate.

Office of Business and Economic Development.—The conference action provides $753,700 as proposed by the House instead of $1,086,100 as proposed by the Senate. The conference action also provides 24 positions as proposed by the Senate instead of 18 as proposed by the House with the understanding that the six positions above the House allowance are to be funded within resources presently available.

Department of General Services.—The conference action provides $24,563,100 as proposed by the Senate instead of $24,145,800 as proposed by the House and reflects an increase of $417,300 as proposed by the Senate for space rental costs and the renovation of the Lansburgh Building which will be used to house District personnel as existing leases expire.

Advisory Neighborhood Commissions.—The conference action provides $934,700 as proposed by the House instead of $1,680,000 as proposed by the Senate.

Office of Employee Appeals.—The conference action provides $601,800 and 14 positions instead of $527,700 and 12 positions as proposed by the House and $675,900 and 16 positions as proposed by the Senate.

District of Columbia Retirement Board.—The conference action provides $312,700 from the general fund as proposed by the House instead of $674,000 as proposed by the Senate. Amendments numbered 5, 6, and 7 are also related to this item.

Amendment No. 3: Substitutes a comma for the word "and" in connection with the proviso for representation allowances for certain District officials.

Amendment No. 4: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which provides a representation allowance for the City Administrator. Authorizing legislation has been approved by the District government and is currently awaiting completion of the layover period before the Congress. The House denied the request. The conferees expect that appropriate records will be kept detailing the amounts, purpose and dates expenditures are made from this allowance.

Amendment No. 5: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which adds the phrase "notwithstanding any other provision of law" to the proviso dealing with appropriations for the District of Columbia Retirement Board. This language clarifies section 121(f)(1) of Public Law 96-122 which requires that all funds for operation of the Board be provided through the appropriations process.

Amendment No. 6: Provides that $312,700 for the District of Columbia Retirement Board shall be derived from the general fund as proposed by the House instead of $674,000 as proposed by the Senate.

Amendment No. 7: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter stricken and inserted by said amendment, insert the following: "not to exceed $1,035,600".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference action provides that not to exceed $1,035,600 for the District of Columbia Retirement Board shall be derived from the earnings of the applicable retirement funds instead of a definite amount of $1,035,600 as proposed by the House and not to exceed $674,300 as proposed by the Senate.

ECONOMIC DEVELOPMENT AND REGULATION

Amendment No. 8: Appropriates $29,096,100 instead of $28,096,100 as proposed by the House and $29,748,900 as proposed by the Senate.

Comprehensive Plan.—The conferees agree that it is important for the District government to complete work on the City's Comprehensive Plan during fiscal year 1982 as was promised by the Mayor and the Director of the Office of Planning and Development during congressional hearings. Ample resources and personnel have been made available in the budgets for fiscal years 1981 and 1982 for this purpose, and the conferees expect District officials to perform whatever work is necessary to complete the Plan by the end of fiscal year 1982.

Department of Housing and Community Development.—The conference action provides $2,000,000 to cover the expenses of issuing $100 million in mortgage revenue bonds by the District of Columbia Housing Finance Agency as proposed by the Senate instead of $1,000,000 as proposed by the House.

District of Columbia Chamber of Commerce. —The conference action provides $75,200 as proposed by the House instead of $100,000 as proposed by the Senate. The conferees expect a detailed explanation of the use of these funds at the hearings on the fiscal year 1983 budget.

Lottery and Charitable Games Control Board.—Deletes funding under "Economic Development and Regulation" and establishes a separate enterprise fund under Amendment No. 11 for the Lottery and Charitable Games Control Board.

Amendments Nos. 9 and 10: Provide that $2,000,000 as proposed by the Senate instead of $1,000,000 as proposed by the House shall be repaid, from excess operating revenues, by the District of Columbia Housing Finance Agency to the District's Department of Housing and Community Development, subject to the rights of the holders of any bonds or notes issued by the Agency.

Amendment No. 11: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following: ": *Provided further,* That the District of Columbia will establish a special fund to assure that any moneys available to the Lottery and Charitable Games Control Board shall be derived from non-Federal District of Columbia revenues.

LOTTERY AND CHARITABLE GAMES ENTERPRISE FUND

For establishment of the Lottery and Charitable Games Enterprise Fund, for the purpose of implementing D.C. Law 3-172 and for the budgeting and accounting of all revenues and expenses of the Lottery and Charitable Games Control Board, $628,000, to be derived from non-Federal District of Columbia revenues: *Provided further,* That the District of Columbia will identify the source of funding for this appropriation from its own locally generated revenues when the Enterprise Fund is established and that no revenues from Federal sources shall be used to support the operations of the Lottery and Charitable Games Control Board: *Provided further,* That the level of administrative expenses to be incurred by the Board shall be appropriated in the District's General Fund budget as a transfer from locally generated revenues; administrative expenses being defined as all anticipated expenses of the Board for the coming fiscal year excluding moneys necessary for the payment of prizes to the winners of the games specified in D.C. Law 3-172: *Provided further,* That the Board shall have the authority to expend, from revenues generated by its operations, funds necessary for the payments of prizes: *Provided further,* That the annual expenses for prizes and administration of the Board shall not exceed resources available to the Board from appropriated authority or revenues generated by the operations of the Board: *Provided further,* That all revenues received by the Board in excess of the funds used by the Board for prize money in a given month shall be transferred to the General Fund from the Lottery and Charitable Games Enterprise Fund through a general operating transfer, promptly after the first of the month for the preceding month: *Provided further,* That the Board may establish a reserve not to exceed 2 percent of projected annual prize payments to provide for prizes awarded in any month which may exceed the revenue generated during that month: *Provided further,* That the Mayor may approve a change in the reserve limit, as necessary, upon the request of the Board: *Provided further,* That the financial operations of the Board with respect to the amount appropriated for administrative expenses shall be in accordance with all laws, regulations and policies of the District of Columbia government regarding appropriated funds: *Provided further,* That for the fiscal year ending September 30, 1982 and for each fiscal year thereafter, the District of Columbia Auditor shall conduct a comprehensive audit on the financial status of the Fund, including but not limited to all appropria-

tions, revenues and transfers to the Fund, and provide such report to the Mayor, Chairman of the District of Columbia Council, and to the Subcommittees on the District of Columbia Appropriations of the House of Representatives and the Senate: *Provided further,* That in addition to current restrictions, advertising on public transportation and at stations and stops is prohibited: *Provided further,* That the advertising, sale, operation, or playing of the lotteries, raffles, bingos, or other games authorized by D. C. Law 3-172 is prohibited on the Federal enclave, and in adjacent public buildings and land controlled by the Shipstead-Luce Act as amended by 53 Stat. 1144, as well as in the Old Georgetown Historic District: *Provided further,* That the Board shall make an annual report to the Subcommittees on District of Columbia Appropriations of the House of Representatives and the Senate at the end of each year detailing the receipts and disbursements of the Board and summarizing measures of regulation and enforcement enacted as well as other information and recommendations deemed of value or which may be requested".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees are agreed that no Federal funds shall be used in connection with the Lottery and Charitable Games Control Board and have included language in the bill establishing a separate fund to account for all administrative expenses of the Board and all payments to lottery winners. The conferees intend that administrative expenses be subject to the same annual budgetary review and audit as the expenses for all other District agencies. The Board is not authorized to embark on any new undertaking without obtaining prior approval of the required executive and legislative bodies through the normal budgetary process.

The conferees are agreed that the newly established Lottery and Charitable Games Enterprise Fund will receive funds appropriated to the Board for administrative purposes from locally-generated non-Federal revenues as well as all proceeds from the operations of the Board, including lottery receipts and any other fees and payments received by the Board. On the first of each month the Board will transfer from the enterprise fund to the general fund of the District of Columbia the amount not required to pay prize winners in that month. The bill language also requires an annual audit of all revenues, transfers, and appropriations to the fund. Copies of the audit report are to be forwarded to the Mayor, Chairman of the Council and the appropriate committees of the Congress.

The conferees are concerned about lottery advertising in areas of the District frequented by visitors or those who come to the District to do business with the Federal government. Language has been included in the bill prohibiting advertising on public transportation and at stations and stops. Language is also included in the bill prohibiting lottery activities on the Federal enclave and in certain other areas of the District. The conference agreement also requires the Board to prepare an annual report on its activities.

PUBLIC SAFETY AND JUSTICE

Amendment No. 12: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amendment, insert the following: "$366,396,200".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

Metropolitan Police Department.—The conference action provides $114,685,300 to fund 3,880 sworn police officers as proposed by the House instead of $113,286,900 to fund 3,800 officers as proposed by the Senate. The Mayor has stated that 200 police officers are in the process of being hired and he expects the strength of the force to exceed 3,800 sworn personnel by February 1, 1982. The Mayor is directed to take appropriate steps to bring the force up to the level of 3,880 uniformed officers by March 31, 1982, and to provide the Subcommittees on District of Columbia Appropriations with monthly reports on the progress being made in that regard. Sufficient funds are included in the bill to finance an average of 3,880 officers for the entire twelve months of fiscal year 1982. Accordingly the conferees direct the Mayor to maintain the average full-time employment level for uniformed officers at 3,880 personnel during the remaining months of fiscal year 1982.

Court of Appeals.—The conference action provides $60,800 for compensation and expenses related to bar examinations as proposed by the Senate instead of $46,400 as proposed by the House.

Superior Court.—The conference action provides $89,500 and six positions for the Probate Division as proposed by the Senate instead of $80,000 and five positions as proposed by the House.

District of Columbia Court System.—The conference action provides $3,641,100 for court-appointed legal representation for indigent defendants under the Criminal Justice Act program instead of $3,380,100 as proposed by the House and $3,902,200 as proposed by the Senate. The conferees note that this amount is less than requested and may be inadequate for the balance of this fiscal year. Language is included under the Public Defender Service relative to this issue.

Public Defender Service.—The conferees are pleased with the work of the Public Defender Service in providing legal representation to indigent defendants. With the reduction of $261,100 in funding request of $3,902,200 for court-appointed counsel under the Criminal Justice Act program the conferees urge appropriate officials to be prepared to discuss at next year's hearings the feasibility of expanding the role of the Public Defender Service in providing legal representation for indigent defendants.

Department of Corrections.—The conference action provides $14,918,100 for payment to the Federal Bureau of Prisons to cover the costs of maintaining District prisoners in Federal institutions as proposed by the Senate instead of $13,918,100 as proposed by the House.

Police and Fire Retirement Systems.—The conference action provides $88,240,000 as proposed by the Senate instead of $86,940,600 as proposed by the House.

Amendment No. 13: Provides a representation allowance of $2,500 for the Joint Committee on Judicial Administration as proposed by the Senate. The House denied this request. The conferees expect that appropriate records of expenditures will be kept and made available for public inspection upon request.

PUBLIC EDUCATION SYSTEM

Amendment No. 14: Appropriates $337,921,300 instead of $365,732,100 as proposed by the House and $378,301,700 as proposed by the Senate.

Amendment No. 15: Allocates $60,220,900 for the District of Columbia Teachers' Retirement Fund as proposed by the Senate instead of $48,119,200 as proposed by the House.

Amendment No. 16: Allocates $784,100 for the Commission on the Arts and Humanities instead of $696,600 as proposed by the House and $809,500 as proposed by the Senate. The increase of $87,500 above the House allowance will provide the Commission with a total of $557,900 for its grants-in-aid program as proposed by the Senate instead of $470,400 as proposed by the House. This allowance for the grants program reflects a 46 percent increase over the amount available in fiscal year 1981. The conferees direct that these funds are to be used only for the Commission's grants program and not for employee staffing. The conferees denied the increase of $25,400 for a new deputy director position proposed by the Senate.

Amendment No. 17: Allocates $4,115,000 for the school transit subsidy program as proposed by the House instead of $4,470,000 as proposed by the Senate. The conferees direct District officials to monitor this program carefully.

Amendment No. 18: Provides that $60,220,900 allocated for the District of Columbia Teachers' Retirement Fund shall be transferred to the Teachers' Retirement Fund as proposed by the Senate instead of $48,119,200 as proposed by the House.

HUMAN SUPPORT SERVICES

Amendment No. 19: Appropriates $397,313,100 instead of $394,259,300 as proposed by the House and $398,010,100 as proposed by the Senate.

Disability Compensation.—The conference action provides $11,374,600 as proposed by the House instead of $12,074,600 as proposed by the Senate.

Unemployment Compensation.—The conference action provides $8,477,000 as proposed by the Senate instead of $6,805,100 as proposed by the House.

Office of Human Rights.—The conference action provides $1,173,500 as proposed by the House instead of $1,229,500 as proposed by the Senate. The conference action also provides 52 positions as proposed by the Senate instead of 49 positions as proposed by the House with the understanding that the three positions above the House allowance are to be funded within resources presently available.

Office on Latino Affairs.—The conference action provides $225,600 as proposed by the House instead of $270,600 as proposed by the Senate. The conference action also provides seven positions as proposed by the Senate instead of five positions as proposed by the House with the understanding that the two positions above the House allowance are to be funded within resources presently available.

Department of Human Services.—The conference action provides $286,267,000 instead of $284,885,100 as proposed by the House and $286,163,000 as proposed by the Senate. The conference allowance provides $8,344,000 for Medicaid reimbursements to D.C. General Hospital as proposed by the Senate instead of $6,962,100 as proposed by the House. The conference allowance also restores $104,000 proposed by the House

and deleted by the Senate for the Sasha Bruce Home for Runaway and Homeless Youth. The Sasha Bruce Home is now the District's only shelter for runaway and homeless youth, providing services to over 300 families annually. Because of the revised allocation formula in the 1980 amendments to the Federal Runaway and Homeless Youth Act, the District's appropriation for this program from Federal grants has been cut from $130,000 last year to $26,000 this year. Additional cuts to human services programs would make it extremely difficult for the District government to ensure a quality program for runaway and homeless youth without this appropriation. In approving the amount of $104,000 for the runaway and homeless youth programs at the Sasha Bruce Home, the conferees direct District officials to expend these funds for this purpose exclusively.

Amendment No. 20: Provides that $11,374,600 shall remain available until expended for District of Columbia employees' disability compensation as proposed by the House instead of $12,074,600 as proposed by the Senate.

Amendment No. 21: Restores language proposed by the House and stricken by the Senate requiring District officials to obtain the approval of the House and Senate Subcommittees on District of Columbia Appropriations prior to obligating any funds appropriated for the summer youth jobs program. The conferees note the significant progress made by District officials in the administration of the summer jobs program in the past year in the areas of payroll accounting, employee orientation, worksite supervision, administrative oversight and other required operating responsibilities. The conferees urge that these efforts be continued in the future and that the annual detailed management plan be prepared and submitted in a timely manner.

PERSONAL SERVICES

Amendment No. 22: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the sum proposed by said amendment, insert the following: "$36,279,100".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conferees note that the pay rates of District employees will be determined by collective bargaining which is now underway, and have approved an increase of $1,478,000 above the Senate allowance.

GENERAL PROVISIONS

Amendment No. 23. Restores language proposed by the House and stricken by the Senate placing a ceiling of $225,000 on the expenditure of funds for travel and per diem costs outside the District of Columbia, Maryland, and Virginia. In doing so, the conferees intend that District officials carefully review the President's recommendations of July 30, 1981 to strengthen the management of travel by Federal employees, and implement those changes which may provide savings in official travel expenditures for the District government.

Amendment No. 24: Changes section number.

Amendments Nos. 25, 26, and 27: Provide an employment ceiling of 32,950 including 31,991 general fund positions of which 28,857 are appropriated positions instead of employment ceiling of 32,922 including 31,963 general fund positions of which 28,829 are appropriated positions as proposed by the House and an employment ceiling of 32,953 including 31,994 general fund positions of which 28,860 are appropriated positions as proposed by the Senate.

Amendments Nos. 28 and 29: Change section numbers.

Amendment No. 30: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which requires the budget for the District of Columbia government for fiscal year 1983 to be transmitted to the Congress by April 15, 1982 as proposed by the Senate instead of February 1, 1982 as proposed by the House. The conferees are agreed that this delay in the submission date of the District's fiscal year 1983 budget from February 1, to April 15 is being granted on a one-time basis for the fiscal year 1983 budget only. The conferees note that this action will allow the Mayor to submit the budget to the City Council on December 1 rather than October 1 as would be required by the February 1 transmittal date. This additional 60 days will allow time for the fiscal year 1983 budget to be approved at the local level as well as provide sufficient time for District officials to gather actual revenue and expenditure data for the previous fiscal year. By using more accurate data in the budget documents, the need for major reestimates each spring and the resulting changes in the budget should be eliminated, allowing for more expeditious handling of the District's budget by the Congress. In addition, District officials have stated that with this extension, budget amendments will be minimized.

The conferees will monitor this process during the coming year to determine the effect of this delay, and necessary adjustments will be made in the appropriation bill for fiscal year 1983.

Amendments Nos. 31, 32, 33, 34, 35, 36, 37, 38 and 39: Change section numbers.

Amendment No. 40: Deletes the phrase "before December 1, 1981," proposed by the House and stricken by the Senate.

Amendment No. 41: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate which inserts language requiring that necessary permits must be obtained from appropriate State agencies before sludge from the District's municipal waste system may be disposed of in any public or private landfills not currently used for this purpose.

Amendment No. 42: Reported in technical disagreement. The managers on the part of the House will offer a motion to recede and concur in the amendment of the Senate with an amendment as follows:

In lieu of the matter proposed by said amendment, insert the following:

"SEC. 123A. (a) Notwithstanding section 422(7) of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code 1-242(7)), the City Administrator shall be paid, during any fiscal year, a salary at a rate established by the Mayor, not to exceed the rate established for level IV of the Executive Schedule under section 5315 of title 5, United States Code.

"(b) For purposes of applying any provision of law limiting the availability of funds for payment of salary or pay in any fiscal year, the highest rate of pay established by the Mayor under subsection (a) for any position for any period during the last quarter of calendar year 1981 shall be deemed to be the rate of pay payable for that position for September 30, 1981.

"(c) Notwithstanding section 4(a) of the District of Columbia Redevelopment Act of 1945 (D.C. Code 5-803(a)), the board members of the Redevelopment Land Agency shall be paid, during any fiscal year, a per diem compensation at a rate established by the Mayor.".

The managers on the part of the Senate will move to concur in the amendment of the House to the amendment of the Senate.

The conference action authorizes the Mayor to set the salary of the City Administrator at a rate not to exceed the maximum statutory rate established for level IV of the Federal Executive Schedule under 5 U.S.C. 5315, and provides that this salary may be payable to the City Administrator during fiscal year 1982. The conference action also authorizes the Mayor to set the per diem rate for board members of the Redevelopment Land Agency in the same manner consistent with his authority to set these rates for members of other boards and commissions of the District government. The Mayor does not have this authority at the present time.

CONFERENCE TOTAL—WITH COMPARISONS

The total new budget (obligational) authority for the fiscal year 1982 recommended by the Committee of Conference, with comparisons to the fiscal year 1981 amount, the 1982 budget estimates, and the House and Senate bills for 1982 follow:

Federal funds:	
New Budget (obligational) authority, fiscal 1981	$495,382,700
Budget estimates of new (obligational) authority, fiscal year 1982	570,170,000
House bill, fiscal year 1982	520,570,000
Senate bill, fiscal year 1982	557,170,000
Conference agreement, fiscal year 1982	557,170,000
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1981	+61,787,000
Budget estimates of new (obligational) authority, fiscal year 1982	−13,000,000
House bill, fiscal year 1982	+36,600,000
Senate bill, fiscal year 1982	
District of Columbia funds:	
New Budget (obligational) authority, fiscal year 1981	1,765,081,500
Budget estimates of new (obligational) authority, fiscal year 1982	1,905,258,200
House bill, fiscal year 1982	1,868,658,200
Senate bill, fiscal year 1982	1,905,258,200
Conference agreement	1,905,258,200
Conference agreement compared with:	
New budget (obligational) authority, fiscal year 1981	+140,176,700
Budget estimates of new (obligational) authority, fiscal year 1982	
House bill, fiscal year 1982	+36,600,000
Senate bill, fiscal year 1982

SENATE CONCURRENT RESOLUTION REFERRED

A concurrent resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. Con. Res. 43. Concurrent resolution granting the status of permanent residence to certain aliens; to the Committee on the Judiciary.

ENROLLED BILLS SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 4734. An act to recognize the organization known as the Italian American War Veterans of the United States; and

H.R. 4792. An act to amend title 10, United States Code, to improve the military justice system.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 195. An Act to recognize the organization known as the U.S. Submarine Veterans of World War II; and

S. 999. An Act to amend the Earthquake Hazards Reduction Act of 1977 and the Federal Fire Prevention and Control Act of 1974 to authorize the appropriation of funds to the Director of the Federal Emergency Management Agency to carry out the earthquake hazards reduction programs and the fire prevention and control program, and for other purposes.

ADJOURNMENT

Mr. BINGHAM. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 37 minutes p.m.) under its previous order, the House adjourned until Friday, November 13, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2502. A letter from the Acting Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Air Force's proposed sale of certain defense equipment and services to Thailand (Transmittal No. 82-02), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

2503. A letter from the Deputy Assistant Secretary of State for Congressional Relations, transmitting a draft of proposed legislation to authorize support to Radio Broadcasting to Cuba, Inc.; to the Committee on Foreign Affairs.

2504. A letter from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

2505. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense equipment and services to Thailand (Transmittal No. 82-02), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2506. A letter from the Inspector General, Department of Agriculture, transmitting a report on computer matching of Federal employees who have Farmers Home Administration loans; to the Committee on Government Operations.

2507. A letter from the Executive Secretary, Federal Reserve Employee Benefits System, transmitting the annual report of the retirement plan for calendar year 1980, pursuant to section 121(a)(2) of the Budget

and Accounting Procedures Act of 1950, as amended; to the Committee on Government Operations.

2508. A letter from the Chairman, Board of Directors, Tennessee Valley Authority Retirement System, transmitting the annual report of the TVA retirement plan, covering the year ended September 30, 1980, pursuant to section 121(a)(2) of the Budget and Accounting Procedures Act of 1950, as amended; to the Committee on Government Operations.

2509. A letter from the Clerk, U.S. Court of Claims, transmitting the court's judgment order in Docket No. 277, *The Creek Nation of Oklahoma* v. *The United States;* to the Committee on Interior and Insular Affairs.

2510. A letter from the Administrator, U.S. Environmental Protection Agency, transmitting the ground water research plan, pursuant to section 2(3) of Public Law 96-569; to the Committee on Science and Technology.

2511. A letter from the Administrator, National Aeronautics and Space Administration, transmitting a report on negotiated contracts for experimental, developmental, test, or research work, or for industrial mobilization in the interest of the national defense, covering the period January through June 1981, pursuant to 10 U.S.C. 2304(e); to the Committee on Science and Technology.

2512. A letter from the Acting Executive Secretary, Office of the Secretary of Defense, transmitting a report on Defense Department procurement from small and other businsess firms for October 1980 through August 1981, pursuant to section 10(d) of the Small Business Act, as amended; to the Committee on Small Business.

2513. A letter from the Deputy U.S. Trade Representative, Executive Office of the President, transmitting a semiannual report on the operation and effect of the International Sugar Agreement, 1977, pursuant to section 5 of Public Law 96-236 and Executive Order 12224; jointly, to the Committees on Agriculture and Ways and Means.

2514. A letter from the Chairman, National Transportation Safety Board, transmitting a copy of the Board's letter appealing its proposed budget allowance for fiscal years 1982 and 1983, pursuant to section 304(b)(7) of Public Law 93-633; jointly, to the Committees on Appropriations and Public Works Transportation.

2515. A letter from the Acting Comptroller General of the United States, transmitting a report on the effect of recent changes in U.S. deterrence strategy on the performance requirements of strategic nuclear weapons, command, control, and communications systems, (MASAS-81-35, August 5, 1981); jointly, to the Committees on Government Operations and Armed Services.

2516. A letter from the Comptroller General of the United States, transmitting a report on the Department of Energy's regulatory reform efforts (EMD-82-6, November 6, 1981); jointly, to the Committees on Government Operations and Energy and Commerce.

2517. A letter from the Chairman, U.S. Nuclear Regulatory Commission, transmitting a proposed regulation to protect unclassified nuclear safeguards information against unauthorized disclosure, pursuant to section 147.d. of the Atomic Energy Act of 1954, as amended; jointly, to the Committees on Interior and Insular Affairs and Energy and Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. BOLAND: Permanent Select Committee on Intelligence. H.R. 4448. A bill to amend title 10, United States Code, to increase the number of Assistant Secretaries in the Department of Defense, and for other purposes (Rept. No. 97-300, Pt. II). And ordered to be printed.

Mr. BOLAND: Permanent Select Committee on Intelligence. Report on implementation of the Foreign Intelligence Surveillance Act (Rept. No. 97-318). Referred to the Committee of the Whole House on the State of the Union.

Mr. WHITTEN: Committee on Appropriations. House Joint Resolution 357. Joint resolution making further continuing appropriations for the fiscal year 1982, and for other purposes (Rept. No. 97-319). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 841. A bill to name the U.S. Post Office Building in Portsmouth, Ohio, the "William H. Harsha United States Post Office Building" (Rept. No. 97-320). Referred to the House Calendar.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 2494. A bill to designate the John Archibald Campbell Federal Building-U.S. Courthouse; with amendents (Rept. No. 97-321). Referred to the House Calendar.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 4506. A bill to name the lock and dam authorized to replace locks and dam 26, Mississippi River, Alton, Ill., as "Melvin Price Lock and Dam" (Rept. No. 97-322). Referred to the House Calendar.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 4569. A bill to designate the U.S. Post Office Building in Hartford, Conn., as the "William R. Cotter Federal Building" (Rept. No. 97-323). Referred to the House Calendar.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 4716. A bill to amend Public Law 90-553, to authorize the transfer, conveyance, lease and improvement of, and construction on, certain property in the District of Columbia, for use as a headquarters site for an international organization, as sites for governments of foreign countries, and for other purposes (Rept. No. 97-324). Referred to the Committee of the Whole House on the State of the Union.

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 4845. A bill to designate the building known as the Lincoln Federal Building and Courthouse in Lincoln, Nebr., as the "Robert V. Denney Federal Building and Courthouse" (Rept. No. 97-325). Referred to the House Calendar.

Mr. HOWARD: Committee on Public Works and Transportation. House Concurrent Resolution 203. Concurrent resolution requesting certain reports relating to the Tennessee Valley Authority Act of 1933, and prohibiting certain transactions by the Board of Directors of that Authority (Rept. No. 97-326). Referred to the House Calendar.

Mr. DIXON: Committee of conference. Conference report on H.R. 4522 (Rept. No. 97-327). And ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BAFALIS:

H.R. 4939. A bill to amend the Internal Revenue Code of 1954 to make permanent the exclusion of labor performed by certain alien farmworkers from Federal unemployment tax; to the Committee on Ways and Means.

By Mr. BOLAND:

H.R. 4940. A bill to amend title 18, United States Code, to make it a felony to kill or attempt to kill officers or employees of the intelligence community, persons given entry into the United States for permanent residence pursuant to section 7 of the Central Intelligence Agency Act of 1949, and persons present in the United States under intelligence auspices, and for other purposes; to the Committee on the Judiciary.

By Mr. EVANS of Iowa:

H.R. 4941. A bill incentive to discourage price support loan defaults; to the Committee on Agriculture.

By Mr. FORD of Tennessee:

H.R. 4942. A bill to provide that certain amounts transferred to State unemployment funds will continue to be available for payment of administrative expenses, and for other purposes; to the Committee on Ways and Means.

By Mr. GIBBONS:

H.R. 4943. A bill to grant the consent of Congress to Harbour Island, Inc., Tampa, Fla., to construct and maintain two fix-span bridges in and over Garrison Channel, Tampa, Fla.; to the Committee on Public Works and Transportation.

By Mr. GLICKMAN:

H.R. 4944. A bill to amend the Internal Revenue Code to provide an income tax exemption for certain mutual benevolent insurance associations; to the Committee on Ways and Means.

By Mrs. HECKLER:

H.R. 4945. A bill to provide that petroleum company overcharges payable to the United States shall be available for low-income energy assistance and weatherization, and for other purposes; to the Committee on Energy and Commerce.

By Mr. JONES of North Carolina:

H.R. 4946. A bill to amend chapter 81 of title 5, United States Code, to provide benefits for survivors of certain Federal employees receiving disability compensation under such chapter; to the Committee on Education and Labor.

By Mr. LUNDINE:

H.R. 4947. A bill to amend the Federal Reserve Act to provide that deposits of State and local governments will not be subject to reserve requirements, and for other purposes; to the Committee on Banking, Finance and Urban Affairs.

By Mr. MATSUI:

H.R. 4948. A bill to amend the Internal Revenue Code of 1954 to provide for the application of cash or deferred-arrangement rules to money purchase plans; to the Committee on Ways and Means.

By Mr. NOWAK:

H.R. 4949. A bill to amend the Internal Revenue Code of 1954 to increase the small issue exemption from industrial development bond treatment to $20,000,000 for industrial-type property used in economically distressed areas and to reduce such exemption for other property not used in such an area, and for other purposes; to the Committee on Ways and Means.

By Mr. PARRIS:

H.R. 4950. A bill to amend the Internal Revenue Code of 1954 to allow retirement income to be taken into account in computing the deduction for two-earner married couples; to the Committee on Ways and Means.

By Mr. RAILSBACK:

H.R. 4951. A bill to amend the Internal Revenue Code of 1954 to provide an additional investment tax credit for fire prevention equipment; to the Committee on Ways and Means.

By Mr. RITTER (for himself and Mr. BAILEY of Pennsylvania):

H.R. 4952. A bill to provide States the option of implementing motor vehicle inspection and maintenance programs to meet legal requirements until such time that the Congress modifies or reaffirms the provisions in the Clean Air Act relating to motor vehicle inspection and maintenance; to the Committee on Energy and Commerce.

By Mr. ROTH:

H.R. 4953. A bill to direct the President to impose certain limitations on the amount of milk protein products that may be imported into the United States; to the Committee on Ways and Means.

By Mrs. SMITH of Nebraska:

H.R. 4954. A bill to authorize the Secretary of the Interior to engage in feasibility studies of water resource development and for other purposes in the Central Platte Valley, Nebr.; to the Committee on Interior and Insular Affairs.

By Mr. SMITH of New Jersey:

H.R. 4955. A bill to provide a survivor annuity to surviving spouses of members of the Reserve components of the Armed Forces who died without having attained age 60 before October 1, 1978, but after they became eligible for retired pay for nonregular service; to the Committee on Armed Services.

H.R. 4956. A bill to amend title 10, United States Code, to authorize the retention in the Air Force Reserve until age 60 of certain retired regular enlisted members of the Air Force; to the Committee on Armed Services.

By Mr. WAXMAN:

H.R. 4957. A bill to amend the Public Health Service Act and the Federal Cigarette Labeling and Advertising Act to establish a national program under an Office of Smoking and Health to inform the public of the dangers from smoking, to change the label requirements for cigarettes, and for other purposes; to the Committee on Energy and Commerce.

By Mr. DOWDY (for himself, Mr. WHITTEN, Mr. BOWEN, Mr. MONTGOMERY, and Mr. LOTT):

H.J. Res. 361. Joint resolution to grant official recognition to the International Ballet Competition; to the Committee on Post Office and Civil Service.

By Mr. DERWINSKI (for himself, Mr. FINDLEY, Mr. LEACH of Iowa, Mr. YATRON, and Mr. MICA):

H. Con. Res. 218. Concurrent resolution expressing the sense of the Congress with respect to the imprisonment and treatment by the Government of the Soviet Union of Mart Niklus, and for other purposes; to the Committee on Foreign Affairs.

By Mr. SMITH of New Jersey:

H. Con. Res. 219. Concurrent resolution calling upon the Union of Soviet Socialist Republics to end the current policies of Jewish emigration discrimination and anti-Semitism; to the Committee on Foreign Affairs.

By Mr. McGRATH:

H. Res. 267. Resolution opposing reductions in the revenue sharing program; to the Committee on Government Operations.

By Mrs. SCHNEIDER (for herself, Mr. RODINO, Mr. EDWARDS of California, Mrs. FENWICK, Mr. JEFFORDS, Mrs. SCHROEDER, Mrs. COLLINS of Illinois, Mrs. MARTIN of Illinois, Mrs. HECKLER, Mr. PRITCHARD, Mrs. CHISHOLM, Mr. LEACH of Iowa, Mr. FISH, Mrs. SNOWE, Ms. OAKAR, Ms. FERRARO, and Ms. MIKULSKI):

H. Res. 268. Resolution expressing the sense of the House of Representatives with respect to the need to maintain guidelines which insure equal rights with regard to education opportunity; to the Committee on Education and Labor.

By Mr. SMITH of New Jersey (for himself and Mr. WEBER of Ohio):

H. Res. 269. Resolution calling upon the Union of Soviet Socialist Republics to permit the emigration of Yuli Kosharovsky and his immediate family to Israel; to the Committee on Foreign Affairs.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

[*The Memorial numbered 222 which appeared in the Record of November 10 has been reclassified as Petition No. 267*]

222. The SPEAKER presented a memorial of the Senate of the Commonwealth of Massachusetts, relative to prisoners of war and missing in action in Southeast Asia; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. FAUNTROY:

H.R. 4958. A bill for the relief of S. Leon Levy; to the Committee on the Judiciary.

By Mr. LEE:

H.R. 4959. A bill to direct the Administrator of Veterans' Affairs to release a reverter interest of the United States in certain real property in Canandaigua, N.Y., previously conveyed by the United States to Sonnenberg Gardens, a nonprofit educational institution of the State of New York; to the Committee on Veterans' Affairs.

By Mr. SMITH of New Jersey:

H.R. 4960. A bill for the relief of Nancy O'Keefe Smythe; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 556: Mr. ROSE.

H.R. 637: Mr. SMITH of Pennsylvania, Mr. COLLINS of Texas, Mr. KINDNESS, and Mr. ROUSSELOT.

H.R. 1193: Mr. ROSENTHAL.

H.R. 1313: Mr. WEBER of Ohio, Mr. LEATH of Texas, and Mr. ANTHONY.

H.R. 1648: Mr. LANTOS, Ms. OAKAR, and Mr. MOFFETT.

H.R. 1779: Mr. SMITH of Alabama.

H.R. 2332: Mr. LEACH of Iowa.

H.R. 2389: Mr. FIELDS and Mr. LOWERY of California.

H.R. 2478: Mr. BLANCHARD.

H.R. 2488: Mr. LELAND.

H.R. 2631: Mr. GOODLING.

H.R. 2826: Mr. BENNETT.

H.R. 3614: Mr. JONES of Tennessee, Mr. BARNES, Mr. ALBOSTA, Mr. ZABLOCKI, Mr. DORGAN of North Dakota, Mr. BLANCHARD, Mr. LEHMAN, Mr. BREAUX, Mrs. HOLT, Mr. DUNN, Mr. GILMAN, Mr. VANDER JAGT, and Mr. DERRICK.

H.R. 4022: Mr. NEAL.

H.R. 4070: Mr. STUDDS and Mr. LOWRY of Washington.

H.R. 4147: Mr. FASCELL and Mr. DICKS.

H.R. 4184: Mr. WILLIAMS of Ohio, Mr. PORTER, Mr. CRAIG, Mr. DERWINSKI, Mr. DAVIS, Mr. ROBERTS of South Dakota, Mr. APPLEGATE, Mr. MARTIN of North Carolina, Mr. LOTT, Mr. NAPIER, Mr. WHITEHURST, Mr. BEREUTER, Mr. BROYHILL, Mr. LONG of Maryland, Mr. HILER, Mr. CORCORAN, and Mr. MOTTL.

H.R. 4362: Mr. BEDELL.

H.R. 4387: Mr. DAUB.

H.R. 4389: Mr. DWYER and Mr. FAUNTROY.

H.R. 4397: Mr. NELLIGAN.

H.R. 4400: Mr. DOWDY, Mr. ASHBROOK, Mr. HORTON, Mr. EVANS of Georgia, Mr. CHAPPIE, Mr. GINGRICH, Mr. WILSON, Mr. EMERSON, Mr. ALEXANDER, Mr. BOWEN, Mr. NICHOLS, Mr. LOEFFLER, Mr. WHITEHURST, Mr. COATS, Mr. ENGLISH, and Mr. HUCKABY.

H.R. 4422: Mr. RUDD, Mr. FORSYTHE and Mr. LAGOMARSINO.

H.R. 4423: Mr. FORSYTHE.

H.R. 4424: Mr. FORSYTHE and Mr. LAGOMARSINO.

H.R. 4425: Mr. FORSYTHE.

H.R. 4426: Mr. FORSYTHE and Mr. RUDD.

H.R. 4427: Mr. FORSYTHE.

H.R. 4449: Mr. TAUKE and Mr. DAVIS.

H.R. 4450: Mr. BEDELL, Mr. BENJAMIN, Mr. DICKS, Mr. LEBOUTILLIER, Mr. LAGOMARSINO, Mr. MCCLORY, Mr. OXLEY, Mr. PEPPER, Mr. PORTER, Mr. ROE, and Mr. SMITH of New Jersey.

H.R. 4526: Mr. DE LA GARZA.

H.R. 4528: Mr. WON PAT.

H.R. 4593: Mr. PORTER, Mr. WYDEN, Mr. DREIER, Mr. PEPPER, Mr. MCCLOSKEY, Mr. MADIGAN, and Mr. NEAL.

H.R. 4657: Mr. LANTOS, Mr. GUARINI, and Mr. RICHMOND.

H.R. 4665: Mr. DANIEL B. CRANE.

H.R. 4666: Mr. PETRI and Mr. MOORE.

H.R. 4720: Mr. MITCHELL of Maryland.

H.R. 4775: Mr. VENTO, Mr. FROST, Mr. ROSENTHAL, and Mr. WEAVER.

H.R. 4776: Mr. SMITH of Pennsylvania, Mr. WILLIAMS of Ohio, Mr. PORTER, Mr. DERWINSKI, Mr. DAVIS, Mrs. HOLT, Mr. ROBERTS of South Dakota, Mr. APPLEGATE, Mr. WON PAT, Mr. MARTIN of North Carolina, Mr. LOTT, Mr. NAPIER, Mr. WHITEHURST, Mr. BEREUTER, Mr. BROYHILL, Mr. LONG of Maryland, Mr. COATS, Mr. HILER, Mr. CORCORAN, Mr. CRAIG, and Mr. MOTTL.

H.R. 4781: Mr. FINDLEY.

H.R. 4808: Mr. BARNES, Mr. BURGENER, Mr. CORRADA, Mr. FORSYTHE, Mr. LAGOMARSINO, Mr. MARTIN of North Carolina, Mr. MCDONALD, Mr. MOLINARI, Mr. MOTTL, Mr. PORTER, Mr. TAUKE, Mr. WON PAT, Mr. WHITEHURST, Mr. SOLOMON, Mr. HANSEN of Idaho, Mr.

RICHMOND, Mr. MARRIOTT, and Mr. MITCHELL of Maryland.

H.R. 4829: Mr. LOWRY of Washington, Mr. STUDDS, Mr. GEJDENSON, and Mr. JEFFORDS.

H.R. 4858: Mr. MCKINNEY, Mr. DERWINSKI, Mr. MCCLORY, Mr. GUNDERSON, Mr. PORTER, Mr. ASHBROOK, and Mr. BROWN of Ohio.

H.R. 4862: Mr. CHAPPELL, Mr. SPENCE, Mr. BARNARD, and Mr. EVANS of Georgia.

H.R. 4879: Mr. WORTLEY and Mr. LAFALCE.

H.R. 4885: Mr. MCDONALD.

H.J. Res. 225: Mr. ANDERSON, Mr. LOEFFLER, Mr. GINN, Mr. PATTERSON, Mr. PAUL, Mr. KEMP, Mr. NOWAK, Mr. ARCHER, Mr. DOUGHERTY, Mr. MAZZOLI, Mr. MARTIN of New York, and Mr. FOGLIETTA.

H.J. Res. 316: Mr. MONTGOMERY, Mr. D'AMOURS, Mr. YOUNG of Florida, Mr. WALGREN, Mr. WYDEN, Mr. MOFFETT, Mr. SHELBY, Mr. MADIGAN, Mr. BROYHILL, Mr. SPENCE, Mr. BENEDICT, Ms. OAKAR, Mr. NATCHER, Mr. ROGERS, Mr. MAZZOLI, Mr. GREGG, Mrs. SCHNEIDER, Mr. BEARD, Mr. RINALDO, Mr. SHAMANSKY, Mr. FRENZEL, Mr. SOLARZ, Mr. ROSENTHAL, Mr. ADDABBO, Mr. GUNDERSON, Mr. MAVROULES, Mr. JEFFORDS, Mr. MARKEY, Mr. GEJDENSON, Mr. STUDDS, Mr. HARTNETT, Mr. ATKINSON, and Mr. BINGHAM.

H.J. Res. 323: Mr. EMERSON, Mr. GINGRICH, Mr. MORRISON, Mr. HANCE, and Mr. PERKINS.

H.J. Res. 354: Mr. WALGREN, Mr. SMITH of New Jersey, Mr. LOWERY of California, Mr. WEBER of Ohio, Mr. CLAUSEN, Mr. LOWRY of Washington, Mr. MITCHELL of Maryland, Mr. PERKINS, Mr. DYSON, and Mr. OBERSTAR.

H. Con. Res. 159: Mr. SILJANDER and Mr. BEREUTER.

H. Con. Res. 168: Mr. BLANCHARD and Mr. MINETA.

H. Con. Res. 178: Mr. TAUZIN, Mr. HILLIS, Mr. DUNN, Mr. QUILLEN, Mr. PAUL, Mr. FOUNTAIN, Mr. MAVROULES, and Mr. DUNCAN.

H. Con. Res. 205: Mr. FASCELL, Mr. DIXON, Mr. GEJDENSON, Mr. MINISH, Mr. LAFALCE, Mr. LOWRY of Washington, Mr. ROSENTHAL, Mr. YOUNG of Missouri, Mr. CRAIG, Mr. BIAGGI, Mr. BLANCHARD, Mr. GILMAN, Mr. DOUGHERTY, Ms. FERRARO, Mr. GOLDWATER, Mr. HUGHES, Mr. JEFFORDS, Mr. DANIEL B. CRANE, and Mr. LANTOS.

H. Res. 153: Mr. BRODHEAD and Mr. BEILENSON.

H. Res. 200: Mrs. ROUKEMA, Mr. SIMON, Mr. DORNAN of California, Mr. MCKINNEY, Mr. MOLINARI, Mr. SHANNON, Mr. FLORIO, Mr. CLINGER, Ms. OAKAR, and Mr. GOLDWATER.

H. Res. 211: Mr. MOLLOHAN.

H. Res. 264: Mr. BAILEY of Missouri, Mr. MCCOLLUM, Mr. MORRISON, Mr. WON PAT, Mr. LEBOUTILLIER, Mr. BUTLER, Mr. JOHNSTON, Mr. LUJAN, Mr. CRAIG, Mr. GLICKMAN, Mr. BLILEY, and Mr. EMERSON.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

[*The following Petition was submitted on November 10 as a Memorial. It has subsequently been reclassified as a Petition*]

267. By the SPEAKER: Petition of the House of Representatives of the Republic of Cyprus, Nicosia relative to disarmament; to the Committee on Foreign Affairs.

[*Submitted November 12, 1981*]

268. Also, petition of the 27th annual session of the North Atlantic Assembly, Munich, transmitting the resolutions and recommendations adopted by the meeting; to the Committee on Foreign Affairs.

269. Also petition of the House of Representatives of Columbia, Bogotá, relative to arms sales to Venezuela; to the Committee on Foreign Affairs.

270. Also, petition of the New England Regional Team, National Association for Foreign Student Affairs, Providence, R.I., relative to Federal programs for international exchange; to the Committee on Foreign Affairs.

SENATE—*Thursday, November 12, 1981*

(Legislative day of Monday, November 2, 1981)

The Senate met at 11:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

Our Father in heaven, as I pray this morning, I am mindful of each person who is part of the Senate family. Help us to see each other as Thou dost see us; to understand that each one is of inestimable value to Thee; that each is unique and irreplaceable. Forgive us for ever evaluating others on the basis of criteria which are false and unworthy. Forgive us for comparing ourselves with others, forgetting that each is intended to be unlike all others in the divine diversity and that in Thy love, no one is more or less important than another.

We remember those who are in the hospital, Senators GOLDWATER and LEAHY. We pray for complete recovery for them and Thy comfort for their loved ones. We pray for any others who are ill or facing difficulty and ask Thy special blessings upon them and their families. Gracious Father, teach us to care for each other, to treat each other as we would like to be treated. Help us to love each other, to see in each other the image of God, and to reverence life. We ask this in the name of Him who loved and cared in perfection. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE TODAY

Mr. BAKER. Mr. President, according to my notes, this morning, we have special orders in favor of the Senator from Washington (Mr. GORTON), the Senator from Texas (Mr. TOWER), and the Senator from Texas (Mr. BENTSEN), to be followed by a period for the transaction of routine morning business to extend not past the hour of 1 p.m., during which Senators may speak for not more than 5 minutes each. It is my understanding as well, Mr. President, that at 1 p.m., under the order previously entered, the Senate will resume consideration of H.R. 4169, the Commerce-Justice-State appropriations bill, until not later than the hour of 6:10 p.m. At that time, the Senate will temporarily lay aside the Commerce-Justice-State appropriations bill if the same has not been disposed of at that time and resume consideration of S. 1112, the Export Administration authorization bill, at which time, the Percy-Dixon amendment will be the pending amendment, on which there is a time limitation of 20 minutes, to be followed by a rollcall, which has already been ordered, unless a second-degree amendment is offered to the Percy-Dixon amendment, in which case there will be 20 minutes of debate on the second-degree amendment, to be followed by a vote on the second-degree amendment.

After the disposition of the Percy-Dixon amendment as amended if amended, the Senate will turn to consideration of an amendment by the distinguished Senator from West Virginia (Mr. ROBERT C. BYRD) the minority leader, on which there is a time limitation of 30 minutes for debate, to be followed by a rollcall which has already been ordered; to be followed thereafter immediately by third reading of S. 1112, the Export Administration authorization bill. The Senate will then proceed to the companion bill, H.R. 3567, at which time, it is anticipated that there will be a motion to strike all after the enacting clause of the House-passed measure and substitute the Senate language as finally adopted; then proceed to third reading and a final vote by rollcall, which has been previously ordered, for disposition of this measure.

At that time, Mr. President, the Senate will resume consideration of H.R. 4169, the Commerce-Justice-State appropriations bill, if the same has not been disposed of earlier.

I recite that schedule, Mr. President, since I wish to remind Senators that these arrangements were made before the 1-day recess in the Senate's activities on yesterday for Veterans Day, and also to point out, Mr. President, that today, being Thursday, will be a late day. I expect the Senate to be in session past 8 o'clock tonight.

CONGRATULATIONS ON A SUCCESSFUL LAUNCH OF THE "COLUMBIA"

Mr. BAKER. Mr. President, I wish to announce to the Senate that the space shuttle *Columbia* was successfully launched on her second historic flight this morning. I want to take this opportunity to congratulate all of those involved in the flight, which began just over an hour ago, once again with a breathtaking liftoff from its launching pad at Cape Canaveral. Astronauts Joe Engle and Dick Truly are in good shape and in routine communication with Mission Control in Houston. I am sure Dick Truly would agree that there is perhaps no better way to celebrate his 44th birthday, which is today, than this unprecedented reuse of a space vehicle.

I extend to the crew of the shuttle and all of those associated with the launch my best wishes and congratulations, and I presume to speak on behalf of the Senate in sending them congratulations and the best wishes of the Senate as a whole.

Our colleague from New Mexico (Mr. SCHMITT) was present at the liftoff and I am sure that it was an especially exhilarating experience for him, since he was among the crew of the last U.S. space mission to land on the Moon and to return.

Mr. President, I have no further need for my time. If any remains under the standing order, I am prepared to yield to any Senator seeking recognition.

Mr. BENTSEN. Mr. President, if I may, I wish only to join in the accolades of the distinguished majority leader and state on the part of the minority that he has stated it well and we join in the excitement and pleasure of a successful launch.

Mr. BAKER. I thank the distinguished acting minority leader. It is a matter of pleasure for both of us to acknowledge

that the space program, which has been so singularly successful, has indeed been a bipartisan effort, spanning the Presidencies of both Republican and Democratic Chief Executives.

Mr. President, I yield back the remainder of my time under the standing order.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDING OFFICER (Mr. COHEN). Under the previous order the acting minority leader is recognized.

Mr. BENTSEN. Mr. President, the acting Democratic leader has no need for the time allocated and I yield it back.

RECOGNITION OF SENATOR TOWER

The PRESIDING OFFICER. Under the previous order, the Senator from Texas (Mr. TOWER) is recognized for not to exceed 15 minutes.

CIA-DEFECTOR PHILIP AGEE AND THE EL SALVADOR WHITE PAPER

Mr. TOWER. Mr. President, on June 8 and 9 of this year, the Wall Street Journal and Washington Post, respectively, came out with articles highly critical of a State Department white paper on El Salvador issued in late February 1981. The two articles, while not the only critical statements on the subject, constituted the basis of a wide public perception that the white paper had been discredited and that the administration could not substantiate significant Soviet-bloc involvement in arming the leftist guerrillas in that country.

According to a Washington Post editorial on June 23, the white paper had been subjected to "closer inspection by this newspaper and the Wall Street Journal." It was consequently found to be "defective" and "in some degree discredited." A Newsweek article entitled "A U.S. White Paper Runs a Bit Dingy" cited "independent investigations" by the Post and Journal in raising "serious questions" about the State Department paper. The New Jersey Record exemplified local newspapers across the country when it wrote in an editorial:

> Now comes word that the White Paper . . . was incorrect and that the threat of direct Soviet intervention in El Salvador was more in the mind's eye of some CIA official than in anything resembling reality.

Representative MICHAEL BARNES, chairman of the House Inter-American Affairs Subcommittee, launched an attack on the white paper asserting that "the press interpretations seem sounder than the administration's interpretations." He declared that "it was only a matter of time until investigative reporters" demonstrated that the white paper evidence was circumstantial. My distinguished colleague, Senator ROBERT BYRD, in a column in the Washington Post stated:

> The nation's major newspapers have challenged the accuracy of the so-called White Paper.

The Post and Journal pieces were subsequently placed in the CONGRESSIONAL RECORD by my distinguished colleague, Senator LEVIN, and Representative VIN WEBER.

On April 9, 2 months before the Post and Journal analyses appeared, CIA defector Philip Agee issued his own 46-page critique of the white paper. It is a document which neither the Post nor Journal identified as a major source for their own articles. Agee is in fact not mentioned in either article although both newspapers now admit that their reporters had seen Philip Agee's critique before writing theirs. They also insist that any parallels between Agee and their own accounts were merely coincidental. Yet many of the criticisms offered by the two newspapers so closely parallel the Agee critique that errors in Agee's analyses are repeated in theirs.

Agee's paper, although released in April, received scant attention at the time. The exaggerated charges and errors in his criticism of the white paper were entirely consistent with his past record. But when two such respected newspapers as the Post and Journal printed reports reiterating Agee's inaccurate reading of the white paper, the effect was far greater. The criticisms gained credence because they were not attributed to Agee. The State Department issued an effective and specific rebuttal to the accusations of defects in the white paper. However, their response was buried on page 29 in the Post and not carried at all in the Journal until August 21 when the Journal attempted to defend its critique of the white paper.

On August 12, former Newsweek senior editor Arnaud de Borchgrave published an op-ed piece in the New York Times. It was mainly in response to the accusations he raised along with the investigations of Cliff Kincaid, a reporter for the weekly paper Human Events that the Journal felt compelled to answer charges of Agee influence on its reporting of the white paper. De Borchgrave charged in his New York Times article:

> Mr. Agee's allegations that the administration's white paper on Communist influence in El Salvador was a fraud were avidly gobbled up by the so-called alternative press before finding their way into other news reports. His material—supplied by his Cuban friends—was a primary source for recent articles in the Wall Street Journal and the Washington Post.

In early July, Cliff Kincaid had charged in his Human Events article entitled "The Invisible Hand of Philip Agee" that the Post and Journal stories were a warmed-over rehash of the work already done by Philip Agee. Kincaid presented for comparison statements from Agee's critique of the White Paper with the two articles from the Post and Journal. He also mentioned in his article that the Post reporter had cited Agee as a source in an early draft of his story, but at his editor's suggestion, that citation had been dropped.

There was a significant spinoff from the Post and Journal articles as local newspapers across the country and the international media carried the issue of the so-called faulty State Department white paper on El Salvador. Those seeking a way to discredit U.S. policy as well as those genuinely concerned with the validity of the white paper were presented with what appeared to be a case of the administration pursuing a defective central American policy based on faulty documentation.

Yet, the public would have reacted differently had it been told that CIA defector Philip Agee perhaps played a principal role in these critiques. The issue remains, that such instances of irresponsible journalism can only serve to damage U.S. foreign policy initiatives through misleading the American public as to what is at stake—and, I might add, misleading the foreign public as well.

I find it very disconcerting that the work of a man who was obviously a traitor to the United States of America would influence the American journalists and the kind of presentation of the news that they give to the American public.

Mr. President, I ask unanimous consent at this point to have printed in the RECORD a table providing point-by-point comparisons of Philip Agee's statements on the white paper, with the Washington Post and Wall Street Journal statements, as well as the State Department's response to the criticisms of the white paper.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

POINT-BY-POINT COMPARISON

PHILIP AGEE, APRIL 9, 1981	THE WASHINGTON POST, JUNE 9, 1981	THE WALL STREET JOURNAL, JUNE 8, 1981	STATE DEPARTMENT RESPONSE
Statements in the State Department analyses supposedly based on the documents but which find no support whatsoever in the documents.	On several major points, the documents do not support conclusions drawn from them by the administration.	Much information about the White Paper can't be found in the documents at all. This information now is attributed by the State Department to other, still secret sources.	The Special Report is not based on captured documents alone, and was never claimed to be. The captured documents go far toward confirming the Report's conclusions. But the Special Report also contains photographs of weapons captured from the guerrillas, and specifically points out that it is based on information going beyond the documents. The Report's second sentence begins: "The evidence drawn from captured guerrilla documents and war material and corroborated by intelligence reports . . ." Further, "The Cuban and Communist role in preparing for and helping to organize the abortive 'general offensive' early this year is spelled out in the following chronology based on the contents of captured documents and other sources" (emphasis added). In the February 23 on-the-record press conference in which the Special Report was presented, Acting Assistant Secretary John Bushnell stated, ". . . let me say that whereas the documents lay out a great deal of information in one place, they are not our only source. We have a great many other sources through technical means and human intelligence, through other intelligence methods. . . ." Even if the captured documents had not fallen into our hands, the foreign weapons supply effort, if not all of its details, would have been known. But it would not have been possible to give so full a picture of that effort in a publicly releasable form.
The White Paper analyst, without giving reasons, says that the guerrilla leader who made the trip is Shafik Handal, the PCS Secretary General.	The White Paper, in summarizing this document, makes it appear that Handal wrote it. In the book of documents released with the white paper, this document is not attributed to any specific author.	The White Paper was more certainly wrong. Mr. Glassman indicates, in attributing to Shafik Handal the authorship of an account of an arms soliciting trip last summer to the Soviet Union and six other countries.	The Special Report did not intend to attribute authorship of the Handal trip report. While the editorial short-hand used in one instance could be read to imply authorship, the translation makes clear that Handal is referred to in the third person. In any case, this ambiguity about authorship is not material to whether Handal made the trip and the nature of commitments received. A September 1 report of an August 30 meeting of the guerrilla joint directorate (Document F), obtained separately from the trip report, confirms that a trip to Vietnam, Ethiopia, and Eastern Europe was made by the Secretary-General of the Communist Party—that is, Handal. This document details commitments made on the trip which substantially confirm the listing in the report of Handal's trip. Another separate report of guerrilla meetings in Havana notes the departure, on May 30, by "Simon" on a trip (Document D). The pseudonym "Simon" is known to belong to Handal. Other intelligence information exists on the trip and the commitments made.

POINT-BY-POINT COMPARISON—Continued

PHILIP AGEE, APRIL 9, 1981	THE WASHINGTON POST, JUNE 9, 1981	THE WALL STREET JOURNAL, JUNE 8, 1981	STATE DEPARTMENT RESPONSE
In document G the EMGC does note that it had a meeting with Arafat on July 22. But there is not a word about military equipment, much less arms and aircraft, being promised by Arafat.	There is not a single word in the document about Arafat promising arms and aircraft.	Other major assertions in the White Paper seem questionable. One is that on July 22, 1980, Yasir Arafat, the PLO leader, met Salvadoran guerrilla leaders in Managua, Nicaragua, and gave promises (of) military equipment including arms and aircraft.	The document reports the meeting with Arafat. The promises referred to in the special report were reported by intelligence sources other than the documents. It was made clear in the White Paper that non-documentary information was also used.
. . . nowhere in the document is there any mention of the Political Commission, nor is there any date contained in the two pages of notes, nor is there any mention of Handal. . . . There are two very different handwritings involved in these notes.	. . . It is obvious that the document is written in two distinctly different handwritings. The document contains no reference to Handal or to a meeting of the Communist party, and it is not dated.	The White Paper also says Mr. Handal wrote another document—two pages of handwritten notes called Document C. The notes don't contain Mr. Handal's name or any date or identification, but the White Paper says that they are notes "taken during an April 28, 1980, meeting of the Salvadoran Communist Party." The notes, however, appear to be written in at least two different handwritings, making them difficult to ascribe to one author.	Our source of information on the April 28 Communist Party meeting (Document C) is the detailed notes taken during the meeting. The notes are handwritten and the handwriting clearly does change. This phenomenon is seen in other lengthy, handwritten guerrilla reports and presumably represents a change of rapporteur during the session. The crucial issue of the accuracy of reporting, not identification of the rapporteur. The person speaking in the cited notes is "Simon"—the known pseudonym of Communist Party leader Handal. His remarks are cited as reported in the detailed notes.
One has to wonder why, if the analyst mentioned 100 U.S. M–16 rifles captured in this incident, he only mentioned that "several" were traced to Vietnam—instead of giving the exact number—especially since no M–16s appear on the Vietnam weapons list.	. . . but the M–16 assault rifle . . . was not on the detailed list given in the document. . . . Why only "some" could be traced to Vietnam was not explained.		There is no doubt that weapons from Vietnam have been shipped to the Salvadoran guerrillas. The AR–15 rifle mentioned in the Handal trip report is the civilian designation of a version of the M–16 rifle. Why the Handal trip report or the Vietnamese used the AR–15 designator to refer to the M–16s being shipped is not known. Although many weapons only have lot numbers that do not allow definitive traces, M–16s can be individually traced once corresponding records of serial numbers are located. Most of the M–16s in the truck referred to in the Special Report were successfully traced directly to Vietnam, where they had been delivered by the manufacturer to U.S. units they left behind. The other captured M–16 rifles could only be traced as having been delivered during the Vietnam war period to U.S. reports where no documentation on further movement was readily available.
But the Spanish notes do not say "war footing" but estado de pelea which, if literally translated, would mean "a state of quarrel, dispute or struggle."	In fact, the author of this part of the document did not use the phrase for war footing (estado de querra) but refers instead to a struggle or dispute (estado de pelea).		"Pelea" means fight in Spanish. Had either of the writers really been interested in translation accuracy (which is immaterial to the White Paper's content since only the Spanish originals were used in analysis) they would have noticed another translation error. Line 6–7 of the English translation of Document C reads "Main tasks: Make adjustments in the Party to carry out the struggle." The translation should have read, "Main tasks: put the party in shape to make war (querra)."
The inaccuracies, fabrications, embellishments and false claims made on the White Paper . . . into little more than a blatant propaganda exercise.		A close reading of the White Paper indicates . . . that its authors probably were making a determined effort to create a "selling" document, no matter how slim the background material.	Most of the criticisms of the Special Report are either based on incorrect assumptions or are inaccurate. The few points of misstated detail or ambiguous formulations that have been correctly identified do not in any way change the conclusions of the Report; and the analysis and conclusions of the Special Report are soundly based and fully valid.

POINT-BY-POINT COMPARISON—Continued

Document I is another fragment and we are told nothing of the rest of this report. The introductory comment to Document I asserts that this report is dated September 26, 1980, but no date is to be seen on the original document. What the State Department analyst fails to say, because it did not fit into his scenario, is that in Document I, when the 130 tons in "Lagos" are mentioned, it is also stated that the guerrillas have been able to bring into El Salvador only 4 tons of the 130 supposedly in Nicaragua . . . and for the meeting which is the subject of this report, the three people who met had not even made arrangements for a place to hold their meeting.		Oddly enough, Document I, which provides the rationale for this extrapolation, seems largely given over to complaints by the unidentified author about the ineptitude of guerrilla leaders in even finding a meeting place, and the slowness of arms deliveries from outside El Salvador. The document purports to be the minutes of a meeting of three men, said to be the "Guerrilla Joint General Staff." The State Department translation of the minutes includes a date at the top, Sept. 26, 1980, which isn't on the document, and only the first page of an unknown number of pages was distributed.	This is an excerpt of a longer document. The date appears elsewhere. Large-scale arms deliveries began to move into El Salvador in November in preparation for the January offensive.
In addition, the original notes say "we are not taking advantage of it." There is no "yet" in the original notes.	The translation quotes the author as saying that the attitude of the socialist camp "is magnificent." He adds "we are not yet taking advantage of it." In fact, though, the word "yet" does not appear in the Spanish original.		Translations were not consulted in making the White Paper analysis, State Department officials told us.
The document does mention that 130 tons are in storage in "Lagos", and that these 130 tons are "one-sixth of all the material obtained with which the DRU will count on concentrated in Lagos". It is from this passage that the White Paper analyst extrapolated the figure of nearly 800 tons of weapons committed to the guerrillas.		The 800 tons figure also represents an extrapolation, Mr. Glassman says. He says he multiplied 130 (the tonnage of arms one document says are stored in Nicaragua) by six to arrive at "nearly 800."	The impression conveyed by the newspaper's account—that the multiplication by six was arbitrary and designed to inflate the estimate—is misleading. The calculation is drawn directly from the guerrilla documents. The account of the September 26, 1980 guerrilla general staff meeting (excerpted as Document I in the published document collection) states explicitly that 130 tons of arms and equipment were then in Nicaragua, specifying that this was "equivalent to one-sixth of all the material obtained that the DRU (joint guerrilla directorate) will have concentrated in Lago (Lagos) (code name for Nicaragua)." 130 tons is one sixth of 780 tons.
Nowhere in the documents is it established that 200 tons (of weapons) actually arrived in El Salvador.	There is no concrete evidence to support this claim (of 200 tons of weapons to El Salvador) in any of the documents released with the White Paper.	But nowhere in the documents is there any mention of 200 tons.	The overall estimate of "nearly 200 tons" contained in the Report is an intelligence community conclusion based on separate reporting on the increased volume of captured imported military weapons, on the mounting pace of land, sea, and air movement, and on the arms, munitions and other equipment actually used by the guerrillas during their January offensive. There is some data in the documents on this point, but it is not definitive. The guerrilla logistics coordinator in Managua on November 1, 1980, reported (Document K) that the Sandinistas provided him with a delivery schedule of 109 tons for the month of November alone—a figure which, considered in conjunction with mounting later deliveries, could be used to justify an estimate larger than 200 tons.
However, the analysis failed to mention that this "agreement in principle" would have to be approved by higher authority. Moreover, according to the document, the final approval for air transport (for arms to the Salvadoran guerrillas) was not given.	Neither this nor any other document released by the State Department indicates that the Soviets ever did provide the requested air transport.		Handal, as noted in the report on his trip, did encounter initial difficulty in securing Soviet commitment to transport arms from Vietnam by air. We assume the transportation difficulties were overcome in some form, given the arrival of Vietnamese-origin U.S. arms in Central America and the greatly increased availability of arms for the guerrillas beginning in November 1980.

POINT-BY-POINT COMPARISON—Continued

PHILIP AGEE, APRIL 9, 1981	THE WASHINGTON POST, JUNE 9, 1981	THE WALL STREET JOURNAL, JUNE 8, 1981	STATE DEPARTMENT RESPONSE
I found it interesting that of only two paragraphs of the 19 documents that were not translated in the English versions, one was the lines quoted above: "The same cable says that this cargo would leave on our ship on August 5." It is possible that the analyst was confused over "our ship", and decided to leave these lines out of the translation thinking that no one would read the originals carefully.	But the one sentence in the Spanish original (also released by State) which the Department dropped in its English translation of the document, seems to confirm numerous other hints within the document that it was written by a Cuban. . . . The last sentence says that this cargo arms "will leave on our ship the fifth of August."		Dropping of the line in the translation was inadvertent. If the goal was deception, the lines would have been dropped in the Spanish language original. Whether the Handal trip report was written by a Cuban, a Vietnamese, or an Eskimo, the only relevant question is whether it is an accurate report.
Certain documents are said to be "excerpts" and include no name of writer or date in the Spanish original. Yet the introductory remarks to these documents describe them as being written by such and such a person on such and such a date.		Several of the most important documents, its obvious, were attributed to guerrilla leaders who didn't write them, and it's unknown who did.	The specific identity of the author in this case and other cases . . . is irrelevant to the evidence in the document. With operational documents and reports of meetings it is the content which establishes validity, not identification of authorship . . . the author and people and places mentioned are sometimes identified by code names or abbreviations. The identification of these code names or abbreviations necessarily involve intelligence judgments.
In Document G the EMGC does note that it had a meeting with Arafat on July 22. But there is not a word about military equipment, much less arms and aircraft, being promised by Arafat.		Other major assertions in the White Papar seem questionable. One is that on July 22, 1980, Yasir Arafat, the Palestine Liberation Organization leader, met Salvadoran guerrilla leaders in Managua, Nicaragua, and gave "promises (of) military equipment, including arms and aircraft."	This came from intelligence sources other than the documents. It was made clear in the White Paper that non-documentary information was also used.
In all of the documents, even if you believe them, the only support actually given by the Soviet Union was an airline ticket for the PCS Secretary General from Moscow to Hanoi.	". . . this document (the Handal trip report) is the only one that linked the Soviets directly to the Salvadoran civil war."	The only concrete instance of Soviet aid delivered to the Salvadoran rebels reported in the 19 documents was an airplane ticket for one guerrilla, presumably Mr. Handal.	This is simply not true . . . published Document B refers to a guerrilla meeting with Soviets in Mexico City in April 1980 and Document D refers to a meeting with Soviets in Managua in May–June 1980. The Soviet Union is also repeatedly referred to in unpublished documents as the "strategic ally" of the Salvadoran guerrillas. The character of relations among Communist countries makes it most unlikely that parallel arms and military equipment commitments from virtually all of Moscow's Warsaw Pact allies (minus only Romania and Poland) plus other close Soviet allies (such as Cuba and Vietnam) would occur without Soviet blessing.
Moreover, there is no indication in the notes that the person writing was referring to a "unification of the armed movement." In the notes themselves the unification question related to the trade union movement and the possibility of a joint leadership not the military struggle.		. . . the White Paper quotes a report allegedly prepared by Handal as saying, "In reference to a unification of the armed movement. . ." The discussion, however, appears to be about labor unions.	Agee and Kwitny are both wrong, the point relates to regional Communist "parties" rather than "labor unions."
I simply cannot understand why the White Paper analyst and Juan de Onis failed to understand that this was meant to be an internal Cuban report, except that if they described it as such, they would have been unable to explain how the report could have made its way into a "document cache" in El Salvador.	If this was a Cuban report on Handal's trip, why was it found in a cache of rebel documents in Salvador?	Mr. Glassman acknowledges that the report couldn't have been written by Mr. Handal because from the contest the author clearly wrote from Cuba after Mr. Handal himself had left.	Foreign and domestic origin reports were received and held by guerrilla groups in El Salvador. The report was probably written in Cuba, but not necessarily by a Cuban. If a Cuban, indeed, had written it, this fact would reinforce, not weaken, the White Paper's conclusions.
Moreover, it is evident in the document that the Salvadoran General Staff was kept waiting for ten days before Bayardo Arce finally went to see them . . .		This reference is contained in an unsigned report. "Document G," in the contest of much complaining that a delegation of Salvadoran leftists was cold-shouldered and otherwise insulted on a visit to Nicaragua for the anniversary celebration of that country's revolution.	These observations ignore the bottom line—Arce offered to provide ammunition and to exchange Western-manufactured arms in the Sandinista army inventory for Communist (arms) that the Sandinistas would be receiving.

POINT-BY-POINT COMPARISON—Continued

The documents contain no suggestion that coordination achieved by the guerrilla organizations through their unity agreement was a "precondition for large-scale Cuban aid."	At another point, the White Paper says that Salvadoran guerrilla leaders formed a united front "as a precondition for large-scale Cuban aid." Mr. Glassman acknowledges that there is nothing to that effect in the documents.	The precondition conclusion is fully substantiated by large amounts of intelligence reporting on Cuban involvemeint with Salvadoran and other Central American revolutionary groups. Havana's encouragement of unification was motivated by a desire to maximize insurgent strength and to avoid use of Cuban support by one guerrilla group against another. The Cubans fostered the coalescence of the major Salvadoran guerrilla groups in Havana where two unification agreements were signed. The May 1980 Havana unification agreement was publicized. Major Communist bloc assistance appeared subsequent to this fusion. A similar sequence of events occurred during the Nicaraguan insurrection.
It is signed by "Ana Maria" who, in the glossary to this document and several others, is said to be in reality Ana Guadalupe Martinez, a well-known leader of the ERP guerrilla organization . . . There is (no) evidence that "Ana Maria" is the "nom de guerre" of Ana Guadalupe Martinez . . . If "Ana Maria" is indeed the ERP leader Ana Guadalupe Martinez, she would have never put the slogan "Revolution or Death! The People Armed Will Win!" because this is not the slogan of the ERP. This slogan is the slogan used by the Popular Liberation Forces (FPL) . . .	The document itself—the most prominently featured document in the White Paper—bears the name "Ana Maria." The Salvadorans say the list was really drawn up by Ana Maria Gonzalez, who belongs to another group, according to Mr. Glassman.	This document—a DRU meeting report—identifies its author only as "Ana Maria." When the document collection glossary conjectured that this was Ana Maria Guadalupe Martinez of the ERP guerrilla group, one official of the Salvadoran Embassy in Washington offered as his opinion that the author was instead Ana Maria Gomez of the FPL guerrilla group. It was we who first made this question of the author's identity known to reporters. The Analysis in the Special Report depends only on this being an account of an actual guerrilla meeting, not on which one of the Ana Marias wrote it.

RECOGNITION OF SENATOR BENTSEN

The PRESIDING OFFICER. Under the previous order, the Senator from Texas (Mr. BENTSEN) is recognized for not to exceed 15 minutes.

A SKILLED LABOR CRISIS—THE LOCATION OF NEW JOBS IN THE 1980's

Mr. BENTSEN. Mr. President, this speech is the fifth in a series I am devoting to a review of the prospects for a skilled craftsman and technical personnel shortage this decade.

In my fourth talk in this series, I summarized the outlook for growth in our labor force this decade. The conclusion was not encouraging. Because of the markedly low birth rates in our Nation during the 1960's and 1970's, our labor force may well grow as little as 15 million persons this decade. That is 4 million fewer persons than the number of jobs added to our economy during the sluggish 1970's. Consequently, if our economy grows as fast or faster this decade than it did during the 1970's, our Nation faces a prospective labor shortage of major magnitude in the coming years.

I noted, Mr. President, that this prospective labor shortage should result in reducing unemployment, rising real wages, and rising productivity—good news for us all. However, I also noted that this looming shortage could become a noose about our economy's throat and lead to a major wave of inflation if we does not rapidly develop laborsaving or laborstretching devices and equipment.

My speech today moves away from general macro labor markets to a review of the geographic distribution of new jobs this decade. I will examine where jobs are expected to be created through 1990. As we will see in a moment, the statistics on this question are revealing. It is important that Congress and our Nation have a clear view of where the benefits and burdens of employment growth are projected to fall in coming years as they debate the wisdom of new labor policies. In particular, it is important for us all to realize that the question of growth in the Sun Belt or Snow Belt greatly oversimplifies a complex issue.

REGIONAL JOB GROWTH

I noted in my last speech that our labor force will expand some 15 percent to about 120 million men and women by 1990. That growth will occur in an uneven pattern across our Nation and at a different pace for various occupations.

In November 1980, the Department of Commerce released a detailed study entitled "Regional and State Projections of Income, Employment, and Population to the Year 2000." This study contains a current review of prospective job growth by geographic location. It suggests that the pattern of job creation in the 1970's will be generally repeated this decade with the Sun Belt States of Texas, California, and Florida experiencing more growth than States elsewhere.

It is important to note that the Commerce Department projected an absolute rise in employment during the 1980's for every State. However, because of the declining rate of growth in the Nation's work force, virtually no State is projected to experience an increase in its employment growth rate through the year 2000 compared to the robust 1970's.

The two exceptions are service industry-intensive Rhode Island and New York. And the increased employment growth rate in New York State is the result of an employment gain projected for the 1980's compared to the loss of over 200,000 jobs in the past decade.

The rate of decline in employment growth projected by the Commerce Department was sharpest in those regions—the Far West, Rocky Mountains,

Southeast, and Southwest—which grew the fastest in the 1970's. Even so, the projected employment growth in these areas for the period 1978 to 1990 is far above the national average. The projected increase for the Southwest region, for example—a region which includes Arizona, New Mexico, Oklahoma, and Texas—is almost 50 percent more than the increase projected for the Nation as a whole. An even greater disparity from the national average exists for States in the Rocky Mountain region. Table I summarizes this regional data and I ask unanimous consent, Mr. President, for a table, entitled "Table I, Projected Regional Job Growth, 1978–90," to be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE I—*Projected regional job growth, 1978–90*

[In percent]

Region:	Job Growth
Rocky Mountain	35.7
Southwest	30.8
Far West	27.3
Southeast	25.3
Great Lakes	17.3
Claims	16.7
New England	15.2
Mideast	10.5

Source: Department of Commerce, Survey of Current Business, November, 1980.

Mr. BENTSEN. Mr. President, this data reveals that the Southwest region, which includes my State of Texas, will see new jobs this decade created at about double the rate of New England and at about triple the rate of the Mideast States.

STATE JOB GROWTH

This regional relative growth data muffles much greater differences between individual States. For example, employment in Wyoming is projected to grow 45 percent and in Texas by 30 percent this decade, compared to less than 6 percent projected for New York State, or 11 percent for Pennsylvania. Relative data on employment growth rates are useful as one indicator of the stress which particular regions will experience in meeting the infrastructure demands posed by a growing work force. Perhaps more useful, however, are data on the absolute increase in jobs expected to occur among the States. Table II summarizes Commerce Department data projections of job growth for the 13 States expected to experience the greatest absolute increase in employment over the 1978–90 period. I ask unanimous consent for that table to be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE II.—*State employment growth projected, 1978-90*

State:	Employment growth
California	2,572,000
Texas	1,905,000
Florida	1,174,000
Michigan	804,000
Ohio	786,000
Illinois	762,000
Tennessee	614,000
Pennsylvania	604,000
North Carolina	564,000
New Jersey	561,000
Virginia	559,000
Colorado	545,000
Washington	533,000

Source: Department of Commerce, Survey of Current Business, November, 1980.

Mr. BENTSEN. Mr. President, this table reveals where the greatest burden, as well as benefits, of job growth over this decade will fall. Keep in mind that about 19 million new civilian jobs are projected to be created over the period 1978 to 1990, by the Labor Department, comparable to the 15 million persons which I projected in an earlier speech to enter our labor force over the shorter period of the 1980's.

The new jobs will not be evenly distributed among the States. One in every four of these new jobs is projected to be added to the labor force either in Texas or California. One in every 10 new jobs will be in Texas, alone. For every one job added in Pennsylvania or Tennessee in the 1980's, better than three jobs are projected to be added in Texas and four in California. Other comparisons are equally striking. For every job added in New England to its labor force in the decade, over two other jobs will be added in Texas.

There will be two jobs added in Massachusetts for every one job in New Mexico and over two jobs in New York for every one added in Nevada or Utah. There will be six times as many jobs added to the labor force in Texas as in Massachusetts and four times as many in Texas as in New York State.

The States noted in table II will receive a disproportionate share of employment growth this decade. We saw a moment ago that the Sunbelt regions are expected to grow faster than the Snowbelt. The data in table II reveal, however, that the actual growth in employment is projected to be more evenly distributed than this statement suggests.

The hoopla over Sunbelt versus Snowbelt is not without justification because the States expecting the biggest job growth are Texas, California and Florida. Yet, it is also true that many other States and regions will experience major employment gains, as well. In fact, of the top 13 job growth States in the 1980's, four are in the Southwest or West, three are in the upper Midwest, four are in the South and two are in the East.

Consequently, while the burden and benefits of job growth in the 1980's fall relatively heavily on the Sunbelt, they will exist to a significant degree in every area of our Nation. No State will be immune to the burdens of growth or bereft of its benefits this decade.

For example, yesterday, I was in Detroit. It was interesting to me to note that the newspaper with the third largest circulation there is the Houston Chronicle, delivered daily by airplane. The reason it has the third largest circulation in Detroit is its classified section and the jobs that are being offered.

So what we are seeing is a transfer of employment. There are a lot of people who think that turns into a blessing for the State that is expanding, it is just not necessarily true.

Anyone who tries to use the Houston mass transit system will find it is one of the most clogged trafficways one can find anyplace in the Nation. And, because of continued growth, it is one that they are having a very difficult time overcoming.

PARAMETERS FOR ACCOMMODATING JOB GROWTH

Our Nation has always applauded economic and job growth, albeit more vigorously when it occurs down the street rather than next door. We have generally been willing to accept the burdens of such growth—congestion, noise, rising school populations—as a necessary tradeoff to the employment and income benefits of growth. Over the last decade, in fact, it has been our Nation's inability to sustain robust growth which created major voter discontent with both the Ford and Carter administrations.

In the last tax bill, I sponsored legislation that would give a very substantial tax credit for the refurbishing of old plants in order to encourage job creation and growth in places where jobs and people are now.

But if we try to go beyond that, I think we run into some problems that result in some very uneconomic results. There is some debate now, whether the Federal Government—acknowledging the benefits of growth—should go further than this and much more actively seek to spread that growth to all regions of our Nation. I do not believe that economic growth patterns should be subject to that sort of major manipulation. In fact, I am not convinced that the Federal Government—even should it want to—could effectively turn aside, much less halt, the population and job trends at work now. It would be a very inefficient use of taxpayer funds, in any case, to try to tilt against these winds. Indeed, it is important that public policy be designed in recognition of these trends and to accommodate them.

At the same time, it is important that steps taken now and in the future to deal with our current and prospective skilled labor shortage not be viewed as merely benefiting growth States.

The Congress placed a major stress in the recent tax bill in trying to put incentive into the economic system, with our shortened depreciation schedules and investment tax credits, to boost productivity in this country. It has really been lagging behind productivity growth in all other major industrial nations in the world except England.

We had been the world productivity leaders—out front in the past. Now, the Japanese are the ones who are leading and we are at the tail end. We put provisions into the tax structure to turn that situation around, but the one thing that we have not taken proper recognition of is what is going to happen to our supply of skilled labor as investment and productivity growth in the years ahead. We will have over a million new jobs created in the computer industries in this decade for which training facilities do not exist. Yet we have other major industries that are slowing down and where we see vast unemployment lines. I saw that yesterday in Detroit in the automobile industry.

We have to find a way to provide

those men and women in the auto and other labor-surplus industries with skills needed in the computer and other labor-short industries. Otherwise, we are going to continue seeing the paradox of page upon page of classified ads asking for people to come take jobs side by side with line after line of unemployed men and women whose skills do not meet the requirements of these new jobs.

We have some answers already. We must do more with our vocational school system. We have to do more to assist private industry find ways to accommodate and remedy the lack of labor skills that we are going to need in this decade. Other remedies will be needed, as well.

My point, Mr. President, is that we can take care of productivity on the one side with capital investments, but unless we have taken care of it on the human investments side, we are not going to achieve the kinds of gains in productivity that are being accomplished today in Germany and Japan and most of our other trading competitors.

There is little reason to expect the geographic pattern of labor-short skilled occupations to follow the general pattern of future labor force growth. Consequently, in designing remedies for our skilled labor shortage, it is not sufficient to merely target them at States projected to experience relatively rapid employment growth in the future. The needs of each State and region must be assessed before a truly efficient and comprehensive program to reduce the skilled labor shortage can be initiated.

This point cannot be emphasized too strongly. Even among the two States projected to grow the fastest through the 1980's, for example, a dissimilar occupational pattern of new job creation is projected to occur. Based on State government data, new jobs for computer system analysts will increase only 19 percent in California from 1980 to 1985, far less than the 38 percent projected by Texas for the longer 1978 to 1985 period. Growth comparisons for other labor-short occupations in these two States are presented in table III; this data emphasizes their disparate interstate growth rates. I ask unanimous consent. Mr. President, for a table entitled "Table III, Project Employment Growth. Selected Occupations. California and Texas" to be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

TABLE III.—*Projected employment growth, selected occupations, California, Texas* [1]

[In percent]

Occupation	California	Texas
Blue-collar worker supervisor	12	19
Computer systems analyst	19	38
TV and radio repairer	23	21
Tool and die worker	10	36
Licensed practical nurse	22	52
Millwright	6	25
Machinist	9	11

[1] Growth periods in California, 1980–1985; in Texas, 1978–1985.

SOURCES: Texas Employment Commission; California Employment Development Department.

Mr. BENTSEN. Mr. President, let me conclude by reemphasizing the finding based on current Federal data that every State and region of our Nation will enjoy the benefits and bear the burden of employment growth this decade. As always, however, those benefits and burdens will not fall evenly on individual States. The design of any steps to address these impacts must reflect these two realities. Similarly, any program designed to ameliorate our skilled labor shortage must be crafted as to reflect these realities, as well.

In my next talk, Mr. President, I will review the pattern of occupational skill training in Japan and Germany. As we move toward a review of the capability of our own training system to meet our skilled labor shortage, it will be useful to know how our major trading partners train their own skilled craftsmen.

Mr. President, I yield such time as I may have left to the Senator from Texas (Mr. TOWER).

Mr. TOWER. I would simply like to commend my distinguished colleague from Texas on his very thoughtful statement. I agree we should not be in the business of trying to manage the business and industrial growth in this country or try to change the demographic shifts that are already underway.

I note with some pride that when I was born in Houston, Tex., just a few short years ago it had a population of 230,000. Now it has a population of 10 times that, because there has been created in Texas and other States of the Southwest a favorable climate for business and industrial growth.

I am very proud of the fact that Texas stands out among the major industrial States in this country in having the highest per man productivity, of having the best return on the labor dollar, and having the lowest rate of unemployment of all the major industrial States.

While the national average is around 8 percent, in Texas it is slightly over 5 percent. I think some of the older States of the North and of the Midwest might think in terms of themselves creating a more favorable climate for business.

Certainly Senator BENTSEN has pointed to one problem, and that is very often our job-training programs are not meeting the needs that are going unfilled. I think that is an area in which perhaps we could be useful.

Mr. BENTSEN. I thank the senior Senator from Texas for his comments. To continue along that line, you can pick out States like New Hampshire where you are seeing job expansion—an area which has succeeded in encouraging business and industry to grow. It has been able to keep jobs instead of seeing jobs being transferred out to other States. States may not be able to generate a large growth in new jobs but they can successfully prevent the loss of existing jobs.

I yield back the remainder of my time.

Mr. TOWER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. SYMMS). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BUMPERS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO VITIATE SPECIAL ORDER

The PRESIDING OFFICER. The special order for Senator GORTON is vitiated.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond the hour of 1 p.m., with statements therein limited to 5 minutes each.

VICTORY FOR THE SENATE PAGE FOOTBALL TEAM

Mr. ROBERT C. BYRD. Mr. President, among the many traditions which occur on Capitol Hill is the annual House versus Senate page football game. On Wednesday, November 11, 1981, Veterans Day, the Senate—now, get this; pay close attention, I say to all Senators—the Senate defeated the House by a score of, now, get this, 21 to 0—a great big goose egg for the House. Twenty-one to zero. Long live the Senate page football team.

This was the second game of an ongoing struggle.

I commend our Senate pages, both Republicans and Democrats. I ask unanimous consent that the names of our players be printed in the RECORD. The commendation of the day goes to our Senate page football team for plastering the page football team from the "other body." Our Senate pages will show 'em.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

NAMES OF PLAYERS

Leon Calomiris, Bill Lanham, Tony Nicholas, Jeff Garn, Ashby Stokes, John Flowers, John Gilmer, Keith Brigman, Tim Page, Mike Prescott, Wilson Parry, Steve Boyden, Nancy Dynan, Hollie Iverson, Ken Dean, McKinley Hackett, Charles Carlson, Kevin Henry.

Head coach: Michael Henry.

Alumni: Bob Bean, Drew Griffith, John H. Harris III, John Pitts, Brad Smith, Bill Norton.

Mr. ROBERT C. BYRD. Mr. President, I thank all Senators for the interest that they have demonstrated in this matter. I thank our pages. Excelsior. Ever upward.

SPAIN BELONGS IN NATO

Mr. HARRY F. BYRD, JR. Mr. President, last month King Juan Carlos of Spain paid an official visit to the United States and was received by President Reagan at the White House.

The President took the occasion to endorse publicly the complete integration of Spain into both the North Atlantic Treaty Organization and the European Economic Community.

I wish today to express my total support for the President's statement. Indeed, the time is long past due for the full membership of Spain in the European family of nations and the Atlantic alliance.

My support for Spanish membership in NATO goes back just over a decade.

In 1971, during a trip to Spain, North Africa, and NATO headquarters in Brussels, Belgium, I became particularly aware of the importance of including Spain in the Western alliance.

Its strategic location, relatively strong military force and strong anti-Communist commitment all argued for Spanish integration into NATO.

Returning to the United States, I reported my findings to the Senate in a speech which began as follows:

Mr. President, it is my view that the time has come to invite Spain to become a member of the North Atlantic Treaty Organization.

Five years later, after the death of Gen. Francisco Franco, and after I had had further opportunity to study the strategic situation in the Mediterranean and eastern Atlantic, I again spoke in the Senate, urging that our West European allies accept Spain as a full partner.

It seemed to me then, and seems to me today, that the passing of Franco, the accession of Juan Carlos and the institution of widespread democratic reform in Spain removed any objections which our European friends might have had in earlier years on ideological grounds.

So today, once again, I express the hope that Spain will be admitted as a full partner in the European family and the defense of the West.

I ask unanimous consent that the texts of my speeches on this subject on May 6, 1971, and April 27, 1976, be printed in the RECORD.

There being no objection, the speeches were ordered to be printed in the RECORD, as follows:

[From the CONGRESSIONAL RECORD, May 6, 1971]

SPAIN SHOULD BECOME A MEMBER OF NATO

Mr. BYRD of Virginia. Mr. President, it is my view that the time has come to invite Spain to become a member of the North Atlantic Treaty Organization.

During the Easter recess of the Congress, I visited Spain, North Africa, and NATO headquarters at Brussels in an effort to assess two things:

The extent and significance of Soviet penetration of the Mediterranean region, particularly North Africa; and

The situation concerning the commitments of the United States and our partners in the North Atlantic Treaty Organization in Europe.

I came away deeply impressed with the strategic importance of Spain in the defense of Europe and the Mediterranean.

Spain always has been of great importance in European defense plans. The United States recognized this as early as 1951, when diplomatic relations between this country and Spain were renewed after the interlude of World War II and the immediate postwar period.

In 1953 the United States negotiated its first base agreement with the Spanish Government, which has been twice extended, with modifications.

Today the Spanish bases have greater importance than ever before.

One reason why this is so is the extensive penetration of the Middle East, the Mediterranean, and North Africa by the Soviet Union. During my visit to that region, it was driven home to me that the Russians are seeking to become the dominant power in the entire Mediterranean area.

Not only do the Soviets maintain a sizable fleet in the Mediterranean waters, but they have become the major force supporting the Arab Nations in their continuing struggle against Israel.

Today Egypt has become virtually a dependency of the Soviet Union. And just this month an Arab federation was formed.

Actually, of the five nations on the African shore of the Mediterranean, only Tunisia and Morocco are friendly to the West. Algeria, while not yet in the Soviet orbit, is unfriendly to the Western allies and represents a fertile field for Russian penetration.

After a revolution deposed the former Government of Libya, the United States was forced to close down the operations at Wheelus Air Base located in that country. These operations were moved to Zaragoza, one of two modern U.S. air bases in Spain. A third air base is on a standby basis in Spain.

The U.S. naval base at Rota, on the Spanish Atlantic coast near Gibraltar, is extremely important to the operations of the U.S. 6th Fleet in the Mediterranean Sea.

Given the present political and strategic situation in the Mediterranean region, it is clear that Spain is of critical importance to the south flank of the NATO alliance.

The exclusion of Spain from NATO results primarily from the opposition of powerful socialist parties in several European nations, notably Norway, Denmark, the Netherlands, and Belgium.

Much of the opposition to Spanish entry into NATO can be traced to the role of Spain in the early years of World War II.

It seems to me that it is time for such matters to be forgotten. We should bear in mind that two of this Nation's strongest allies are Japan and Germany, the nations who were the chief opponents of the Allies in World War II.

Portugal is already a member of NATO. Inclusion of Spain in the alliance would extend NATO coverage across the Iberian Peninsula. This in turn would greatly strengthen the position of NATO both in Europe and in the Mediterranean.

The peacetime army of Spain consists of five divisions and 16 brigades. The mobilization potential of this army is considered to be 40 divisions.

Spain also has a navy of 80 ships and an air force of nearly 200 modern aircraft. Both the navy and the air force could be more than doubled in time of war.

In overall military power, only two of our NATO partners—West Germany and Turkey—clearly are stronger than Spain. Spanish membership in NATO certainly would represent a desirable strengthening of the alliance.

I think it would be a step in the direction of realism if Spain were to be admitted to NATO. Differences of political ideology within member countries of the alliance have not destroyed it in the past, and there is no reason to suppose that the addition of Spain to the ranks of the allies would in any way weaken it.

We should bear in mind that the Soviet Union is never reluctant to cooperate with other nations whose governments are ideologically opposed to communism.

Realism suggests that the members of NATO should not attempt to insist that all members of the alliance be models of democracy.

Addition of Spain to NATO could help reduce the burden on the United States of maintaining a huge contingent of forces in Europe. Today the United States has 300,000 servicemen and 200,000 dependents in the European area.

There has been a great deal of discussion in this country as to whether the United States should maintain its present level of troop commitments in Europe. In the Senate itself, Senator Mansfield has sponsored a resolution calling for a reduction in the U.S. troops level in Europe.

Addition of Spanish forces to NATO would help to make feasible a reduction in the American burden and would make a solid contribution to the strength of the alliance.

Spain is a member of the West European family of nations. She belongs in the ranks of the alliance which is the principal instrument of West European security.

[From the CONGRESSIONAL RECORD, Apr. 27, 1976]

SPAIN BELONGS IN NATO

Mr. HARRY F. BYRD, JR. Mr. President, the death of Gen. Francisco Franco last year ended his nearly 40-year reign over Spain.

Franco's successor, Juan Carlos de Borbon, was inaugurated as King of Spain, only 2 days after Franco's death, on November 22 of last year.

The transition in Spain's political leadership has to date not produced any major outbursts of violence, and the fear that Spain would follow the tumultuous and uncertain path of Portugal has not yet been realized.

In the 5 months that King Juan Carlos has been in power he has shown strong leadership and sensitivity in meeting the problems confronting his country.

He defused the political impasse between Spain and Morocco over the Spanish Sahara through personal diplomacy, and he has also undertaken steps to meet with the Catalans and Basques, who are seeking greater autonomy from the central government for their respective regions.

Early this year the new Spanish Government also announced its intent to develop a program of domestic reform, which will include among other things, the creation of a two-house parliament and a modification of the antiterrorists decree.

Both of these proposals are seen as a major shift in policy, and the creation of a two-house parliament, in particular, should provide the Spanish people with more direct, and responsive representation in their Government.

This is not to say, however, that it will provide a democracy such as we have in the United States.

But I have had the opportunity to discuss the current political situation in Spain with the distinguished Senator from Rhode Island (Mr. Pell), who is a member of the Foreign Relations Committee, and who recently had the opportunity to visit Spain.

Senator Pell was most impressed by the steps taken by King Juan Carlos, to ease the internal political restrictions. These steps have included, among others, the release of political prisoners, open political activity, and freedom of the press.

Senator Pell feels, as I do, that the United States, and the free world, now have the opportunity to encourage this progress in Spain.

The Senator from Missouri (Mr. Eagleton) also made an excellent speech in the Senate on February 5 concerning the situation in Spain.

In this context, it deserves to be emphasized that Spain's clandestine, but well-organized, Communist Party has not been able to exploit the political situation, as its Portuguese counterpart did in neighboring Portugal. Nevertheless, Spain's new young King faces numerous domestic and international problems, and Spain's extremist elements appear ready to challenge his authority should a political vacuum develop, or should a political or economic crisis arise.

Undoubtedly many of these elements will promote dissidence in the hope of undermining the new Government. But with sup-

port and encouragement from the United States, and our European allies, the new Government of Spain will be able to respond to the challenges it will encounter, and it will be able to undertake the reform of its own institutions, in a responsible and enlightened way, without fear of intrusion from outside powers.

The United States and Spain have, in fact, just concluded a new defense agreement. This agreement is the latest in a series of defense agreements between the two countries which date back to 1953. A that time the United States recognized the strategic importance of Spain in the defense of Europe and the Mediterranean.

Indeed, Spain should have been permitted to join the NATO alliance when it was formed. But opposition from some of our European allies prevented Spain from being admitted to NATO.

At the outset much of the opposition to Spain's entry into NATO could be traced to the role of Spain in the early years of World War II. Later the opposition continued more out of opposition to the nature of the Franco regime.

In 1971, I urged that Spain be admitted to NATO, but strong opposition to Spain entering the alliance continued from some of our other European allies.

The strategic importance of Spain for Europe and the Mediterranean, particularly its importance to the southern flank of the NATO alliance, has, however, not diminished over the years. On the contrary, given the present political and strategic situation in the Mediterranean region, Spain is of more importance to the security of the free world than ever before.

The southern flank of the NATO alliance is in precarious balance.

Two traditional U.S. allies and friends, Greece and Turkey, find themselves embattled over Cyprus, with both threatening to decrease or eliminate their NATO roles unless a mutually satisfactory solution to the Cyprus problem can be found.

The political revolution in Portugal in 1974 also brought domestic disorder and government instability to that NATO ally. Vast Soviet expenditures supported the activities of the Portuguese Commmunist Party, as it sought to circumvent constitutional procedures, overrule the outcome of popular elections through its organized cadres, and sympathetic elements in the military forces, and assume government control, contrary to the popular will.

While the pendulum now seems to have swung back in favor of the moderate forces in Portugal, the outcome is far from certain, and its role in NATO remains in question.

The political and economic chaos in Italy, which threatens to bring formal Communist participation to the national government, is illustrative of the internal weakness and potential difficulties facing NATO in all of the countries which constitute the alliance's southern flank.

But while the publicity surrounding detente may have dimmend the popular awareness of existing military and political threats to the free world, which in turn has contributed to an erosion in the western alliance system, Communist Russia has no such problems.

The Warsaw Pact's land forces represent one of the most awesome military machines ever created, and Russia is simultaneously seeking dominance over Europe's waters.

The day has long gone since the U.S. 6th Fleet sailed the Mediterranean Sea unchallenged. The Soviets now maintain a sizeable fleet in the Mediterranean, and they seek to become the dominant power in that region.

So Spain, which has always played an important role in the formulation of European defense plans, assumes ever-increasing importance for West European security.

Through bilateral agreements, the United States has had base rights in Spain, the most important of which is Rota. Located near the strategic Atlantic approaches to the Mediterranean, Rota serves as a base for the U.S. naval fleet, a communications center, and as a monitoring center for Russian naval activities.

The United States has now signed a new 5-year agreement with Spain for continuing these base rights, but the two governments have also agreed to a "Treaty of Friendship and Cooperation," which must be approved by two-thirds of the U.S. Senate.

The new treaty between Spain and the United States illustrates the importance the United States attaches to the stability and orderly development of that country, and it represents an American commitment of support.

But I think the time has come to go even further.

Spain belongs in NATO, and it is my view that now is the time for the United States to spearhead a drive for Spain to become a member of that defense organization, in cooperation with our European allies.

At a time when the resolve of the free world is being questioned, admitting Spain into the North Atlantic Treaty Organization would help restore some of the declining credibility confronting the alliance today.

With Spain in the NATO alliance the strategic security of Europe would be strengthened, and that country's military forces would also add meaningfully to the defense capability and readiness of NATO's conventional forces.

Spain has a navy of approximately 90 ships, including 10 submarines, 1 helicopter carrier, 1 cruiser, 13 destroyers, as well as a number of mine sweepers, torpedo boats, patrol craft, landing ships, and frigates.

The air force consists of 200 combat aircraft, and the peacetime army of Spain consists of 5 divisions, and 16 brigades.

The mobilization potential of this army is considered to be 40 divisions.

Spain has more than 300,000 men under arms, of which 213,400 are conscripts, and in 1974 that country spent $1.43 billion on defense out of a GNP of approximately $65 billion.

In overall military power, only two of our continental NATO partners—West Germany and Turkey—clearly are stronger than Spain.

Spain, then, could make a solid contribution to the NATO alliance, and would represent a desirable strengthening of the alliance.

As a member of the West Europe family of nations, Spain belongs in the ranks of the alliance which is the principal instrument of West European security. And on time could be more propitious than now.

As Spain enters a new stage in her history she should do so with the full support of the countries that constitute the North Atlantic Treaty Organization.

FEDERAL HIGHWAY PROGRAM WINS GOLDEN FLEECE AWARD

Mr. PROXMIRE. Mr. President, today I am giving my "Golden Fleece" of the month award for November to the Federal Highway Administration for the worst record of civilian cost overruns in the Federal Government. When you have the worst record in the Federal Government, Mr. President, you are really the super bowl champion of waste. Mismanagement, delays, and confusion in the construction of our interstate highway system have caused a 267 percent, $100 billion cost overrun that dwarfs any other civil project. While it is said that the road to perdition is paved with good intentions, no one expected this to apply to the U.S. highway program.

When it comes to civilian cost overruns, Mr. President, the Interstate Highway System under the Federal Highway Administration stands at the top of the list—the undisputed champion of mismanagement and waste. Every other civilian project pales by comparison.

Even the numbers involved are so staggering that they numb the mind. When Congress first aproved the estimates for the Interstate Highway System in 1958, the firm, hard figures showed a cost of $37.6 billion. Now that same program stands at $137.9 billion, an increase of $100.3 billion.

The cost growth in the highway program is as big as the entire defense budget in 1977 or as large as the combined 1982 budgets for the Departments of Agriculture, Education, Energy, Housing and Urban Development, Interior, Justice, State, and Transportation.

The blame for this mammoth cost overrun cannot pe placed solely at the doorstep of inflation. Of the current $100.3 billion overrun, $55.9 billion represents inflation. Taking inflation out entirely still leaves an unbelievable real overrun of $44.4 billion or more than the project was supposed to cost in the first place.

Mr. President, funding for the Interstate Highway System continues to the present day, so the end of cost overruns is not yet in sight. On October 3, 1981—just a few weeks ago—the Senate passed a transportation appropriations bill which contained about $3.2 billion in funding for the system. Note: this Senator opposed the bill, which passed by a vote of 77 to 15. From $35 billion to $53 billion remains to be spent on the Interstate System.

Perhaps the worst example of spending in the highway program is the Westway in New York City. The final cost of this 4 mile long road will reach an incredible $1 billion per mile—that is $16 thousand an inch, Mr. President—making it, inch for inch, the most expensive highway ever built by mankind any time, anywhere.

Federal taxpayers will pay for 90 percent of Westway including the actual construction of a tunnel along, in, and above the Hudson River bed, creation of 234 acres of real estate, and upgrading of a parallel 6- to 8-lane highway next to Westway.

The Glenwood Canyon project in Colorado is another example of an outrageous throw-away. It has been exempted from the new cost reduction program, as has Westway. This 12.6 mile four-lane highway is currently estimated to cost $300 million but more likely will run to over $600 million during the 8-year construction period.

Every year, Mr. President, the Comptroller General of the United States makes a detailed listing of all major Federal acquisitions. The most recent list includes 1,040 projects.

The total cost growth in these 1,040 projects is $325.8 billion. Thus, the Federal Highway Administration, by itself,

accounts for over 30 percent of the total Federal overruns. The only challenger to the Federal Highway Administration is the U.S. Navy, with a cost growth of $104.2 billion, but this includes 96 different Navy programs.

RATIFICATION OF THE GENOCIDE CONVENTION IS NECESSARY FOR A STRONG HUMAN RIGHTS POLICY

Mr. PROXMIRE. Mr. President, it is essential that our Nation pursue a consistent and outspoken human rights policy in order that we may expose and counter the Soviet threat to political and individual freedom. This was made clear in a State Department memorandum approved by Secretary of State Haig and published in the New York Times last Thursday.

The State Department noted in the beginning of the memorandum that:

Human rights is at the core of our foreign policy because it is central to what America is and stands for.

According to the memo, human rights is also what is ultimately at issue in our contest with the Soviet bloc. "The fundamental distinction," the State Department explains, "is our respective attitudes toward freedom. Our ability to resist the Soviets around the world depends in part on our ability to draw this distinction and to persuade others of it."

In short, an important objective of our human rights policy is "to demonstrate, by acting to defend liberty and identifying its enemies, that the difference between East and West is the crucial political distinction of our times."

Yet, Mr. President, our abiilty to carry this out is impaired as long as we remain vulnerable to Soviet charges of hypocrisy in our policy on human rights. Our failure to ratify the Genocide Convention has long been used by the Soviets in attempts to discredit us in the international community.

Simply put, Mr. President, we cannot hope to persuade others of the distinction between ourselves and the Soviets when we, ourselves, have failed to recognize in an international treaty the most fundamental human right—the right to live.

In the memo, the State Department asserts that:

Overall U.S. foreign policy, based on a strong human rights policy, will be perceived as a positive force for freedom and decency.

Yet, Mr. President, for our human rights policy to be truly strong and effective, it must be consistent. And consistency demands that we ratify the Genocide Convention.

Virtually every President since Harry Truman has recognized and affirmed the need to act on the Genocide Treaty to solidify our international posture on human rights.

Mr. President, we cannot delay any longer; we must act now to ratify the Genocide Convention.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

VOLUNTARISM

Mr. DURENBERGER. Mr. President, Americans have a proud and long-standing tradition of assisting those in need without receiving financial reward for their efforts. The spirit of voluntarism continues today, even during this period of economic difficulty when many who had once stayed home to raise their families are entering the work force in order to stay ahead of the rising cost of living. Concerned Americans still find time to devote their talents to helping the needy.

I have often said that the efforts of private citizens can be at least as effective as those of governments. Volunteers seem to have a keen sense for getting to the heart of a problem and arriving at sensible and effective solutions. I have spent most of my life in voluntary public service of one kind or another. It is through that process that I have learned how much we have lost over the last 20 years when we continually turn to Government to solve all our problems.

More important, I have learned that there are solutions to a lot of problems that we have considered traditionally as public sector problems that lie in private enterprise. While Government agencies and international organizations are often most adept at coordinating relief efforts and long-range programs, individuals provide the people-to-people contact that makes the projects they undertake so successful. Their efforts achieve not only the material goals, but the even more important one of understanding between people. Volunteers in service to others enjoy an intensely personal reward of self-satisfaction.

Minnesota has produced its share of dedicated volunteers, from the medical professionals who have served in the refugee camps at the Thai border to those who helped build a clinic in Haiti. The latest example of this generosity is the work that Dr. and Mrs. Roger Belisle and Mr. and Mrs. Del Asmussen have performed in the small village of El Casco, in the State of Durango, Mexico.

Roger Belisle and Del Asmussen, both employees of Control Data Corp., in Minnesota, received 18-month leaves of absence to further their efforts. They formed the American-Mexican Medical Foundation in 1979 as a vehicle for improving the health care and standards of living of the people of El Casco. With the cooperation and support of their wives, the people of El Casco, and the Mexican Government, a clinic is being built and essential health classes are being taught. The efforts of these individuals and the cooperation of companies like Control Data are a tribute to the spirit of volunteerism in America.

Another group of Minnesotans has helped construct an orphanage in Leogane, Haiti. Members of a number of Minnesota churches donated their time and talents to work with the Haitian people to build a school and auditorium as well. The different language and customs have made the time spent in Haiti a unique and satisfying experience.

Mr. President, I ask unanimous consent to have printed in the RECORD the news articles about these Minnesotans.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

SUBURBAN CHURCH MEMBERS BUILD AN ORPHANAGE IN HAITI

(By Ruth Hammond)

For the suburbanite who's an inexperienced traveler, doing mission work in Haiti can be frightening. Yet three groups of people, most from Lutheran Church of the Master in Brooklyn Center, have traveled to that Caribbean island country since last December to build an orphanage for 105 children and spread "the good news about Jesus." Another group of 10 women just returned from 10 days in Leogane, a coastal village, where they helped build a school near the orphanage.

The latest group is made up of members of St. Nicholas Episcopal Church in Richfield, Woodlake Lutheran Church in Richfield and Jesus People Church in downtown Minneapolis. St. Nicholas Pastor John McMillan's interest in Haiti was sparked after he talked with Church of the Master Pastor Paul Swedberg. The $42,000 project to build the orphanage was Church of the Master's "first world mission."

McMillan mentioned the need for further work in Leogane in a Sunday sermon at St. Nicholas in June. That night St. Nicholas's mission committee, which had been praying for guidance in choosing a mission, decided to join other area churches working in Leogane. In the past four months, the 120-family congregation has raised $12,000 of its $30,000 goal. Mary Jackson, a committee member, said she hoped other churches in the southwest suburbs would join them in their effort.

One evening in early September, Fred Morrissette, 28, leader of this and other Haiti missions, sat in the old Chevrolet bus that he planned to drive from his Monticello home to Florida before the Haiti trip. The bus was parked in the St. Nicholas parking lot and he was drinking Coke with his brother-in-law, Ron Holmberg, and his friend, Mike Power of Hibbing, who would accompany him as far as Florida, while they waited for the start of a pre-trip meeting in the church.

Among the supplies Morrissette had loaded in his bus to bring down to Haiti was his air conditioner. He figured it would be of use. He had dealt with the red tape to get electricity in the orphanage by going to the electric company every day for a month and getting the signatures of the prime minister, the secretary of state and three other government officials, he said.

Haiti is an extremely poor nation. Those who go on the missions are warned to expect that, but a few are still surprised and feel endangered by conditions, Morrissette said. The first night a mission group arrived in Leogane last April, its members witnessed a voodoo ceremony of striking unfamiliarity. "A hundred people came by, beating drums and blowing horns, and they (the Twin Citians) got scared," Morrissette said.

During such voodoo ceremonies the Haitians "wear weird costumes."

"Like Mardi Gras in New Orleans," Holmberg said.

"It couldn't be any weirder than Mardi Gras," Power said.

One member of the St. Nicholas mission group did not return with the others. Grace Barberg of Jesus People Church plans to remain in Haiti for three months. She also

went to Haiti in June. She said, "I see a real need for the gospel, the good news of Jesus to be spread there." She said the people are friendly and eager to talk to Americans. She tells them "Jesus loves you" in Creole and invites them to a Biblical movie. After the movie, translators convey the Americans' message of what Jesus means to them. It is not uncommon for 400 people to attend a movie, Morrissette said.

On her last trip Barberg concentrated more on preaching than on construction of the cinder-block orphanage. "I laid five blocks and had to rest," she said.

The blocks weigh "only 26 pounds," Morrissette said. Haitians are the people laying the blocks for the school and an attached auditorium, both designed by Morrissette. The Minneapolis-area missionaries hauled the blocks from a pile to the work site and conveyed their religious messages.

Chrystal Linn, a Woodlake member, was undaunted by the weight of the blocks. "I was raised on a farm and I know how to work," she said. She took the trip because it seemed like "a new way to serve the Lord."

The 400-seat auditorium will be used to train ministers to go into the interior. Six or seven Haitians will teach the 300 children expected to attend the school. Morrissette believes it's important for the Haitians to be able to carry on the mission by themselves if necessary.

The youngest members of the St. Nicholas mission group are 18-year-olds Betsy Stark and Laura Greimel, both of whom have worked with Hmong refugees in St. Paul. Greimel just graduated from Jefferson High School in Bloomington and is starting at the University of Minnesota this fall. She said she's interested in observing another culture and learning why there are differences and similarities among human beings.

Morrissette, who attends Assembly of God Church in Monticello, said the interdenominational nature of the mission has never been a matter of conflict. He compared it with building a house: Everyone's not a carpenter and everyone's not a plumber, but together they can build something as long as the carpenter doesn't pound nails into the plumber's pipes.

[From the Rochester (Minn.) Post-Bulletin, Sept. 15, 1981]

STATE MAN HELPS BUILD MEXICAN CLINIC

(By Karren Mills)

EL CASCO, MEX.—Life slowly changes in El Casco, as the rural Mexican village inches into the 20th century. Some of the credit goes to a Minnesota man helping villagers build a medical clinic.

When Roger Belisle first visited the village of 400 nearly 12 years ago, he found an existence rather than a life. There was no electricity. Cars and trucks were novelties. Medical care was primitive.

The Bloomington man was moved to help.

"I decided to help these people as much as I could," said Belisle, who expanded his studies in biomedical engineering at the University of Minnesota and became licensed to practice medicine in Mexico.

Belisle and his wife Eva, who was born in El Casco, and their two young children then began traveling to the village on vacations, bringing bandages, aspirin, vitamins and other essentials for the villagers.

As Belisle, an idealist, came to know the people better, his frustration with conditions in the village grew. He was driven by his need to help, but knew he couldn't accomplish much by himself.

So in 1979, Belisle and other interested Minnesotans formed the nonprofit American-Mexican Medical Foundation and began work on a 2,700-square-foot free clinic to serve El Casco and surrounding communities. Villagers are providing the construction labor. Materials are being purchased with money donated to the foundation.

"People in the United States like to think of Mexico as a very romantic area, an area that exists the way it is because the people want it that way. But that's not the case," said Belisle.

But change comes slowly. Even when it is being given a boost.

There are now seven old trucks and two cars in El Casco, located about 300 miles south of El Paso, Texas. But most of the farmers still use mules and horses to get to and from their fields.

The government has run an electric line into the village, and a half-dozen villagers have brought in refrigerators. But when most villagers have money for milk, they can buy only enough for one day. When someone kills a pig, there is a village feast because the meat won't keep.

There is a handful of porcelain toilet stools, but there is no running water. Those with porcelain toilets must pour water into the bowl to flush them. The majority of the villagers, however, don't have outhouses and use the smooth, flat rocks from the riverbed instead of toilet paper.

A few of the women now are having their babies delivered by doctors in a nearby town, but many still use midwives.

El Casco is a poor village, but the people aren't poverty-stricken.

When the corn and bean crops fail—which happens often because there is no irrigation system—the men go to the large cities of Mexico or slip across the border into the United States for a few months to work.

Besides food, those trips—and children who have moved into the larger cities—provide money for the cars and trucks, the refrigerators, the porcelain toilets and the electric blenders that sit on tables next to the wood-burning cook stoves in many kitchens.

The villagers and Belisle would like to see El Casco become more self-sufficient, so the men don't have to leave and find other work to keep their families alive.

As they see it, water for irrigation and drinking and good medical care are the keys to achieving that self-sufficiency.

The Mexican government drilled a deep well and installed a pump in the village three years ago to provide pure drinking water.

However, the pump worked only a short time and efforts to have it fixed have been unsuccessful. So the villagers still get their drinking water from a shallow well next to the riverbed and wash their clothing in the river.

The government also began building a dam about a mile from El Casco four years ago, but there were delays and it hasn't been completed.

"When it is done, all the farmers in El Casco will be able to irrigate their fields. Water is the key to everything—the fields, good drinking water so the people don't get sick," said Jose Rivas, postmaster and owner of the only restaurant.

"But who knows when it will be done. We're not getting any promises. It could be three months, it could be a year," Rivas said.

"Farming in the last five years has been real bad. It's been so dry. That has made life here much worse," Rivas said. "When they don't have the crops, they don't have money for anything. The men leave to find work in other places."

About 90 percent of the men leave the village for work when the crops are bad. Rivas said 1948 was the last good year for farmers in El Casco.

Guadalupe Amaya, village official and a farmer, said he has to go to the United States to work for about nine months every three years. In between, he works in large cities in Mexico for one or two months each year.

"I only go to the United States when I really can't make it anymore," said Amaya, who has done carpentry and restaurant work in Arizona. "I feel very lonesome because I don't know what's going on with my family. When I get a letter saying one of the children is sick, I don't know what happened."

Having the clinic completed and a full-time doctor in town will be a major step forward in helping the villagers cope with their problems, Rivas added.

"Because if we're healthy, we can work and make money so we can eat."

MINNESOTAN'S HEALTH PROJECT IN MEXICAN VILLAGE GOES SLOWLY

(By Karren Mills)

EL CASCO, MEX.—Roger Belisle has a dream for the people of rural Mexico. He wants them to have access to the same quality of medical care that he and his family have in Minnesota.

Sometimes, however, it is difficult to turn a dream into reality.

Belisle is finding that out.

The 43-year-old Bloomington, Minn., man is spearheading construction of a medical clinic in El Casco, the small village in northern Mexico where his wife Eva was born.

When he first visited El Casco in the late 1960s, he was troubled by the lack of medical care. Parasite infestation was rampant. Nutrition was poor. Babies were dying "from the simplest of problems," Belisle said.

"I saw that a health program was needed," he said. The nearest hospital was 125 miles away and people had to travel 30 miles to the nearest clinic.

So Eva's brother Filiberto Nunez went to the state Capitol in Durango and asked if the government could set up a clinic in El Casco.

"He was told a clinic could be set up, but he knew it probably would be many years," Belisle said.

In the meantime, Belisle earned a license to practice medicine in Mexico and began driving 2,000 miles to El Casco with his wife on vacations to provide medical care.

"As time went on it turned out that what I was doing was making a pretty big impact. That encouraged me," Belisle said. "So we contacted the Mexican government to find out what their plans were and to tell them what we were trying to do."

The government said they still had the El Casco request, but Mexico is big and they couldn't possibly cover all areas at once, Belisle said.

"So we planned a clinic. We talked to people about just exactly what they thought they would need and started construction," Belisle said.

"We contacted the Mexican government again to see if they could help. They said if we were better organized, if there was some way we could represent all of the people in a large area in the state of Durango, that they probably would be able to help us," Belisle said.

So in 1979, the American-Mexican Medical Foundation was formed and the Belisles and other volunteers began working on the project in cooperation with the Mexican Department of Public Health and other government agencies.

Control Data Corp. gave Belisle and Del Asmussen of St. Paul, Minn., 18-month social service leaves from their jobs at full pay to raise the money needed to complete the clinic and hire a fulltime doctor.

Those leaves end in December. Meanwhile, the walls of the 11-room clinic are up and the windows are in storage. But money is still needed to buy cement for the roof and floor.

Belisle and Asmussen also discovered in August when they returned to El Casco that the cost of construction materials had gone up again.

And they found that the government had

finally responded to the village's request for help.

Since Belisle's last visit in December, the Mexican Social Security Department had constructed a small first-aid station, one of 65 built in Durango this year. The station opened in March.

A medical school resident from the state Capitol is on duty from 9 a.m. to 1 p.m. weekdays, along with a village girl who received 22 days of training as a social worker. Another village girl was trained to give shots, take blood pressures and temperatures and weigh and measure patients on weekends.

Main functions of the first-aid station are treatment of infections, physical examinations, simple suturing of cuts and some health teaching, said Fe Sanchez Castaneda, 17, the social worker.

The station sees about 6 to 10 patients a day from a 12-mile radius covering six villages.

"We see a lot of parasites in adults and children People come for illnesses such as diarrhea and anemia and for family planning (condoms, birth control pills and intrauterine devices are offered)," Miss Castaneda said.

While the villagers are glad to have the government first-aid station, they maintain that it is not enough, that they still need Belisle's clinic, which will serve a 60-mile radius and will handle more complex problems.

Miss Castaneda said the government first-aid station hopes to work together with Belisle's private clinic.

"When his clinic is finished, many more people will come because they have so much confidence in him," Miss Castaneda said. "There is plenty of need for both. But we have medicine here and a lot of people who are suffering now have some relief."

Belisle agreed. However, reducing the needs of the people makes it more difficult to obtain the money needed to complete the private clinic.

"The Mexican government is a very proud government and I don't think they really want to have Americans think that they cannot survive without American help," Belisle said. "This maybe has slowed up our efforts to help the people.

"We're not claiming to be gods where we can go in and solve the problems. But if there is any way that we can help these people, we would be willing to offer that assistance."

Belisle says he would like to see the people achieve a state where they can take care of themselves. "It's a dream, but it's a dream that I very much believe in.

"If they had water to grow their crops, they could afford to hire the doctors from the big cities. But until they do, we're going to provide that care. If I have to do it all by myself, they're going to have it. As much as I can provide."

MEXICANS GET HELP WITH "ACCEPTABLE" BIRTH CONTROL DATA

(By Karren Mills)

EL CASCO, MEX.—Filiberto Nunez and his wife Gloria have eight children ranging from 18 months to 19 years, a normal sized family in El Casco.

But Nunez says people in the small northern Mexican village don't always have large families by choice.

"Most families in Mexico are large because we don't know how to prevent it," said Nunez, 42, who has been married 20 years. "Only last year were we aware of family planning."

Mr. and Mrs. Nunez were among villagers who gathered this summer to learn about a natural family planning method developed by Carman and Jean Fallace. Fallace is natural family planning director for the Human Life Center at St. John's University in Collegeville, Minn.

Carol and Felix Rosado of Milford, Pa., teach the Fallace method of natural family planning to Spanish-speaking families for Family Life Promotion of New York Inc. They were brought to El Casco by the American-Mexican Medical Foundation, a non-profit Minnesota corporation that is building a free medical clinic in the village, to offer classes.

Under the Fallace method of natural family planning, changes in the woman's temperature, cervical mucus, and the opening and height of the cervix are observed to determine when she is fertile and can conceive a child. If a couple wants to prevent conception, they abstain from intercourse during the fertile period.

The Rosados do not try to tell the people how many children they should have.

"We don't say to them have less, we don't say to them have more. What we say is that they have the decisionmaking power to determine if they want another baby this year or wait another year," said Rosado, a Mexican native who grew up in Merida.

"The goals of our being here are, first, to spread the good news that there is such a thing, whether they use it now or five years from now. And second, that there is an alternative, and one recommended and approved by the Catholic Church, to what the government is teaching and which may not be suitable for them for religious reasons," he said.

About 96 percent of Mexico's 67 million people are Roman Catholic.

The government embarked on an aggressive family planning campaign a few years ago, encouraging the people to use birth control pills and other forms of contraception, but many resisted because the Catholic Church opposes artificial birth control and many in rural areas were never reached.

While birth control pills and intrauterine devices are available to the women of El Casco through a new government-run first-aid station and doctors in a larger town 30 miles away, most women do not use either.

"Most of the people object, I think, because of their religion," said Sylvia Alvarado Nunez, 24, who has taught in the village's elementary school for five years and was married six months ago.

"A lot of people are interested in the natural family planning classes. Even the elderly have been talking about it. They are saying we've learned a lot of good things we never knew before," the teacher said.

The Rosados, who were in El Casco for three days, met with the men and women together for the first family planning session, then met separately with the two groups for the final two days. The separation was necessary in the Mexican culture, they said, because the men and women weren't willing to discuss such a private matter in a mixed group and there wasn't time to work with individual couples.

About 80 people crowded into a large room in one of the adobe homes for the introductory session. More than 30 women and nearly as many men attended the later sessions.

"I have never seen as many people turn out for a meeting here," said Fe Sanchez Castaneda, 17, social worker for the government first-aid station.

"For our health education meetings, maybe two or three women show up," she said.

Nunez wasn't surprised, however. He said he doesn't believe that Mexican couples have large families so they will have someone to take care of them when they are old.

"If you have one child who loves you, he will help you when you are old," he said. "I think it's worse when we have so many children. It has been very hard for me to take care of eight children."

But the Rosados aren't under any illusion that their three days of classes will make an overnight difference in El Casco.

"My main concern is that we convince a lot of people that the people here want to learn more about natural family planning and sex education, so when the clinic is finished somebody will be here to do followup, to help the people when they have questions, so that these people will eventually be able to have their own program," Mrs. Rosado said.

"I don't know whether that will happen," she added. "People are funny about their sexuality, very private. They don't like to change."

Mrs. Rosado also noted that the men in El Casco and other rural villages may not want their women to change too much.

"They don't know what's going to happen if the women stop having children. Are they going to get restless and want something to do—to go out and work where there is no work? Having children is a way of keeping that woman in the house until she's 45 years old.

"Our coming here for three days, I don't know how much that's going to accomplish in tearing down the taboos of centuries. But if they can talk to each other over the next few months about something like sex, that's going to do an awful lot."

MEXICAN VILLAGE HELPED BY A DAUGHTER WHO BROKE AWAY

(By Karren Mills)

EL CASCO, MEX.—Eva Nunez Belisle was born 40 years ago in El Casco, a poor village in northern Mexico, and didn't have a bed to sleep in until she was 12.

When she was 14 she moved to Monterrey, where she later met her husband-to-be Roger Belisle, an American who was vacationing in Mexico.

Mrs. Belisle now lives in a split-level rambler in an upper middle-class area of Bloomington, Minn., but those early years are never far from her mind.

"I had a very hard life when I was growing up," said Mrs. Belisle. "Now I want to help my relatives and friends as much as I can."

So when she and her husband, who is licensed to practice medicine in Mexico, travel back to El Casco on vacations to provide free medical care and work on a clinic they are helping build, Mrs. Belisle has their station wagon stuffed to the brim with used and new clothing for the villagers.

She also tries to bring single relatives to the United States for visits, hoping they will meet and marry someone who will offer them an easier life. There have been a couple of successful matches.

While everyone in El Casco now has a bed to sleep in, most of the young villagers will never have the opportunity—as Mrs. Belisle and some of her relatives have had—to leave the village and find an easier life.

A major problem for those growing up in El Casco is education.

The village has only an elementary school, which goes through sixth grade. The nearest secondary school—grades seven through nine—is 20 miles away. There is no daily bus service, so the children must board in the town where they go to school.

"It's big problem, because any good job requires secondary school. Often in the large cities, they even require secondary school for housekeepers," said Sylvia Alvarado Nunez, 24, a teacher in El Casco.

Those without secondary school can expect a life of hard manual labor, she said.

"The teachers meet with the parents and encourage them to send their children to secondary school but many say the children must work in the fields and others don't have the money," Mrs. Nunez said.

During her five years as a teacher in El Casco, Mrs. Nunez said about one-fourth of the 41 students who completed primary school went on to secondary school. Only one of those who went on was a girl.

But Mrs. Nunez, who grew up in the capital city of Durango, said attitudes are changing

and people are becoming more aware of the importance of education.

"I've heard a lot of women tell their daughters they should look at me as an example," she said. "And girls tell their mothers, 'I want to be like her.'"

The changes will occur faster once a relay station—now in the talking stages—is built so television can be brought into the village, Nunez predicted.

"That will be very good because it will give the people access to many new ideas," she said. "In Mexico, they show a lot of educational programs for both children and adults."

In the meantime, the people are exposed to new ideas largely through magazines and through relatives who have moved away and come back to visit, Nunez said. The adults and older children in the village all read and write, she added.

However, those who stay in El Casco aren't all there because they have no place else to go.

Mrs. Belisle's brother, Filiberto Nunez, 42, a farmer with a wife and eight children, has tried life in Monterrey and once spent five months in Minnesota with the Belisles to see if he would like to move to the United States.

But he returned to El Casco, despite its drawbacks.

"El Casco is not a good place to raise a family because the children can only go to elementary school and there is little medical care," he said.

"You don't feel that you like it much when the crops are failing because there is no rain. But you love it when the crops are good and you are able to live," Nunez added.

"The climate here is so beautiful. I love to hunt and we can hunt rabbits and deer in the mountains."

Nunez has made his choice. He'll remain in El Casco and work to get the government to complete its irrigation system so the farmers can get better crop yields. And he'll continue helping Belisle build the free medical clinic so the villagers can look forward to better health.

Belisle doesn't plan to give up either.

"What we're doing is like a raindrop in the desert. But eventually it will help." Belisle said.

Mr. DURENBERGER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ABDNOR). Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS FOR 1982

The PRESIDING OFFICER. The clerk will now report H.R. 4169.

The legislative clerk will read as follows:

A bill (H.R. 4169) making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

The Senate resumed consideration of H.R. 4169.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONTRIBUTIONS TO INTERNATIONAL ORGANIZATIONS

Mr. WEICKER. Mr. President, the appropriations bill before the Senate provides $435,240,000 for U.S. contributions to international organizations. These payments are made pursuant to conventions, treaties, or specific acts of Congress. The amount provided in the bill is the amount requested by the administration. It reflects the deferral of contributions to a number of international organizations as requested by the President. However, it was the judgment of the committee that contributions to two prominent Latin American organizations—the Organization of American States and the Pan American Health Organization should not be deferred. The full amount of our assessment for these two organizations is included in the bill. It is the judgment of the committee that the withholding of payment of our obligations for these organizations might call into question our commitment to this important area of the world.

I ask unanimous consent that a table indicating the amount provided for each international organization be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Contributions to international organizations

[In thousands of dollars]

	Fiscal Year 1982 Recommendation
Organization: United Nations and Specialized Agencies:	
United Nations	$120,438
United Nations Educational, Scientific and Cultural Organization	42,233

UP AMENDMENT NO. 606

Mr. STEVENS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Does the manager of the bill wish to temporarily set aside the committee amendments?

Mr. WEICKER. Mr. President, I ask unanimous consent that the committee amendments be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an unprinted amendment numbered 606:

On page 8, between lines 12 and 13, add the following paragraph:

FISHERMEN'S GUARANTY FUND

For payment of claims and expenses to carry out the provisions of Section 7 of the Fishermen's Protective Act of 1967 (Public Law 90-482), as amended, there are appropriated not to exceed $1,800,000 from the fees collected from fishing vessel owners pursuant to Section 7 of that Act, to remain available until expended.

Mr. STEVENS. Mr. President, the Fishermen's Protective Act of 1967 was extended in Public Law 97-68 through the act passed by the Senate several weeks ago. Section 7 creates a voluntary insurance program to cover certain financial losses to U.S. commercial fishing vessels resulting from seizure by a foreign nation: First, on the basis of ocean jurisdictional claims the United States does not recognize or, second, under a general jurisdictional claim the United States recognizes, but, on the basis of conditions and restrictions that are not related to fishery management, are more onerous than comparable conditions and restrictions imposed by the United States on foreign vessels that are subject to its jurisdiction, fail to take into account traditional U.S. fishing, or fail to allow U.S. vessels equitable access to that foreign nation's fisheries.

Mr. President, that is a summary of the act we have already passed.

The purpose of the provision is twofold: First, to insure that the U.S. juridical position on coastal nation jurisdiction—for example that a coastal nation should not have exclusive management authority over tuna within 200 miles of its shores and should not arbitrarily exclude U.S. shrimp fishermen or others from its fisheries—is not compromised de facto by U.S. fishermen fearful of vessel seizures, and, second, to help compensate fishermen who, in accordance with U.S. laws and policy, are seized by a foreign nation.

Any U.S. fishing vessel owner may join the program by entering an agreement with the Secretary of Commerce and paying the required fee. To date, 60.3 percent of the costs of the program have been paid by fishing vessel owners. Industry pays for all administrative costs. Under rules recently promulgated by the Department of Commerce, the fees will be increased and are expected to total $1.8 million from commercial fishing vessel owners in fiscal year 1982. It is the policy of the Department that fee income should defray all administrative expenses of the program and cover at least 50 percent of claims historically paid even though the statute sets a minimum of 25 percent.

The moneys in the Fishermen's Guaranty Fund, including those contributed by fishermen fees and the interest generated from those fees as now allowed under Public Law 97-68, can be paid for claims only if provided for in advance in appropriation acts. I refer to section 7 (e).

Mr. President, because this program was just reauthorized, the administration did not request appropriations for the Fishermen's Guaranty Fund in its fiscal year 1982 budget requests. Therefore, we are faced with a situation of not having funds in this bill. The last appropriations were made in the fiscal 1981 supplemental appropriations bill enacted this summer, but those funds have been exhausted by prior claims. At present, somewhere in excess of $1.5 million in claims are now pending with the Department of Commerce.

On October 26, 1981, the President signed legislation to extend the voluntary insurance program under section 7 through 1984. The amendment I now offer provides appropriations not to exceed the amount paid in fees by our fishing fleet.

It is an amendment, in other words, that appropriates funds that are to be derived from the program described above and will not entail additional Federal moneys. Mr. President, I offer the amendment on that basis.

Mr. WEICKER. Mr. President, it is my inclination at this point, after I discuss a few matters with the distinguished Senator from Alaska, to accept his amendment. Let me underline the point I believe he has already made.

I understand that this amendment will have no net outlay effect, since expenditures will be offset by $1.8 million in fees to be collected from fishing vessel owners under section 7 of the Fishermen's Protective Act during fiscal year 1982. Is that the Senator's understanding?

Mr. STEVENS. It is my understanding, Mr. President.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, I am prepared to accept the amendment. I just want the record to show that I reserve the right vis-a-vis the issue of jurisdiction over tuna. I have some disagreement with the present policy. I do not want to have my agreement to the amendment indicate that I think the present policy is necessarily the best. With that stated reservation, I am prepared to accept the amendment.

Mr. HOLLINGS. Mr. President, we are prepared to accept the amendment. There is no outlay effect whatever?

Mr. STEVENS. Mr. President, it is an insurance program. The money comes from fees to be paid by the fishermen themselves. It is my understanding that this $1.8 million projected in budget authority will be offset by the amount to be paid in fees this year by the fishermen.

Mr. WEICKER. That is correct, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 606) was agreed to.

Mr. STEVENS. I move to reconsider the vote by which the amendment was agreed to, Mr. President.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I do understand the Senator's position dealing with tuna within our domestic waters. That is not an issue that is directly impacted by this amendment. I thank the Senator for his consideration.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 607

(Purpose: To establish minimum levels for the Small Business Administration's Pollution Control Bond Guarantee program)

Mr. HAYAKAWA. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

Mr. WEICKER. Mr. President, I ask unanimous consent that the committee amendments be set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The bill clerk read as follows:

The Senator from California (Mr. HAYAKAWA), for himself and Mr. LEVIN, proposes an unprinted amendment numbered 607.

Mr. HAYAKAWA. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 21, line 4, before the period insert the following:

": *Provided*, That during 1982, the Administrator of the Small Business Administration shall enter into commitments to guarantee not less than $175,000,000 of contingent liability for principal, subject only to the absence of qualified contracts pursuant to section 404 of the Small Business Investment Act of 1958".

Mr. HAYAKAWA. Mr. President, the amendment I am offering today, on behalf of myself and the Senator from Michigan (Mr. LEVIN) attempts to address a problem of authority, and make clear where the authority rests.

On May 7, 1981, I chaired a hearing in the Small Business Committee on legislation to increase the annual authorization level of the Small Business Administration (SBA) pollution control program from $110 to $250 million. At that time, the administration recommended that the level for fiscal year 1982 be reduced to $95 million. Notwithstanding that recommendation, the committee agreed to include the $250 million authorization in the Omnibus Reconcilia-

tion Act of 1981; the Senate accepted the committee recommendation; the conferees agreed to the $250 million mark; and the President signed the act into law.

Now the administration is attempting to subvert congressional authority, completely ignoring the intent of the statute, by placing a ceiling on the pollution control program of $50 million for fiscal year 1982.

Mr. President, I could understand a desire to reduce the size of the program if it was ineffective, or if there was rampant abuse, or if the default rate was exceptionally high, or if there was no demand for it. However, none of these is the case. In his testimony before the House Small Business Subcommittee on Energy, Environment and Safety on November 4 of this year, Mr. Edwin T. Holloway, Acting Associate Administrator for Finance and Investment of the SBA says:

During its nearly five years of operation the program has assisted 213 companies. Through Fiscal Year 1981 the amount of principal that SBA has guaranteed totals $256 million. Since its inception the program has experienced only two defaults, which resulted in $66,000 of payments from the reserve fund. In these cases, our collateral position and work-out agreements with the companies indicate that no losses will occur.

Later in his statement, Mr. Holloway concludes:

This program has proven to be of significant merit in meeting the needs of the small business community in pollution control financing.

I ask unanimous consent that the full text of Mr. Holloway's testimony be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF EDWIN T. HOLLOWAY

Mr. Chairman and members of the subcommittee: I am pleased to have this opportunity today to discuss the Small Business Administration's Pollution Control Financing Guarantee Program.

Public Law 94–305, passed in 1976, authorized the SBA to guarantee 100 percent of the payments due from eligible small businesses under qualified contracts for the planning, design, financing or installation of pollution control facilities or equipment. The program was designed to allow small businesses to obtain access to the municipal bond markets. This would put them on a more equal footing with their large competitors, who are already able to receive favorable rates and terms for their pollution control financing. Under the program small business concerns are now able to obtain access to an existing supply of funds which were not previously available to them.

Over 200 small business concerns have utilized the tax-exempt bond financing SBA guarantee program. The process begins when a public entity issues tax-exempt pollution control revenue bonds. The term of repayment of the bond is typically 20–25 years. The business enters into a contract with the issuer of the bonds stipulating that periodic payments in sufficient amounts to cover the interest payments to the bondholders and to redeem the bonds as they mature will be made by the small business. The ability of the small business to comply with the terms of this contract is guaranteed by SBA.

Small businesses, because of their limited size and lack of investor recognition in the market, have not been able to obtain tax-exempt financing. The SBA guarantee of the contract between the small business and the issuer provides that recognition. As a result, eligible small businesses can obtain financing in the same manner as corporate giants. In this system that I am describing, the SBA's guarantee role is an "add-on" to the existing system of the municipal bond financing. While the SBA retains the authority for final credit approval, if neither regulates the market nor determines which business loans come into being.

The private sector operates this unique marketplace. This market consists of large and small commercial banks and investment bankers; bond buyers such as insurance companies, banks and individuals; and intermediaries such as bond traders. Through the SBA pollution control financing program, small businesses are added to this market as participants who can enjoy the favorable financing terms and rates previously available only to large firms.

Under the program, bond financing is available on terms up 30 years at competitive rates. Up $5.0 million per small business may be obtained through this bond financing method.

During its nearly five years of operation the program has assisted 213 companies. Through Fiscal Year 1981 the amount of principal that SBA has guaranteed totals $256 million. Since its inception the program has experienced only two defaults, which resulted in $66,000 of payments from the reserve fund. In these cases, our collateral position and the work-out agreements with the companies indicate that no losses will occur.

On an annual basis, the program has grown considerably since its inception. In FY 1977, 12 companies were assisted for a total principal of $5.7 million; in FY 1978, 14 firms for $9.9 million were assisted; in FY 1979, 45 firms for $41.5 million were assisted; in FY 1980, 77 firms for $98.5 million, and in FY 1981, 66 firms for $99.9 million were accommodated through the program. There are currently outstanding, 55 commitments to be closed totalling $91.2 million in principal. Additional applications from 47 companies totalling $77.8 million in principal have been received and are being processes. Further, a recent informal polling of many underwriters and bond issuing authorities active in the program reveal that 151 applications totalling $210 million are being processed for submission to SBA under the program.

The program was designed to be and is self-sustaining. Although Congress appropriated $15 million in 1976 to cover losses, this amount has never been needed and still remains available. In addition, through September 31, 1981, fees in excess of $20 million had been collected to cover any losses that might be experienced. This provides a total loss reserve of over $35 million including interest earned on the amounts collected. The probability of losses is minimized by the overall stringent credit criteria, the eligibility requirements of the program and the high levels of cooperation between the public and private sectors in implementing the program.

This program has proven to be of significant merit in meeting the needs of the small business community in pollution control financing.

Mr. Chairman, this concludes my prepared remarks. I will be pleased to answer any questions that you may have at this time. Thank you.

Mr. HAYAKAWA. Mr. President, in light of the SBA's and Congress' clear support for this program, I can not understand why the administration would choose to cut it so drastically. I understand that the economy is experiencing a recession, and that Federal intervention in the credit market usurps credit otherwise available to the private sector for productive investment and economic growth. But this program of guaranteeing tax exempt municipal bonds is used for pollution control facilities which are mandated by law, and merely assists small businesses in financing Federal requirements. These expenditures would not have to be made by small businesses were it not for the environmental regulations.

Since the Federal Government is not paying for the equipment it requires, the very least that must be done is assisting small businesses to finance the expenditures necessary to meet the Federal requirements. The SBA pollution control program carefully screens applicants for creditworthiness, and issues a guarantee on bonds and loans which the businesses have to obtain on their own, at a cost borne by the businesses. Taxpayers are not only not paying for this program, they are making money on the fees charged and the interest accrued on the fund.

Mr. President, there is no excuse for reducing the guarantee activity of this program. Doing away with the guarantees will not diminish the credit activity one iota—because small businesses are going to have to finance the means to comply with Federal standards in any case. Moreover, it does not modify the entitlement of these businesses to tax exempt financing, it merely reduces their ability to find the financing. In fact, the only possible reduction in credit activity that a reduction in this program would achieve would result directly from the inability of small businesses to obtain financing to meet the pollution requirements, culminating in a closure of the businesses.

There have been 55 commitments already made for 1982 guarantees totaling $91.2 million. In addition, 47 companies have made applications totaling $77.8 million, which are being processed. Finally, there are some 151 applications totaling $210 million being prepared. Combined, there is a demand for $380 million in guarantees for fiscal year 1982. With that in mind, Congress wisely raised the program ceiling to $250 million. If the administration's actions are left unaltered, not only will the applications being prepared and processed be ineligible, $41.2 million in committed guarantees will be abandoned. The SBA will have to tell those businesses, "Sorry, I know you spent a lot of time and money preparing your application, and paid to have our staff review it, and received a commitment from this agency, but we have decided to renege."

We cannot allow that to happen. This amendment requires that during 1982 the Administrator of the Small Business Administration shall enter into commitments to guarantee not less than $175 million of contingent liability for principal, subject only to the absence of qualified contracts. This floor level will allow all of the current commitments to be honored. and insure that at least $84 million of the potential $288.8 million in remaining requests are committed.

I believe this amendment is necessary

if we are to establish the authority of Congress to set levels of Federal credit guarantee activity, preserve the pollution control program, and, indeed, allow many small businesses to continue operating. I urge the adoption of the amendment.

Mr. President, I ask unanimous consent to have printed in the RECORD a statement by Senator LEVIN, who is unable to be here today. He is a cosponsor of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

● Mr. LEVIN. As cosponsor of this amendment, I thank the Senator from California for his leadership on this issue, I understand this amendment is acceptable to the floor managers of this bill.

This amendment would simply require the Administrator of the Small Business Administration to satisfy the intent of Congress as contained in the Omnibus Budget Reconciliation Act of 1981. The amendment would direct the Administrator to utilize not less than $175 million of the $250 million authorized by Congress for SBA's pollution control financing guarantee program, subject only to the absence of qualified firms seeking SBA's guarantee for their pollution control financing.

Each year, many small businesses are faced with the need to install pollution control equipment in order to meet Government imposed pollution control requirements. These firms are often unable to secure financing from traditional sources. When financing is available, it can be obtained only on unfavorable terms at extremely high interest rates. Traditional lending institutions are often unwilling to loan money to small businesses for investment in nonproductive pollution control equipment. Furthermore, small firms are reluctant to borrow money for an investment which will not improve the productivity or profit of their business and will tie up needed capital. The pollution control financing guarantee program, used in conjunction with pollution control industrial revenue bonds, allows small firms to obtain funds at reasonable rates.

As a result, guarantees for pollution control financing are critically important to small businesses and this Nation. Without this program, many firms would be forced out of business with an obvious job loss. Without this program, progress on cleaning this Nation's air, water, and land would be slowed.

During consideration of the fiscal year 1982 Omnibus Budget Reconciliation Act, the Small Business Committee increased the authorized program level of the pollution control financing guarantee program to $250 million from $110 million in fiscal year 1981. This action was taken in response to the tremendous demand for pollution control guarantees experienced in fiscal year 1981. In fact, only 2 months into fiscal year 1981, $52 million in guarantees had been committed. At the same time, SBA had another $75 million in requests pending of what they considered to be worthy applications.

A similar situation is occurring this fiscal year, but under different circumstances. While demand continues to increase, the Reagan administration on November 5, 1981, imposed an arbitrary "cap" of $50 million on SBA's pollution control program for all fiscal year 1982.

This "cap" is contrary to the needs of small businesses and the intent of Congress. On November 4, 1981, SBA's Associate Administrator for Finance and Investment testified before the House Small Business Subcommittee on Energy, Environment and Safety, stated that there are currently outstanding 55 commitments totalling $91.2 million, of which $40 million will be closed by December 31, 1981. Additional applications from 47 firms totalling $77.8 million have been received and are being processed. Further, a recent informal polling of many underwriters and bond issuing authorities active in the program revealed that 151 applications totalling $210 million are being processed for submission to the agency, according to SBA.

Of possibly more importance, however, this artificially imposed cap flies in the face of the congressional desires and explicit statements that SBA's guarantees be available for this pollution control financing program. Last fiscal year, Congress specifically increased the program level to meet the demonstrated pollution control financing needs of small businesses. This increase would therefore be understood by the administration to mean that Congress intends guarantees to be made available to qualified firms so that investments can be made in equipment necessary to meet the Government's pollution control requirements.

This amendment, I believe, will insure the congressional intent on this one program is followed. However, there are other guarantee programs within SBA and outside where arbitrary caps have been imposed on agency utilization of guarantees—caps which bear no relation to the level of demand experienced in these programs. The administration's actions raised serious questions about the institutional role of Congress and whether our efforts to set budgets and program levels for agencies have any meaning at all when the executive branch arbitrarily makes changes without notification, let alone approval.●

Mr. WEICKER. Mr. President, I thank the distinguished Senator from California for his very perceptive remarks in relation to the amendment he has presented.

By using tax-exempt, SBA guaranteed pollution control revenue bonds, SBA cooperates with commercial and investment banks and local and State authorities to provide access to long-term, below market financing to eligible small businesses in the same manner that large corporations obtain their financing for pollution facilities.

This program has been one of SBA's most successful and problem-free programs. Since its inception, SBA guaranteed over $238,000,000 in principal amount of obligations, for over 200 small companies, employing nearly 20,000 people. Financing for pollution abatement facilities has occurred in 25 States with more participating States projected in the future. When this program was enacted in 1976, a revolving fund capitalized at $15,000,000 was created.

Fees charged borrowers for processing and guaranteeing the bonds are paid into the fund. Liabilities incurred through default would be paid out of that fund. To date, through collection of guarantees and other fees of over $16,000,000, this fund has more than doubled to approximately $31,000,000, without further appropriations required from Congress. In addition, through investment of the moneys in the revolving fund, SBA has earned an additional $738,000 during the first 6 months of fiscal year 1981 for the Government.

During the life of the program, only two defaults have occurred which according to CBO and SBA, will not result in any ultimate loss to the Government.

I commend my colleague from California for his amendment; and, on the part of the majority, I am delighted to accept it.

Mr. HOLLINGS. Mr. President, the program makes money for the Government. Let the record show that I believe this is the first one we have passed this year that would make money for the Government. We join in supporting the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 607) was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HOLLINGS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 608

(Purpose: To reduce funding for the Federal Trade Commission)

Mr. KASTEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Does the manager of the bill request that the committee amendment be set aside?

Mr. HOLLINGS. I ask unanimous consent that the committee amendment be set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The bill clerk read as follows:

The Senator from Wisconsin (Mr. KASTEN) proposes an unprinted amendment numbered 608:

On page 16, line 17, strike "71,958,000" and insert in lieu thereof: "68,100,000".

Mr. KASTEN. Mr. President, this amendment would reduce funding for the Federal Trade Commission from $72 million to $68.1 million. The FTC is currently spending at a rate of $68.1 million a year, almost $4 million less than the level recommended in the bill before us today, and the Commission has voted to accept a budget as small as $61.1 million. I believe that $68.1 million is more than enough to allow the FTC to carry out essential programs and to continue operating at a productive level.

Mr. President, we had an opportunity to discuss this particular issue in the Appropriations Committee. At that time, the Senator from Connecticut and I discussed the merits of this amendment. I thank him for his cooperation in the committee and in deliberations during the last few days. I thank him also for his understanding and cooperation in our efforts to work for an efficient Federal Trade Commission and one that will not back away from its essential responsibilities, particularly in the area of antitrust enforcement.

As chairman of the authorizing subcommittee, I look forward to working with him in the future. I pledge my continued cooperation as we work together to make the FTC a more effective and more efficient Government agency.

Mr. President, if my amendment is agreed to, we would simply be funding the FTC at a rate approximately equal to what it is spending today. A funding level of $68.1 million would permit the FTC to reevaluate its preliminary decision to reduce the number of regional offices from 10 to 6, and to reduce employment levels in those offices.

While I believe that essential FTC enforcement programs would not have been gutted at the $61.1 million level accepted by the FTC, the higher $68.1 million level I now propose should certainly allay any fears that Members may have in that regard.

Mr. President, since January both Congress and the administration have searched for ways to reduce Federal spending. Here is one place where we can cut, and at the same time preserve major FTC programs and staffing patterns. This amendment has the implicit support of both the FTC and the administration, it has been cleared with the appropriations subcommittee staff on both sides, and it brings us one step closer to our budget goals for fiscal year 1982. I urge adoption of this amendment.

Mr. President, I have worked, and worked successfully, with the chairman of the subcommittee. I know also that he has now been in touch with the Chairman of the FTC. I guess if there is anything we have accomplished in the last 3 or 4 weeks, it is that we have worked with the FTC and particularly the new Chairman. He understands that he is to work with us, and he understands particularly the importance of the appropriations process and of this bill.

I think we have succeeded in getting the FTC's attention. I think we have succeeded in making a step forward, and I hope that we can succeed now in backing up somewhat and finding a compromise level of the appropriations for the fiscal year 1982.

Mr. HOLLINGS. Mr. President, will the distinguished Senator yield for a question?

Mr. KASTEN. I yield.

Mr. HOLLINGS. As I understand it the Senator from Wisconsin does not in any wise wish to restrict the antitrust activities of the Federal Trade Commission by this amendment. Will the distinguished chairman of our Subcommittee on Antitrust object to the Federal Trade Commission viewing the Mobil-Marathon merger?

Mr. KASTEN. I am the chairman of the Consumer Subcommittee of the Commerce Committee. I do not have any objection to either the Justice Department or the FTC reviewing this matter. I am honestly not sure whether it is the Antitrust Division at Justice or if it is the FTC that would be the most efficient spot for this question to be reviewed.

But either way, I have no objection to any kind of review of this question or any other questions. The key point is that if any changes are going to be made in the essential responsibilities of the Federal Trade Commission having to do with antitrust, those changes should be made in the legislative branch, through the appropriations process and through the authorizing committees.

We should not by the budget process back away or start to gradually back away from the important commitment we have to antitrust. The FTC should not make changes through the budget process that appropriately belong here in the appropriations and authorization process. I believe that is one of the things that the Senator from Connecticut and I have been able to encourage, and it is something that I believe that the Commission accepts.

Mr. HOLLINGS. So if I understand it, then, it is not the intent of the Senator from Wisconsin to in any wise inhibit or restrict the Federal Trade Commission if it so sees fit to look at that particular merger?

Mr. KASTEN. The Senator is correct.

Mr. HOLLINGS. I thank the distinguished Senator from Wisconsin.

Mr. WEICKER. Mr. President, I thank the distinguished Senator from Wisconsin for his handling of this matter from its inception, during the Appropriations Committee hearings, and to this point in the Chamber.

It is true that in the formation of any new administration some matters can slip between the cracks and one of those matters was communications between the new Chairman of the Commission and the Appropriations Committee and the authorizing committee. I also join with the Senator from Wisconsin in happily stating that those communications are in place now and what is being done here in the Chamber shows that they are working and working well.

I think the Senator from Wisconsin also stated with great clarity my feelings and his own, I know, but certainly mine also as to any change that might come about in the mission of the FTC, but that is a matter to be handled by the legislative and executive branches in the normal constitutional process and not something to be achieved by virtue of budget recommendations.

A reduction to $68.1 million in the fiscal 1982 budget from $72 million is a total reduction of $3.9 million, or 5.4 percent and would require workyear and related operating expense reductions in most Commission programs.

A limited hiring freeze would be necessary to meet the $68.1 million budget. Attrition would yield the reductions necessary and no reductions-in-force would be required as would be under the administration's $61.1 million proposal. Related reductions in operating expenses would be required; however, near-normal operations could be conducted.

This level would be $2.7 million less than the actual fiscal 1981 appropriation—$70.8 million. However, increased personnel compensation costs and major rate increases in space, $1.3 million, and utilities have caused fiscal 1982 base requirements to increase substantially.

Programmatically, reductions in most cases will be applied across the board and would not adversely affect the general thrust of existing Commission policy. The Commission has stated, in all of the various budget exercises, that it intends to maintain the same proportion of available resources allocated to the two enforcement missions—antitrust and consumer protection, making most of the cuts in nonenforcement and overhead accounts. But obviously, the agency will be engaged in fewer antitrust and consumer protection activities.

This reduced level would allow the continuation of most of the Commission's current programs. It does give the new Chairman of the Commission the flexibility to expand some important areas of critical concern—for example, antitrust investigations of price-fixing and other, illegal collusive activity—while forcing the curtailing of other less productive areas—for example, the industrywide program in the competition mission.

In the consumer protection mission, this reduction will require the Commission to become more selective in new case generation in areas like enforcement of credit statutes but would allow some modest expansion in benefit-cost analyses as required by statute.

In sum, the revised budget of $68.1 million forces the Commission to curtail activities and economize in many areas but allows the continuation of basic antitrust and consumer protection programs vital to small businesses and consumers.

Never before has there been a greater need than now for the Federal Trade Commission. I am confident that its new Chairman as he gets a handle on the many problems that will be confronting him is going to look long and hard at what it is that is transpiring in this Nation today vis-a-vis the concentration of economic power.

I agree with many of the things, I might add, that he has said in the press vis-a-vis previous activities of the Commission which seem to go way beyond the legislative mandate.

The consumer needs to be protected. I think he has made clear he is going to do that without unnecessarily bogging the Commission down in dotting of every "i" and crossing every "t."

I hope that the working out of this funding, which I might add is a compromise of views as between his initial views, the initial views presented by the administration, and those presented within the Appropriations Committee, will enable him to do the job and do it well.

I accept the amendment, but most importantly, I commend the distinguished Senator from Wisconsin for a very statesmanlike job here in bringing together this agency of Government with

the legislative branch. Indeed, even though his appointment comes from the administration, and I am sure his philosophy might be akin to the administration, for the most part his contacts with Government are going to be with this branch of Government and it really just makes no sense to get those relationships off on the wrong foot.

I congratulate the Senator from Wisconsin for putting things back on the track.

Mr. KASTEN. I thank the distinguished Senator and chairman of the subcommittee. I greatly appreciate and admire his fine work on this bill, and particularly on this amendment, and I look forward to working with him in our continual oversight and attention to the Federal Trade Commission, in particular the FTC's antitrust enforcement.

Mr. GORTON. The report stated the committee's belief, "* * * that the FTC should maintain a viable regional structure." It indicated that the regional offices "* * * have a major role in working with the small business communities in their areas, in identifying local anticompetitive problems, in enforcing antitrust laws, and in explaining to businesses their rights and responsibilities under numerous Federal statutes." The committee specifically found that the regional offices have been instrumental in protecting consumers and very cost effective, having obtained more than $100,000,000 in consumer redress during the past 3 years, enough to offset their operating costs for more than 7 years. The report also noted, however, that the recommended appropriation did represent a significant reduction, "* * * and requires the Commission to reevaluate the configuration and placement of its regional offices." It added:

(T)he Committee expects the Commission to undertake a review of those factors which affect an effective, although smaller (at least five offices) regional structure.

It is my understanding that a majority of the Commission recommended that the number of regional offices be reduced from 10 to 6, strictly as a means of meeting a possible appropriations reduction to $61,123,000; and that this would require that the number of work years allocated to the regional offices be reduced from approximately 300 to 150 by the middle of fiscal year 1982, requiring a reduction in force of about 100 people. I further understand that in the case of an appropriation of $68.1 million, as Senator KASTEN's proposed amendment would establish, the Commission would look anew at the question of whether the number of regional offices should be reduced. Is the foregoing consistent with the Senator's understanding of the circumstances?

Mr. WEICKER. Yes, it is.

Mr. GORTON. Does the report language which I have quoted reflect an intention by the committee to enjoin or encourage the FTC to, in fact, reduce the number of regional offices, assuming the $68.1 million appropriation is approved by the Congress?

Mr. WEICKER. No, it does not. The language simply reflects the committee's recognition that a reduction in the number of regional offices unfortunately might be necessary or prudent, even at the higher appropriation figure.

Mr. GORTON. I thank the distinguished Senator.

Mr. KASTEN. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment (UP No. 608) was agreed to.

Mr. KASTEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. INOUYE. Mr. President, I ask unanimous consent that Bryan Walsh, of Senator CHILES' staff, be given the privilege of the floor during the debate and votes on this matter.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. KASTEN). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. HEINZ). Without objection, it is so ordered.

Mr. BAKER. Mr. President, under an order previously entered, there will be no votes before 3 o'clock today. But, as I indicated earlier today, I expect this day will be a fairly late day because at 6:10 p.m. we start on another matter.

There will be a series of votes, and then we will resume consideration of the bill now before us.

Mr. President, I understand that there are important conferences going on, including the conference on the agriculture bill which will require the attention of the chairman of that committee, the distinguished Senator from North Carolina, and other Members. However, I think it is also urgent that we go on with the consideration of this measure, the consideration of amendments as and when they can be offered.

The distinguished Senator from North Carolina (Mr. HELMS) has indicated that he will try to make arrangements to juggle those balls at the same time to see if we can continue the conference on the farm bill while we are still going on with the consideration of this measure.

I do expect the Senate to do the best it can under these difficult circumstances. This is rather a sample of things to come, as it always is in the final days and weeks in a session. We have too many things to do and too little time to do them in.

I would urge all Members to consider that we have to invest this time wisely between now and later in the afternoon on this bill, to make arrangements to do the conference report as they can, offer these amendments as we must, and get on with that and with other matters as quickly as possible.

Mr. HELMS. Mr. President, will the distinguished majority leader yield?

Mr. BAKER. I yield.

Mr. HELMS. Mr. President, as the distinguished majority leader indicated, we do have a conference with the House on the farm bill which, up to now, has gone on and on like Kelly's brook, and it is likely to do that for some time.

It is an immensely extensive bill. We are trying to bring it into some sense of logic. I feel that that deserves the attention of all members of the conference from the Senate side as well as the House side.

What I would suggest to the leader is that he let me go back to the House and see if I can find someone to chair that conference and then come back.

Before I go, I would pose a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state the inquiry.

FIRST EXCEPTED COMMITTEE AMENDMENT—PAGE 2, LINES 17–23

Mr. HELMS. At the present time, is the first excepted committee amendment on page 2, lines 17 through 23, which is the prohibition of prosecution of farmers for failure to return the agricultural census form?

The PRESIDING OFFICER. That is the first excepted committee amendment.

The first excepted committee amendment is as follows:

On page 2, line 17, beginning with ": Provided.", strike through and including line 23;

Mr. HELMS. Just to get the ball rolling, let me make a brief statement and ask for the yeas and nays.

Mr. BAKER. Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, in the opinion of the Senator from North Carolina, and in my capacity as chairman of the Agriculture Committee of the Senate, I am constrained to suggest that the House acted wisely in providing that no funds be made available to the Bureau of the Census for the prosecution of any person for failure to return 1978 Agricultural Census forms 78A40A, or 78A40C or 78A40D, or form 79A9A or form 79A9B, or for the preparation of similar forms for any future agriculture use.

Mr. President, I simply do not feel I have ever heard a great number of complaints about a Government nuisance that has been the case with respect to the census forms. If any of my colleagues have constituents who are farmers, and most of them do, I would invite them to seek the opinion of those farmers regarding these forms. I doubt that Senators could repeat the precise wording of the responses they will receive from the farmers on this floor or in any polite society.

I have had farmers tell me it takes up to 3 days to fill out some of the forms. It should be borne in mind that a great many farmers are not oriented toward paperwork in the first place, but there has to be a limit as to what the Federal bureaucrats can require.

It is a drastic step, I realize, to prohibit prosecution, but I do not know of any other way to get the attention of the

bureaucrats in this matter. Why should a farmer be fined or thrown into jail because a census bureaucrat has devised an impossible form to fill out?

I think it is up to the Federal bureaucrats to devise something simpler, and I think that the House language is the only way to send a message that desperately needs to be sent.

Having said that, Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. HELMS. Mr. President, the distinguished Senator from Hawaii has handed me his copy of this census form that the farmers are required to fill out. I left my copy in my office.

With his indulgence, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the form was ordered to be printed in the RECORD, as follows:

The form requested to be printed, not reproduced in the RECORD.

Mr. WEICKER. Mr. President, the committee has eliminated language in the bill that was included in the fiscal year 1981 Appropriations Act, which prohibits the prosecution of any person for failure to return forms associated with the 1978 Census of Agriculture, or the preparation of similar forms for any future agricultural census. The forms concern the farm finance survey and the census of agricultural services, both of which are important benchmarks for the preparation of the national income and product accounts. Officials at the Bureau are particularly concerned about the farm finance survey which contains data on farms and farm landlords not available from any other source. The basic statistics obtained are required for calculating many of the economic data series describing the economic condition of the farm sector.

We have received letters of support for the Committee's action from the following people, and I ask unanimous consent to have them inserted in the record at this point:

Shirley Kallek, Associate Director, Bureau of the Census, Department of Commerce.

William G. Lesher, Assistant Secretary for Economics, Department of Agriculture.

Robert P. Parker, Chief of the National Income and Wealth Division, Bureau of Economic Analysis, Department of Commerce.

Paul S. Weller, Vice President, Public Affairs, National Council for Farmer Cooperatives.

Donald E. Wilkinsen, Governor, Farm Credit Administration.

John H. Aiken, Executive Director, Federal Statistics User Conference.

C. Edward Harshbarger, Research Manager, Farm Bank Services, Denver, Colo.

Peter J. Berry, Professor of Agricultural Finance, University of Illinois at Urbana-Champaign.

Richard K. Perrin, Professor and Chairman, Economic Statistics Committee, North Carolina State University.

George R. Dawson, Department Head, College of Agriculture, Mexico State University.

Luther Tweeten, Regents Professor, Oklahoma State University.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF COMMERCE,
Washington, D.C., July 17, 1981.

Mr. TIMOTHY R. KEENEY,
Subcommittee on State, Justice, Commerce and the Judiciary, Senate Committee on Appropriations, Washington, D.C.

DEAR MR. KEENEY: Enclosed are fact sheets concerning the farm finance survey and the census of agriculture services which are conducted as part of the census of agriculture. As I indicated to you, although funding for the 1982 Census of Agricultural Services was eliminated from the 1982 budget request, it would be helpful if the language could be deleted for future censuses. The appropriate form numbers are 78A-40A, 78A-40B, 78A-40C, and 78A-40D.

We are much more concerned about the elimination of the language prohibiting the conduct of farm finance survey (Forms 79A-9A and 79A-9B). This survey provides data which are not available from any other source. It is conducted on a sample basis in the year following the basic census and covers only about 45,000 farms and about 35,000 farm landlords. Farm landlords are covered in no other census or survey. A measure of its importance is shown by the fact that the Department of Agriculture contributed approximately $600,000 to the 1979 survey in order to obtain data at the state level since our funding permitted only the collection of data at the national level.

Our suggestion for the amendment language is—On page ——, Line ——, following "or 78A-40D" add ":" and delete "or form 79A-9A, or form 79A-9B, or for the preparation of similar forms for any future agricultural census."

If there are additional questions, please call me at 763-5274.

Sincerely,

SHIRLEY KALLEK,
Associate Director,
Bureau of the Census.

U.S. DEPARTMENT OF COMMERCE,
Washington, D.C.

REINSTATEMENT OF THE CENSUS OF AGRICULRURAL SERVICES IN THE 1982 CENSUS OF AGRICULTURE

Increasingly, farmers and ranchers have been buying more of the goods and services used in production of their crops and livestock. These services have become an integral part of the agricultural production process. Consequently, the National Economic Council identified a number of areas in our economy about which very little information was available, including activities classified as agricultural services. The Agricultural Services Census was established in 1969 to provide the data for this growing segment of the agriculture input sector.

The data collected in this census are sought by government agencies as well as by business. The Bureau of Economic Analysis uses the data as a major source for the preparation of certain segments of its detailed input-output study of the U.S. economy. These data also constitute an important benchmark for the preparation of the national income and product accounts.

Data from this census are used in the development of the total production estimates for the gross national product (GNP). This information enables a precise determination of the contributions of this particular industry group to the overall U.S. economy. Even though the agricultural services group is only a part of the total number of industries which go into the input-output estimates, the ultimate validity of the input-output tables and analytical system is a direct function of its component parts. Considerable success has been made at improving the reliability of the GNP and to discontinue the Agricultural Services Census would, in effect, decrease the reliability of the GNP estimates for the agricultural sector.

This program receives strong support from the U.S. Departments of Agriculture, Labor, and the Interior, the Farm Credit Administration, and various other Federal agencies. Continuation of this data series was also unanimously supported by the Census Advisory Committee on Agriculture Statistics at its meeting on October 23, 1979. This committee represents all sectors of the agricultural economy.

The increasingly significant contribution of the agricultural services sector to total agricultural production is critical to the full understanding of the Nation's agricultural production system. For example, employment of over one million workers with a total payroll of over $2.5 billion were reported in the 1978 Agricultural Services Census.

FACT SHEET—FARM FINANCE SURVEY

The farm finance survey provides a series of data which are collected on a sample basis once every five years following the census of agriculture. It was first conducted in 1954. The 1979 survey included a sample of 45,000 farm operators and 35,000 landlords (less than 2 percent of farm operators) minimizing respondent burden to the extent possible. Because of the burdensomeness and sensitivity of financial-type inquiries they have been excluded from the census of agriculture form. However, to meet the priority needs of the data users, most such questions have been included in one comprehensive sample survey—farm finance.

The survey provides needed information on the financial status of the agricultural sector of the Nation's economy. The basic statistics obtained in the farm finance survey are required for calculating many of the economic data series describing the economic condition of the farm sector. Current economic data, such as the sources and level of income received by farmers, sources and level of credit, methods of financing new technology, and the parity price index for agriculture depend on data from the survey. These economic data series provide policy analysts and decision makers with information needed to make many important decisions affecting farmers.

In addition to being the only source for some of the data in these economic data series, the survey is the only comprehensive source of data for analyzing and understanding the relationships among the financial, operating, structural and socio-economic characteristics of U.S. farms and farm families. This unique feature of the survey makes it a vital source of factual information to help in making policy and program decisions that have significant impact on the economic status of the farm sector.

Examples of policy and program decisions dependent on data from the data from the Farm Finance Survey:

Assessing the financial condition of the farm sector and for different sizes, types or other structural characteristics of farms;

Evaluating the effectiveness of commodity programs in improving the financial condition of farmers;

Monitoring the uses of credit by farmers to develop additional capital resources and adopt new technology to improve productivity;

Evaluating the adequacy of available credit for particular groups of farmers such as those with small farms, beginning farmers, or tenant operators of farms;

Analyzing the need and adequacy of risk reduction programs in agriculture, such as crop insurance, disaster assistance programs and grain reserves;

Assessing the impact of tax policies on farmers, especially policies relating to investment credit, estate taxes, and real property taxes;

Analyzing the impact of farm programs and policies on the structure of the farm sector, including increasing concentration of production in fewer and larger farms and control over farm production through contracting and vertical integration;

Evaluating financial programs, market shares, and credit service provided to farmers by major institutional lenders such as the Farm Credit System; and

Constructing gross national product accounts for the farm sector and personal income data series used to distribute about $50 billion of Federal funds.

Commodity Futures Trading Commission;

American Banking Association; and

Farmbank Research and Information Services.

DEPARTMENT OF AGRICULTURE,
Washington, D.C., July 28, 1981.

Hon. LOWELL WEICKER,
Chairman, Subcommittee on State, Justice, Commerce and the Judiciary, Committee on Appropriations, Washington, D.C.

DEAR MR. CHAIRMAN: I write in support of your effort to remove the language of the amendment by Senator Melcher which has the effect of prohibiting the Bureau of the Census from conducting the Farm Finance Survey as a followup to the 1982 Census of Agriculture.

This survey is the only instrument currently available for providing vital information on the financial status of the agricultural sector of the Nation's economy. Current economic data, such as the sources and level of income received by farmers, sources and level of credit, and methods of financing new technology for agriculture depend on data from the survey. The Department of Agriculture views these data of such importance that in 1979 the Department contributed approximately $600,000 to the Bureau of the Census' survey in order to obtain data at the state level since without such additional support the Bureau would have only been able to collect data at the national level.

We support the amendment language provided by the Bureau of the Census: On page ———, line ———, following "or 78A-40D" and ":" and delete "or form 79A-9A, or form 79A-9B, or for the preparation of similar forms for any future agriculture census."

Since the data collected in the Farm Finance Survey are vital to decision making in both the public and private sectors and since these data are available only as a result of the Farm Finance Survey, I hope it will be possible to eliminate the restrictions in the Fiscal Year 1982 Appropriations measure.

Sincerely,

WILLIAM G. LESHER,
Assistant Secretary for Economics.

U.S. DEPARTMENT OF COMMERCE,
Washington, D.C., September 14, 1981.

Hon. LOWELL P. WEICKER, Jr.,
U.S. Senate,
Washington, D.C.

DEAR SENATOR WEICKER: I am writing in support of the effort to permit the Bureau of the Census to conduct the Farm Finance Survey as part of the 1982 Census of Agriculture.

... of Economic Analysis of the Department of Commerce is responsible for the preparation of the official estimates of the Gross National Product (GNP) and related national and regional measures, which are widely used by Government and business to formulate and monitor policy decisions. The quality of the estimates of the output and income of the components of these measures relating to the farm sector rely heavily on the results of the Farm Finance Survey. Specifically, this survey provides benchmark data for production expenses, inventories, and labor costs. Because there is no alternative source for these items, loss of the Farm Finance Survey would lower the quality of our estimates.

The Bureau of Economic Analysis appreciates your efforts to reconsider this important matter.

Sincerely yours,

ROBERT P. PARKER,
Chief, National Income and Wealth Division.

NATIONAL COUNCIL OF FARMER COOPERATIVES,
Washington, D.C., August 31, 1981.

Hon. LOWELL P. WEICKER, Jr.,
Chairman, Subcommittee on State, Commerce, and the Judiciary, Committee on Appropriations, U.S. Senate, Russell Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: For more than 30 years, representatives of the National Council of Farmer Cooperatives have served on the agricultural advisory committee to the Bureau of the Census. We have helped develop modern-day versions of both the U.S. Census of Agriculture and its follow-on surveys.

Now we learn that one of those important follow-on surveys, the Farm Finance Survey, is in jeopardy through an amendment to the Commerce Appropriations Bill (H.R. 4169).

We ask your support in assuring proper FY 1982 funding of this Farm Finance Survey, and your opposition to any effort to delete it or render it ineffective.

An analysis of the need and value of national follow-on surveys should be based upon how such data serves the citizenry, not upon the personal whim of legislators or bureaucrats. Unless conclusive proof can be produced to indicate that data collected by this survey is not needed, then it is our position that the survey should be retained. We pledge our every effort to work to reduce respondent burden, and to continue to modify the survey for maximum effectiveness.

Our experience indicates that the Farm Finance Survey provides invaluable follow-on data and comparisons from the quinquennial Census of Agriculture. This data is gleaned from the 3,000-county base of the Census of Agriculture, and is unique in its national scope and agricultural content. It is used by the cooperative Farm Credit System to chart financial trends, to provide financial comparisons among borrowers, and to improve its borrower services. It is used by suppliers to agriculture to plan expansion or shifts in areas of farm needs. And it is used by government to better provide those services needed to retain a healthy and viable agricultural economy.

It is our sincere hope that proper FY 1982 funding will be authorized by your committee, so that this Farm Finance Survey may be initiated as soon as possible. Thank you for your consideration.

Sincerely,

PAUL S. WELLER,
Vice President, Public Affairs.

FARM CREDIT ADMINISTRATION,
Washington, D.C., August 28, 1981.

Hon. LOWELL P. WEICKER, Jr.,
Chairman, Subcommittee on State, Commerce, and the Judiciary, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: We understand that future Farm Finance Surveys are in jeopardy due to an amendment to the Commerce Appropriations Bill (H.R. 4169). In effect, this amendment would prohibit the use of funds appropriated to the Department of Commerce for a Farm Finance Survey. This letter presents our views on the amendment in terms of its implications for achieving the objective of the Farm Credit System as established by the Farm Credit Act of 1971.

The Farm Credit System was created to improve the income and well-being of American farmers and ranchers by furnishing sound, adequate, and constructive agricultural credit and closely related services. To this end, the Farm Credit Administration was created to charter, examine, and supervise the banks and associations that comprise the System. In addition, the Farm Credit Administration is responsible for the analysis of rural credit needs and the means by which those needs can be met under changing farming and economic conditions. Currently, the System has some $75 billion in loans outstanding to agricultural and aquatic producers and their supply and marketing cooperatives.

Achieving our congressionally mandated mission requires that we carefully and continually monitor the financial condition of the agricultural sector. Information provided through loan applications and loan servicing enables us to continuously evaluate the financial status of System member-borrowers. We must look to outside sources, however, for information on how well the System is serving the credit needs of the farm sector as a whole. Among other things, we need information by which to compare the financial condition and characteristics of member-borrowers with those of the aggregate farm population. The census of agriculture is uniquely valuable in this respect. The Farm Finance Survey, conducted as a special follow-up to the larger census, is especially useful insofar as it provides benchmark information on the financial condition of the farm sector and its subsectors, as well as comprehensive information on the sources and uses of agricultural credit.

The Farm Credit Administration supports efforts to hold the reporting burden imposed on American farmers to the minimum necessary to develop and maintain sound agricultural policies. We are concerned, however, that loss of the Farm Finance Survey could seriously reduce the amount and reliability of information available to gauge the financial condition of the farm sector. This would detract from our ability to provide accurate and timely reports to Congress on the extent to which the System's objective is being met.

Sincerely,

DONALD E. WILKINSON,
Governor.

FEDERAL STATISTICS USERS' CONFERENCE,
Washington, D.C., September 17, 1981.

Senator MARK O. HATFIELD,
Chairman, Senate Appropriations Committee, U.S. Senate, Washington, D.C.

DEAR SENATOR HATFIELD: The Board of Trustees of the Federal Statistics Users' Conference and the FSUC Agricultural Statistics Committee strongly support the action taken by your subcommittee on State, Justice, Commerce, and the Judiciary to delete the language of the Melcher Amendment to the 1982 budget of the Department of Commerce that would have denied funds for conducting the Farm Finance Survey as a follow up to the 1982 Census of Agriculture.

The position of our Agricultural Statistics Committee has been clearly expressed by the chairman of that committee in a letter to me. He stated:

"The FSUC Agricultural Statistics Committee feels that it is essential to restore a portion of the Department of Commerce budget so that the Farm Finance Survey can be conducted." A poll of members produced

the following major reasons we feel this course of action should be taken:

"1. The Farm Finance Survey is the major, and in most respects, the only information on the financial aspects of the agricultural sector that can be used to design, administer, and measure the effects of agricultural programs and policies.

"2. The current economic stress in the agricultural sector brought about by the cost/price squeeze, high interest rates and structural changes makes it essential to retain reporting of this nature so that government and private sector programs affecting farm operators may proceed from a realistic base of information.

"3. The survey would involve only a small number of farms, thus avoiding a census which might be burdensome to the farmer respondents.

"While we agree with many of the cost reduction programs in place or under discussion, the Farm Finance Survey is, in our view, an essential resource for the effective management of agricultural programs and should be treated as an exception and conducted as planned."

A list of the members of the FSUC Agricultural Statistics Committee is enclosed.

A sampling of views of the heads of Departments of Agriculture at various Universities indicated that they approve restoration of funds in the 1982 budget of the Department of Commerce for conducting the 1983 Farm Finance Survey. This support comes from the following Universities:

Mississippi State University, New Mexico State University, Oregon State University, Rutgers University, Southern Illinois University, University of Georgia, University of Idaho, University of Minnesota, and West Virginia University.

To cite a specific example of the value of the survey, the head of the Department of Agricultural Economics at the University of Idaho said:

"We utilize the information generated from the Farm Finance Survey in classroom instruction to better inform students in farm management, agricultural policy, marketing and farm finance. We also use this information in many of our research projects and as a basis for our Extension Program in Agricultural Policy. Without this information we would be at a severe disadvantage."

I hope that this information will provide added support for this action should any question arise when the bill comes before the Senate.

Sincerely,

JOHN H. AIKEN,
Executive Director.

AGRICULTURAL STATISTICS COMMITTEE

Richard Lindstaedt, Director Market Research, Elanco Products, Eli Lilly & Company (Chairman, FSUC Committee).

Norman M. Coats, Director, Economic Research Department, Ralston Purina Company.

Bruce L. Gardner, Professor, Department of Agriculture and Resource Economics, University of Maryland.

R. J. McCoy, Manager, Commodity Research & Analysis, the Procter & Gamble Company.

R. Gerald Saylor, Director, Market Economics, Deere and Company.

A. C. Peterson, Director of Agriculture Chemicals Market Research, Shell Chemical Company.

Glenn W. Suter, Director, Division of Statistics, New York State Department of Agriculture and Markets.

Norman Urquhart, Asst. Vice Pres. and Commodity Economist, Citbank.

John Wilkin, Vice President, Doane Agricultural Service, Inc.

FARMBANK SERVICES,
Denver, Colo., September 2, 1981.

Senator LOWELL WEICKER,
Chairman, Subcommittee on State, Justice, Commerce, and the Judiciary, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: I am writing to support your effort to alter the language of the Melcher amendment which prohibits the Bureau of the Census from conducting the Farm Finance Survey as a followup to the 1982 Census of Agriculture.

Obtaining reliable financial information on the agricultural sector of the economy is nearly impossible. This special survey is the only instrument currently available which provides data on the financial condition of American agriculture. This information is very useful to a number of organizations, including the Farm Credit System, because it permits banks in the System to more accurately gauge how lending policies and practices should change to meet the growing credit needs of our farmers and ranchers. The information also permits all lending institutions to monitor regional differences in farm structure and credit worthiness—which is important information to have when new farm programs are being developed.

Since information from the Farm Finance Survey is so important to public and private decisionmakers, I hope it will be possible to eliminate the restrictions in the Fiscal Year 1982 appropriations measure.

Sincerely,

C. EDWARD HARSHBARGER,
Research Manager.

UNIVERSITY OF ILLINOIS,
AT URBANA-CHAMPAIGN,
Urbana, Ill., August 31, 1981.

Senator LOWELL WEICKER,
Chairman Subcommittee on State, Justice, Commerce, and the Judiciary Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR SENATOR WEICKER: As a user of data from the Farm Finance Survey conducted every five years by the Census Bureau, I have been encouraged to indicate the benefits of this data in light of the possible loss of funding for the Survey from an amendment proposed for the 1982 appropriations bill for the Commerce Department. My job is that of a professor of Agricultural Finance at the University of Illinois, conducting research and educational activities on all aspects of agricultural finance with emphasis on the financial management and performance of farm businesses. In support of these activities, a comprehensive, high quality, stable data base is essential in identifying emerging problems, explaining farmers' financial behavior, and evaluating various management strategies for improving financial performance.

I am fortunate to have USDA personnel located at the University of Illinois who have access to and have worked with data from the Farm Finance Survey in the past. Several publications have occurred over the years as a direct result of having this data available, and it has served an essential role in validating many of the assumptions and specifications that finance researchers must make in conducting their analyses. Moreover, I am aware that data from this survey provide important benchmarks with which USDA analysts evaluate possible changes in their annual data series on financial performance in the farm sector. Hence, listing the availability of this data would substantially deteriorate the quality of the excellent performance measures that have been developed for the farm sector, and significantly affect the availability of high quality information for financial research.

Many states do provide record keeping services for selected farmers and many lending institutions compile financial data as well. However, these types of data are not based on sampling procedures and are indicative of selected farm and farmers characteristics. Hence, their generality is quite limited.

Thus, I am quite supportive of efforts to continue the Farm Finance Survey, and hope that this will be the case.

Sincerely,

PETER J. BARRY,
Professor of Agricultural Finance.

NORTH CAROLINA STATE UNIVERSITY,
Raleigh, N.C., September 4, 1981.

Senator LOWELL WEICKER,
Chairman, Subcommittee on State, Justice, Commerce, and the Judiciary, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR SENATOR WEICKER: I write to you to urge your support for funding of the Farm Finance Survey which the Census Bureau has proposed for 1983, which I understand would be included in the 1982 Appropriations Bill.

The American Agricultural Economics Association's Economic Statistics Committee, which I chair, has been cooperating with the Census Bureau and the Department of Agriculture to modify data collection and reporting procedures so as to provide better knowledge about farm income and changes in the structure of the farming sector. This collaboration has been underway for about ten years, and in a recent review of this work it was clear that we are just beginning to see the payoff in terms of improved understanding of the economic health of the farming sector. Much of the data for these efforts can be obtained only from a survey such as the Farm Finance Survey. If it is to be discontinued, our knowledge of the current problems and progress in agriculture will be severely limited. I hope that it will be possible for your committee to find some way to avoid this unfortunate prospect.

Sincerely,

RICHARD K. PERRIN,
Professor and Chairman, Economic Statistics Committee, American Agricultural Economics Association.

NEW MEXICO STATE UNIVERSITY,
Las Cruces, N. Mex., August 31, 1981.

Senator LOWELL WEICKER,
Chairman, Subcommittee on State, Justice, Commerce, and the Judiciary, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR SENATOR WEICKER: I am writing to urge your support of the Farm Finance Survey being debated in committee. Agriculture, the most basic of all industries must have available statistics for use in directing policy decisions. We would be ignoring an industry's needs if we adopted the views of Senator Melcher.

Sincerely,

GEORGE R. DAWSON,
Head of Agriculture Department.

OKLAHOMA STATE UNIVERSITY,
Stillwater, Okla., August 31, 1981.

Senator LOWELL WEICKER,
Chairman, Subcommittee on State, Justice, Commerce, and Judiciary Appropriations, U.S. Senate, Washington, D.C.

DEAR SENATOR WEICKER: I am strongly opposed to efforts to terminate the 1983 Farm Finance Survey, and urge that funds be restored in the 1982 Budget of the Department of Commerce to conduct the Survey.

Without reasonably accurate information

on the economic position of farmers, it is impossible to make sound public policy. The Farm Finance Survey is absolutely critical for reliable information on the economic health of the farming industry. That survey is the only source of reliable data on the assets, liabilities, and net worth of farmers. It provides a quinquennial benchmark that make possible annual estimates of the farming sector balance sheet. It is the only survey that provides sufficient data to specify the income and balance sheet position of farmers by type and size of farm. Such data are essential to determine changes in wealth position of farmers, capital gains, and compare efficiency among farms of different sizes.

This information could potentially be obtained in the Census of Agriculture. Because of its detail and sensitivity, however, it is obtained only from the Farm Finance Survey which, because of the relatively small sample, minimizes the burden on respondents while obtaining reasonably reliable data.

As immediate past president of the American Agricultural Economics Association, former chairman of that Association's Economic Statistics Committee and former member of the Agricultural Census Advisory Committee, I have a good feel for the availability and need for economic data on the farming industry. In addition, as the author or co-author of four books and over 250 journal articles and published papers on agriculture, I have the experience of one who works with the data from day to day. And I can tell you that there are few sets of information more important to farmers, economists, policy makers and others concerning the agricultural industry than information obtained from the Farm Finance Survey. I hope you will spare no effort to see that this survey is pursued in a timely and expeditious manner with full funding.

Sincerely,

LUTHER TWEETEN,
Regents Professor.

Mr. HELMS. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside so I may address another amendment.

The PRESIDING OFFICER. Is there objection to temporarily laying aside the committee amendment? The Chair hears none. Without objection, it is so ordered.

Mr. HELMS. Now I would pose a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

SECOND EXCEPTED COMMITTEE AMENDMENT—PAGE 11, LINES 24–25

Mr. HELMS. Is the next committee amendment the proposal on page 11, lines 24 and 25, restrictions on funding construction of any ship in any foreign country?

The PRESIDING OFFICER. The Senator is correct.

Mr. HELMS. I thank the Chair.

Mr. President, the House language provides that—

No part of any appropriation contained in this title shall be used for construction of any ship in any foreign country.

As a general principle, I do not see how anyone could disagree with that restriction. Frankly, I am puzzled as to why the Senate committee voted to strike the provision. Neither the House report nor the Senate report makes any mention of the provision. I certainly cannot understand how the Senate could go on record as approving the removal of such language.

I wonder if the distinguished floor manager is willing to explain the committee's action.

Mr. INOUYE. The committee's action was an all-sweeping action. We decided to take out all of these conditions in the hope that when this matter is taken up on the floor, the Senate could exercise its will and restore whatever provision they wanted to.

In this case, I would suggest, if the distinguished Senator wishes to restore this language, that it should come under another section. I think it should be on page 14, after line 17, under the Department of Transportation. That is where it would belong.

Mr. HELMS. Page 14?

Mr. INOUYE. Page 14, afer line 17.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. I thank the Chair.

Mr. President, I do not know whether this unanimous-consent request will apply, but I will make a pass at it and see how the distinguished manager of the bill (Mr. WEICKER) reacts to it.

I ask unanimous consent that the House provision on page 11, lines 24 and 25, which were elim'nated by the Senate committee, be reinserted on page 14 after line 17.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I renew my unanimous-consent request.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request by the Senator from North Carolina?

Mr. WEICKER. I have no objection.

The PRESIDING OFFICER. Hearing none, it is so ordered.

Mr. HELMS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HELMS. I want to be certain that the amendment, as eliminated by the Senate committee, is now in place on page 14 after line 17 as a result of my unanimous consent request.

The PRESIDING OFFICER. Is the Senator attempting to insert House language in a later part of the bill?

Mr. HELMS. Yes. I understand the manager of the bill would not object to it.

The PRESIDING OFFICER. That has already been done.

Mr. HELMS. I thank the Chair.

THIRD EXCEPTED COMMITTEE AMENDMENT—PAGE 12, LINES 1–3

Now, Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HELMS. Is the next succeeding committee amendment on page 12, line 1 through 3—

No part of any appropriation contained in this title shall be obligated or expended for promoting or conducting trade relations with Cuba.

The PRESIDING OFFICER. The Senator is correct.

Mr. HELMS. Mr. President, the distinguished and charming Senator from Florida wishes to address herself to this amendment as well, but I do want to say, prior to her arrival in the Chamber, that the House language states:

No part of any appropriation contained in this title shall be obligated or expended for promoting or conducting trade relations with Cuba.

The committee proposes to strike this language. The Senator from Florida (Mrs. HAWKINS) and this Senator from North Carolina wish to make sure that the language is included.

Mr. President, I am at a loss to understand why anyone with the best interests of the United States at heart would want to spend taxpayers' money to promote or conduct trade relations with Cuba. Certainly the House of Representatives does not want to spend taxpayers' funds for this purpose. If the Senate strikes the House language, it would send a wrong signal to Cuba. It would undercut the President and the Secretary of State.

We are talking about taking strong measures against Cuba if Cuba does not stop exporting revolution. We are talking about setting up Radio Free Cuba. A prohibition of the sort passed by the House is completely in accord with U.S. Government policy. Why should we be afraid to spell it out in law? I think the House language should be retained.

Mr. President, I ask for the yeas and nays on this committee amendment.

Mr. WEICKER. Mr. President, I wonder if the Senator from North Carolina will agree to have a short quorum call, because I should like to discuss that with him.

Mr. HELMS. Surely.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Will the Senator state whether he wishes the second committee amendment to be agreed to?

Mr. HELMS. I am sorry, I do not understand what the Chair means.

The PRESIDING OFFICER. The second committee amendment was an amendment to strike.

Mr. HELMS. That is correct.

The PRESIDING OFFICER. The language the Senator from North Carolina proposed to strike had been removed, but the original committee amendment had not been acted on, which would strike this duplicative language.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, as I understand the inquiry of the Chair, he is asking if the Senator from North Carolina agrees to striking the second amendment on page 11 so that it may be inserted and reinstated on page 13. Is that true?

The PRESIDING OFFICER. The Chair states that it has been reinstated. The question now is whether the Senator wishes it stricken.

Mr. WEICKER. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. WEICKER. Mr. President, I move that the second committee amendment be agreed to. I ask unanimous consent that the second committee amendment be adopted.

The PRESIDING OFFICER. Without objection, it is so ordered.

The second excepted committee amendment (page 11, lines 24–25) was agreed to.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

THIRD EXCEPTED COMMITTEE AMENDMENT—PAGE 12, LINES 1–3

Mr. WEICKER. What is the pending business, Mr. President?

The PRESIDING OFFICER. Without objection, the third excepted committee amendment is the pending business.

Mr. WEICKER. If I am not mistaken, did not the Senator from North Carolina have a request pending before the rollcall vote?

The PRESIDING OFFICER. The yeas and nays were not ordered.

Mr. WEICKER. I am aware of that, but was not that the request of the Senator from North Carolina or to the quorum call?

The PRESIDING OFFICER. That was the request of the Senator from North Carolina.

Mr. HELMS. Mr. President, in the light of circumstances, that judgment can be made subsequently, I withdraw at least temporarily my request for the yeas and nays.

The PRESIDING OFFICER. The Senator from Connecticut is recognized.

Mr. WEICKER. Mr. President, as to the proposal relevant to the third committee amendment, which relates to the language which states:

> No part of any appropriation contained in this title shall be obligated or expended for promoting or conducting trade relations with Cuba.

That language was stricken by the subcommittee and the full committee. As I understand the request of the Senator from North Carolina, it is to reinstate that language.

Let me say this: Nothing is a more classic example of legislation on an appropriations bill than this statement and nothing more classically illustrates why it is that there should not be legislation on an appropriations bill or, rather, why it should be handled by the authorizing committees.

The distinguished Senator from North Carolina, among others, is a member of the Committee on Foreign Relations. That is where this subject matter should be addressed. Regardless of what side anybody takes on the issue, the reason it should be addressed there is that we have no foreign policy when it comes to Cuba. As long as we stick these little buzzword cliches in appropriations bills, we are not going to have a foreign policy as it relates to Cuba or Central America or the Caribbean or South America.

Mr. President, this is an enormously important subject to this Nation. In effect, we have had the same foreign policy as between Cuba and the United States since the 1950's. I suggest that the time has come for a review of that policy and implementing one that makes sense.

Maybe the Senator from North Carolina would disagree with the Senator from Connecticut, Mr. President, as to what it is that makes sense, but certainly, the Nation is owed a debate on this subject. Right now, the only foreign policy that we have is name calling. One week it is Castro laying it on Ronald Reagan; the next week it is Reagan-Haig laying it on Castro. What kind of a foreign policy is that?

Senators are going to traipse in here and they are going to vote on this amendment and figure that will settle the Cuban issue. And it does not. It is not that that issue is not without consequence. It could very well lead, under the present set of circumstances, to armed conflict. It jeopardizes our young people. It seems to me that, in every sense of the word, we owe it to this Nation as Senators to establish a foreign policy, one that is conceived in the normal constitutional process, which is by the Senate Committee on Foreign Relations, then by the full U.S. Senate, in conjunction with the President, the State Department, and so on.

Now, if it is the will of the Senators that this language stay in, it is of no matter in the sense of its coming to a rollcall vote. But it is of great import that one of the great issues of this time remains unaddressed.

At the present time, Mr. President, in Cuba—indeed, in the Caribbean and in Central America—the Soviet Union wanders around willy-nilly, all as a result of a foreign policy that was instituted in the late 1950's.

It seems to me that the first question that should arise in anybody's mind is, how valid is a policy that has permitted the Soviet Union to plant itself squarely in our hemisphere? It is obviously a foreign policy that does not work. I should think this should be, along with the Mideast, No. 1 on the agenda of the Foreign Relations Committee.

This amendment, if I am not mistaken, relates to trade relations. Let me tell about trade relations and about trade in Cuba right now. Anybody who thinks it is just the Soviet Union in Cuba should go down there. It is the Soviet Union, all right. It is also Japan, Italy, Spain, Great Britain, West Germany, Canada. Every nation in the world is present in Cuba and is trading with Cuba, and the United States is not competing at all, either in terms of goods or in terms of ideas. That is why ideas are dominated by the Soviet Union and products are dominated by all the world's trading partners, except the United States.

What kind of foreign policy is that? I suggest that the cause of peace and the cause of getting the Soviet Union out of the Caribbean are far better served by the United States getting down there and competing than it is by the present policy of name calling, which purports to be a substitute for a foreign policy.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GARN). Without objection, it is so ordered.

Mr. WEICKER. Mr. President, I ask unanimous consent that the consideration of the third committee amendment, page 12, lines 1 through 3, be temporarily laid aside at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, I want to take a few moments today to reiterate a point that I raised last week in my opening remarks. It is my sincere desire that no later than tomorrow afternoon an appropriation for the agencies funded by this legislation will be approved. However, unless we act promptly, there is every likelihood of another continuing appropriation.

Let me illustrate why another continuing resolution funding the agencies under this bill is undesirable.

First, the bill, as reported by the Senate Committee on Appropriations, achieves greater savings than the House-passed bill. Overall, the 1982 appropriation recommended by the Senate Committee on Appropriations is $1 billion below the 1981 spending levels.

Second, the priorities earmarked by the Senate are considerably different than those established by the House in a number of areas. For instance, we maintain higher spending levels for a number of important fisheries and weather service programs operated by

the National Oceanic and Atmospheric Administration. We have provided a larger appropriation for the continuation of the sea grant college programs. Yet, overall, the Senate spending levels in the Commerce area are $150 million below the House. Under a continuing resolution, these savings will be lost.

In the Justice Department area, the impact of the conventional continuing resolution is even greater. Most agencies—including the Federal Bureau of Investigation, the Drug Enforcement Administration, the litigating divisions and the U.S. attorneys, as well as the Immigration and Naturalization Service—will be funded at 1981 appropriation levels. For the most part, this level would be lower than even the revised budget proposed by the administration and rejected by the committee as harmful to our Nation's criminal justice efforts.

Under a continuing resolution, the Federal Bureau of Investigation will be funded at a level which is $74 million less than that currently in the bill. If you recall, the Bureau informed Congress that the $47 million September cut would result in the loss of 2,000 employees, including several hundred agents. A continuing appropriation could nearly double that reduction. For the Drug Enforcement Administration, the funding level will be $16,479,000 less than that approved by committee. Again this will result in reductions in personnel and could threaten the State and local drug task forces.

Perhaps most severely affected by the failure to enact an appropriation bill will be the Immigration and Naturalization Service. As you know, Senator HOLLINGS and I will offer an amendment to increase the committee recommendation for INS by $85 million. These are emergency funds. They are necessary to deal with the continual tide of illegal aliens.

Recently, we were informed by OMB that INS is currently in a deficiency situation. Without an appropriation bill, however, INS will be continued at a level which is $108 million below that which it needs. There are no emergency funds in the House-passed bill. So, unless the Senate acts on this bill, there will be no emergency funds for the agency.

Finally, I want to underscore something which should already be apparent to the Members of this body. The INS and Justice agencies point out why a continuing appropriation would impose hardship. However, it should also illustrate that to the extent that the Senate submits to extended debate on issues which are extraneous to the appropriations process, the Senate also relinquishes its voice in establishing the priorities of the budget. In my view, this is perhaps the greatest disservice we do for we are foregoing our own constitutional role in setting Federal spending.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mrs. HAWKINS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 609

(Purpose: To authorize the Attorney General to acquire and exchange information regarding certain deceased individuals and missing children)

Mrs. HAWKINS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Does the manager temporarily set aside the committee amendments?

Mr. INOUYE. I ask unanimous consent to temporarily lay aside the committee amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Florida (Mrs. HAWKINS) proposes an unprinted amendment numbered 609.

Mrs. HAWKINS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 25, between lines 15 and 16, insert the following:

Section 534(a) of title 28, United States Code, is amended—

(1) by striking out "and" at the end of paragraph (1);

(2) by redesignating paragraph (2) as paragraph (4);

(3) by inserting after paragraph (1) the following new paragraphs:

"(2) acquire, collect, classify, and preserve any information which would assist in the identification of any deceased individual who has not been identified within fifteen days after the date of the discovery of the deceased individual;

"(3) acquire, collect, classify, and preserve any information from authorized officials of the Federal Government, the States, cities, and penal and other institutions, or from a parent, legal guardian, or next of kin of an unemancipated person, as defined by the laws of the State of residence of such person, which would assist in the location of any missing person who—

"(A) is under proven physical or mental disability making the person a danger to himself or others;

"(B) is in the company of another person under circumstances indicating that his physical safety is in danger;

"(C) is missing under circumstances indicating that the disappearance was not voluntary; or

"(D) is unemancipated as defined by the laws of his State of residence; and"; and

(4) by striking out "exchange these records" in paragraph (4) (as so redesignated) and inserting in lieu thereof "exchange such records or information".

The heading for section 534 of title 28, United States Code, is amended to read as follows:

"§ 534. Acquisition, preservation, and exchange of identification records and information; appointment of officials".

The table of sections at the beginning of chapter 33 of such title is amended by striking out the item relating to section 534 and inserting in lieu thereof the following new item:

"534. Acquisition, preservation, and exchange of identification records and information; appointment of officials.".

(The names of the following Senators were added as cosponsors to UP Amendment 609, by unanimous consent: Mr. ABDNOR, Mr. ANDREWS, Mr. ARMSTRONG, Mr. BAKER, Mr. BAUCUS, Mr. BOREN, Mr. BOSCHWITZ, Mr. BUMPERS, Mr. HARRY F. BYRD, JR., Mr. CHILES, Mr. COCHRAN, Mr. COHEN, Mr. D'AMATO, Mr. DANFORTH, Mr. DECONCINI, Mr. DENTON, Mr. DOLE, Mr. DOMENICI, Mr. DURENBERGER, Mr. EAGLETON, Mr. EAST, Mr. EXON, Mr. GARN, Mr. GORTON, Mr. GRASSLEY, Mr. HATCH, Mr. HEFLIN, Mr. HEINZ, Mr. HELMS, Mr. HOLLINGS, Mr. JEPSEN, Mrs. KASSEBAUM, Mr. KASTEN, Mr. LAXALT, Mr. LUGAR, Mr. MATHIAS, Mr. MATSUNAGA, Mr. MATTINGLY, Mr. METZENBAUM, Mr. MURKOWSKI, Mr. NICKLES, Mr. PACKWOOD, Mr. PELL, Mr. QUAYLE, Mr. RANDOLPH, Mr. RIEGLE, Mr. ROTH, Mr. RUDMAN, Mr. SPECTER, Mr. STAFFORD, Mr. STENNIS, Mr. SYMMS, Mr. THURMOND, Mr. TOWER, Mr. WALLOP, and Mr. WILLIAMS.)

Mrs. HAWKINS. Mr. President, the amendment I am offering today is identical to S. 1701, the missing children bill, which has been cosponsored by 56 Members of the Senate. My amendment would establish a national computer information network to assist law enforcement agencies in locating, and identifying missing children and to aid in the identification of the dead who are found without enough evidence to establish their next of kin.

Currently, the FBI maintains a nationwide file on all information sent to it from the 47 States who submit to it computerized information they collect on missing persons disappearing inside their State borders. A nationwide system makes sense. After all, this is the computer age and an era of profound advances in communications technclogy; 8,000 pieces of information can be stored on a computer chip no larger than a fingernail. Information can be sent without difficulty to other countries.

It is easily within our means to develop a nationwide system for almost any conceivable purpose if the desire is there to do so. Therefore, the country owes a debt of gratitude to the FBI for having the vision to voluntarily provide a national clearinghouse for missing people.

However, statistics indicate that records for only 10 percent of all missing persons are ever entered into statewide computers. I might add that the overwhelming majority of missing persons are children and therefore only 10 percent enter the national clearinghouse. This is a national disgrace because many missing children become classified as missing because they were abducted and taken against their will to other States and countries. With such a modest percentage entered into the clearinghouse, it is obvious that steps must be taken to increase the chances that kidnapped children can be located, wherever they are, and returned safely to their homes.

At the present time, a stolen car gets more attention under current law than does a missing child.

Harsh though the statement is, it is the truth. Recently, as chairman of the Labor Subcommittee on Investigations and General Oversight, I heard heart-breaking testimony from the parents of missing and murdered children. All pointed to the need for a nationwide information system.

From Mr. and Mrs. John Walsh of Hollywood, Fla., whose 6-year-old son, Adam, was abducted from a shopping center and murdered, I heard of the frustration of trying to coordinate their search among different police agencies. Mr. Walsh told my subcommittee:

It is certainly evident that the priorities of this great country are in some disorder. A country that can launch a space shuttle that can return to the Earth and take off again, a country that can allocate millions of dollars to save a small fish, the snail darter . . . but does not have a centralized reporting system or a nationwide search system for missing children, certainly needs to reaffirm the very principles that the country was founded on. We pray, along with thousands of other concerned parents, that you will continue to have the strength to continue your efforts. You have helped us keep the threads of our lives together and given us definite reassurance that Adam did not die in vain. God bless you.

From Mrs. Julie Patz of New York City, whose 6-year-old son, Etan, disappeared on the way to school more than 2 years ago and has never been found, I heard of a family's sense of hopelessness and isolation in trying to cope with the unthinkable. Mrs. Patz said:

When the police have gone, the burden falls back on the parents. Usually, they are emotionally distraught, financially limited, untrained in search methods and totally lacking any official leverage necessary for obtaining information. The task of conducting a national search is beyond the abilities of the grieving parents.

Much of the language in this bill has been suggested by the Federal Bureau of Investigation. After extensive discussion with the Bureau almost all of their suggestions or recommendations were included by appropriate additions to the Missing Childrens Act.

Costs can be kept at a minimum because the computer system to track missing children is already in place. The information on unidentified deceased individuals can be initiated with minimal costs. These films can be adequately and efficiently maintained by a hand file process involving minimal staff additions for the FBI.

The bill has been well received by all manner of law enforcement agencies. Specific endorsement of this bill has been made by the National and International Associations of Police Chiefs, the International Union of Police Associations, AFL–CIO, and the American Correction Association. In addition, a strong endorsement has been received from the city of Chicago Police Department.

Our collective awareness of this critical problem has been increased by the activities surrounding this legislation. Now is the time to seize the momentum that has stirred the American public. The situation demands an appropriate response from the membership or Congress. The Missing Childrens Act will be an essential resource in assuring the real safety of our children.

This amendment will provide a solution so desperately needed. I urge you to join with the 56 cosponsors of the missing child bill and the National Association of Chiefs of Police who strongly endorse S. 1701 and support passage of this amendment.

In an effort to help the families of missing children, I have submitted this amendment which will:

First. Provide a national clearinghouse for identification of missing children, run aways and victims of parental kidnapping.

Second. Allow all missing children to be listed in a national crime information center.

Third. Provide parental access to a computer network.

Fourth. Assist in identification of deceased individuals.

No one even knows how many children disappear each year, but we do know that this is a problem we can no longer neglect.

STATEMENT ON UP AMENDMENT NO. 609

Mr. SYMMS. Mr. President, I am pleased to be a cosponsor and support the passage of S. 1701, the Missing Children's Act. I commend and congratulate Senator HAWKINS on her efforts. This legislation requires the Attorney General to maintain a nationwide computer system for the listing of missing children, which will allow law enforcement agencies to obtain information about missing children not only within their home State, but throughout the country.

Not only will information on missing children be readily available, but also, for the first time, a national computerized clearinghouse of information on dead whose next of kin cannot be located will be established. Since this bill requires information to go into the computer 15 days after the deceased person has remained unidentified, it provides current information to families or kin seeking status of a missing family member.

I commend Senator HAWKINS for the work she has done to increase our awareness of the severity of this problem. This action is long overdue and I believe that the implementation of this legislation will greatly assist families seeking missing person information and help ease the worry that results from having a missing family member.

Mr. WEICKER. Mr. President, though I disagree with the amendment of the distinguished Senator from Florida insofar as it is legislation on an appropriations bill, I also know full well that this is not unique nor will it be unique to hear such amendments.

Certainly, the substance of the amendment deserves, I think, the support of all of us here on the Senate floor. I think the observations she made are entirely correct. On behalf of the majority I am more than willing to go ahead and accept the amendment.

Mrs. HAWKINS. Mr. President, I thank the Senator from Connecticut for his kind remarks.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 609) was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MITCHELL. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MITCHELL. Mr. President, the appropriations bill now before us contains funding for the Economic Development Administration in fiscal year 1982. I wish to make two points as the Senate considers this legislation.

First, it has been 11 months since the President first proposed to terminate EDA. During that period, the Congress has repeatedly rejected that proposal. Today, we are implementing the congressional will by providing EDA funding for another year.

This is extremely significant to the State of Maine, Mr. President.

The EDA was created to promote the long-range economic development of areas with severe and persistent unemployment and with low per capita income. EDA aids in the development of public facilities and private enterprise to create new, permanent jobs and to preserve existing jobs which might otherwise be lost by the shutdown of an industry in such an area.

The act is grounded in the reality that no matter how successful national economic policies may be in stimulating overall economic growth and reducing inflation and unemployment, important structural problems will remain. Many of our Nation's urban and rural communities and multistate regions will still be experiencing unemployment, lagging economic growth, industrial decline and underutilized production facilities and resources.

Maine has many such areas. My State has a per capita income that is 20-percent lower than the national average.

Manufacturing jobs in the State have grown by 3.5 percent in the last decade, compared with an average growth rate of 25 percent in the West and 18 percent in the South.

We in Maine have benefited greatly from economic development funding and our successes have no doubt had some beneficial albeit small, impact on the national economy.

For example, EDA is directly responsible for creating and saving thousands of jobs in Maine. In a State with chronic unemployment problems and an economy aggravated by high energy costs, this is a substantial contribution. Many Maine communities do not have the indigenous resources to attract substantial private investment. EDA has provided that seed money.

EDA grants and loans are partially responsible for successful efforts to revitalize our fishing, potato farming and textile industries.

Mr. President, I am heartened by the reaffirmation of our commitment to help regions of our country where incomes remain low, where unemployment remains high, and where help is needed to stimulate local economic growth.

Second, while I am pleased that Congress has continued its commitment to economic development programs, I am concerned about the level of funding for EDA provided in this bill. The Congress has authorized $290 million for the EDA in fiscal year 1982. This is the absolute minimal level of funding necessary to implement a scaled-back but still effective program. As the national economy goes deeper into recession, it seems to me that more, not less, economic development assistance would make sense.

It is my hope that the members of the conference committee on this bill will accept the appropriation level contained in the House bill. Further cuts would further delay the economic recovery of numerous regions. The economic recovery of the Nation will be inevitably retarded if it is accompanied by continuing pockets of slow growth and economic stagnation.

I should like to address some questions to the distinguished chairman of the State-Justice-Commerce Appropriations Subcommittee. (Mr. WEICKER).

Mr. MITCHELL. Is it the belief of the Senator from Connecticut that EDA programs make an important contribution to areas of low per capita income and persistently high unemployment?

Mr. WEICKER. Yes; Mr. President, I agree with the Senator from Maine. EDA has been very successful in creating jobs, generating State and local tax returns, and raising the level of economic activity in areas of slow growth.

Mr. MITCHELL. Does the Senator agree further that distressed areas are in greater need of EDA programs in the present economy, and that there are no other Federal programs that address the needs met by EDA programs now?

Mr. WEICKER. Yes; it is my belief that EDA provides aid not available through other Federal programs at this time.

Mr. MITCHELL. Mr. President, does the Senator support the maximum funding possible for EDA within the constraint of overall budget considerations?

Mr. WEICKER. I assure the Senator that I do.

Mr. MITCHELL. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that the committee amendments be set aside and that I may be permitted to send an amendment to the desk, sponsored by myself, Senator ROBERT C. BYRD, Senator KENNEDY, Senator DANFORTH, Senator BUMPERS, Senator LEAHY, and Senator BAUCUS.

The PRESIDING OFFICER. Is there objection?

Mr. WEICKER. Mr. President, the minority manager of the bill and I agree that the committee amendments may be set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 610

(Purpose: Expressing the sense of the Senate that the Department of Justice and the Federal Trade Commission shall vigorously and actively enforce the antitrust laws)

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Ohio, for himself and Mr. ROBERT C. BYRD, Mr. KENNEDY, Mr. DANFORTH, Mr. BUMPERS, Mr. LEAHY, Mr. BAUCUS, and Mr. EAGLETON, proposes an unprinted amendment numbered 610.

Mr. METZENBAUM. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, add the following new section:

SENSE OF THE SENATE RESOLUTION

The Congress has consistently sought to prevent the excessive concentration of the American economy by enacting the Sherman Antitrust Act in 1890, the Federal Trade Commission and Clayton Acts in 1914, and the Celler-Kefauver Act in 1950;

Vigorous enforcement of the antitrust laws is essential to the operation of a competitive economy, and lies at the heart of our Nation's historic commitment to a free and open marketplace;

Antitrust enforcement efforts are of particular significance in a climate of increased Government deregulation of business, in order to assure that the economic marketplace remains competitive;

A series of corporate mergers is currently taking place which is tying up substantial amounts of credit to the detriment of small business and is contributing to the intolerably high level of interest rates;

The Congress has concluded that excessive economic concentration tends to lessen competition, impede economic growth and innovation, harm small business, and jeopardize local control of business:

Now, therefore it is the sense of the Senate that:

(1) The Department of Justice and the Federal Trade Commission seek actively and vigorously to enforce the antitrust laws, including those against mergers and concentration, until and unless the Congress determines otherwise; and

(2) Moneys appropriated under this bill shall be expended in a manner consistent with this resolution.

Mr. METZENBAUM. Mr. President, this amendment has to do with a question pertaining to effective endorsement of our antitrust laws. In this struggle, unfortunately, the problem is that the man who heads the Antitrust Division at the present time has indicated that the earlier decisions that have been part of our Nation's history, the interpretations by the Supreme Court, are not exactly in accord with his point of view and, therefore, he does not intend to abide by them. Unfortunately, the man who heads that Division reflects a general position that many in the administration seem to have at the moment: People are appointed to positions by the administration who actually are hostile to the laws that they are called upon to enforce.

For example, in EPA, we find a lady by the name of Mrs. Gorsuch, who indicates that she really does not have strong concerns about the environment. In the Consumer Product Safety Commission, we have a woman by the name of Steorts. She, too, has turned her back on the question of effective enforcement of the obligations imposed upon her and that Commission by the law.

In the Department of Justice, Civil Rights Division, we have a man by the name of William Bradford Reynolds, who has been less than ardent in his concern with respect to civil rights.

We find too often, Mr. President, that those who are being appointed to these positions want to turn the clock back, to turn their backs upon the laws as they presently exist.

As a consequence, the people of this country are failing to get the kind of enforcement, the kind of strength, the kind of determination to which they are entitled in connection with the antitrust laws of this country.

Probably the most egregious situations in which people have been appointed to public office who do not believe in the laws they are called upon to enforce, have to do with the area of antitrust. We find, as a consequence, a whole host of merger activity throughout this Nation, because the message is out. Mr. Baxter, at the Antitrust Division, and Mr. Miller, the new head of the Federal Trade Commission, do not like the law. They do not think the laws should be as they are. They think they should change the laws. But the fact is that they are not talking about formally changing and properly changing the laws. They want to change the laws by indifference, by lack of concern, by disregard.

This administration, which came in on the basis of law and order, on the basis that it would enforce the law no matter who was affected, is now saying, "That is not what we mean in the area of antitrust."

The sad part about that is that this represents a break with almost 100 years of bipartisan support for antitrust and its basic themes and doctrines. Antitrust is not a Democratic program. It first came into being in 1890 with the Sherman antitrust law, authored by Senator John Sherman, a Republican from my State of Ohio.

Over a period of time, men who have been part of this body have seen fit to speak up for antitrust, and those who have been charged with the responsibility at the administrative level have spoken up for antitrust.

I am proud to say that in the last session of Congress we enacted one of the most recent changes and one of the few changes made in recent years to the antitrust laws, the Antitrust Procedural Improvements Act. I am proud that I was the author of that bill, and the coauthor was the distinguished chairman of the Judiciary Committee, the Senator from South Carolina (Mr. THURMOND).

It is particularly disturbing and surprising that we now find that this law which works so effectively for the free enterprise system, which really talks about free competitive forces being able to work, suddenly is being put up on a shelf, and, we are told, is no longer important.

Fortunately, over the years, we have not had Democrats and Republicans

fighting with each other on this subject. When the Senate Antitrust Subcommittee was revived, it was revived by a Republican controlled Senate in 1953; and last year's Antitrust Procedural Improvements Act, as I previously mentioned, was a joint product of the present chairman of the Judiciary Committee and me.

Today, the breakdown in antitrust enforcement is particularly upsetting. We have a merger wave that is approaching mammoth proportions. The pace has jumped 25 percent from last year's third quarter, and is accelerating.

Particularly disturbing is the fact that these are giants swallowing larger well-managed, profitable companies almost as big as they are, or bigger. Du Pont swallows Conoco. Prudential Insurance Co. buys up Bache. Mobil buys Marcor and flops on its face with respect to the economics of that deal. Exxon acquires Reliance Electric, in my own home community. When some of us spoke out against that acquisition, we were told this was going to save a million barrels of oil a day. Now they write about that acquisition in Fortune magazine, in a feature cover story: "Exxon's $600-Million Mistake."

Connecticut General buys INA; and Mobil, in a capping climax, now wants to buy up Marathan Oil, in my own State.

Mr. President, I ask unanimous consent to have printed in the RECORD the article to which I referred, which was published in Fortune magazine.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

EXXON'S $600 MILLION MISTAKE

(By Lewis Beman)

Imputing devious motives to Exxon Corp. has long been fashionable. The practice goes back at least to Ida Tarbell's muckraking turn-of-the-century classic, The History of the Standard Oil Company. Cynicism was rampant last spring when the corporate heirs of John D. Rockefeller announced that Exxon was abandoning an energy-saving device called the "alternating-current synthesizer." Many were sure that it had never been more than a smoke screen for Exxon's politically controversial $1.2-billion purchase of Reliance Electric Co. in 1979. Once the heat was off, the synthesizer, which Exxon had spent $15 million developing—gum-ball money for the world's largest corporation—could easly be junked if it proved a turkey.

Exxon stockholders might well wish that this bit of demonology were true. Alas, a more straightforward theory—that Exxon had high hopes for the synthesizer—is the correct one. The concept was seductively simple. A microprocessor was to be used in combination with power transistors to raise the efficiency of most electric motors, saving the country the equivalent of a million barrels of oil a day by 1990. By picking up an established electrical-equipment manufacturer that could mass-produce the synthesizers, the top executives at Exxon's Manhattan headquarters believed, the company could make a hell of a lot of money.

These dreams are shattered, and the real news is that the $15-million R&D loss is only the tip of the iceberg. The whole synthesizer affair, it is clear from an exhaustive search of the mountains of documents that have come to light in the course of half a dozen lawsuits stemming from the Reliance merger, is a managerial blunder of epic proportions that has cost Exxon at least $600 million. That figure represents the premium the oil company paid for Reliance in the belief, subsequently proved naive, that the synthesizer was a hot product ready to bring to market.

In hindsight, Exxon's reckless plunge is understandable. It is run by oilmen with little knowledge of manufacturing and something of a wildcatter's mentality that says play your hunches and bet as big as you can. Clearly, these executives were not restrained by Exxon's board. Nor were they well served by the battery of prestigious consultants called in on the Reliance merger.

In a smaller company, a $600-million mistake could spell disaster. Even for mighty Exxon, which earned $5.7 billion on sales of $103 billion in 1980, it is a painfully large sum, roughly equal to one quarter's dividend payout. The cost could turn out larger, too, for folly has been compounded by bad luck. After it consummated the Reliance deal, Exxon was shocked to learn that a company newly acquired by Reliance had been cheating for years on tests of its products. There's now a tangle of lawsuits, and Exxon conceivably could be hit with a big tab to make good on defective products.

SHADES OF THE ELF QUEEN

The possibility of such outcomes was far from the minds of the executives who championed the Reliance deal within Exxon. Their code name for the acquisition was Project Galadriel, after the elf queen who presents a magic light to the hero of J. R. R. Tolkien's The Lord of the Rings. To the rest of top management, which came to share their enthusiasm, Project Galadriel offered an ingenious way around the roadblocks that had long barred the inheritors of the Standard Oil Trust mantle from major diversification outside the energy business.

Exxon had dabbled in diversification as far back as 1964, when it made a pass at two small companies, one in fertilizer and the other in industrial gas. The Justice Department's Antitrust Division blocked the first acquisition and allowed the second, but Exxon never learned how to make money in industrial gas and later sold the company. Figuring that the trustbusters were going to object to any merger that made sense from a business point of view, Exxon's management committee, which makes the big decisions, decided in 1969 to take a venture-capital approach to diversification.

The vehicle was Exxon Enterprises Inc., which has since pursued an incredibly varied range of projects and has taken the company into such innovative businesses as photovoltaic cells and office automation. (See "Exxon Has Its Eye on More Than Oil," Fortune, April 1977.) Exxon has viewed these "windows on technology" in the tradition of the oil industry, where one big find makes up for several dry holes. The hope was to develop a series of profitable operations, each capable of reaching $100 million a year in sales. So far, these businesses seem to have been nothing but dry holes from the standpoint of profits.

Early in 1977, Exxon Enterprises was handed a second, more ambitious task: to serve as a stalking-horse for a conglomerate merger that would add at least $1 billion to the oil company's revenues. The man chiefly responsible for this change was George T. Piercy, a member of the management committee who oversaw Exxon Enterprises—and later the Reliance deal. Piercy had been the oil industry's chief negotiator with OPEC at a 1973 session. After that session, the cartel assumed the power to set oil prices, and in the wake of that development Piercy appears to have become convinced that diversification was a matter of great urgency.

Piercy set about breaking the resistance of other members of the management committee to the idea of doing a big deal. He was obviously successful, for in March 1979, Project Galadriel was brought before the Exxon board. The script of the presentation, evidently an elaborate affair with slides, appears in the files of the Federal Trade Commission antitrust suit that Project Galadriel subsequently provoked. It gives an amazingly detailed account of an extensive two-year search by Exxon Enterprises that eventually led the oil giant to Reliance.

TIGER ON THE PROWL

The principal speaker was Jo A. Graves, an up-and-coming executive who had been brought in as senior vice president of Exxon Enterprises. Before the Tiger had gone prowling, Graves' script shows, Exxon Enterprises had studied five industries for the management committee. Then it had focused on six possible merger candidates: Bristol-Myers, Schering-Plough, Colgate-Palmolive, Carnation, Upjohn, and Hewlett-Packard.

In the end, Graves told the directors, the management committee had decided that these targets were too expensive to pursue. "The conclusion," he said, "was that the stock market was valuing these companies pretty well and that under the conditions of having to pay a premium price over market, Exxon would have to bring something to a union in addition to money." This led to a search for technology under development at Exxon Enterprises that could supply that needed "something." Graves went through a long recounting of possible synergies and merger candidates that were rejected. All this was a buildup for the feature act at the board meeting. Graves introduced Richard H. Baker, an electrical engineer at Exxon's research laboratories in Florham Park, New Jersey, to demonstrate an invention that had put Exxon Enterprises onto the idea of buying Reliance. The device, Graves told the board, presented the oil giant with the "strategic step-out opportunity" it had been seeking.

A former MIT researcher, Baker had been hired to help develop an electric automobile that the company believed might be commercially feasible by the end of the century. One technical problem was that the most-efficient electric motors ran on AC current, while batteries produced DC power. Commercially available inverters, which change DC into AC, were far too heavy. But Baker had come up with a much lighter electronic device that seemed to do the job.

Deciding it was looking too far ahead, the oil company subsidiary shifted its efforts to developing a hybrid vehicle that combined an electric motor with a small gasoline engine. By then, however, it had the idea that Baker's device represented a major technological breakthrough that could revolutionize the mundane electrical-equipment industry.

MOTORS THAT GRIND ON

Electric motors, which account for nearly two-thirds of electricity consumption in the U.S., overwhelmingly run on AC current. Because of the inherent characteristics of AC, they generally have to run at a constant speed. The output of whatever mechanisms they drive—pumps, say, or compressors—is varied by some form of "throttling." The valves on pumps are closed, for example, while the motor itself grinds on, wasting electricity.

It has long been possible to vary the speed of AC motors by varying the frequency of the electric current leading to them. But this takes special equipment so expensive that it is economically impractical except for machinery that needs to be closely controlled for other reasons. What Exxon Enterprises thought it had in its hands was an electronic gadget inexpensive enough to be practical.

By the middle of 1978, Exxon Enterprises' Electric Power Conversion Systems group had

drafted a plan to go into commercial production within about two years. The plan envisioned a firm that would eventually be able to generate sales of about $270 million. The start-up investment required, on top of the $8 million already spent on research, was estimated to be about $30 million. Market entry would be faster, the group figured, if another $10 million was used to acquire a small firm already in the electric-drives business.

As this proposal went up the ranks for approval, Exxon's ambitions for the project ballooned. Piercy in particular was intrigued by the idea and, as he was later to tell a federal judge in the FTC case, prepped himself by reading an electrical-engineering text "in between television shows." The synthesizer, he clearly thought, was a great piece of technology to bring to a conglomerate merger. By September 1978, Reliance having been singled out as the target company, Piercy brought Project Galadriel up for consideration by Exxon's management committee, which asked for further studies.

A PICKET FENCE OF PATENTS

As these got under way, it seemed to escape Exxon's top managers that a different standard of analysis might be appropriate for a billion-dollar investment than for one involving $40 million. Consultants were brought in, to be sure, but they voiced no warnings. Both Booz Allen & Hamilton and Arthur D. Little supported the notion that a "substantial acquisition" was necessary to successfully exploit the synthesizer. The key element, said Booz Allen, was marketing. Exxon had established what its executives called "a picket fence of patents" around the new device. But that promised only a two- or three-year head start, Booz Allen said. Unless Exxon could enter the market in a big way right from the beginning, it would soon be overtaken by imitators.

In light of subsequent events, it is amazing that neither Exxon nor its consultants questioned the fundamental assumption on which the entire case for Project Galadriel rested. This was Exxon's intuitive belief—and it seems to have been little more than that—that Reliance could turn out energy-efficient motors with synthesizers at a far lower cost than anything the competition might bring out, eventually as much as 90 percent lower. From this premise, it was easy for Exxon to envisage that its combination of low price and energy efficiency would prompt companies across the land to retrofit or replace their motors.

In fact, the Exxon synthesizer represented no great technological breakthrough. Companies like Emerson Electric and PTI Controls of Fullerton, California, were already selling solid-state controls. But they were definitely not cheap. Everything, then, hinged on costs, yet these are precisely what were not investigated closely. The closest thing to a red flag was a brief note in a Booz Allen technology assessment. "The cost advantage has not been probed in depth and quantified in this study," Booz Allen said. But it added, in words that seemed enough for Exxon's impatient acquirers: "An inherent cost advantage, based on a rough analysis, appears feasible."

Another consultant that took Exxon's assumptions at face value was Morgan Stanley. Four months before Grave's presentation to the board, Exxon executives had called down to the 29th floor of their headquarters building, where the elite investment-banking firm has offices, to enlist the services of Robert Greenhill, head of Morgan Stanley's mergers and acquisitions department.

Exxon had figured to buy Reliance for a 50 percent premium over its recent market price of $40 a share. But the oil company was a bit behind the times. Greenhill told Piercy, who for all his experience across the table from oil sheikhs had never negotiated a significant merger. Except for distress sales, Greeenhill said, the going premium was getting up toward 80 percent. Fortunately, he added, Reliance's stock had dropped to $32 following its announcement that it intended to buy the Federal Pacific Electric Co. Thus, the $60 a share that Exxon had in mind still seemed like a pretty good price.

In addition, Morgan Stanley told Exxon, the financial strains of the Federal Pacific merger might make Reliance's management more receptive to an Exxon offer. Both Morgan Stanley and Exxon seemed to ignore the possibility that the market reaction to the Federal Pacific deal might be a tip-off of potential trouble.

Morgan Stanley, on the contrary, believed that Exxon's invention justified paying a high price. With synthesizers, it figured, Reliance's annual growth would jump by more than 1 percent. The present value of the resulting earnings surge was somewhat mysteriously calculated to be $610 million, which roughly coincided with the total value of the premium Exxon proposed to offer.

Not long afterward, following Grave's slide presentation and the synthesized demonstration, Exxon's board approved the Reliance acquisition at a price not to exceed $60 a share. Negotiations began 16 days later, when Piercy personally flew out to Reliance's Cleveland offices at the head of an Exxon team. Piercy did not seem to care that it was Friday the 13th of April, nor did he notice that Reliance's address was 29325 Chagrin Boulevard.

Morgan Stanley had arranged for a hotel suite, where Exxon displayed a prototype of the synthesizer, hooked up to fans, for the edification of B. Charles Ames, then Reliance's chief executive. Apparently, they expected him to be impressed with both the technology and the offering price of $60 a share. He wasn't.

SOME BLUNT TALK ABOUT PRICE

Ames, who has since left Reliance to take the helm at Acme-Cleveland, a machine-tool maker, is a polite, soft-spoken man. He's also extremely shrewd and given to blunt assessments (he once was McKinsey & Co.'s man in Cleveland). Ames confides that he has always been leery of high technology. "An enthusiastic inventor is a menace to practical businessmen," he says, "and it takes a skeptical ear to figure out whether something that works will sell." He does not think that Exxon executives ever really appreciated the difference. But while he was noncommittal about what the synthesizer might do for his company, he was rather blunt about the price Piercy offered. "It was too low," he says. Moreover, he realized that the last thing Exxon wanted was a fight. "I figured that if they didn't want to fight, they were going to pay," he recalls.

Ames's canny bargaining was to make him something of a hero on Wall Street—particularly among arbitrageurs who were richly rewarded for their patience throughout the four-month interval between Exxon's announcement of its interest in Reliance and its purchase of the shares. The market at first figured that $55 would take the company. But Ames, who had been thinking about putting out a new issue of stock at $33 before Exxon came courting, hung tough even after the oil company handed over a formal letter proposing a cash tender offer at $65 a share. Piercy's not-to-subtle offer of an Exxon directorship did not move him, and only after a private dinner with Piercy did he allow that $72 a share might be good enough to take to his board.

From Exxon's point of view, the higher price that Ames extracted soon paled alongside the concession he claims to have won on the antitrust issue. Piercy told him that Exxon expected the government to object to the merger but that the oil company intended to fight. In that case, Ames says he replied, let's not have the usual boilerplate that allows a company making a tender offer to withdraw at the first sign of trouble. "By that time," he says, "about 60% of our stock was in the hands of the arbitrageurs, and I knew that someone was going to take us over if Exxon dropped out of the picture." Dart Industries, Dana, and TRW were all showing interest, Ames has disclosed.

THE FTC GRABS THE CASE

Piercy says that the antitrust language in the tender offer "was not discussed" in his negotiations with Ames, and Exxon takes the position that the scrapping of that boilerplate was a "voluntary gesture." If so, it was a gesture that was to put Exxon in an extremely awkward position.

Exxon had hoped that if the government struck, the Justice Department would take on the case, and it had employed the former head of the Antitrust Division as outside counsel on the deal. But the Federal Trade Commission, which shares enforcement powers in the anti-merger section of the Clayton Act, grabbed the case instead and went into federal court to obtain a temporary injunction against the merger.

The FTC's complaint was based on the fact that Exxon had taken preliminary steps to set up a new company to commercialize the alternating-current synthesizer before it had decided to acquire Reliance. In the FTC's view, this meant that the merger would eliminate "potential competition" between Exxon and Reliance. The FTC asked for a temporary restraining order that barred Exxon from paying for tendered shares until the court had time to review the matter. Exxon had expected that move, as well as Judge John H. Pratt's order blocking the deal for 21 days. What it did not expect, however, was that Reliance would intervene with the suggestion that Exxon be allowed to purchase the shares under a court order, but that it be prevented from actually taking over until the antitrust question was resolved.

For Exxon, the implications of this suggestion were horrendous. Antitrust cases have been known to drag on for more than a decade, and if Reliance's suggestion had been followed, Exxon would have been forced to pay $1.2 billion for a passive investment. Some Exxon executives seemed to regard the suggestion as Ames's way of giving his stockholders the money while keeping the company.

From the witness stand, Exxon President Howard C. Kauffmann told Judge Pratt that if any such order were issued, Exxon would drop the deal. The court finally ruled that Exxon could exercise its tender offer. But it imposed an onerous condition: Exxon would have to "hold separate" the Reliance divisions that were most relevant to the commercialization of the alternating-current synthesizer—the very raison d'être of the merger.

It is impossible to tell what any judge has in mind when he makes a ruling, but Judge Pratt's subsequent statements clearly indicate that he expected Exxon to drop the deal. When Exxon hesitated, however, Reliance sued to compel the company to go ahead with the purchase of the shares. At this point Judge Pratt learned about Reliance's claim that some antitrust aspects of the deal had been negotiated in advance. Reportedly he hit the ceiling, and Exxon's lead attorney later told him in open court that worries about his reaction were a major reason for Exxon's decision to go ahead with the deal even though it now had strong doubts that it made sense.

Thus there is some question about how voluntary Exxon's purchase of the tendered Reliance shares was. In a subsequent lawsuit, brought by Reliance stockholders seeking interest to compensate them for the de-

lay in getting paid, Exxon claimed that Ames violated his agreement with Pierce by the uncooperative act of intervening in the antitrust suit. But there is no way of telling how confident Exxon's lawyers were that this argument would sway the court, and Exxon has agreed to settle the stockholders' suit out of court for $4 million.

THE LITTLE CONTRAPTION THAT COULDN'T

On a plea from Exxon, Judge Pratt—holding his temper this time—softened his "hold separate" order. Exxon was to have no contact with Reliance's drives group, but could at least work with the Reliance division that produced finished motors. In the electrical-equipment industry, "drives" (the electrical parts of a motor) are considered separate from the mechanical parts.

Even this more limited order created an awkward situation. It meant, in effect, that Exxon had to start a second drives operation within Reliance to manufacture and market the alternating-current synthesizer. In March 1980 it brought key Reliance personnel to its labs in Florham Park. Almost immediately, the Clevelanders discovered that Exxon's original cost projections were unrealistic. One problem lay in the design itself; Exxon Enterprises had not taken into account the varying conditions under which the device would have to operate. In November reliance's chief operating officer, Emory G. Orahood Jr., wrote a strong memo to Piercy urging that the project be scrapped.

It took another four months for Exxon to make the embarrassing public announcement that its great new idea had been a bust. This was somewhat softened by the disclosure that Reliance was now working on an alternative design. That was a bit misleading, since the new work was undertaken by the same team in Florham Park, now trying desperately to retrieve something from the wreckage of Exxon Enterprises' grand strategy. And according to John C. Morley, a career Exxon man who took over as Reliance's C.E.O. in December following Ames' resignation, no one expected anything spectacular by the time he arrived on the scene. The recent announcement by Reliance that the whole project has been scrapped merely nailed the plywood on a "window on technology" that had already been locked.

For far less than it paid for Reliance, Exxon could have learned that its synthesizer had no future. Robert C. Byloff, president of a small electric-drives manufacturer named Fincor, a division of Incom International, says he for one would have been willing to educate Exxon executives on the reality of the electrical-equipment industry. His company built 25 prototypes of the famous variable-speed motor for Exxon prior to the Reliance negotiations. They included everything but the electronic components, which Exxon was almost compulsively secretive about. "If they had shown us what they intended to put in their black box," Byloff says, "I think we could have told them that their enthusiasm was somewhat excessive." Exxon's management committee seriously considered buying Fincor as a less expensive alternative to Reliance, figuring that the acquisition would have cost about $10 million. Byloff says that Exxon never approached him, but that in any event he would have preferred to give advice free of charge and keep his company where it is.

THE WORST MISTAKE OF HIS CAREER

Ames, who personally made a profit of $3.8 million when Exxon bought Reliance, insists that the merger was a sound one even though the oil company's plans for the synthesizer were ill-founded. Just before he resigned last November, he told Piercy: "You guys made the right strategic decision for all the wrong reasons." Ames was proud of a company whose sales he had increased by 142 percent over the previous seven years, mainly by acquisitions. But that time, however, there was ample evidence that Reliance stock had not even been worth the $34 a share that it commanded on the eve of the Exxon offer. This was because Ames himself had just made an acquisition that turned out to be the worst mistake of his career.

At the time Exxon was getting ready to buy it, Reliance had acquired Newark-based Federal Pacific Electric Co. from its parent, UV Industries, for $345 million. The deal had been part of a UV attempt to head off a takeover by Victor Posner's Sharon Steel Corp. (See "UV Industries Wins the Right to Die," Fortune, April 23, 1979.) Most security analysts considered Federal Pacific a rather second-rate operation, which explains why Reliance's stock fell by some 15 percent when the merger was first announced. But Wall Street's views turn out to have been overly charitable.

The problem, according to a suit that Reliance subsequently brought to force UV to take back its company, is that Federal Pacific cheated for years on tests of its circuit breakers by Underwriters Laboratories. Without UL certification, the circuit breakers would have been unsalable. "It was the most sophisticated swindle I have ever seen," Ames says. "They had constructed a laboratory with miles of buried wires and concealed levers just so they could trick the UL inspectors."

When the cheating stopped at Federal Pacific Electric is not precisely clear, for many documents in the Reliance suit have been sealed by court order. But a close reading of what is available for public perusal provide at least a faint trail through an industrial Watergate.

Reliance alleges that UV executives knew what was going on and withheld the information from the unsuspecting purchaser, an allegation denied by UV. What everyone agrees upon is that on October 23, 1978, shortly before Reliance and UV Industries reached agreement on their deal, an ex-employee of Federal Pacific sent a letter to one of its executives revealing some details about cheating at a plant in Albemarle, North Carolina. The information was passed up to Harry E. Knudson Jr., Federal Pacific's president and a UV director, and the basic issue before the court is how much of an obligation he had to tell this to Reliance before it consummated the acquisition on March 29, 1979. Ames leaves no doubt that if he had known about the problem before then he would have dropped the deal. Piercy also says that had the situation come to light before Exxon bought the Reliance shares on September 24, Project Galadriel would have been scrapped.

A DISTURBING REPORT

UV Industries seems to take the line that between March 29 and September 24, Ames learned something about the trouble brewing at Federal Pacific Electric and failed to tell Exxon. Some circumstantial evidence indicates this is at least a theoretical possibility. On September 13, Knudson was sent a report from the chief engineer at the Albermarle plant, predicting that almost all circuit breakers that Federal Pacific had made would lose their Underwriters Laboratories labels. An undated memorandum that Knudson apparently sent to William B. Korb, the Reliance executive responsible for Federal Pacific, conveys the same information. In a memo to Piercy in July 1980, Ames asserted that Korb had learned at least something about the FPE situation in the fall. He is not precise about when.

The tantalizing question, of course, is whether the news traveled from Newark to Cleveland in the six days before Reliance filed its September 19 suit to force Exxon to go ahead with its purchase of the shares, and in the 11 days before Exxon exercised its tender offer. Ames insists that it did not, and all indications are that Exxon believes him.

Piercy has said that he did not know the extent of the circuit-breaker problem until his regular spring review of Federal Pacific as Reliance's "contact executive" in May 1980. By that time the new subsidiary of Exxon's new subsidiary had lost the UL labels on virtually its entire line of circuit breakers, which had accounted for $100 million of sales in 1979. Ames's staff also had begun tallying the potential expense if a recall program became necessary. The initial estimate: three years' production of the Albemarle plant might have to be replaced by electricians. The cost, counting labor, could be very high indeed. The question is still in doubt pending a determination by the Consumer Product Safety Commission of whether to order a recall of Federal Pacific's residential-type circuit breakers. Reliance began recalling some of its industrial circuit breakers early this year, and one industry source has estimated that the bill for this recall alone might approach $200 million.

Whose pocket this would come out of is unresolved. UV Industries has been dissolved, but a liquidating trust still holds over $400 million in cash and securities. Reliance is suing UV to pay for the recalls. To the extent that UV can't pay, Reliance is looking to Sharon Steel, which assumed UV's liabilities when it bought its remaining assets in November 1979. But Sharon's legal obligations are by no means clear. If Reliance can convince the court that it was the victim of a fraud, so might Sharon. Contemplating the results of what is perhaps one of the worst mergers ever made, Ames is happy about one thing: "If Exxon hadn't come along, I don't know what would have happened to Reliance."

Reviewing Exxon's trip down Chagrin Boulevard, Donald S. MacNaughton, chief executive officer of the Hospital Corp. of America and an outside director of Exxon since 1970, finds no fault with the company's top executives. "Management didn't make an error in judgment," he insists. "They did all the right things and came to reasonable conclusions. The only problem was that it just didn't work. It's like golf; sometimes the lie of the ball is simply bad." MacNaughton is not alone in trying to see things in the most favorable light. Reliance's new C.E.O., John Morley, talks enthusiastically about the importance of electricity to the oil company's future.

A HARD ACT TO MATCH

But it will be years, if ever, before Exxon's investment in Reliance pays an acceptable return. To match the rate of return on employed capital that Exxon's energy operations had last year, Reliance would have had to earn $375 million. But in 1978, its best recent year, it earned only $65 million. Last year Exxon reported a $6-million loss for its subsidiary, which, according to Morley, reflects temporary costs associated with the Federal Pacific fiasco and the unrelated write-up of Reliance's facilities and inventories to actual market value. But this is actually the smaller of two red-ink figures. In a 10-K that Reliance itself had to file with the Securities and Exchange Commission because some of its public debt was still outstanding, the reported loss was $42 million. Most of the difference lies in the way Exxon accounts for interest paid by Reliance on money borrowed to buy Federal Pacific.

For a century-old company that has no desire to go out of business when its wells run dry, the logic of diversification is still compelling. At minimum, its experience with Reliance should have taught Exxon how not to go about negotiating a merger. The wildcatter mentality of playing your hunches may still be a good way to make money in oil—but all the world isn't oil.

Mr. METZENBAUM. Mr. President, the proposed Mobil acquisition of Marathon is sharply contested by Marathon and is unquestionably one of the most shocking merger efforts in decades. Under normal circumstances, it would not and could not even have been considered.

Mobil is the second largest oil company in America. Marathon is the 16th largest oil company in America. Mobil and Marathon compete vigorously in many markets: One example is exploration, in the acquisition of oil leases for development through competitive bidding, particularly in Rocky Mountain areas and the Outer Continental Shelf. That competition will no longer exist if the acquisition is permitted to go through.

Probably most important is the fact that if Mobil is permitted to acquire Marathon, the latter company, which is the most important supplier of gas to unbranded and private brands who provide the most price competition, will no longer be extant. The company making the acquisition, Mobil, actually refuses to supply the independent branded and unbranded dealers.

If Marathon is absorbed in Mobil, the independents, who in fact are the price cutters in the field, who provide the competition, will lose their major source of supply, and the American consumer will pay the price.

Furthermore, the direct retail competition which presently exists between Mobil and Marathon in the Midwest, in the Western States, and elsewhere, will disappear, particularly after Marathon's acquisition of Husky, which would make them much more competitive with Mobil.

In the area of pipeline transport, Mobil and Marathon are major competitors in crude oil transport; and that competition, involving the Louisiana crude producers, will disappear totally from the American economic scene.

In the area of domestic refining, they compete directly. In the area of storage terminals for refined petroleum products, there is direct competition between them. In oil shale exploration and development, both are major factors, and competition will be hurt.

The critical point for the American people is that if the Mobil-Marathon merger is permitted to go through, these two competitors in the economic mainstream of America will wind up being No. 1 in motor gasoline, No. 1 in total liquid pipeline mileage, and No. 1 in domestic refining capacity. Unfortunately, all the others who are sitting out there, looking around to pick up other small oil companies—the Texacos and the Gulfs and the others—will be on the move, totally eliminating the really competitive forces that are operable in the marketplace at the present time.

One of the worst things that is happening involves reports of a deal on this merger effort. I have seen a copy of an agreement that I understand is being proposed by the Federal Trade Commission Bureau of Competition. Imagine proposing a deal making it possible to allow the acquisition for a 6-month holding basis. Whom are they kidding? What an absurd proposition. A 6-month holding basis, and then maybe the FTC will turn the deal down. But you have to look at that agreement to understand the real hooker in it. The real hooker in it has to do with the fact that during the 6-month period, Mobil would be able to fire any Marathon employee.

Whom does the FTC Bureau of Competition think they are kidding? That proposed agreement for a 6-month holding period is a fraud, a fraud on the American people, and the Bureau of Competition should be ashamed of itself.

The fact is that what it really means is that they are afraid to grapple with the issue up front. They are afraid to say to the American people, "Yes, we are indeed letting Mobil take over Marathon, but we are going to hold it for 6 months; and during the 6-month period, we are not really going to have control—no, not really—but Mobil is going to be able to fire each and every Marathon officer, each and every Marathon employee."

There is great protection in there for competition. They have to give them 72 hours' notice before they can fire them. Is that not wonderful?

Yesterday, I was in Findlay, Ohio, where Marathon's home office is. I have never seen a community turn out as that community turned out in support of Marathon. It should be noted that the Senator speaking at the moment has not always been a great supporter of Marathon. I have not hesitated to criticize Marathon when I thought it was the appropriate thing to do, and I do not intend in the future to restrain myself in that respect. However, criticism of Marathon, and permitting Mobil to acquire Marathon, are totally different matters.

This company is Findlay, Ohio. This company is loved by the people who work there and who deal with the company—the colleges, the school system, the people who live in that community. If you looked throughout all America in order to find a more beautiful, homespun kind of community, you could not find a better one than Findlay, Ohio.

Unfortunately, there is this goliath, Mobil, which made such a shambles of its acquisition of Marcor and Montgomery Ward, this company which has been looking and prowling and rambling throughout the entire economic marketplace looking for something to gobble up because it has too much money. Remember, the oil companies came to the floor of the U.S. Senate and said they needed decontrol so they could get more money to go out and produce more oil. What more oil are they talking about?

Buying Marathon does nothing as far as producing more energy. It will not add one drop of oil to this Nation's resources.

As a matter of fact, Mobil is trying day in and day out to buy up companies in this country that do not add anything to the energy productive resources of our Nation.

It was Mobil who just recently attempted to buy up Conoco. That would not have added anything to the energy resources of this country.

I believe it is high time that this administration, the Department of Justice Antitrust Division, and the Federal Trade Commission be advised and notified and told by the U.S. Congress:

> We expect you to obey the law. We expect you to do what your predecessor did. We expect you to follow the Supreme Court decisions. We expect you to have some concern for small business and for the local concerns of the people of Findlay and other small cities throughout this country. We think it is high time that someone spoke up and said that this excessive concentration is not good for the Nation.

What good would the Mobil acquisition of Marathon do? Who needs it? What will it add? What will it contribute?

If anyone can tell me that it will add one single iota of value to the economic mainstream of America I would like to learn about that fact.

All of these problems of small business, all of the concerns for local communities, all of the problems of excessive concentration—all of this is part of the central tradition of antitrust. It is now scorned and disdained by Messrs. Baxter and Miller, despite clear congressional concern for these small businesses and localities throughout our Nation's history.

Senator GORTON, a distinguished Member of the majority, said in connection with the Miller nomination:

> The administration is saying that it is its intent unilaterally to retreat from this congressional policy without bothering to amend the current laws or to consult with the Congress . . . Its statements amount to a signal to the business community that violations of current law will be tolerated in certain areas, a signal that may have already been received and acted upon.

I commend the distinguished Senator from Washington. I commend him for his astuteness. I commend him for zeroing in exactly to the nub of the problem.

And I share his further thoughts when he says that:

> The current merger wave involving some large individual merger drives has already tied up substantial amounts of credit, making it even more unavailable to small businesses which seek to expand and contributing further to the continuing intolerably high levels of interest rates.

Said he further:

> Certainly, the acquisition of existing facilities rather than investing in new plants and equipment does not lead to economic growth.

The Senator was right on the money, right on the button.

Vertical mergers are no longer suspect, according to Mr. Baxter, despite the fact that there are clear Supreme Court precedents. When he was asked his authority for repudiating these clear Supreme Court decisions, Mr. Baxter could not come up with a merger case but only the Sylvania case. Unfortunately for him that case deals not with mergers but only with a faltering company's quite loose locational franchising agreements.

Is it any wonder that Mobil felt free to try to swallow up Marathon? That other huge oil behemoths are waiting in the wings?

Is it any wonder that lawyers have wondered how to advise their clients with Baxter's speeches on one hand and Supreme Court decisions on the other?

Is it any wonder that a Dillon Read partner has predicted that the Baxter

views "should spark a 10- to 15-percent pickup in merger activity"?

These mergers do the economy and our Nation little good. As the President of Marathon has stated:

> Everybody in the United States who suffered through the energy shortage has got to ask this administration and Congress whether this kind of acquisition is going to increase the Nation's oil reserves by a single barrel. How much oil might Mobil find with the $5 billion they're offering for Marathon? If they had taken the money they spent for Marcor and used it in their oil exploration program, they might have found enough reserves on their own that they would not need ours now. Just when the public was beginning to get a better understanding of oil industry economics, Mobil, with its high-handed arrogance, seems to be trying to set back public attitudes to the days of the Standard Oil trust.

Many mergers, particularly of the conglomerate and vertical variety, are highly inefficient. Many come about by reason of the price-earnings ratio of one company to the other. Many have to do with the ability of companies to use their excess cash and their obligations to put it to work or to distribute it to their stockholders.

The Exxon Corp., which I mentioned before, bought the Reliance Electric Co. for $1.3 billion. They came before our committee and put on a magnificent demonstration and showed us how this wonderful new piece of equipment was going to work, and told us it was going to save a million barrels of oil a day. Who amongst us lowly Senators could question the credibility, the representations of the world's largest industrial company, Exxon? How could we challenge that? They must know what they are doing.

A year later they found that the devise was a dud and they were embarrassed. But the fact is they have gobbled up Reliance Electric Co. in my own home community.

Contrary to Mr. Baxter's notions that mergers come from acquired company inefficiencies, acquisition-minded executives look for highly profitable companies. They are out there in the field now with billions of dollars of credit money tied up, credit that is not available to small business people, not available for people who want to use it for their homes, not available for people who want to buy automobiles, not available for the economy, not even available to the U.S. Government. They have tied up $60 billion in dollars committed to make acquisitions.

There is something sad about all of that. I believe it appropriate that this body indicate by its support of this amendment its concern for the failure to abide by the laws of this country. This proposal does not call for any new legislation. It does not call for any change of the laws. It calls only for the administration at the FTC level and at the Antitrust Division level to abide by the laws that are presently on the books of our country. I think that is little enough to be asking.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that Senator PROXMIRE be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I rise to support the amendment of the Senator from Ohio. The resolution we have introduced today as an amendment to the Justice Department appropriations bill will send an important message to the department and to the business community.

We are telling the Attorney General and his chief assistant for antitrust that Congress intends the antitrust laws of our Nation to be enforced fully and vigorously. On a bipartisan basis, the Senate is saying that we regard antitrust enforcement as important and particularly timely now for the American consumer and small businesses throughout our country. At the same time, this amendment will send a message to Wall Street. Large corporations may be tempted to evade the statutes and controlling Supreme Court decisions because of lax enforcement or disparagement of antitrust law by Justice Department officials. But those companies and their attorneys should know that the Congress will insist that our antitrust laws are enforced.

Every administration shapes its own policies and priorities for enforcement. But when storm signals mount that our antitrust enforcement agencies may disregard the laws passed by Congress, because they disagree with Congress' judgment, it is time for Congress to exercise its oversight responsibility.

Antitrust laws and theories often seem complex and academic to the average citizen. But the consumers and small businessmen of America understand the basic principle of antitrust: When competition is either foreclosed, or conducted unfairly, they suffer.

Antitrust enforcement is especially crucial now. As we increase deregulation of industry, we increase our reliance on a competitive free market to protect the public interest. While inflation continues to plague us, removing artificial restraints on price competition remains an important part of any anti-inflation program. As the Senate noted yesterday, pressures on available credit are increased when unproductive merger offers and the target companies defensive response tie up millions of dollars of available credit.

Above all, when the attorney general or his assistants, and the head of the FTC, disagree with the laws of the books, or with a clear line of Supreme Court precedent interpreting them, the proper course under our system is to ask Congress to change the law. Agency heads may not arrogate to themselves the right to nullify our antitrust laws by refusing to enforce them.

The press has carried several reports quoting businessmen and attorneys who state that the department's signals of weak antitrust enforcement are seen as a free flag to undertake questionable mergers. For example the Washington Post reported:

> Wall Street financiers are being told by their lawyers that almost any merger is worth a try. Things are being proposed that never would have been proposed by companies before the Reagan administration took office.—(Wash. Post Aug. 3, 1981)

The Wall Street Journal reported a warning by Robert Pitofsky, a distinguished antitrust lawyer and former commissioner of the Federal Trade Commission:

> Mr. Pitofsky contends that by raising doubts about whether many proscribed practices remain so, the Reagan administration may break down self regulation by business, tempting it to try a variety of harmful practices. (Wall Street Journal, Aug. 11, 1981.)

One particular concern is Mr. Baxter's disdain for Government challenge to vertical mergers or vertical restraints of trade between manufacturers and their suppliers or distributors. Yet Congress and the Supreme Court have made amply clear this is an important area of antitrust violations under the law. Mr. Baxter and Mr. Miller have an obligation to follow the law.

At recent hearings of the Senate Judiciary Committee several colleagues and I questioned Mr. Baxter about this failure to enforce the laws vigorously. His responses were not satisfactory.

Mr. Baxter had indicated he sees little place in antitrust enforcement for concern about the survival of small business in the face of alarming economic concentration. But Congress made clear when it enacted the Celler-Kefauver amendments to the Clayton Act in 1950 that in addition to preserving the "invisible hand" of competition, it sought to preserve the opportunity for smaller business to survive. The Supreme Court acknowledged this intent in its decision in *Brown Shoe Co.* v. *United States*, 370 U.S. 294, 312–323 (1962).

I supported the free market, and I have worked for many years to end unnecessary economic regulation. But we must also make sure, through strong antitrust enforcement, that the market is, in fact, a free and competitive one.

(By request of Mr. ROBERT C. BYRD, the following statement was ordered to be printed in the RECORD:)

● Mr. LEAHY. As Senators we have spoken often in the last few years about the need to protect this Nation's vital resources. But among the strong and vital ingredients in our economic life which is rarely identified as a resource is the competitive marketplace. I believe that this resource is threatened today as it has not been in generations by a trend toward economic concentration in business and industry. And because of this threat I rise to cosponsor this resolution on antitrust enforcement.

While this Congress has been working hard on legislation to deconcentrate governmental power and to widen the au-

thority to make decisions, the antitrust policies of this administration seem designed to reconcentrate industry and replace narrow and top-heavy Government decisionmaking with narrow and top-heavy industry decisionmaking.

I will concede that the final ending has not been written to the administration's merger policies, but I worry about the early trends. Here are a few of the signs I see:

Virtual abandonment of certain areas of enforcement, such as vertical mergers and resale price maintenance;

The dropping of antitrust cases inherited from previous administrations;

Repeated pronouncements that set an unmistakable tone, like "Bigness is not bad"; and

Switching the Government's role in private antitrust suits by promising to support defendants with amicus briefs rather than plaintiffs.

These are a few obvious signs. I also see the outlines of a policy that defines harm narrowly to mean only the threat of impairment to competition in a specific market, even if that policy means all but a few competitors will disappear from the marketplace and even if the trend to merge will create an intense concentration of capital.

The American democracy works for some reasons that are clear and are grounded in the Constitution and for other reasons that are less clear and are founded in social traditions and economic patterns that are as much a part of what we are as the Bill of Rights. If it would be excessively rosy to suggest that we have corporate democracy in America, it is no exaggeration to say that the decisions made by the marketplace are protected from errors and rash extremes because of the great number an diversity of corporate managers making those decisions. I would find it hard to believe that a few centralized corporate decisionmakers would do as well or would be an improvement over the few government agency decisionmakers whose power we are trying so hard to curtail and reassign to a broader constituency.

It is safe to conclude that there is little administration interest in vertical mergers, while horizontal mergers will be weighed against a wide variety of factors in addition to those in the present merger guidelines.

There is considerable agreement that conglomerate mergers have no immediate, significant impact on competition. But this is far from justifying a conclusion that an accelerating trend to conglomerate mergers will not affect the fabric of life in the country. While the potential competition theory has not been widely used in the recent past because of difficulties of proof inherent in the theory, the area is important and would benefit from keen analysis in the Justice Department and at the FTC.

So far I have been speaking of substance rather than process, the merger issues rather than the means by which new policies evolve. But I must add that the process disturbs me even more than the policy changes I have been able to discern so far. Traditionally, enforcement priorities at the Justice Department and the FTC are matters within the sound discretion of the President's appointees, the Attorney General and the Chairman of the FTC. Enforcement priorities reflect the application of scare resources to an order of priorities, where all of the enforcement goals under law cannot be achieved or cannot be achieved at one time.

But I wonder if prosecutorial discretion is not being used at the present time to effectively amend statutes whose goals are deemed archaic or out of step with currently popular economic analysis. The legislative history of the amendment of section 7 of the Clayton Act in 1950 reflects that Congress was concerned with more than the protection of competition, though that was the primary goal. Congress was clearly concerned with the disappearance of small enterprise in favor of a few dominant giants and with the progressive concentration of capital. The Supreme Court in the 1950's and 1960's made it clear that it looked beyond strict economic considerations to the threat of concentration in evaluating a number of horizontal mergers.

Thirty years of fairly consistent interpretations should not be cast aside in the name of arranging priorities, but should be changed only after serious consideration both by the enforcement agencies involved and the Congress.

The independent agencies have always served as a protection against precipitate action by any given administration, and I think it demeans no one to urge that policy changes at the FTC be undertaken with deliberation and only after consultation with Congress.

Merger policies can affect the health and dimension of the business sector for generations. The resolution introduced in the Senate today will reaffirm the will of Congress to have its laws enforced as they are written, until those for whom concentration is no threat are successful in getting those laws changed.●

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

Mr. THURMOND. Mr. President, I rise in opposition to the resolution introduced by the distinguished Senator from Ohio. I am not opposed to the overall objective of the resolution which is to express support for active and vigorous enforcement of the antitrust laws. But I believe that certain parts of the assertions in the preamble tend to overstate the facts and law relating to mergers. I thus now offer a substitute resolution which I believe accurately reflects the sense of the Senate on antitrust enforcement.

I also add that the resolution I am offering by way of a substitute is not intended to restrict the ability of the Department of Justice or the Federal Trade Commission to use their resources as they see fit in antitrust enforcement.

I believe that both Mr. Baxter, Assistant Attorney General for Antitrust, and Mr. Miller, Chairman of the Federal Trade Commission, are devoted to a faithful and vigorous enforcement of the laws.

These are well-qualified and able men and admirable appointments by the President.

Thus, this resolution is offered for the sole purpose of expressing the continuing interest of this body in the enforcement of the antitrust laws. However, the Department of Justice and the FTC can and must be free to direct their limited enforcement resources to those areas they deem most effective and beneficial to the public interest which, I believe, they have been doing so far and will continue to do in the future.

UP AMENDMENT NO. 611

Mr. President, I send to the desk a substitute amendment.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from South Carolina (Mr. THURMOND) for himself, Mr. HATCH, Mr. SPECTER, Mr. EAST, Mr. GORTON, Mr. LAXALT, and Mr. WEICKER proposes an unprinted amendment numbered 611:

In lieu of the language proposed to be inserted, insert the following:

The Congress enacted the Sherman Antitrust Act in 1890, the Federal Trade Commission and Clayton Acts in 1914, and the Celler-Kefauver Act in 1950;

Vigorous enforcement of the antitrust laws, including those against mergers which may have the effect of substantially lessening competition or which tend to create a monopoly, is essential to the operation of a competitive economy, and lies at the heart of our nation's historic commitment to a free and open marketplace;

Antitrust enforcement efforts are of particular significance in a climate of increased government deregulation of business, in order to assure that the economic marketplace remains competitive;

Now, therefore it is the sense of the Senate that:

(1) The Department of Justice and the Federal Trade Commission seek actively and vigorously to enforce the antitrust laws; and

(2) Monies appropriated under this bill shall be expended in a manner consistent with this resolution.

Mr. THURMOND. Mr. President, I ask for action on this substitute amendment.

The PRESIDING OFFICER (Mr. MATTINGLY). The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I am aware of the substitute amendment offered by the distinguished chairman of the Judiciary Committee. I feel that the amendment, the substitute, bears the thrust of the concerns that I have expressed.

I respect very well the fact that each of us has a different way of starting the same proposition, but the fact that his amendment specifically provides that it is the sense of the Senate that the Department of Justice and the Federal Trade Commission seek actively and vigorously to enforce the antitrust laws means that we will have spoken, and spoken as only the Senate can speak in these terms. It will effectively accomplish the purpose, and I am, therefore, prepared to accept this substitute. It is my understanding that Senator DANFORTH, who is a cosponsor, is also ready to accept it.

Mr. THURMOND. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. METZENBAUM. Pardon me, Mr. President, if I accept the substitute, do I

understand the Senator from South Carolina is asking for the yeas and nays?

Mr. THURMOND. I think we had better have the yeas and nays.

Mr. METZENBAUM. On the substitute?

Mr. THURMOND. On the substitute.

Mr. METZENBAUM. Mr. President, parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state his inquiry.

Mr. METZENBAUM. If I accept the substitute, is there need for the yeas and nays?

The PRESIDING OFFICER. The Senator from Ohio has the yeas and nays for his amendment.

Mr. METZENBAUM. I am sorry.

The PRESIDING OFFICER. The Senator from Ohio has got the yeas and nays on his amendment. Therefore, it would take unanimous consent for him to modify his amendment by way of accepting the amendment offered by the Senator from South Carolina.

Mr. METZENBAUM. Mr. President, I ask unanimous consent——

Mr. THURMOND. Mr. President, I object to the unanimous-consent request and ask for the yeas and nays on the substitute.

The PRESIDING OFFICER. The Chair will first hear the inquiry and request of the Senator from Ohio.

Mr. METZENBAUM. I cannot hear the Chair.

The PRESIDING OFFICER. The Senator has a request in process. Did the Senator from Ohio request to continue his statement, his unanimous-consent request? The Chair thought the Senator was in the process of doing that.

Mr. METZENBAUM. Let me get the parliamentary situation clear. I have had a rollcall agreed to with respect to my amendment. The Senator from South Carolina has offered a substitute and I have indicated my willingness to accept the substitute. The Senator from South Carolina has indicated he wishes the yeas and nays with respect to the substitute. Under those circumstances since it would seem to me to be unnecessary to have to vote inasmuch as I am prepared to accept the substitute, I am prepared to, and I ask, unanimous consent then to vitiate the order for the yeas and nays on my original amendment since the one rollcall would be for both.

The PRESIDING OFFICER. Is there objection to vitiating the yeas and nays on the rollcall of the Senator from Ohio's amendment? If there is no objection——

Mr. THURMOND. Mr. President, I have no objection to that. I want a rollcall vote on my substitute.

The PRESIDING OFFICER. Without objection, it is so ordered. The yeas and nays have been vitiated on the amendment of the Senator from Ohio.

Mr. METZENBAUM. I am sorry, I did not hear the Chair.

The PRESIDING OFFICER. Without objection, the yeas and nays are vitiated on the amendment offered by the Senator from Ohio.

Mr. BUMPERS. Mr. President, reserving the right to object——

Mr. THURMOND. Mr. President, I have asked for the yeas and nays.

Mr. BUMPERS. Mr. President, reserving the right to object——

Mr. THURMOND. They have been ordered, I believe, on the substitute.

The PRESIDING OFFICER. They have not, sir.

Mr. THURMOND. I ask for the yeas and nays on the substitute.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BUMPERS. Mr. President, is there a unanimous-consent request pending?

The PRESIDING OFFICER. There is no unanimous-consent request pending.

Mr. METZENBAUM. It is my understanding, Mr. President, that the Senator from Arkansas had reserved the right to object with respect to my unanimous-consent request; is that correct? That is my understanding.

The PRESIDING OFFICER. The Chair was waiting to see if there was an objection to the request and the Chair ruled there was no objection.

Mr. THURMOND. Mr. President, I ask for the yeas and nays on my amendment and that we proceed to a vote.

The PRESIDING OFFICER. The yeas and nays have already been ordered on the amendment of the Senator from South Carolina. The question is on agreeing to the amendment of the Senator from South Carolina to the amendment of the Senator from Ohio. Is there further debate?

Mr. BUMPERS addressed the Chair.

The PRESIDING OFFICER. The Senator from Hawaii has the floor.

Mr. INOUYE. Mr. President, I yield to the Senator from Arkansas.

Mr. BUMPERS. Mr. President, the Senator from Ohio and the Senator from South Carolina are both saying approximately the same thing. The resolution of the Senator from South Carolina is acceptable to the Senator from Ohio. However, I would like to say a few words to express my view that we ought to be taking more substantive action than a sense-of-the-Senate resolution, which all of us know does not have a binding effect.

It occurs to me that if you look at the history of the antitrust laws of this country, the reasons for them, as originally adopted and carried out by Teddy Roosevelt are more compelling now than they were when they were originally passed.

I do not know how much of this information the Senator from Ohio has put into the RECORD, but I would like to make a few points about mergers that have been going on apace in this country to dramatize how critical this problem has become.

As of July 20, 1981, seven large companies lined up $26.9 billion in credit. That was seven companies, some of whom were seeking to take over Conoco. Conoco did not seek to be taken over. Du Pont, which finally acquired Conoco, borrowed somewhere between $6 and $6.5 billion, I forget the exact size of the figure, to consummate that sale.

What is $6.5 billion in this country? Consider this example, Mr. President. All of the New York City banks combined increased their commercial and industrial loans in 1980 by $6 billion. In other words, Du Pont borrowed more to take over Conoco than all the banks of New York City increased their commercial and industrial loans during a full year.

For a period of time, almost $27 billion in credit was tied up in a country where credit is supposed to be tight and where credit tightness is causing the exorbitant interest rates which everybody deplores. The effect of that absorption of credit, of course, is that we get no more jobs; we do not get any more competition. On the contrary, it is anticompetitive, and it certainly makes it a lot tougher for the small business people of this country to borrow money. They are dropping like tenpins all over the country.

Acquisitions have been occurring long before Mobile and du Pont and Seagram and others were trying to take over Conoco. Consider this statistic, Mr. President. Between January 1977 and the time we began phasing in the decontrol of oil prices in this country, in May 1979, the top 20 oil companies of the country acquired 32 other companies. That is according to CRS. During that period of time, that averages 1.2 companies per month that just the top 20 oil companies were taking over.

Even more, from May 1979, when we started phasing in the decontrol of our oil prices, until about June of this year, those same companies swallowed up 42 more companies. That was an average after phased-in decontrol, not of 1.2 companies per month, but of 1.75 companies per month that just the top 20 oil companies were taking over. More importantly, listen to the size, listen to the size of the acquisitions. They increased 142 percent, going from $225 million in that first period, January 1977 to May 1979, to $544 million per acquisition since that time. That amounts to a monthly average acquisition by those 20 companies of $953 million.

In other words, Mr. President, the top 20 oil companies in this country have been spending $1 billion a month not to develop synthetic fuels, not to develop solar energy, not to drill more holes anywhere, but to buy other companies.

In the 1974 list of the Fortune 500 corporations, the 500 largest corporations in the country, seven of the top 20 were oil companies. That was in 1974, and today, 13 of the top 20 corporations in America are oil companies. They are not satisfied just with their oil operations. They are spreading out into the coal business. And listen to this: Thirteen of the top 25 coal companies are owned by oil companies and Exxon is No. 4 in coal holdings of all the companies in the country.

Mr. President, that would not be particularly bad except for a couple of things. They have the money to buy up virtually all the coal in the country. My guess is that they own about 30 to 40 percent—I think they own 40 percent of the non-Federal coal in this country right now, but do they want it in order to develop coal, produce coal, or synthetic fuel from coal? Well, I doubt it. I am not blaming Exxon or anybody else

for this, but if you were the President of Exxon, Mr. President, would you develop a synthetic fuel from coal if you saw the chance that what you might be doing is developing a barrel of oil from coal that you could market very profitably at $20 per barrel?

You would want to give the president of Exxon a saliva test if he did that, because they have 5 billion barrels of oil in the ground, which is worth $35 a barrel right now, untouched. Do you think that they are going to try to find an alternative fuel for this country at anything less than $35 a barrel? Can you see one of those annual reports going out saying, "We have some good news and some bad news. The good news is we have developed a new technology to produce oil from coal at $20 a barrel. The bad news is the value of our reserves just went down $75 billion."

That is not about to happen. Yet the oil industry continues to take over all the coal companies they can find. AMAX is one of the biggest coal companies in the United States, and it was just a few months ago that Standard of California was trying to buy AMAX for $4 billion.

Mr. President, I will tell what is happening in this country: The big conglomerates and the big oil companies are finding it a lot easier to take their newfound profits and buy other corporations than they are to improve their own productivity. If you were to ask the president of a corporation, "Why do you want to buy this; why don't you get more productive?" he would answer, "Go talk to the vice president in charge of productivity; I am too busy buying up this new company here so our annual report will look nice and fat."

So, Mr. President, I support this resolution. I applaud the Senator from South Carolina and the Senator from Ohio for agreeing on it, but the time is coming when we are going to have to address this in a much more stringent way.

Mr. President, I yield the floor.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Ohio.

Mr. INOUYE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. INOUYE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. INOUYE. Mr. President, I ask unanimous consent that the present matter be set aside temporarily in order to permit the distinguished chairman of the Judiciary Committee to bring up another matter.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

UP AMENDMENT NO. 612

(Purpose: To indicate an intent that funds shall be used for the preparation of recommendations for the exchange of computerized records)

Mr. THURMOND. Mr. President, on behalf of the distinguished Senator from Kansas (Mr. DOLE), I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from South Carolina (Mr. THURMOND), on behalf of the Senator from Kansas (Mr. DOLE), proposes an unprinted amendment numbered 612:

On page 22, line 9, before the period, insert the following: "including the preparation and submission of recommendations as to whether the Federal Government should provide communications systems, networks, and data bases for the exchange of criminal records, provided that no part of any appropriation contained in this Act may be used to engage in message-switching until a plan for such message-switching has been approved by the appropriate committees of the House of Representatives and the Senate, including the Judiciary Committees".

(By request of Mr. THURMOND, the following statement was ordered to be printed in the RECORD:)

● Mr. DOLE. Mr. President, as a member of the Senate Judiciary Committee, I have had ample opportunity to review certain functions within the Department of Justice. No one is more aware than the Senator from Kansas of the need to be cautious and selective in the manner in which we will spend the limited funds appropriated to operate our Federal Government. However, there are several areas of special concern to me which I believe should receive priority treatment.

One such area is the Federal Bureau of Investigation's computer operations. For the last 10 years, the National Crime Information Center—the NCIC—has been a subject of considerable controversy. This controversy has focused primarily on the question of whether, and in what manner, the data contained in the NCIC should be part of a program providing for the interstate exchange of criminal records.

At this time, there is an operational system which permits the exchange of State criminal history information. I am referring to the National Law Enforcement Telecommunications System—NLETS. NLETS is a privately-maintained system in which each State maintains its own criminal history records and must make a separate inquiry of every other State when information is required regarding suspected multistate offenders. One of the advantages of NLETS is that it permits States to exercise control over their own criminal history data. There is merit to the argument that local law enforcement officials should be given a significant role in the decision to maintain, purge, and/or update their computerized criminal records.

However, NLETS has been the target of a good deal of criticism because it lacks a centralized index to the records maintained by other States. It has been argued that a centralized index would facilitate the exchange of criminal history data between and among the States. One of the arguments made in opposition to the use of a centralized index is that it would be the first step toward a national data bank in the hands of the FBI and that it could ultimately jeopardize the civil rights of all of us.

There is no question that we must insure the security, integrity, accuracy, and privacy of data of this nature and that we must exercise a degree of control over the uses to which such data is put. However, there remain serious differences of opinion as to how these goals are to be accomplished.

The FBI has already commenced a pilot program to test the interstate exchange of criminal data using a centralized index. This Senator believes that any such program should be delayed until we have had sufficient time to review the practical and ethical questions which have been raised and to avail ourselves of expert advice in this area.

To this end, I am introducing an amendment to H.R. 4169 to provide that a portion of the funds appropriated for the administration of the Department of Justice are to be used for the purpose of studying what the role of the Federal Government should be in the interstate exchange of criminal history data.

For the past 2 years, the Senate Judiciary Committee has voted in favor of authorizing funds for such a study. The committee has recommended that an independent entity be selected by the Attorney General and the House and Senate Judiciary Committees to submit recommendations as to the extent, if any, that the Federal Government should provide communications systems, networks, and data bases, for the distribution and use by Federal, State, local, or foreign governments or private entities, of records compiled as a result of arrests of individuals or any other criminal records.

Any such recommendation should include an assessment of the feasibility and advisability of continuing the National Crime Information Center, including the computerized criminal history program, and the other criminal record operations of the Federal Bureau of Investigation including but not limited to the criminal records operations of the FBI identification division and the automated identification system.

An assessment should also be made of the feasibility and advisability of a plan to improve the operations of those systems and of reconciling the operational redundancies among those systems. An assessment should also be made of the feasibility and advisability of incorporating national driver registry information into the computer operations of the Federal Government. In addition, the Judiciary Committee has recommended the selection of an advisory panel which would represent the interests of the Governors of the States, other users of the system, and those involved in law enforcement, civil liberties protection, and criminal justice operations.

The purposes of the study which was approved by the Senate Judiciary Committee were as follows:

First. To determine the purposes and uses of the system and related data bases by Federal, State, and local law enforcement and criminal justice agencies, by Federal, State, and local, and foreign governments, and by private sector organizations;

Second. To determine whether foreign entities and agencies other than law enforcement and criminal justice agencies should be allowed access to data contained in the system for purposes which are not related to law enforcement and criminal justice needs of the United States, and, if so, the policies and procedures for such access;

Third. To determine the functional, informational, and data service requirements to meet those recommended purposes and uses, with particular regard to the intergovernmental exchange of data;

Fourth. To establish standards for system and data integrity and quality of service, including standards for the relevancy, accuracy, reliability, and completeness of data accessible in or through the system, as well as methods for insuring that irrelevant, inaccurate, obsolete, or incomplete data is identified in a timely fashion and corrected or eliminated from the system;

Fifth. To establish privacy, confidentiality, and security requirements that any Federal, State, or local agency, or private sector organization, shall meet in order to gain access to the system, including standards as to use, who is responsible for maintaining the data, who has access to the data, what types of data are to be maintained, mechanisms for insuring data accuracy, reliability, security, and completeness, and an agreement by the State or Federal agency to be audited for compliance with such standards;

Sixth. To require that data be submitted by all Federal law enforcement and criminal justice agencies, including data with respect to the arrest and disposition of Federal offenders;

Seventh. To establish procedures for the audit of Federal, State, and local level programs;

Eighth. To develop effective sanctions for misuse of data and improper distribution of data, including legislative recommendations with respect to such sanctions;

Ninth. To provide procedures to enable an individual to have access to, review, and challenge any information pertaining to him contained within the system;

Tenth. To provide for an annual report to the Congress on the system including problems relating to the data contained in the system, the technology employed, the utility of the system, a breakdown—by level of Government—of the number of files maintained in the system on multistate offenders, Federal offenders, and single-State offenders, a breakdown—by category of users—of requests for information, and legislative and regulatory recommendations with respect to improvement of the system;

Eleventh. To provide a timetable for the implementation of the plan, the costs of such implementation, and recommendations for the funding of the system;

Twelfth. To determine whether the maintenance and management of the system should be by the States pursuant to Federal guidelines, the Federal Bureau of Investigation, another organization within the Department of Justice, or a combination thereof;

Thirteenth. To determine whether the computerized criminal history program should be separated from the National Crime Information Center;

Fourteenth. To make recommendations on the following:

First. With respect to criminal history information for single-State offenders, a requirement that criminal fingerprint cards only may be included in the Federal component of the system;

Second. The definition of "multistate offender," and appropriate policies and procedures for the maintenance of information on multistate offenders;

Third. The establishment of an automated interstate identification index to provide identifying information to Federal and State agencies, such index to consist solely of personal identifiers of an individual, the individual's FBI number, the individual's State identification number, and a notation of the existence of a criminal fingerprint card, and not to include charge or offense data;

Fourth. Whether message-switching of information contained in any system should be allowed. "Message-switching" means the use of electronic equipment to receive a message, store that message until an outgoing line is available, and then retransmit the message without any direct connection between the line on which the message was received and the line on which the message is retransmitted;

Fifth. Whether the organization charged with the management of the system shall be required to return any fingerprint card and delete the index entry upon request by the submitting State;

Sixth. The acquisition of updated technology and equipment; and

Seventh. Any other matter determined appropriate by the Attorney General or the advisory panel.

It is the sincere hope of the Senator from Kansas that this amendment be adopted and that a portion of the moneys appropriated for the administration of the Department of Justice be earmarked for a study such as the one which has been approved by the Senate Judiciary Committee during both the 96th and the 97th sessions of Congress. It should be noted that if the current pilot program to test the interstate exchange of criminal history data using a centralized index is delayed, funds being expended for the pilot program will be freed to be used for other purposes, such as the proposed study.●

Mr. METZENBAUM. Mr. President, will the Senator from South Carolina yield for a question?

Mr. THURMOND. I yield.

Mr. METZENBAUM. My question is this: I believe that, in the past, I have sponsored this amendment. Is this the same amendment that has been on the Judiciary Committee appropriation bill in the past?

Mr. INOUYE. The Senator is correct.

Mr. METZENBAUM. I thank the Senator.

Mr. WEICKER. We accept the amendment, Mr. President.

Mr. INOUYE. We also accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 612) was agreed to.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. INOUYE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. INOUYE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 611

Mr. THURMOND. Mr. President, I suggest action on the matter now before the Senate.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the amendment of the Senator from South Carolina to the amendment of the Senator from Ohio.

Mr. THURMOND. It is a substitute for the amendment.

The PRESIDING OFFICER. The Senator is correct.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Missouri (Mr. DANFORTH), the Senator from Alabama (Mr. DENTON), the Senator from Arizona (Mr. GOLDWATER), the Senator from Iowa (Mr. JEPSEN) and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Delaware (Mr. BIDEN), the Senator from Nevada (Mr. CANNON), the Senator from Illinois (Mr. DIXON), the Senator from Ohio (Mr. GLENN), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Michigan (Mr. LEVIN), the Senator from Louisiana (Mr. LONG), the Senator from Montana (Mr. MELCHER) and the Senator from New York (Mr. MOYNIHAN), are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY), is absent because of illness.

I further announce that, if present and voting, the Senator from Illinois (Mr. DIXON), would vote "yea."

The PRESIDING OFFICER (Mr. SPECTER). Is there any Senator in the Chamber wishing to vote?

The result was announced—yeas 85, nays 0, as follows:

[Rollcall Vote No. 364 Leg.]

YEAS—85

Abdnor	Bradley	Cochran
Andrews	Bumpers	Cohen
Armstrong	Burdick	Cranston
Baker	Byrd,	D'Amato
Baucus	Harry F., Jr.	DeConcini
Bentsen	Byrd, Robert C.	Dodd
Boren	Chafee	Dole
Boschwitz	Chiles	Domenici

Durenberger	Kassebaum	Riegle
Eagleton	Kasten	Roth
East	Kennedy	Rudman
Exon	Laxalt	Sarbanes
Ford	Lugar	Sasser
Garn	Mathias	Schmitt
Gorton	Matsunaga	Simpson
Grassley	Mattingly	Specter
Hart	McClure	Stafford
Hatch	Metzenbaum	Stennis
Hatfield	Mitchell	Stevens
Hawkins	Murkowski	Symms
Hayakawa	Nickles	Thurmond
Heflin	Nunn	Tower
Heinz	Pell	Tsongas
Helms	Percy	Wallop
Hollings	Pressler	Warner
Humphrey	Proxmire	Weicker
Inouye	Pryor	Williams
Jackson	Quayle	Zorinsky
Johnston	Randolph	

NOT VOTING—15

Biden	Glenn	Levin
Cannon	Goldwater	Long
Danforth	Huddleston	Melcher
Denton	Jepsen	Moynihan
Dixon	Leahy	Packwood

So Mr. THURMOND's amendment (UP No. 611) was agreed to.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Ohio, as amended.

The amendment (UP No. 610), as amended, was agreed to.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader.

Mr. BAKER. Mr. President, I have a unanimous-consent request to make. The minority has not cleared it at this time. I had hoped at this moment to propound a unanimous-consent request in respect of changing the time to resume consideration of the Export Administration bill. I am not prepared to do that.

The PRESIDING OFFICER. The Senate will be in order. The majority leader deserves our attention.

Mr. BAKER. I am not prepared to do that at this moment. But Senators should be on notice that for reasons I think are good reasons a little later I will make the request or propose to make the request that the time to resume consideration of this measure, that is to say, the Export Administration bill, be changed from 6:10 p.m. as presently ordered to 7:10 p.m. I do not now make that request, but I hope to be able to make it very shortly.

VISIT TO THE SENATE BY MEMBERS OF THE ISRAELI KNESSET

Mr. BAKER. Mr. President, I yield to the distinguished chairman of the Committee on Foreign Relations so that he may call the attention of the Senate to important visitors.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. BAKER. Mr. President, may we have order in the Senate?

The PRESIDING OFFICER. There will be order in the Senate.

Mr. PERCY. Mr. President, I thank the majority leader.

To my colleagues let me say that I have great pleasure and pride in introducing to the U.S. Senate some dear friends of the United States of America, personal friends of all of us, a delegation from the Knesset. The chairman is Prof. Moshe Arens, chairman of the Foreign Affairs Committee on Armed Services Committee; Ambassador Chaim Herzog, whom so many of us have known through the years; Ms. Sarah Doron, Mr. Shlomo Hilel, Mr. Joseph Rom, and Mr. Dan Rosolio.

Members can, if they have not already introduced themselves, now step over and introduce themselves to our distinguished guests, and we will then resume our meeting down in S-116. I thank the majority leader very much indeed.

RECESS

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate stand in recess for 1 minute so we can visit with our distinguished guests.

There being no objection, the Senate, at 5:09 p.m., recessed until 5:10 p.m.; whereupon the Senate reassembled when called to order by the Presiding Officer (Mr. SPECTER).

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS, 1982

FIRST EXCEPTED COMMITTEE AMENDMENT—PAGE 2, LINES 17 THROUGH 23

The PRESIDING OFFICER. The question recurs on agreeing to the first committee amendment.

Mr. INOUYE. The yeas and nays are ordered.

The PRESIDING OFFICER. The yeas and nays have been ordered.

Mr. HELMS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HELMS. Is the first excepted committee amendment the amendment that relates to the farm census? Will the Chair state the title of the amendment?

The PRESIDING OFFICER. The Chair does not interpret, but the Chair can state that the amendment is now found on page 2, lines 17 through 23.

Mr. HELMS. I think the point has been made, Mr. President. I thank the Chair.

The PRESIDING OFFICER. The yeas and nays have been ordered on agreeing to the amendment. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Missouri (Mr. DANFORTH), the Senator from Alabama (Mr. DENTON), the Senator from Arizona (Mr. GOLDWATER), the Senator from Iowa (Mr. JEPSEN), and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Delaware (Mr. BIDEN), the Senator from Nevada (Mr. CANNON), the Senator from Illinois (Mr. DIXON), the Senator from Ohio (Mr. GLENN), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Michigan (Mr. LEVIN), the Senator from Louisiana (Mr. LONG), the Senator from Montana (Mr. MELCHER), and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present and voting, the Senator from Montana (Mr. MELCHER) would vote nay.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 3, nays 82, as follows:

[Rollcall Vote No. 365 Leg.]

YEAS—3

Chafee	Gorton	Mathias

NAYS—82

NOT VOTING—15

Biden	Glenn	Levin
Cannon	Goldwater	Long
Danforth	Huddleston	Melcher
Denton	Jepsen	Moynihan
Dixon	Leahy	Packwood

So the committee amendment on page 2, lines 17–23, was rejected.

Mr. THURMOND. I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senate will be in order.

THIRD EXCEPTED COMMITTEE AMENDMENT

Mr. THURMOND. Mr. President, I ask for the yeas and nays on excepted committee amendment No. 3.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the third excepted committee amendment.

Mr. THURMOND. Mr. President, I should like to say a word on it.

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

Mr. THURMOND. Mr. President, this is the House committee amendment:

> No part of any appropriation contained in this title shall be obligated or expended for promoting or conducting trade relations with Cuba.

That was the House provision. Who could object to that? However the Senate committee struck that out. It is my position that that House provision should be retained in the bill. I ask for a vote on it.

Mr. WEICKER. Mr. President, I am going to synopsize in about 1 minute, then I am going to be offering a substitute amendment of my own.

The question was asked by the distinguished Senator from North Carolina, "who could object to that?" Well, the U.S. Senate ought to object to it and, certainly, the members of the Committee on Foreign Relations ought to object to it.

We are not going to make foreign policy in a little bit of ad hoc activity here on the Senate floor, throwing out a few buzz words.

Mr. President, I repeat what I said earlier, which is that we have had no foreign policy in the Caribbean, Central America, Cuba, or anywhere else in that part of the world. We have not had it for 30 years. That is the reason why the Soviet Union is wandering willy-nilly in that part of the world without any effort by the United States to compete in terms of ideas, products—you name it.

Mr. MATHIAS. Will the Senator yield for a question?

Mr. WEICKER. I do yield to my good friend, the distinguished Senator from Maryland.

Mr. MATHIAS. The Senator from South Carolina says, who would object? I wonder if the Senator from Connecticut, the manager of the bill, could tell us whether the President of the United States has objected?

Mr. WEICKER. I have not heard from the President of the United States.

Mr. MATHIAS. So he has not objected.

Mr. WEICKER. He has not objected.

Mr. THURMOND. Mr. President——

Mr. WEICKER. I do not yield at this time.

So that we all do not get into one of these rhetorical traps, so that we are not blown over by fearing to stand up against some pretty volatile words and phrases, I think the time has come for the United States to establish a foreign policy; and that foreign policy should be constructed by the President of the United States, the Secretary of State, and the Foreign Relations Committee of the U.S. Senate. It is our prime responsibility here, so that we can remove the Soviet presence from the Western Hemisphere.

Right now, the foreign policy consists of name calling. One day it is Mr. Castro doing a number on our Chief Executive and/or Secretary of State, and the next day it is the two of them doing a number on Mr. Castro. What kind of foreign policy is that?

The language I propose as a substitute will read as follows:

"It is the sense of the Senate that the president, in consultation with the Congress, develop an effective foreign policy to address expansion of the economic and political influence of the Soviet Union in the Carribean region generally and in Cuba specifically;

"*Provided* further that in developing such a policy the president shall consider the full range of economic and diplomatic relations with the nations of the region in order to promote stability, human rights and economic development for the people of the region."

At least, we get this back into its proper order.

Obviously, I have the general objection of all the legislation that is being heaped on our appropriations bills. But, sooner or later, I think it is necessary that we follow the proper constitutional process. Otherwise, let us eliminate all the authorizing committees, and we can run this place with the Appropriations Committee, the Budget Committee, and the Finance Committee.

I was in Cuba about a year and a half ago. Since we are specifically on the matter of trade—never mind ideology—if anybody thinks that what is in that country is solely a product of Cuba or the Soviet Union, let me tell you that it has been Japan, Italy, France, Canada, West Germany, and England. Every other free, democratic nation in the world has its products in Cuba.

I am not advocating or putting an amendment on this bill that dictates our foreign policy, that we should normalize relations, or that we should trade. But if the Mideast is a priority, then our own part of the world should be our own priority, and it is not.

The reason why the Soviet Union runs footloose and fancy free, whether it is in Cuba or Central America or wherever, is that we have no foreign policy, and that part of the world looks to every part of the world except the United States.

The Senator from North Carolina, one of the principal sponsors of this amendment, is a member of the Foreign Relations Committee. Why is it that he cannot accomplish it in his own committee, rather than come to an appropriations bill? It is obvious that the headlines have not necessarily always been in the Western Hemisphere and, more particularly, Central America and the Caribbean. Now we are starting to get some, as the sham of our policy becomes obvious, and nation after nation is flirting with some alternate form of government to the ones that exist and that we have been supporting.

I cannot think of a greater priority for the Senate and for our generation to truly once again establish our Nation as the preeminent influence in that part of the world.

So, I hope that at least as a beginning, to that end, and without anybody fearing that they have voted for Castro or for communism—as a beginning—the Senate will support this substitute amendment. It just does not say that we are going to cut off funds or are not going to have funds to do anything with trade, but it specifically directs everybody to the job that needs to be done.

UP AMENDMENT NO. 613

Mr. President, I send to the desk a substitute for the language proposed to be stricken by the committee amendment on page 12, lines 1 to 3.

I ask unanimous consent that the name of the Senator from Hawaii (Mr. INOUYE) be listed as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The bill clerk read as follows:

The Senator from Connecticut (Mr. WEICKER), for himself and Mr. INOUYE, proposes an unprinted amendment numbered 613.

Mr. WEICKER. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language proposed to be stricken by the committee amendment starting on page 12, line 1, insert the following:

"It is the sense of the Senate that the President, in consultation with the Congress, develop an effective foreign policy to address expansion of the economic and political influence of the Soviet Union in the Caribbean region generally and in Cuba specifically: *Provided further*, That in developing such a policy the President shall consider the full range of economic and diplomatic relations with the nations of the region in order to promote stability, human rights and economic development for the people of the region."

Mr. WEICKER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. THURMOND. Mr. President, is the Senator willing to add the House language back to his amendment?

Mr. WEICKER. Yes; I would be more than willing. If the Senator would like to have the House language and my language, I have no problem with accomplishing something along that line. Would the Senator like to suggest the absence of a quorum?

Mr. THURMOND. Mr. President, I suggest the absence of a quorum.

Mr. HELMS. Will the Senator withhold that? Then I will put in a quorum call.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, the able Senator from Connecticut raised a question about the administration's position on the House amendment which the Senate committee struck. The matter prior to any agreement that may be reached between the Senator from South Carolina and the Senator from Connecticut was on the question whether the committee amendment to strike the House language would be approved by the Senate. Senator WEICKER inquired about the administration's position on the House amendment. Both the Department of State and the Department of Commerce have informed me that they prefer the House language, which they both say reflects the administration policy.

Mr. President, I suggest the absence of a quorum.

Mr. WEICKER. Mr. President——

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. WEICKER. Mr. President, I am not impressed by the fact that the Department of State or the Secretary of State or the Secretary of Commerce, whoever it was, will take the House language.

It was so with the previous Secretary of State and the previous Secretary of Commerce and the Democratic administration. It was so with the Secretary of State and the Secretary of Commerce and the Republican administrations all the way back to the late 1950's.

Why is it that I have to ask that we have a change in our foreign policy? Why

is it that I have to defend a new game plan, when that is the policy that has been in place since the end of the 1950's, which has succeeded in putting the Soviet Union smack in the middle of the hemisphere? Has anybody asked themselves that question? Why are they here, and why are they being looked to more and more, not just by Cuba but by other nations in that part of the world as well?

All my amendment does, in effect, is to stop the name calling, the brickbats, the endless schism, and it starts a process going. Maybe it is after that process that everybody feels we should totally isolate Cuba. I am not here to make a judgment. I feel that that is not the way to go. But I realize that the proper forum for my ideas would be before the Foreign Relations Committee, in talking with the counselors to the administration.

If the administration does not have any commonsense, at least let us start to show it on the floor of the Senate. Maybe we have a certain air of detachment about what is going on in the Middle East or Afghanistan or Poland and the rest because of distance. But we cannot afford to goof on this one.

Since the matter has been raised and since we are going to have some legislation on an appropriations bill, at least let us make it intelligent, at least let us have it pertain to our generation and what it is we look for; because, sooner or later, this nonforeign policy in our part of the world is going to lead to armed conflict. How many crises do you think you can have before this explodes in our face?

Do you honestly feel that by leaving Cuba in a vacuum, you are doing anything other than to leave her with the Soviet Union and nobody else? That is what is happening.

The most frustrating experience I ever had in my life was, upon leaving the island of Cuba, to know that the United States was not competing, either in terms of ideas or in terms of products; to know that our ideas are better, but nobody hears them because we do not speak them; to know that our products are better, but nobody has them because we do not sell them.

I have indicated a willingness, because I think that if we get anything started, it is better than where we are. I have indicated to the distinguished Senator from South Carolina that I am willing to go ahead—if he wants to leave the House language in there, I will let that go. But then I would like my language to be added to it, and then at least we start the constitutional process, trying to do the correct thing by ourselves and by that part of the world.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, the distinguished Senator from Connecticut has agreed to accept the House wording in the bill, thus leaving the House provision in the bill. The provision reads this way:

No part of any appropriation contained in this title shall be obligated or expended for promoting or conducting trade relations with Cuba.

Mainly what I objected to was striking that out because I think it should remain in the bill.

The distinguished Senator from Connecticut has agreed to allow that provision to remain in the bill and then to add some language following it with a change in the word diplomatic "relations" to diplomatic "options" which I am willing to accept.

In view of this we will accept the provision.

Mr. WEICKER. I thank the distinguished Senator from South Carolina, my colleague.

I also wish to put in, so it moves easier, at the beginning instead of "It is the sense," "*Provided*, That it is the sense of the Senate"—just to have it move along better. That is all.

The PRESIDING OFFICER. Is the Senator asking that the amendment be modified?

Mr. WEICKER. Mr. President, I ask that my amendment be modified in the following respects.

At the beginning it shall be "at the end of the language proposed to be stricken." "At the end", instead of "in lieu of".

The PRESIDING OFFICER. Is there objection to the request of the Senator from Connecticut?

Mr. WEICKER. May I propound the entire request?

That start off "Provided that it is the sense of the Senate," and that on line 10 instead of "relations" the world "options" be inserted.

The effect of that I wish to make sure I am accomplishing by virtue of my amendment is that the House language remain intact, that then at the end of the language proposed to be stricken by the committee amendment:

Provided, that it is the sense of the Senate that the President in consultation with the Congress, develop an effective foreign policy to address expansion of the economic and political influence of the Soviet Union in the Carribean region generally and in Cuba specifically: *Provided further*, That in developing such a policy the President shall consider the full range of economic and diplomatic relations with the nations of the region in order to promote stability, human rights and economic development for the people of the region.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Connecticut?

Mr. THURMOND. Mr. President, we are willing to go along with the original House provision with the modification as explained by the distinguished Senator from Connecticut, and we wish to have a rollcall vote on this, a yea and nay vote on the committee amendment.

The PRESIDING OFFICER. Without objection, the amendment is so modified.

The modified amendment is as follows:

At the end of the language proposed to be stricken by the committee amendment starting on page 12, line 1, insert the following: "*Provided*, That it is the sense of the Senate that the President, in consultation with the Congress, develop an effective foreign policy to address expansion of the economic and political influence of the Soviet Union in the Carribean region generally and in Cuba specifically: *Provided further*, That in developing such a policy the President shall consider the full range of economic and diplomatic options with the nations of the region in order to promote stability, human rights and economic development for the people of the region."

Mr. HELMS. Mr. President, does the Senator wish to vitiate the yeas and nays on his amendment?

Mr. WEICKER. I wish a rollcall on the whole thing.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. WEICKER. If I vitiate the yeas and nays on my amendment, then would the rollcall vote take place on the committee amendment as amended?

The PRESIDING OFFICER. It would.

Mr. WEICKER. Mr. President, I ask unanimous consent that the yeas and nays be vitiated on my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I ask for the yeas and nays on the committee amendment as it came from the House, as modified.

The PRESIDING OFFICER. They have already been ordered.

The question is on agreeing to the amendment of the Senator from Connecticut, as modified.

The amendment (UP No. 613), as modified, was agreed to.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, I ask unanimous consent that the committee amendment be agreed to and that there be a yea and nay vote on the House language as amended.

Mr. HELMS. Mr. President, reserving the right to object, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I move to table the committee amendment.

Mr. HELMS. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from South Carolina to lay on the table the third committee amendment on page 12, striking lines 1 through 3. The clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from Missouri (Mr. DANFORTH), the Senator from Alabama (Mr. DENTON), the Senator from North Carolina Mr. EAST), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina (Mr. EAST) would vote yea."

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Illinois (Mr. DIXON), the Senator from Ohio (Mr. GLENN), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Michigan (Mr. LEVIN), the Senator from Louisiana (Mr. LONG), the Senator from Montana (Mr. MELCHER), the Senator from New York (Mr. MOYNIHAN), and the Senator from Colorado (Mr. HART), are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY), is absent because of illness.

The PRESIDING OFFICER (Mr. BOSCHWITZ). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 84, nays 0, as follows:

[Rollcall Vote No. 366 Leg.]

YEAS—84

Abdnor	Garn	Pell

NOT VOTING—16

Cannon	Goldwater	Long
Danforth	Hart	Melcher
Denton	Hayakawa	Moynihan
Dixon	Huddleston	Packwood
East	Leahy	
Glenn	Levin	

So the motion to lay on the table the committee amendment on page 12 to strike lines 1 to 3 was agreed to.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER TO POSTPONE RECONSIDERATION OF S. 1112 UNTIL 7:10 P.M.

Mr. BAKER. Mr. President, there is an order to resume consideration of the Export Administration bill at 6:10 p.m. I ask unanimous consent that that be changed to 7:10 p.m., under the same terms and conditions.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS, 1982

The Senate continued with consideration of the bill.

UP AMENDMENT NO. 614

(Purpose: To prevent the conversion of the Portland, Maine, Weather Service Forecast Office)

Mr. COHEN. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Maine (Mr. COHEN) for himself and Mr. MITCHELL, proposes an unprinted amendment numbered 614.

Mr. COHEN. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 6, line 12, strike out "$835,281,000" and insert in lieu thereof "$835,390,000".

On page 6, line 13, after the comma insert the following: "of which $109,000 shall be available to prevent the conversion of the Portland Weather Service Forecast Office located at Portland, Maine, to a weather service office, and".

Mr. COHEN. Mr. President, this is a simple amendment. It is designed to correct what is otherwise a pennywise and pound foolish action that is to be taken. That is to downgrade the Portland Weather Service Forecast Office to a weather service office.

Mr. President, if there is one thing that is consistent about Maine, that is that the weather is inconsistent and rather unpredictable. It is critical to the farmers and our fishermen alike. We have had fishermen who have drowned off the coast of Maine in recent months and years and had the Coast Guard tell us that they cannot afford to have a helicopter in Maine to rescue those fishermen. Now we have a situation where we are going to downgrade one of the busiest weather service forecasting offices in the country, with seven aviation terminal forecasts and 14 weather forecasts. This will be transferred to Boston with a notion that, somehow, we are going to replace five people with one in Boston where, actually, the grade level is higher in Boston than in Maine.

I ask the committee to accept the restoration of the $109 thousand that will keep the Weather Service Forecast Office at full staff for the State of Maine, which also has jurisdiction for New Hampshire, instead of transferring this to Boston. In addition to having the Weather Service transferred to Boston, you would also have the weather forecasting transferred to Boston out of Albany, all of which I say is physically impossible.

Mr. MITCHELL. Mr. President, I join my colleague in urging the acceptance of this amendment by the committee. As Senator COHEN has stated, this is a matter of considerable importance to the people of the Northeastern part of the United States and northern New England. The proposed saving will not, in fact, be a saving. I think it makes great sense to make the restoration as requested, and I urge its acceptance by the Senate.

Mr. WEICKER. Mr. President, I understand the problem that is posed for my distinguished colleagues from Maine (Mr. COHEN and Mr. MITCHELL). To be candid, were it not for the strictures placed upon the committee and the requests of the Department of Commerce, there would not have been a unilateral action by the committee to cut back on these weather stations, in Maine or anywhere else, for that matter.

However, because of budget constraints and the priorities and the selections made by the agencies involved, this weather station was one of those scheduled to close down.

Personally, Mr. President, I trust far more the experience of my colleagues on this floor in the representation of their States than I do the word of some bureaucrat. For that reason, I am more than delighted to accept the amendment on behalf of the majority.

Mr. HOLLINGS. Mr. President, where is this weather station? The distinguished Senator from Maine (Mr. MITCHELL) had me up there. I do not remember seeing this weather station. Where is it?

Mr. MITCHELL. It is in Portland, Maine, Mr. President. It is a place that sorely needs a weather station, I might say to the Senator from South Carolina.

Mr. HOLLINGS. Mr. President, I enjoyed my visit up there about a month ago. It is magnificantly beautiful country. It is a tragic thing not to try to take care of weather needs and, more particularly, from a safety standpoint. We do a lot of air travel and everything else, Mr. President. I do not know that closing these stations is not becoming a false economy.

The senior Senator from Maine mentions the Coast Guard. That fits right into the pattern of Coast Guard services that we experience also. I explained only the day before yesterday, when we stated on the State-Justice-Commerce appropriations bill, how we had to get a Coast Guard cutter all the way from New York to stop a big tanker off-loading drugs coming into South Carolina. We have to try to keep these kinds of services constant. On behalf of the minority, we shall be glad to join the Senators in urging the amendment's adoption.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 614) was agreed to.

Mr. WEICKER. I move to reconsider the vote by which the amendment was agreed to.

Mr. HOLLINGS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 615

Mr. HOLLINGS. Mr. President, I send to the desk an amendment on behalf of the Senator from Hawaii (Mr. INOUYE) and myself on the Asia Foundation and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from South Carolina (Mr. HOLLINGS) for himself and Mr. INOUYE, proposes an unprinted amendment numbered 615.

On page 37 after line 9 insert: "including the development of recommendation to Congress by December 1, 1981, regaining the future of the Asia Foundation.".

Mr. HOLLINGS. Mr. President, this conforms to the concerns of the Senator from North Carolina (Mr. HELMS) and the Foreign Relations Committee as evidenced by the recently passed foreign relations authorizations bill. For the last 2 years, the funding of the Asia Foundation has been rather uncertain. The Appropriations Committee has the very same interest that the Foreign Relations Committee does in obtaining a clear signal from the administration regarding the Asia Foundation. This provision is included and is identical with the requirement of the Foreign Relations Authorization Act in the bill—it passed the Senate, as I indicated, and is still pending in the House.

I understand that Senators HELMS and HAYAKAWA and other members of the Foreign Relations Committee wanted that concern reaffirmed. With that reaffirmation, we can move with that particular section, which I think is a very sound provision. I want to continue the good and outstanding work done by the Asia Foundation. I offer that language.

The PRESIDING OFFICER. Does the manager of the bill wish that the committee amendments be laid aside?

Mr. HOLLINGS. I ask unanimous consent that the committee amendments be laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLLINGS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 615) was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HOLLINGS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

NINTH EXCEPTED COMMITTEE AMENDMENT—PAGE 42, LINES 11 AND 12

Mr. HOLLINGS. Mr. President, with the permission of the manager of the bill—and I wish the staff would see if this is correct—I think it would be appropriate at this time to move to the committee amendment on page 42, lines 11 and 12, "For a grant to the Asia Foundation, $4,100,000, to remain available until expended," since the language just adopted satisfies the previous object to the committee amendment.

I would then move adoption of the committee amendment on page 42, on lines 11 and 12.

Mr. HELMS. Mr. President, the administration budget request for the Asia Foundation was zero. In other words, no funds were requested at all.

The House appropriated $2 million. However, the Senate committee voted to appropriate $4.1 million. Moreover, the Foreign Relations Committee in the authorization bill directed the State Department to report on the need for the Asia Foundation by December 1. I am informed that that deadline will not be met. Mr. President, why should we temporize any longer?

I think this is a good place to save money, money that was not even asked for. At the minimum, we should stick with the House figure of $2 million. I oppose the committee amendment.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I have been in conversation with the distinguished Senator from Hawaii, the distinguished chairman of the Foreign Relations Committee, and the distinguished Senator from South Carolina.

I make this inquiry: While I was in the Agriculture Committee conference, was the language included that we had discussed previously?

Mr. HOLLINGS. Yes.

Mr. President, the amendment we adopted reads:

Including the development of recommendations to Congress by December 1, 1981, regarding the future of the Asia Foundation.

This is the very language of the Foreign Relations Committee authorization act that was passed by the Senate earlier this year.

It was my understanding that the distinguished Senator from North Carolina wanted to make certain we included that language before we moved the committee amendment.

Mr. HELMS. That is satisfactory to the Senator from North Carolina. I think it is imperative that the State Department meet the deadline established by the Foreign Relations Committee. I think this will get the message across; and under those conditions, I withdraw the objection.

Mr. HOLLINGS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I ask unanimous consent that it be in order to ask for the yeas and nays on excepted committee amendment No. 6.

The PRESIDING OFFICER. Is there objection?

Mr. WEICKER. Mr. President, as the manager of the bill, it is my intention to bring this up as the next matter and make the necessary motions to do it in an orderly fashion. I would appreciate it if the distinguished Senator from South Carolina would permit the managers of the bill to proceed in an orderly fashion.

Mr. THURMOND. Mr. President, if the Senator intends to bring it up next——

Mr. WEICKER. I say to the Senator that I think this will be the issue that occupies us for the remainder of the evening.

Mr. THURMOND. This is not legal services.

Mr. HOLLINGS. The Senator said No. 6. Which one is it?

Mr. THURMOND. It is the prayer amendment.

Mr. WEICKER. I have no objection if the Senator wants the yeas and nays.

The PRESIDING OFFICER. Is there objection to it being an order at this time to order the yeas and nays on the sixth excepted committee amendment?

The Chair hears none, and it is so ordered.

Mr. THURMOND. Mr. President, I now ask for the yeas and nays on excepted committee amendment No. 6.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HOLLINGS. Mr. President, I believe there is some misunderstanding, and I should like to clear it up.

I ask unanimous consent that we now proceed to page 42, lines 11 and 12; that it be in order to proceed to the committee amendment on page 42, lines 11 and 12, reading, "For a grant to the Asia Foundation, $4,100,000, to remain available until expended."

The PRESIDING OFFICER. The managers have authority to set aside any committee amendments, and proceeding to the amendment specified by the Senator from South Carolina is consistent with that authority.

Mr. HOLLINGS. Then, I so move.

The PRESIDING OFFICER. The amendment is now the pending question.

The excepted committee amendment is as follows:

On page 42, line 11, strike "$2,000,000", and insert "$4,100,000".

Mr. HOLLINGS. I now move the adoption of the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment?

The question is on agreeing to the amendment.

The amendment (page 42, lines 11 and 12) was agreed to.

Mr. HOLLINGS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HELMS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SEVENTH EXCEPTED COMMITTEE AMENDMENT—PAGE 32, LINE 23 THROUGH PAGE 36, LINE 10

Mr. WEICKER. Mr. President, the distinguished Senator from South Carolina, Senator HOLLINGS, and I agree to consider the committee amendment which begins on page 32 and ends on page 36.

UP AMENDMENT NO. 616

Mr. President, I send to the desk an amendment to the committee amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Connecticut (Mr. WEICKER) proposes an unprinted amendment numbered 616.

On page 35, line 10, strike the following: "directly or indirectly".

Mr. WEICKER. Mr. President, I move the amendment.

Mr. HELMS. Mr. President, I am sorry. I did not hear what the distinguished Senator from Connecticut said.

Mr. WEICKER. I move the amendment which I just offered to the committee amendment and which the clerk just read.

Mr. HELMS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, may I ask the distinguished Senator from Connecticut why he wishes to delete the words "directly or indirectly" which is what his pending amendment does?

Mr. WEICKER. Because I think these words are superfluous. I think they are unnecessary to the language in the bill.

Mr. HELMS. I am regretfully and respectfully in disagreement with the Senator because the deletion of these three words will put us back in contention with the problem that existed so long with the Legal Services Corporation anyhow. The Corporation has a long history of going around the corner and under the doormat and around the intent of Congress. The Senate amendment is weak enough as it is, but these three words are absolutely essential to protect the interests of American taxpayers.

Mr. President, the House language says that the appropriations for the Legal Services Corporation shall not "be expended for any purpose prohibited or limited by any of the provisions of H.R. 3480 as passed by the House of Representatives."

The committee voted to strike this restriction in the House bill and insert instead broad and sweeping language which is nevertheless hardly adequate to restrain the activism of the Legal Services Corporation.

There is no point in consuming the time of the Senate in reciting the horror stories of the misuse and the abuse of the Legal Services Corporation.

The point I wish to make is that both actions emphasize the clear fact that no authorization had been passed for the Legal Services Corporation. It has been on continuing resolution since last year. Both the House action and the Senate committee action are an attempt to get authorization passed by the back door.

It is a clear attempt, and I say this respectfully to the Senators involved, to put authorization language on an appropriations bill.

Furthermore, when we were in the reconciliation process the administration was clear that it wanted no funds whatsoever passed for the Legal Service Corporation. At that time the Senate included $100 million for legal services but not for the Corporation directly. Now we suddenly see an appropriation of $241 million without, and let me emphasize this, without any authorization legislation without the restraints which the House has debated twice and passed twice.

Now the able Senator from Connecticut wishes to dilute the Senate language even more. If, at this point, we take out "directly" or "indirectly," there would be the implication in the legislative history that we approve indirect funding of the prohibited activity. We cannot allow that to happen.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, let me put it straight out here so that we know exactly what is involved. I do not in any wise want to be a party to the passage of legislation under any subterfuge.

Up to this point we have agreed and we worked matters out. It has been my wish all along that all matters could be worked out as they were in the committee.

Now we are going to start taking up the tough choices. Legal Services is one of those. It is one of the problems that the committee faced.

Senator HOLLINGS and I preferred to move into this without any restriction or legislative language or getting involved in that morass, but we understand that there were other Senators who had different feelings, Senator CHILES being one, and there were many Members on my side of the aisle who felt that they did want modifications to the Legal Services Corporation and wanted the chance to express themselves.

So after much discussion and a carefully constructed compromise the committee evolved upon the language which is contained in the committee amendment.

Aside from the fact, as I stated, that this language is superfluous, it also is there for a parliamentary reason. It is there so that we do not spend the next 2 weeks trying to legislate on this appropriations bill but rather accept the compromises that we worked out within the committee which I think were a fair representation of the views of the members of the committee and also which views incorporated some of the positions over on the House side.

So the purpose of this amendment is twofold. The language is superfluous but it is also so that we can get down to the business of voting on the Legal Services Corporation.

It will be my intention to go ahead and have these votes. If the amendment will not be accepted by motion, then it would be my purpose to have this amendment and the committee amendment voted on in order within a short space of time.

So I am going directly now to my comments vis-a-vis the Legal Service Corporation and hope that this amendment will be adopted and that the committee amendment will be adopted.

I repeat the committee amendment falls far short of anything that I would hope for in terms of the Legal Services Corporation because very simply I do not think that because a lawyer is assigned to a citizen of this country through the Legal Services Corporation that lawyer should have any less power than one whom any other citizen of this Nation would select by the private process.

In order to be effective, the lawyer should have all the tools at his or her command and not, because the salary is being paid for by public funds, be restricted in any way in presenting the case of his or her client.

In considering funding for the Legal Services Corporation, I strongly urge the Senate to reject any attempts to include those provisions and restrictions adopted by the House. The Senate Appropriations Subcommittee and Committee carefully considered the Legal Services Corporation. Hearings were held and testimony taken. In an unusual move, even critics of the agency were invited to testify before the subcommittee with respect to their problems with legal services for the poor.

The committee has crafted a bill that takes into account—in a very reasonable and logical way—the concerns Members of Congress and others brought to our attention. Those provisions are included in H.R. 4169 and they severely restrict the activities of legal services attorneys in those somewhat political areas that many find offensive. The provisions of H.R. 4169:

Outlaw the representation of almost all aliens, both illegal and legal;

Deny legislative representation to poor people through Legal Services attorneys;

Require the Reagan Board of Directors to regulate class action lawsuits against governmental entities; and

Give bar associations majority control over local Legal Services programs.

Other concerns or problems were simply not brought to our attention, otherwise we would have dealt with them as well. But it makes no sense to simply adopt—without hearing, without testimony, without any rational consideration whatsoever—the House-passed restrictions with respect to Legal Services. This approach would be to bypass com-

pletely our own Senate processes and procedures, and to blindly follow the House. Such an approach should be rejected out of hand.

Let me give you a few examples of what you would be doing by adopting in toto the House version. The House-passed verson prevented—inadvertently I presume—the Legal Services Corporation from making grants to bar associations. The Senate bill remedies that problem. The House-passed bill restricts what individual legislators may ask of Legal Services attorneys; our bill remedies that problem too. We are dealing rationally and logically with the problems brought to our attention. We should follow such a path and adopt the bill that was reported to you by the committee.

The Senate will have full opportunity to deal in depth with the Legal Services Corporation when its authorization is again scheduled for action in the 97th Congress. That is the proper time and place to deal with the many technical and complex issues, not here. I strongly urge your support for the committee approach to the Legal Services Corporation.

If we bog down on this particular issue let no one make any mistake that of all the line items in the State, Justice, Commerce bill this one. Legal Services, actually does better by a continuing resolution. So if we want to bog down and not have this bill become law then, fine, Legal Services will be the beneficiary.

Point number two: The figure for Legal Services of $241 million is hardly adequate to do the job necessary in terms of the services to be provided.

It would seem to me that for an administration that wants everybody to work within the system that can only be possible for a large portion of our society if they have these services available to them. Otherwise their cause has to be pleaded in the streets. This is law and order money; it is law and order money.

I am sorry that when an attorney takes a case that he causes discomfiture to the other side, and sometimes the other side is local government, State government, the Federal Government. I figure that it is what he is there for. But I know one thing after my experience in the U.S. Senate in the last 2 years, nobody's rights are going to be protected by this body or the House, and maybe by the time this body gets through with the courts they will not be protected by the courts either.

Any rights that have accrued to the minorities of this country—and by that I do not mean the blacks and Hispanics, I mean minority in the sense of physical condition, the elderly being a minority unit, mental condition, those who are retarded are a minority unit, all of us taken as part of society are indeed a part of some minority; and those rights that we seek to achieve in that minority capacity have never been brought to fruition by the Congress of the United States.

It has taken the courts to do that job. That is why I oppose the legal incursions or the constitutional incursions by this body into the judicial branch of Government. But, having said that, it is all the more important that at least there be legal counsel to protect those whose rights which may be denied.

I just think the matter of legal services has been an unparalleled success in terms of the Federal Government's stepping into what was a void in our constitutional system.

I do not want to take away from what it is that Senator HOLLINGS is going to discuss; but the other day in the committee when we were discussing this matter and the room was full, he indicated that that room would be cleaned out if the attorneys for all the private interests who are subsidized by us as taxpayers left the room. The corporations get legal services paid for by the taxpayers of this country indirectly; but just as surely I can assure you that when it comes to toting up the bottom line of the profits that this will be taken out as an expense. Who do you think is paying for that? They are legal services. Senator HOLLINGS can say it far more eloquently than I can, but I think he makes the point.

I hope that on this measure the Senate will vote overwhelmingly to assure the contitutional rights of all Americans.

Mr. President, in just a few minutes, pursuant to the unanimous-consent request of the leader, it is my understanding that the Senate will move on to other business.

The PRESIDING OFFICER (Mr. SIMPSON). One more minute.

Mr. WEICKER. But it would be my intention as the manager of this bill to see this matter resolved this evening.

We have prayer in school coming up, we have all sorts of further incursions into the judiciary coming up, we have got abortion coming up. We are going to hit every one of these problems held on now. Never mind the fact that the proponents of this type of legislation cannot accomplish their work within the authorizing process. But they are not going to get their way here, and they are not going to get it on this bill. There is a lot of good work that has gone into this product, and it deserves to pass instead of this constant circumvention of the constitutional process by those who just cannnot wait to achieve their particular radical ends. Well this radicalism from the left has to filter through that constitutional process and so is it going to filter through that process when it comes from the right.

So understand if we want to exercise our prerogative and say what it is these budgets are going to consist of and what the priorities are going to be, then let us pass this State, Justice bill. Otherwise we will lose that opportunity and it becomes a matter of last year's priorities or the administration's priorities.

U.S. EDUCATIONAL AND CULTURAL EXCHANGE PROGRAMS

● Mr. KENNEDY. Mr. President, today the Senate is discussing the fiscal year 1982 appropriations bill for the Departments of Commerce, State, and Justice including funding for the International Communication Agency (ICA). I wholeheartedly support the action of the Appropriations Committee to protect funds for our all important educational and cultural exchange programs. I was deeply concerned to learn that in response to President Reagan's call for an additional 12-percent budget cut, ICA was proposing to reduce substantially its educational and cultural exchange programs.

The reductions proposed by ICA Director Wick were drastic and far-reaching. Academic exchange programs in 61 countries would have been ended. It would have meant the end to the highly respected 35-year-old Fulbright fellowship program in all but a few countries where special agreements exist. The number of U.S. scholarships awarded in Third World countries would have been drastically reduced at a time when the Soviet Union already offers 12 times as many scholarships to Africans as the United States does, and 10 times as many to Latin Americans.

The Humphrey fellowship program, which brings professionals from developing countries to the United States for advanced training, would have been eliminated under the proposed cuts. ICA's international visitor program would have been terminated for 75 countries. This valuable program has brought thousands of journalists, labor and political leaders, and other opinion shapers from foreign countries to the United States, including 33 current heads of state.

The proposed cuts would have had a profoundly negative effect on American interests. Curtailing international exchanges would have hampered our ability to represent American values abroad and to project a positive vision of our country's ideals. I might add that the importance of fostering a better image of the United States has been underlined by several recent events: Violence directed against U.S. diplomats abroad and manifestations of anti-American sentiment in Western Europe. At a time when U.S. capacity to influence global affairs is perceived as declining, we cannot afford to break off international exchanges with friends and allies. Rolling back these programs would have symbolized an American retreat from our commitment to the promotion of better international understanding and it would have abandoned the field to the Soviet Union, with its expanding budget for such purposes already four times the U.S. program.

I understand that ICA decided to concentrate the budget cuts on educational and cultural programs because these programs were less staff intensive and therefore might be rebuilt faster than other operations. However, the impact of these reductions would actually have been much greater than the sums cut from the budget. For instance, if funds for academic programs were cut as proposed, annual host-country contributions of $9 million and private-sector support of over $3 million would have fallen off sharply.

The international vistors network of 750,000 volunteer, private "citizen diplomats" would have begun to disintegrate, and many private agencies which are affiliated with ICA programs would have

been forced to close. Grants providing seed money to nonprofit organizations, estimated to have a five to tenfold effect in attracting private support, would have been eliminated. In short, the effective mobilization of private resources and private enterprise by a Government agency would have been derailed.

Cutting back these programs would have directly reduced the awareness among foreign leaders of American perspectives. ICA's educational programs, by insuring that U.S. training is accessible to all, has shaped the general climate of public opinion and attitudes toward the United States in foreign countries. These exchanges have also strengthened training in international affairs on U.S. campuses, ultimately reducing the likelihood that the United States will be caught off guard by developments abroad.

Mr. President, I am most pleased to see the Senate protect these extremely important programs, which I have supported in the past and intend to support in the future.●

● Mr. CHILES. Mr. President, I wish to enter into a brief colloquy with Senator WEICKER and Senator HOLLINGS concerning a matter that I hope can be addressed in the conference report on this bill.

The Departments of State and Justice have a joint responsibility to negotiate agreements with foreign nations to facilitate improved law enforcement cooperation. The need for such cooperation has taken on a much greater urgency with the tremendous upsurge in the use of foreign banking institutions to hide the fruits of major crimes and thus frustrate U.S. law enforcement efforts. This has been particularly the case with the huge profits derived from large scale drug trafficking operations.

Often it is impossible to obtain legally admissible evidence of known cases of illegal funds overseas because international cooperation in law enforcement has not kept pace with the increasingly sophisticated methods of major criminals. While accurate estimates are not available, the amount of U.S. moneys booked and/or flowing through offshore banks which are serving illegal purposes —tax evasion, laundering, fraud, and organized crime operations—certainly involves many billions of dollars.

Cooperation between the United States and Switzerland under the 1977 Treaty on Mutual Assistance on Criminal Matters has virtually eliminated any difficulty in obtaining necessary evidence of illegal funds secreted in Swiss financial institutions. However, a major portion of the offshore banking of illicit funds is no longer in Switzerland. The Bahamas, Cayman Islands, Mexico, Panama, and other countries with offshore banking operations are increasingly used as financial havens by criminal elements. Until agreements are concluded with all these countries, the flow of illegal profits will continue to be a serious law enforcement problem.

It is imperative that our law enforcement officials be able to move against the assets of drug dealers and organized crime figures. No business, legal or illegal, can operate without capital. Wiping out the bank accounts of the drug merchants would be one of the most constructive actions we can take to put the drug smuggling rings out of commission.

I am concerned that the negotiations to conclude such treaties are not a high priority with either the State or Justice Department. A mutual assistance treaty with the Bahamas was drafted in 1977 but has not progressed beyond the draft stage. It is of critical importance to law enforcement that the Bahamian treaty be successfully negotiated and that work begin immediately to negotiate treaties with the United Kingdom, because of the problems in the Cayman Islands, as well as with Mexico, Panama, and other countries commonly used as financial havens by large-scale narcotics traffickers. Until agreements are concluded, the tide of illegal profits flowing to these countries will continue to thwart the efforts of law enforcement authorities.

On a number of fronts, Congress is expressing its strong interest in improving and helping our law enforcement effort. I believe Congress should express itself on the matter of these treaty negotiations and insist upon a more aggressive effort by the two Departments. The State, Justice, and Commerce appropriations bill affords us an excellent opportunity to make that expression.

I want to request of the floor managers that an effort be made to include in the conference report a statement directing the Departments of State and Justice to move expeditiously to conduct negotiations to conclude agreements to secure the cooperation of the law enforcement authorities of foreign countries in order to effectively deprive domestic criminals of the use of foreign havens for the proceeds of their crimes. I would further request that the Departments be required to report to both the House and Senate Appropriations Committee on a regular basis as to the progress being made to comply with this directive.

Mr. WEICKER. I appreciate the concerns expressed by the Senator from Florida regarding the responsibility of the Departments of State and Justice to pursue negotiations with foreign nations regarding improved law enforcement cooperation. During our subcommittee hearings with the Drug Enforcement Administration officials, we discussed efforts to conclude treaties which would permit our law enforcement officials to move against the assets of drug dealers.

I can assure my colleague that, in conference with the House, I will raise these issues for possible inclusion in the Statement of Managers.

Mr. INOUYE. The minority has no objection. I commend Senator CHILES for bringing it to our attention and Senator WEICKER for his willingness to raise the matter in conference.●

● Mr. SPECTER. Mr. President, I would like to ask two questions of the distinguished chairman of the subcommittee. The House bill contains $81.706 million in salaries and expenses for the Securities and Exchange Commission. The Senate committee recommendation is for $84 million. The Commission has informed employees of the Philadelphia Branch Office and the Washington Regional Office, which includes Pennsylvania, Virginia, West Virginia, Maryland, and Delaware, that these offices will be terminated as a result of the President's proposed 12½-percent reduction in this account. Does this bill contain the President's proposed 12½-percent reduction for the Securities and Exchange Commission's salaries and expenses account?

Mr. WEICKER. No. The bill provides $84 million for salaries and expenses for the Securities and Exchange Commission.

Mr. SPECTER. Would this appropriation require closing of the Washington Regional Office and Philadelphia Branch Office?

Mr. WEICKER. No, it would not.●

EXPORT ADMINISTRATION AUTHORIZATION, 1982–83

The PRESIDING OFFICER. Under the previous order, the hour of 7:10 having arrived, the Senate will now resume consideration of S. 1112 which the clerk will state by title.

The legislative clerk read as follows:

A bill (S. 1112) to authorize appropriations for the fiscal years 1982 and 1983 to carry out the purposes of the Export Administration Act of 1979, and for other purposes.

The Senate resumed consideration of S. 1112.

AMENDMENT NO. 624

The PRESIDING OFFICER. Who yields time?

Mr. HEINZ. Mr. President, I suggest the absence of a quorum and ask unanimous consent that the time be charged equally to both sides.

The PRESIDING OFFICER. Without objection it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, under the rule, as I understand it, at the hour of 7:30 p.m., it will be in order for either the Senator from Illinois (Mr. PERCY) or the Senator from Illinois (Mr. DIXON) to offer a perfecting amendment. Under the rule, this does not in and of itself preclude any other amendments being offered. I wanted to propound a parliamentary inquiry if, the hour of 7:30 having arrived, it would now be in order for Senator PERCY or Senator DIXON to offer an amendment?

The PRESIDING OFFICER. There remain 2 more minutes to be disposed of. Then that would be appropriate.

Mr. HEINZ. Mr. President, as I understand the Percy-Dixon amendment, it essentially will change the date in the current Dixon-Percy amendment, making the effective date January of 1985. If my good friend from Illinois (Mr. PERCY) would respond——

Mr. PROXMIRE. Mr. President, if the Senator will yield on that, the Senator's amendment is very clear but we have only a couple of minutes. I would have to oppose that amendment, although I do not expect to have a rollcall vote on

it. The reason I oppose it is I think it ought to apply to every President of the United States. I do not think we should exempt the present President until near the end of his term. I just want to be on record on that.

Mr. PERCY. The Senator will not ask for a rollcall vote?

Mr. PROXMIRE. I shall not ask for a rollcall vote.

Mr. HEINZ. Mr. President, I shall not ask for a rollcall vote on it, either. I am disposed, not because I support the original Percy amendment—I do not—but because I think it will perfect and improve the Percy amendment and because it will not, for the next 4 years, bind this President's hand, I am prepared to accept it.

Mr. METZENBAUM and Mr. BOSCHWITZ addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. PERCY. Mr. President, I have not yet offered the amendment.

The PRESIDING OFFICER. All time has expired. The question is on agreeing to the amendment numbered 624

Mr. PERCY. We have not offered the amendment yet.

The PRESIDING OFFICER. An amendment is pending.

Mr. PERCY. Mr. President, I ask unanimous consent to be able to offer the amendment with the date change in it so that we can know that we are voting on something we have agreed to.

The PRESIDING OFFICER. The Senator has a right to offer a second-degree amendment.

UP AMENDMENT NO. 617

(Purpose: To amend the Export Administration Act of 1979)

Mr. PERCY. This amendment is in the second degree, Mr. President. It simply adds an effective date of January 1, 1985.

Mr. President, I send to the desk the perfecting amendment.

The PRESIDING OFFICER. The clerk will state the amendment.

The bill clerk read as follows:

The Senator from Illinois (Mr. PERCY) for himself, Mr. DIXON, Mr. DOLE, Mr. PRESSLER, Mr. BAUCUS, Mr. ROTH, Mr. JEPSEN, and Mr. GRASSLEY, proposes an unprinted amendment numbered 617 to amendment numbered 624.

Mr. PERCY. I ask unanimous consent that the reading of the amendment be disposed of.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language proposed to be inserted, insert the following:

SEC. . (a) Section 5 of the Export Administration Act of 1979 (50 U.S.C. App. 2404) is amended by adding at the end thereof the following:

"(m) Exclusion for agricultural commodities.—This section does not authorize export controls on agricultural commodities, including fats and oils or animals hides or skins.".

(b)(1) Section 6 of such Act (550 U.S.C. App. 2405) is amended by adding at the end thereof the following:

"(1) Agricultural commodities.—(1) If the authority conferred by this section is exercised to prohibit or curtail the export of any agricultural commodity to carry out the policy set forth in subparagraph (B) of paragraph (2) of section 3 of this Act, other than in connection with the prohibition or curtailment of all exports, the President shall immediately report such prohibition or curtailment to the Congress, setting forth the reasons therefor in detail and specifying the length of time the prohibition or curtailment is proposed to remain in effect.

"(2)(A) If the Congress, within 60 days after the date of its receipt of such report, adopts a joint resolution approving such prohibition or curtailment pursuant to paragraph (3), then such prohibition or curtailment shall remain in enect for the period specified in the report, for one year after the close of the 60-day period, or until terminated by the President, whichever occurs first.

"(B) If the Congress, within 60 days after the date of its receipt of such report, fails to adopt a joint resolution approving such prohibition or curtailment pursuant to paragraph (3), then such prohibition or curtailment shall cease to be effective upon the expiration of such 60-day period.

"(3)(A) For purposes of this paragraph, the term 'resolution' means only a joint resolution the matter after the resolving clause of which is as follows: 'That, pursuant to section 6(1) of the Export Administration Act of 1979, the Congress approves the exercise of the authority conferred by section 6 of such Act as reported by the President to the Congress on .', with the blank space being filled with the appropriate date.

"(B) On the day on which a report is submitted to the House of Representatives and the Senate under paragraph (1), a resolution with respect to such report shall be introduced (by request) in the House by the majority leader of the House, for himself and the minority leader of the House, or by Members of the House designated by the majority leader and minority leader of the House; and shall be introduced (by request) in the Senate by the majority leader of the Senate, for himself and the minority leader of the Senate, or by Members of the Senate designated by the majority leader and minority leader of the Senate. If either House is not in session on the day on which such a report is submitted, the resolution shall be introduced in that House, as provided in the preceding sentence, on the first day thereafter on which that House is in session.

"(C) All resolutions introduced in the House of Representatives shall be referred to the Committee on Foreign Affairs and all resolutions introduced in the Senate shall be referred to the Committee on Banking, Housing, and Urban Affairs.

"(D) If the committee of either House to which a resolution has been referred has not reported it at the end of 30 days after its introduction the committee shall be discharged from further consideration of the resolution or of any other resolution introduced with respect to the same matter.

"(E)(i) A motion in the House of Representatives to proceed to the consideration of a resolution shall be highly privileged and not debatable. An amendment to the motion shall not be in order, nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(ii) Debate in the House of Representatives on a resolution shall be limited to not more than 20 hours, which shall be divided equally between those favoring and those opposing the resolution. A motion further to limit debate shall not be debatable. No amendment to, or motion to recommit, the resolution shall be in order. It shall not be in order to move to reconsider the vote by which a resolution is agreed to or disagreed to.

"(iii) Motions to postpone, made in the House of Representatives with respect to the consideration of a resolution, and motions to proceed to the consideratoin of other buisness shall be decided without debate.

"(iv) All appeals from the decisions of the Chair relating to the application of the Rules of the House of Representatives to the procedure relating to a resolution shall be decided without debate.

"(v) Except to the extent specifically provided in the preceding provisions of this subparagraph, consideration of a resolution in the House of Representatives shall be governed by the Rules of the House of Representatives applicable to other resolutions in similar circumstances.

"(F)(i) A motion in the Senate to proceed to the consideration of a resolution shall be privileged. An amendment to the motion shall not be in order, nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(ii) Debate in the Senate on a resolution, and all debatable motions and appeals in connection therewith, shall be limited to not more than 20 hours, to be equally divided between, and controlled by, the majority leader and the minority leader or their designees.

"(iii) Debate in the Senate on any debatable motion or appeal in connection with a resolution shall be limited to not more than 1 hour, to be equally divided between, and controlled by, the mover and the manager of the resolution, except that in the event the manager of the resolution is in favor of any such motion or appeal, the time in opposition thereto shall be controlled by the minority leader or his designee. Such leaders, or either of them, may, from time under their control on the passage of a resolution, allot additional time to any Senator during the consideration of any debatable motion or appeal.

"(iv) A motion in the Senate to further limit debate on a resolution, debatable motion, or appeal is not debatable. No amendment to, or motion to recommit, a resolution is in order in the Senate.

"(G) In the case of a resolution described in subparagraph (A), if prior to the passage by one House of a resolution of that House, that House receives a resolution with respect to the same matter from the other House, then—

"(i) the procedure in that House shall be the same as if no resolution had been received from the other House; but

"(ii) the vote on final passage shall be on the resolution of the other House.".

(2) Section 7(g)(3) of such Act (50 U.S.C. App. 2406(g)(3)) is amended by adding at the end thereof the following new sentence: "This paragraph does not apply to the prohibition or curtailment of the export of any agricultural commodity pursuant to section 6(1).".

(C) The amendments made by this section shall take effect on January 21, 1985.

Mr. PERCY. Mr. President, as Senator HEINZ has explained, this amendment simply makes the date to be effective January 1, 1985. I am ready for a voice vote on this amendment.

Mr. BOSCHWITZ. Will the Senator yield?

Mr. PERCY. Yes, I yield, Mr. President.

Mr. BOSCHWITZ. Mr. President, I also want to express my opposition to the amendment. I join in the remarks of the Senator from Wisconsin.

Mr. HEINZ. Mr. President, I am prepared to yield back the remainder of my time.

Mr. PROXMIRE. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment (UP No. 617) was agreed to.

Mr. HEINZ. I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

● Mr. GRASSLEY. Mr. President, I am pleased to join my colleagues from Illinois in cosponsoring this amendment which would require congressional approval before any selective embargo of agricultural exports could be imposed. My position on embargoes that single out one sector of our Nation's economy has long been known—if an embargo is warranted, it should be imposed to all products exported to the particular country or countries at which the embargo is directed.

I hope that our colleagues will join us in supporting this amendment. It is consistent with the will of the Senate as expressed in the embargo protection provisions included in S. 884, the 1981 farm bill. This amendment will give us additional protection against another unfortunate agricultural embargo such as we recently experienced which cost our farmers dearly, but did nothing to harm the Soviet Union. I strongly urge my colleagues to support this fine amendment.●

● Mr. GORTON. Mr. President, I rise to speak in favor of the amendment offered by the Senators from Illinois. There have been reasoned arguments made on both sides of this issue. But I must conclude that the small intrusion on the foreign policy powers of the President contemplated by this amendment cannot outweigh the right of the farmers of this country to be free from carrying the entire burden of U.S. foreign policy. The terms of the amendment are fair.

If the President acts in such a way so as not to single out agriculture to effectuate foreign policy objectives, the Congress plays no role in the process. If, however, the President singles out agriculture this amendment allows, after a reasonable time, for the review of the action by Congress. I think the farmers of this country are entitled to have this body review that decision. I urge my fellow Senators to support this amendment.●

Mr. PERCY. Mr. President, in just a moment, the Senate will vote on the amendment offered by myself and my distinguished colleague from Illinois, Senator ALAN DIXON, to the Export Administration Act. Stated very simply, our amendment changes existing law in one important aspect. It requires that effective January 1, 1985, and thereafter, in the event the executive branch finds it necessary to embargo agricultural products for foreign policy or national security reasons in less than an across-the-board manner, the affirmative approval of the Congress would be required.

Mr. President, this legislation does not hinder or constrain the flexibility of the President. There is adequate precedent for requiring congressional involvement of this kind. I would disagree strongly with anyone in this body who would suggest that we need the kind of Presidential flexibility we had 2 years ago, when the agricultural community of this Nation was singled out to bear the full brunt of our foreign policy actions in response to the invasion of Afghanistan. I have every reason to believe the current President when he states that he would not repeat the previous action. While I hope the current occupant of the White House is there for another 7 years, we cannot be assured that his successor will feel the same way about selective agricultural embargoes. This amendment allows for Presidential flexibility, but at the same time involves the Congress in a decision of this magnitude. I urge my colleagues to support the amendment.

Mr. President, I express my deep gratitude to the floor managers of the bill for the way this was handled and particularly to my colleague (Mr. DIXON) for the leadership he has provided in this area. We are responding to an urgent need throughout the agricultural community and I pay particular tribute to the way he and his staff have worked intimately with us and with agricultural organizations.

Mr. President, I ask unanimous consent that a letter of support for this amendment be printed in the RECORD at this point that we have received from the American Farm Bureau.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

AMERICAN FARM BUREAU FEDERATION,
Washington, D.C., November 12, 1981.

Hon. CHARLES H. PERCY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR PERCY: The American Farm Bureau Federation communicated to all Members of the Senate on November 9, indicating our support for the Percy/Dixon amendment to the Export Administration Act. As you are aware, consideration of that amendment was delayed until today, Thursday, November 12, 1981.

Farm Bureau reiterates its support for that amendment, which would require Congressional approval for selective embargoes on farm exports if imposed by the President. We believe this action is necessary, based on recent history of ill-advised embargoes.

We are aware that the House/Senate Conference Committee considering S. 884, the Food and Agriculture Act of 1981, has under discussion proposals dealing with compensation to farmers for embargoes on agricultural exports. We believe action on that matter is also important and necessary to help relieve the impact of embargoes on producers. However, we believe the Percy/Dixon amendment to the Export Administration Act will complement rigid language under consideration by the farm bill conference committee to ensure that any future embargo will be carefully considered before imposition.

Sincerely,

ROBERT B. DELANO,
President.

Mr. DOLE. Will the Senator from Illinois yield?

Mr. PERCY. I am happy to yield.

Mr. DOLE. May the Senator from Kansas be joined as a cosponsor of the amendment?

Mr. PERCY. I understood the Senator from Kansas is a cosponsor of the amendment.

Mr. President, I do ask unanimous consent that Senator DOLE of Kansas be added as a cosponsor to the amendment if he is not already.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question now is on agreeing to the first-degree amendment as amended. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Missouri (Mr. DANFORTH), the Senator from North Carolina (Mr. EAST), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), and the Senator from Oregon (Mr. PACKWOOD), are necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina (Mr. EAST) would vote "yea."

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Michigan (Mr. LEVIN), the Senator from Louisiana (Mr. LONG), the Senator from Montana (Mr. MELCHER), and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I further announce that, if present and voting, the Senator from Montana (Mr. MELCHER) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 66 nays 20, as follows:

[Rollcall Vote No. 367 Leg.]

YEAS—66

Abdnor	Garn	Percy
Andrews	Gorton	Pressler
Armstrong	Grassley	Pryor
Baker	Hatch	Quayle
Baucus	Hawkins	Randolph
Bentsen	Heinz	Riegle
Biden	Helms	Roth
Boren	Hollings	Rudman
Bumpers	Inouye	Sarbanes
Burdick	Jackson	Sasser
Byrd, Robert C.	Johnston	Schmitt
Cochran	Kassebaum	Simpson

NOT VOTING—14

Cannon	Hart	Long
Danforth	Hayakawa	Melcher
East	Huddleston	Moynihan
Glenn	Leahy	Packwood
Goldwater	Levin	

So the amendment (UP No. 624), amended, was agreed to.

AMENDMENT NO. 628

The PRESIDING OFFICER. The next amendment will be stated.

The bill clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) proposes a printed amendment numbered 628.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place add the following:

SEC. . Notwithstanding any other provision of law, a suspension of or restriction on all exports from the United States to the Union of Soviet Socialist Republics shall be imposed if the Union of Soviet Socialist Republics, or its allies, engages in direct military action against Poland, including but not limited to an armed invasion.

SEC. . Such suspension or restriction of all exports from the United States to the Soviet Union shall be imposed unless the President certifies to the Congress within thirty days of direct Soviet military intervention in Poland that the suspension is not in the national security and foreign policy interests of the United States.

(The names of Mr. JACKSON and Mr. MOYNIHAN were added as cosponsors of the amendment.)

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I may modify my amendment so as to make the second part of that amendment consistent with the first part.

The second section of my amendment dealing with the Presidential certification should also include direct military intervention in Poland by the Soviet Union or its allies.

In the amendment as written it does not contain that language, and that was the intent of the language as was expressed in the first section.

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia?

Mr. HEINZ. Mr. President, reserving the right to object, as I understand the language the Senator proposes to insert after the word "Soviet Union," the word "the Warsaw Pact"?

Mr. ROBERT C. BYRD. Line 10 of the printed amendment, amendment No. 628, reads as follows:

. . . days of direct Soviet military intervention in Poland that the . . .

I would change it to read:

. . . days of direct military intervention in Poland by the Soviet Union or its allies that the . . .

In other words, the amendment as printed does not make reference to the allies.

Mr. HEINZ. Mr. President, I shall not object.

Mr. ROBERT C. BYRD. I thank the distinguished Senator.

The PRESIDING OFFICER. Without objection, the amendment is so modified.

Mr. ROBERT C. BYRD. Mr. President, I send the modification to the desk.

The modified amendment is as follows:

At the appropriate place add the following:

SEC. . Notwithstanding any other provision of law, a suspension of or restriction on all exports from the United States to the Union of Soviet Socialist Republics shall be imposed if the Union of Soviet Socialist Republics, or its allies, engages in direct military action against Poland, including but not limited to an armed invasion.

SEC. . Such suspension or restriction of all exports from the United States to the Soviet Union shall be imposed unless the President certifies to the Congress within thirty days of direct military intervention in Poland by the Soviet Union or its allies that the suspension is not in the national security and foreign policy interests of the United States.

Mr. ROBERT C. BYRD. Mr. President, my amendment requires that a comprehensive trade ban be imposed on the Soviet Union if that country, or its allies, takes direct military action against Poland.

We live in a period of history in which terrorist attacks are nearly commonplace, undeclared wars flare up and fester all over the globe, and some nations engage in brutal aggression at will, with little fear of retribution.

Afghanistan was one clear example of blatant and brutal aggression. Poland must not be another.

My amendment is clearly in line with administration policy as articulated by Secretary of State Alexander Haig in the aftermath of the administration's decision to lift the grain embargo imposed by President Carter following the Soviet invasion of Afghanistan. In a story appearing in the Washington Post on April 25, the Secretary stated that the administration would impose not only a new grain embargo, but an across-the-board ban on trade with the Soviets, should they invade Poland.

So my amendment makes automatic such an embargo if the Soviets or their allies should invade Poland.

I also recognize that the President requires flexibility in making foreign policy determinations of this importance. Therefore, I have so structured my amendment to insure that Presidential flexibility is maintained. A trade ban will not be implemented if, within 30 days after an invasion of Poland, the President certifies to Congress that such a suspension of trade would not be in the national security or foreign policy interests of the United States.

Why do I offer this amendment? I think it is imperative that we send a strong signal to friend and foe alike that Congress stands behind the administration's publicly stated policy regarding Poland. I think it strengthens the President's hand if Congress sends this signal abroad.

During his confirmation hearings before the Senate Foreign Relations Committee, Secretary Haig stated that the basic ingredients of a successful foreign policy include consistency, reliability, and balance. With respect to consistency, the Secretary stated:

An effective policy cannot be created anew daily, informed solely by immediate need. To do so risks misperception by our adversaries, loss of confidence by our allies, and confusion among our own people.

I could not agree more with the Secretary's criteria for the conduct of our foreign policy. That is why I expressed concern on Tuesday of this week when I introduced my amendment that our policy with respect to the Soviet Union has been marked by inconsistency. I cited the following:

The lifting of the grain embargo imposed by President Carter following the Soviet invasion of Afghanistan. The Soviets are still in Afghanistan.

The announcement that while we would provide grain to the Soviet Union we would not provide butter. We turned around and made a major butter sale to New Zealand which, in turn, can sell the butter to a third country which would not be precluded from selling it to the Soviet Union.

The new grain agreement with the Soviet Union, which will allow them to purchase 23 million tons of grain during the sixth year of the long-term grain agreement which we have with them.

I also cited the warnings we have issued our European allies that purchases of Soviet natural gas could allow the Soviet Union to exercise an unhealthy influence over Western economies. I think this latter issue deserves greater attention, and I urge my colleagues to read an item from the November 9 New York Times entitled: "Europe-United States Energy Rift."

Written by Clyde Farnsworth, the article noted:

The United States is getting a polite rebuff from Western Europe on the energy alternatives it is offering in last ditch efforts to dissuade the Europeans from increasing their reliance on Soviet natural gas.

However, Mr. Farnsworth pointed out the inconsistency of our warnings to the Europeans when he noted:

Even while the United States has lobbied hard against the project, the Commerce Department has quietly issued export licenses to the Caterpillar Tractor Company for pipelaying equipment the Russians need to build the line. The Japanese would have gotten the business, had Caterpillar's bid been turned down.

I might point out that the Caterpillar deal was finalized after we had pressured the Japanese to refrain from selling the pipelayers to the Soviets for the same gas project.

Our concern for European reliance on Soviet natural gas has a hollow ring to it. One of the justifications for raising the grain embargo on the Soviet Union was that it was hurting our farmers more than it was hurting the Soviets.

It is estimated that the Soviet Union will be facing a 40-million-ton shortfall in grain production this year. And the future looks equally bleak for the rest of Soviet agriculture.

On the one hand, we worry about the Europeans becoming overly reliant upon the Soviet Union for natural gas supplies. Yet, on the other hand, are American farmers becoming overly reliant upon the Soviet market for grain exports? The Europeans certainly see this dichotomy in very clear terms.

Mr. President, in sum, I believe my amendment to be consistent with a firm and commonsense policy. It maintains Presidential flexibility. It sends the appropriate signal that Congress will support the administration's pledge for a

total trade ban if Poland is invaded. And this congressional signal will demonstrate that, on this issue, friend and foe alike can expect consistency and reliability in this aspect of our foreign policy.

Mr. President, I ask unanimous consent to have printed in the RECORD the following material: A letter dated November 12, 1981, addressed by me to the President; an article from the Washington Post of April 27, 1981, entitled "No 'Quid Pro Quo' Given M.S. for End of Grain Embargo"; an article entitled "For a Bushel of Grain," published in the Economist of May 2, 1981; and an article entitled "Reagan in Wonderland," published in the National Journal of May 9, 1981.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
OFFICE OF THE DEMOCRATIC LEADER,
Washington, D.C., November 12, 1981.

THE PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: This is to request your official view regarding my amendment to the Export Administration Act which would require the imposition of an across-the-board trade embargo on the Soviet Union in the event the Soviets or their allies invade Poland.

Attached is a copy of my proposed amendment which does provide for presidential flexibility regarding the imposition of such an embargo.

Thank you for your kind attention to my request.

Sincerely,

ROBERT C. BYRD.

[From the Washington Post, Apr. 27, 1981]

NO "QUID PRO QUO" GIVEN U.S. FOR END OF GRAIN EMBARGO

(By Jane Seaberry)

The Reagan administration received no "quid pro quo" from the Soviet Union in return for lifting a partial embargo on U.S. grain exports, Commerce Secretary Malcolm Baldrige said yesterday, but he discounted the idea that the Soviets might read the decision as a sign of weakness.

"I think there is no mistake in our intentions vis-a-vis the Soviets," Baldrige said in an interview on "Issues and Answers" (ABC, WJLA), citing "hard signals, tough signals" from both the president and Secretary of State Alexander M. Haig Jr.

During the campaign, President Reagan frequently criticized the embargo, imposed in January, 1980, by former President Carter in retaliation for the Soviet invasion of Afghanistan, as being a disproportionately severe sacrifice for farmers. But it was not lifted until Friday, partly because Haig had persuaded the president that it would be inappropriate to lift the embargo while the possibility existed of Soviet intervention in Poland and that premature lifting of the embargo would be inconsistent with the administration's efforts to put across a hard line to Moscow.

That line has been put down, Baldrige indicated yesterday. Asked how he thought the Soviet Politburo would read the decision on the embargo, he said, "I would not take that as a signal of weakness in any way, shape or form. I would take it as a sense of security that this president feels strong enough to be able to do that and withstand . . . a minor amount of criticism."

Haig reportedly still thinks lifting the embargo is a mistake, and he told the Associated Press Saturday that the administration would impose an across-the-board ban on trade with the Soviet Union—including a new grain embargo—if the Soviets intervene in Poland.

"I think the most important thing we must prevent in the wake of lifting the embargo is the perception that it was exclusively the consequence of a perceived Soviet moderation in Poland," Haig said. He said it would be a mistake to "let Poland exclusively dominate our assessment of future relations with the Soviet Union and return to an attitude of normal if the situation in Poland is not aggravated."

Haig acknowledged that tensions in Poland had eased, but he warned the crisis is not past. He also said Reagan took into account "certain domestic considerations" in his decision to lift the embargo, noting "this farm bill and even his economic program could be in jeopardy on this issue."

But Baldrige dismissed the idea that domestic politics, in an effort to win support for the administration's economic recovery plan or its pending farm bill, played the major part in the decision. "Political reasons in this town have to be considered, along with everything else, but that was far away from the major reason," he said.

Baldrige said Reagan decided to end the embargo because "it was not his embargo in the first place. . . . It was Jimmy Carter's embargo."

Baldrige said the President never said he would lift the embargo if he received some concession from the Soviets, nor did the administration receive any private assurances from the Soviets regarding the situation in Poland.

"He's never stated it would take a quid pro quo," Baldrige said. "The fact is he didn't think it was an effective enough tool, a kind of retribution against a move in Afghanistan when it was first imposed.

"The question is to send the right kind of signal to the Russians so there's no mistake about our policy and our intentions, so they understand that," Baldrige said. "Once that's done, and it's been done in the last three months, there's no real reason to keep that embargo on."

Meanwhile, Treasury Secretary Donald T. Regan told reporters yesterday that the administration didn't lift a high-technology embargo against the Soviets, imposed shortly after the grain embargo, because high-technology goods have defense and political overtones.

[From the Economist, May 2, 1981]

FOR A BUSHEL OF GRAIN

(President Reagan makes himself look a bit of a Carter.)

President Reagan's decision to end the grain embargo imposed on the Soviet Union after the invasion of Afghanistan has sacrificed his principle of firm government to his promise of less government. As presidential hopeful, Mr. Reagan dubbed the embargo ineffective and discriminatory. His promise to lift it won votes in America's farm belt. By redeeming that election pledge, he has helped himself to win the friends he needs to steer his economic package through Congress. But the grain embargo was a weapon of foreign policy, not domestic policy. The decision to lift it now is both ill-judged and ill-timed.

Ill-judged, above all, on a point of principle. President Carter imposed the grain embargo in January, 1980, to punish the Russians for their occupation of Afghanistan. He did not expect it to make them drop their weapons and run from Afghanistan; but he did mean it to impose a price. That distinction later got lost in the all-too-familiar muddle of Carterian thinking, but it is worth bearing in mind. By lifting the embargo President Reagan has diminished the penalty the still-occupying Russians have to pay.

What of its effect on the Soviet economy? Negligible, says Mr. Reagan. Not so. The embargo hit only those grain sales above the 8m tonnes to which the Americans are legally committed under their grain agreement with Russia. But last year that left the Russians with close to 12m tonnes to find in a hurry. True, the force of the American embargo was blunted when other countries—notably Argentina—bumped up their grain sales. But the message still got through.

Coinciding with two poor harvests in succession in the Soviet Union, the embargo obliged Russia's grainbuyers to scurry about the globe, grabbing grain where they could find it—and often at prices well above world market levels. And even their best efforts left Russia's farmers with 13 percent less feed grain this winter (only 110m tonnes, compared with 126m tonnes in 1979–80). Livestock that cannot be fed over the winter has to be slaughtered. Last year the shortage of meat and dairy products set off strikes in several large factories. Still proclaiming loudly that the embargo hurt the United States more than it hurt them, last week Russian officials were knocking on the door of the department of agriculture within hours of the president's decision.

And what of the embargo's effect on America's farmers? Much of the grain destined for Russia's silos last year was sold elsewhere. Government loans and direct grain purchases made up to the farmers for any loss of banned exports at the (more fairly shared) expense of the American taxpayer. President Reagan is no fan of government intervention, especially when it means spending Americans' tax dollars. Lifting the grain embargo appealed to his conservative, free-trading instincts. But a true conservative—and the president of the United States at that—should not balk at the kind of government intervention which upholds America's interests abroad. By bending the principles of his foreign policy to the dictates of the farm lobby, President Reagan has exposed an Achilles heel for all to see.

REMEMBER LINKAGE?

When he came to power, a stern President Reagan warned the Russians that in future only their own good behavior around the globe would earn them the fruits of detente and arms control. But as any stern parent knows, jellybean diplomacy works only if it is consistently applied. In January, Mr. Reagan—rightly—decided that the grain embargo should remain. To lift it, he said, would send the wrong signal to the Russians.

Nothing else has changed, except that good weather and low demand suggest that America may have a bigger grain surplus this year. Casting about for a convenient figleaf, White House spokesmen are mumbling hopeful-sounding phrases about the easing of tensions in Poland. But the embargo was a response to the actual Soviet occupation of Afghanistan, not the feared occupation of Poland. And although President Brezhnev might wish he could share America's optimism, his Polish crisis is deepening, not easing. The American secretary of state, Mr. Haig, insists that a trade embargo would be imposed "across the board" if the Russians move against Poland. But for how long next time? The wrong signal Mr. Reagan was worrying about has got through. Mr. Brezhnev may wager on surviving the next storm of disapproval from the White House.

Dismantling the grain embargo also sets a bad example for America's allies. How does President Reagan hope to dissuade energy-hungry west Europeans from selling their pipes for Soviet gas, or discourage American, west European and Japanese industrialists from selling their high technology to the Russians, if he bows so easily to the demands of his own farmers? When Mr. Carter imposed the embargo, he was accused of shooting off America's toe to show his feel-

ings about Afghanistan. By dropping the embargo, President Reagan has shot a bit off the claim to consistency which he wants to make a hallmark of his presidency.

[From the National Journal, May 9, 1981]

REAGAN IN WONDERLAND

(By Michael R. Gordon)

To hear Administration officials tell it, the United States has a new weapon in its diplomatic arsenal: the grain embargo. Even though the embargo, imposed after the Soviet invasion of Afghanistan, was a flop and was lifted without any concessions on Moscow's part, the threat of future trade bans may deter the Soviet Union from invading Poland. Or so the Administration's line seems to go.

This may appear to be an unfair parody of recent Administration foreign policy. But a quick review of the history of the grain embargo shows that the Administration's evolving policy on the ban has a definite Lewis Carroll flavor that is bound to confuse even those inured to the zigs and zags of Carter Administration policy making.

The story starts in the midst of last year's presidential campaign, when candidate Ronald Reagan promised farmers that as President, he would put an end to the partial ban on grain sales imposed by President Carter on Jan. 4, 1980. Following the Soviet invasion of Afghanistan, Carter had stipulated that the United States would not sell the Soviet Union any more grain than the eight million tons guaranteed on an annual basis under a five-year U.S.-Soviet grain agreement. The ban also applied to shipments of phosphate fertilizers and soybeans. With an eye on the farm vote, Reagan declared that "Jimmy Carter's grain embargo, which has hobbled American farmers for months now, has had virtually no impact on the Soviet Union."

The scene then shifted to the White House soon after Reagan's inauguration. By that time, however, there was precious little evidence that American farmers were being hurt by the embargo. Drought in the Midwest had pushed up the price of corn, and U.S. farmers had found new markets, including some abandoned by Argentina as it aggressively marketed its grain—at inflated prices—to the Soviet Union. The Agriculture Department issued several reports showing that despite the embargo, U.S. grain exports were running at record levels and that the United States exported a record $40.5 billion in agricultural goods in fiscal 1980.

At the same time, reports persisted that the grain embargo was having a modest impact on the Soviet Union. Though Agriculture Department statistics showed that the Soviet Union was in the process of importing a record 34.5 million metric tons of grain in the marketing year ending June 30, the Soviets unexpectedly suffered a second bad harvest. Meat production was down slightly and reports of demonstrations in several Soviet cities and in Estonia filtered back to the West. Some Soviet experts cited reduced Soviet exports to Eastern European nations, including Poland.

Faced with these facts and with the growing Soviet threat to Poland, Reagan ordered a "review" of the embargo in January. On Feb. 17, Sen. Nancy Landon Kassebaum, R-Kans., reported that Reagan, in a meeting with Members of Congress, said that if the embargo were "gratuitously lifted, without some quid pro quo from the Russians, it would be sending a signal to our allies that we were softening our stand against Soviet action." This line was echoed by Commerce Secretary Malcolm Baldrige, who in an April 18 interview stated that the United States would lift the embargo only in a "quid pro quo" deal that involved assurances that Moscow would not invade Poland.

In spite of this tough talk, Reagan less than a week later ordered the embargo lifted without receiving any apparent Soviet assurances. In an effort to deflect any suggestion that the action represents a softening of the U.S. stance toward Moscow, some Administration officials stressed the influence of domestic political "considerations." In an aboutface, Baldrige insisted that lifting the embargo involved no quid pro quo. In an interview with the Associated Press, Secretary of State Alexander M. Haig, Jr. argued that if Reagan had not repealed the embargo, "his farm bill and even his economic program could be in jeopardy. . . ."

Then, to ensure that the United States was not sending the wrong "signal," Haig warned that it would reimpose the embargo as part of a more comprehensive trade ban if the Soviets invaded Poland.

Reconciling foreign and domestic policies is understandably often a difficult task. But the Administration's handling of the grain embargo is a history of lost opportunities, according to some Soviet specialists. The Administration's need to assail the Soviet Union publicly canceled out any gains that may have flowed from using the repeal of the grain embargo as an instrument of rapprochement—a device to initiate discussions about the future of Afghanistan or arms control.

Unable to use the lifting of the embargo as a carrot, the Administration has all but thrown away the stick. Its strategy of advertising that it is yielding to domestic pressure on the one hand and threatening to reimpose the ban on the other can only be characterized as self-defeating. If the United States seeks in the midst of some future crisis to rally its allies to impose trade sanctions against the Soviet Union, the erratic application of the recent U.S. grain embargo may give them pause—and so the Soviets may reason.

By unilaterally lifting the embargo, Reagan has also eliminated one of the few features of his Soviet policy that seemed to unite conservatives and liberals. For hardliners, the embargo was just one more means of punishing Soviet expansionism. For detente-minded moderates, it represented a way to counter Soviet aggression short of intervention in the Third World or a nuclear arms race.

The history of trade sanctions against the Soviet Union and developing nations such as Iran is a mixed one, at best. And the Administration may well be right that as a practical matter, the embargo had only a marginal effect on the Soviet Union and had outlived its usefulness. But symbols are the stuff of which much of the Administration's Soviet policy is made, and its easy dispatch of the grain embargo must cause many to wonder about how steady a course the Administration will steer in its dealings with Moscow.

Mr. ROBERT C. BYRD. Mr. President, I reserve the remainder of my time.

Mr. HEINZ. Mr. President, I suggest the absence of a quorum.

Mr. METZENBAUM. Mr. President, will the Senator withhold?

Mr. HEINZ. I yield 2 minutes to the Senator from Ohio.

The PRESIDING OFFICER (Mr. ARMSTRONG). The Senator from Ohio is recognized.

Mr. METZENBAUM. I thank the Senator from Pennsylvania.

I rise to indicate that I had intended originallly to offer an amendment in the second degree to the amendment offered by the distinguished Senator from West Virginia. My amendment in the second degree would have provided a 9-month moratorium on acquisitions by major international energy companies of the smaller oil companies of this country. It would have been a ban with respect to Exxon, Mobil, Texaco, Gulf, Shell, Standard of California, Standard of Indiana, Sohio, and BP.

As a matter of fact, as I thought about it, it occurred to me that it probably would be inappropriate to offer it as an amendment to this very important amendment offered by the Senator from West Virginia. It has to do with a subject totally different from the subject of the amendment.

The facts are that there will be, as I see it, some time, several days at least, in which there ought to be an opportunity for me to offer the amendment at a later point.

I am happy to say the distinguished Senator from Washington (Mr. GORTON) has indicated strong interest as well as support for the concept of providing a ban on this type of acquisition. Senator KENNEDY from Massachusetts has indiindicated his support for the concept.

I do not think it would be in the right vein with respect to the spirit and effort of the distinguished Senator from West Virginia to attack such an amendment at this point.

I, therefore, explain to the Senate and those Members who had indicated their interest in supporting this amendment why it will not be offered at the present time.

I thank the Senator from Pennsylvania and the Senator from West Virginia for yielding the time.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator from Ohio (Mr. METZENBAUM) for his consideration and understanding as so stated by him.

The PRESIDING OFFICER. Who yields time?

Mr. HEINZ. Mr. President, I rise in opposition to the Byrd amendment, and I know that my distinguished colleague from Illinois, Senator PERCY, the chairman of the Committee on Foreign Relations, will oppose it.

I oppose it for two reasons: First, I think regardless of the fact that should the Soviets in any way, shape, or form, with their allies, or with anyone else, move in some threatening way toward Poland, or into Poland, by military means, this country should take the strongest possible action.

What I object to in the amendment of the Senator from West Virginia is that this absolutely ties the President's hands. He has no flexibility unless he comes back to Congress; and, further, it is going to make it extraordinarily difficult for the President to negotiate something that would be even more effective than an American total embargo, and that is a multilateral embargo with our allies.

This amendment raises a very legitimate issue: the necessity for a clear and forceful U.S. response to a Soviet intervention in Poland. Unfortunately, in doing so, the amendment would weaken the ability of the United States to respond effectively.

The essence of successful foreign policy is flexibility. All nations maneuver to try to maximize their flexibility and re-

duce that of their opponents. Wars occur when states have lost their flexibility and have no other recourse.

With wisdom, the formers of the Constitution sought to build in flexibility into the U.S. system by placing primary responsibility for the conduct of foreign policy in the executive branch. The Congress was also given a role in the nature of providing advice and consent to the executive in the conduct of our foreign affairs. The need for flexibility has only heightened in today's fast-paced and complex world.

The proposed amendment encroaches upon the spirit of that constitutional mandate given to the President and reduces his flexibility by legislatively prescribing specific options in the event of certain eventualities. The exact eventualities can never be precisely foreseen, so it would be unwise to lock the United States into a specific action in advance of an act all of the details of which cannot possibly be foreknown.

The amendment would require a total response even in the event of a limited Soviet intervention. What form would a Soviet intervention take? Who would be involved? What would be the conditions? What would be the costs and benefits of any given policy in those specific circumstances?

Most important is the effect of this amendment on our NATO relationship, which is already suffering from some difficult strains.

NATO is the body that has been specifically established to coordinate allied responses to Soviet actions in Europe. A Soviet intervention in Poland would have a great impact upon NATO, yet the Byrd amendment would already lock the United States into a position without even involving the NATO framework. As we have painfully learned recently, no embargo is going to be successful without the cooperation and participation of our allies, not only in the implementation of a policy but also in its actual planning. The Byrd amendment would have us step on the toes of our allies just at the moment when we would most need their cooperation. It would show U.S. distrust of NATO in the very hour of its severe testing.

There has been worked out with our NATO allies a carefully calibrated set of responses in the event of Soviet intervention in Poland. Should we now disregard those plans by legislative fiat? We would thereby tie our own hands while weakening any possible allied response. In the guise of support, we would have done a severe disservice to the Polish people, as well as to the people of all Europe.

Mr. President, I ask unanimous consent that a letter from Secretary of State Alexander M. Haig, Jr., to Senator BAKER, dated November 12, 1981, be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

THE SECRETARY OF STATE,
Washington, November 12, 1981.

Hon. HOWARD A. BAKER, Jr.,
U.S. Senate.

DEAR SENATOR BAKER: Senator Robert Byrd has proposed an amendment to S. 1112, the Export Administration Act, which would impose a total U.S. embargo on exports to the Soviet Union in response to "direct military action" by the USSR or its allies against Poland. The Department of State strongly opposes this amendment.

The Byrd amendment would commit the U.S. to unilateral action in response to Soviet action without provision for consultation with our allies or possible concerted action with them. The United States has already discussed with its major allies, both in NATO and bilaterally, various measures which might be taken in response to possible Soviet moves against Poland.

As such, the Byrd amendment would seriously restrict the President's flexibility in dealing with a complex and potentially dangerous foreign policy issue. The situation in Poland is delicate, complex, and at times rapidly changing. It is a particularly inappropriate environment for tying the President's hands with even the most well-intentioned of legislative initiatives.

Although we oppose this amendment, it might be useful for the Congress (or the Congressional Committees with jurisdiction over the Export Administration Act) to indicate that the statement in the Export Administration Act of 1979 to the effect that it "is not intended to constitute authority to impose total economic embargoes" should not be construed as prohibiting use of the Act as authority for a total embargo in the event of Soviet or Warsaw Pact military action against Poland.

I would appreciate your support in this matter.

Sincerely,

ALEXANDER M. HAIG, Jr.

Mr. HEINZ. Mr. President, the most important part of this letter to our majority leader from our Secretary of State is as follows:

As such, the Byrd amendemnt would seriously restrict the President's flexibility in dealing with a complex and potentially dangerous foreign policy issue. The situation in Poland is delicate, complex, and at times rapidly changing. It is a particularly inappropriate environment for tying the President's hands with even the most well-intentioned of legislative initiatives.

I do not doubt that the amendment of my friend from West Virginia is indeed well intentioned. I understand his objective, and I think I support his goal of trying to insure that we have the strongest possible, most effective, response to any Soviet or Warsaw Pact military action against Poland. It is only a question of means, and we do not want to get into a situation which precludes making such an action fully effective. I believe, Mr. President, that includes having our allies who should and necessarily must stand up with us to make such action truly effective.

Mr. President, does the Senator from Illinois seek time? How much time remains?

The PRESIDING OFFICER. The Senator has 5 minutes and 41 seconds remaining.

Mr. HEINZ. I yield 3 minutes to the Senator from Illinois.

Mr. PERCY. I want to first commend my distinguished colleague for his statement. Certainly all of us would concur in the feeling that if Poland were invaded by the Soviet Union, or otherwise used military force, that this would be a provocative action calling for decisive United States and Western action. But we have all known that unilateral embargoes over a period of time simply do not work. Further, the effect of this amendment might well be a disincentive for our allies to come together with us.

Responses in the contingency of military action against Poland is a matter we have discussed in detail with our allies. The Foreign Relations Committee, and individual members of the committee and the chairman certainly have discussed it with Chancellor Schmidt and others in Europe to see what kind of unified action we would take. I have even discussed this in the Kremlin without any equivocation, laying the cards right on the table.

There should be no chance of miscalculation. But any action that would be taken by the Senate that would appear as though we were moving unilaterally, not in concert with our allies, would be counterproductive to our aims.

So, therefore, I feel we can take the spirit of the Byrd amendment and strengthen that amendment by indicating clearly that we would not be acting unilaterally, we would be acting with our allies. It would be the sense of the Senate that we thus move in concert with our allies along lines that the President, the Secretary of State, the Secretary of Defense, and others have obviously discussed with our allies, and as many of us have talked with our counterparts in European countries.

So I certainly commend the distinguished manager of the bill, the Senator from Pennsylvania (Mr. HEINZ), for the comments he has made with respect to the Byrd amendment as it now stands, and I stand ready to support a substitute amendment that would accomplish the same purpose but, I think, strengthen the Byrd amendment considerably by indicating clearly that we intend to work in concert with our allies and not on a unilateral basis.

May I also indicate that Senator GORTON is unavoidably detained now at a dinner. He will be back for a vote. He asked me to associate himself strongly with the position the Senator from Pennsylvania and the Senator from Illinois have taken on the floor this evening, and also associate himself strongly with the letter from Secretary Haig dated November 12 to the majority leader that the floor manager of the bill has just inserted in the RECORD. I too wish to associate myself with Secretary Haig's letter.

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Until such time as——

Mr. HEINZ. Mr. President, I withhold the amendment.

Mr. President, at the appropriate time, I will send an amendment to the desk as a substitute for the amendment of my friend from West Virginia. The substitute will simply reflect the kind of reservations I have stated about Senator BYRD's amendment. The amendment is in two parts.

First, it will state very clearly that no provision of the Export Administration Act or any other act shall be construed as prohibiting the use as authority for a total embargo in the event of Soviet or

Warsaw Pact military action against Poland.

That, Mr. President, is language that Secretary Haig has asked that we include in any action in this area, because he believes that it will make very clear that he is in no way constrained from acting as he may see fit in this regard, even if it does involve a total embargo.

The second part of the amendment makes it the sense of the Senate that a suspension of, or restriction on, exports from the United States to the Soviet Union shall be imposed in concern with our allies if the Soviet Union or its allies engages in direct military action against Poland, including but not limited to an armed invasion.

The purpose of that clearly, Mr. President, is to put us on record, in the strongest possible way, and to make it clear that we want our allies to be part of the solution, not part of the problem.

Let me state one other reeason why I hope my colleagues will support the Heinz-Percy substitute for the Byrd amendment. It is this: If, by any chance, the Byrd amendment, on an up or down vote, should be defeated, I believe it would send a signal of weakness. Should it be accepted, I think it ties our President's hands. For that reason, I suggest that the substitute that Senator PERCY and I will offer provides the proper signal that we want to send to the Soviet Union and its allies, and yet it strikes a balance with our allies, and with the President and his Secretary of State, that we believe is necessary for the conduct of American foreign policy.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. The time of the Senator from Pennsylvania has expired.

Mr. ROBERT C. BYRD. How much time have I remaining?

The PRESIDING OFFICER. The minority leader has 1 minute 23 seconds.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that I have an additional 5 minutes and that the distinguished Senator from Pennsylvania (Mr. HEINZ) have a similar addition of time.

The PRESIDING OFFICER. Is there objection?

Mr. HEINZ. Reserving the right to object, how much time did the Senator ask for?

Mr. ROBERT C. BYRD. Five minutes each.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I had a letter delivered to the President at midday today requesting his views on my amendment to impose an across-the-board ban on the Soviet Union in the event the Soviets or their allies invaded Poland.

I received a copy of the letter that was delivered to the distinguished majority leader this afternoon outlining the State Department opposition to my amendment. Since I have not yet received a response to my letter, I take it that Secretary Haig's letter is the position of the administration.

I only reiterate what I stated already. Senators PERCY and HEINZ both deplore the fact that my amendment would require unilateral action against the Soviets.

Well, Mr. President, I take it that Mr. Haig had considered such unilateral action when on April 25 of this year he made the unequivocal public statement which was reported in the April 27 Washington Post, in which the Secretary stated unequivocally that the administration would impose not only a new grain embargo but an across-the-board ban on trade with the Soviets should they invade Poland.

He did not say anything about unilateral action. He just said that there will be an across-the-board ban on trade with the Soviet Union in the event they invade, period. No ifs, ands, or buts about it.

So I took him at his word.

Senator PERCY said:

> We have discussed this matter in detail with our allies.

Well, we should have discussed it in detail with our allies because the prospect of the Soviet invasion of Poland has been imminent for many weeks and months. I hope we have discussed this with our allies. I hope that in discussions with our allies we have made it plain to them what the Secretary of State made preeminently clear to all the world when on April 25 he said that the administration would impose not only a new grain embargo but an across-the-board ban on trade with the Soviets should they invade Poland.

I took him at his word. My amendment simply seeks to put the Congress, the imprimatur of the Congress, in back of the Secretary's word which he stated publicly in April.

Now we find those on the other side saying, "We would be acting unilaterally if we did that. We should discuss this with our allies."

Presumably Mr. Haig already made that plain. He did not have any doubts as to what this country would do if the Soviets invaded. He said we would impose an across-the-board ban.

Now when it comes down to the Congress putting its stamp of approval and stating its support for that position, then we hear from the Secretary and we hear from Senators that, "We must not do that because we would be acting unilaterally."

The distinguished Senator from Pennsylvania is now going to offer a substitute. Let us take a look at it.

> It is the sense of the Senate that a suspension of or restriction of all exports from the United States to the Union of Soviet Socialist Republics shall be imposed in concert with our allies if the Union of Soviet Socialist Republics or its allies engages in direct military action against Poland, including but not limited to an invasion.

By putting in "in concert with our allies," it seems we are not tying our allies' hands but our President's hands.

Suppose our allies did not want to act in concert with us? Are we going to back away from imposing such a ban on trade against the Soviets? Why tie our own hands by that language?

We are not tying the President's hands in my language. I am giving him 30 days in which to certify to the Congress that it would not be in the national interest, the national security interests or the national foreign policy interest, to impose such a ban. So the flexibility is given to the President in my amendment and we have ample time in which to consult with our allies if we have not already done it. And if we have not already consulted with them, why have we not? The threat has been there for weeks and months. Mr. Haig surely must have consulted with our allies when he said without any equivocation, without any question, indubitably clear, in his statement:

> We will impose an across-the-board ban on trade with the Soviets if they invade Poland.

I simply want to put it in stone, to say that Congress will support that.

I hope my colleagues will support my amendment. In order to do that, of course, they would have to vote down the substitute by Mr. HEINZ, my distinguished friend from Pennsylvania.

Mr. HARRY F. BYRD, JR. Will the Senator yield for a question?

Mr. ROBERT C. BYRD. Yes.

Mr. HARRY F. BYRD, JR. As I understand the Senator from West Virginia——

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HARRY F. BYRD, JR. I ask unanimous consent that I might have a half minute to propound a question.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. HARRY F. BYRD, JR. I wanted to get a half minute to ask a question of the Senator from West Virginia.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. May I ask the Senator from West Virginia this question: As I understand the amendment of the Senator from West Virginia, if the President makes a certification to the Congress that it would be in the best interests that this amendment be set aside, it could then be set aside.

Mr. ROBERT C. BYRD. I did not understand the Senator's question.

Mr. HARRY F. BYRD, JR. As I understand the amendment of the Senator from West Virginia, the President, at any time, could make a certification to the Congress that this action was not in the best interests of the country and in that event the amendment of the Senator from West Virginia would become inoperative. As I understand, that would in no way tie the President's hands.

Mr. ROBERT C. BYRD. The Senator is preeminently correct. He would have 30 days in which to make such a certification.

Mr. HARRY F. BYRD, JR. I thank the Senator.

Mr. HEINZ. Mr. President, having listened to the colloquy between Senator BYRD, of Virginia, and Senator BYRD, of West Virginia, I would like to make something more clear for the RECORD.

As I understand the question of the

Senator from Virginia, he asked the minority leader, once the embargo was in place, whether at any time the President could suspend such embargo, to which, as I understand the answer of the minority leader, it was "Yes." Therefore, it was argued that this provided the President with flexibility.

In fact, as I read the amendment, and I shall address a question to Senator BYRD about this in a minute, my understanding, based on his amendment, is if the President does within 30 days request that the embargo be lifted, or if the Congress does not go along with his request, the President is locked in. So if the President waited for 31 days, if he or the Congress simply did nothing within that 30-day period, he would be locked in. Is that not correct?

Mr. HARRY F. BYRD, JR. It is not my amendment, but as I read the amendment, the President would have 30 days to make that decision. He can make the decision the first day that the embargo went into effect. I cannot see how that ties the President's hands.

Mr. HEINZ. Let me ask the author of the amendment, Senator BYRD, if I might have his attention.

Mr. President, let me ask my good friend from West Virginia (Mr. ROBERT C. BYRD) is it not the case that if the President, within the first 30 days, does not certify to the Congress, as required here, if he should, on the 31st or the 41st or on the 101st or on the 2001st, decide he wanted to lift the embargo, would he not be prevented from doing so?

Mr. ROBERT C. BYRD. He has 30 days.

Mr. HEINZ. And after that, if he should go along for 31 days, he is locked in for a month, for a year, for 2 years, for 5 years, for 100 years. So this locks us into a total trade embargo, if this is ever triggered, forever. Is that not correct?

Mr. ROBERT C. BYRD. Mr. President, the President has 30 days in which to certify to Congress that such an embargo would not be in the national interest or the foreign policy interest. Congress also, of course, at any time, can take whatever action is necessary to give the President greater flexibility if the circumstances so require.

Mr. HEINZ. Mr. President, I listened carefully to the answer of my good friend from West Virginia, and I did not hear him deny that, once this was in effect for 31 days, it would be in effect forever unless Congress took action to undo it. I do not think he is going to deny that, because that is the way the amendment is written.

Mr. President, I am second to none in my concern about the Soviet Union. I know exactly how the minority leader feels about it. But it seems to me that this locks us into a permanent confrontation with the Soviet Union. If we impose this embargo and, 45 days or 60 days later, the Soviets pulled out, that embargo would still have to be in place. That means that they would have no incentive to pull out of Poland.

Mr. President, if there is one thing we all want to do, we not only want to keep them out but if they should ever go in, we want to get them out.

Mr. ROBERT C. BYRD. Will the Senator yield?

Mr. HEINZ. I am happy to yield to the Senator from West Virginia.

Mr. ROBERT C. BYRD. Mr. President, they would have every incentive to move out, every incentive, because the reason for which the embargo would have been applied would have been removed.

Mr. HEINZ. I say to the Senator from West Virginia, Mr. President, I certainly do disagree on the effect of his amendment. It is for that reason that I hope my colleagues will wisely adopt the Percy-Heinz, or Heinz-Percy, substitute.

Mr. PERCY. If the Senator would yield, Mr. President, I do not recall at any time that the Secretary of State testified before the Foreign Relations Committee his saying that we were going to unilaterally impose, flatly, an embargo if they took certain action. The Secretary has absolutely clearly stated that the President should have maximum flexibility and we should work in concert with our allies.

The PRESIDING OFFICER. All time has expired.

UP AMENDMENT 618

Mr. ROBERT C. BYRD. Mr. President, I send an amendment to the desk in substitution

The PRESIDING OFFICER. The amendment will be stated

The bill clerk read as follows:

The Senator from West Virginia (Mr. ROBERT C. BYRD) for himself and Mr. JACKSON and Mr. MOYNIHAN proposes an unprinted amendment numbered 618 to amendment No. 628.

SEC. . Notwithstanding any other provision of law, a suspension of or restriction on all exports from the United States to the Union of Soviet Socialist Republics shall be imposed if the Union of the Soviet Socialist Republics, or its allies, engages in direct military action against Poland, including but not limited to an armed invasion.

SEC. . Such suspension or restriction of all exports from the United States to the Soviet Union shall be imposed unless the President certifies to the Congress within 60 days of direct military intervention in Poland by the Soviet Union or its allies that the suspension is not in the national security and foreign policy interests of the United States.

UP AMENDMENT NO. 619

Mr. HEINZ. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ) for himself and Mr. PERCY, proposes an unprinted amendment numbered 619 to amendment 628, as modified.

The PRESIDING OFFICER. The Senator's amendment has no keying language. Could the Senator indicate where he wishes the amendment to go?

Mr. HEINZ. The Senator's amendment is a perfecting amendment to the Byrd amendment.

The PRESIDING OFFICER. Could the Senator elaborate where he intends the amendment to be placed? At the end of the first-degree amendment?

Mr. HEINZ. Mr. President, I need a copy of the Byrd amendment.

I suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HEINZ. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HEINZ. Mr. President, I ask that my amendment that is at the desk be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Pennsylvania (Mr. HEINZ) for himself and Mr. PERCY, proposes an unprinted amendment numbered 619 to amendment No. 628, as amended.

Mr. HEINZ. I ask unanimous consent that further reading of the amendment be dispensed with, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Strike all after the word "law" line 1.

No provision of this act or any other act shall be construed as prohibiting the use of this act as authority for a total embargo in the event of Soviet or Warsaw Pact military action against Poland.

"SEC. . It is the sense of the Senate that a suspension of or restriction on all exports from the United States to the Union of Soviet Socialist Republics shall be imposed if the Union of Soviet Socialist Republics, or its allies, engages in direct military action against Poland, including but not limited to an armed invasion."

The PRESIDING OFFICER. The question is on agreeing to the Heinz perfecting amendment to the Robert C. Byrd first-degree amendment. There is no time for debate.

Mr. HEINZ. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. HEINZ. Mr. President, as I understand the situation, the first vote will be on the Heinz perfecting amendment to the Robert C. Byrd first-degree amendment.

The PRESIDING OFFICER. The Senator is correct.

Mr. HEINZ. That amendment, which was necessitated because the Senator from West Virginia proposed a substitute for his own amendment, virtually identical to his amendment, is really the only way it is possible to have a vote on what I referred to earlier as the Heinz substitute. My question, Mr. President, is this:

If those people who are in favor of the Heinz substitute first should vote for it as the first vote comes up and it should carry, then those people who are in favor of the Heinz substitute should vote against the Byrd substitute amendment; then, assuming the Byrd substitute amendment falls, they would then be voting on the first-degree Byrd amendment as amended by the Heinz substitute amendment. If they still favored it at that point, I assume they would still want to vote for it.

Would that be correct, Mr. President?

The PRESIDING OFFICER. As the Senator knows, the Chair cannot interpret the effect of votes on various pending amendments. The question now re-

curs on agreeing to the Heinz perfecting amendment.

Mr. HEINZ. Mr. President, I ask for the yeas and nays on the Heinz amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the Heinz perfecting amendment. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Missouri (Mr. DANFORTH), the Senator from North Carolina (Mr. EAST), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I further announce that if present and voting, the Senator from North Carolina (Mr. CAST), would vote "nay."

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Michigan (Mr. LEVIN), the Senator from Louisiana (Mr. LONG), the Senator from Montana (Mr. MELCHER), the Senator from New York (Mr. MOYNIHAN), the Senator from Arizona (Mr. DECONCINI), and the Senator from Mississippi (Mr. STENNIS) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 49, nays 35, as follows:

[Rollcall Vote No. 368 Leg.]

YEAS—49

Abdnor	Hatch	Quayle
Andrews	Hatfie'd	Roth
Armstrong	Hawkins	Rudman
Baker	Heinz	Schmitt
Boschwitz	Humphrey	Simpson
Burdick	Jepsen	Specter
Chafee	Kassebaum	Stafford
Cochran	Kasten	Stevens
Cohen	Laxalt	Symms
D'Amato	Lugar	Thurmond
Denton	Mathias	Tower
Dole	Mattingly	Tsongas
Domenici	McClure	Wallop
Durenberger	Murkowski	Warner
Garn	Nickles	Weicker
Gorton	Percy	
Grassley	Pressler	

NAYS—35

Baucus	Dodd	Metzenbaum
Bentsen	Eagleton	Mitchell

	Matsunaga	Zorinsky

NOT VOTING—16

Cannon	Hart	Melcher
Danforth	Hayakawa	Moynihan
DeConcini	Huddleston	Packwood
East	Leahy	Stennis
Glenn	Levin	
Goldwater	Long	

So Mr. HEINZ' amendment (UP No. 619) was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GORTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The vote now occurs on the Robert C. Bryd substitute for his own first-degree amendment as amended by the Heinz amendment.

Mr. ROBERT C. BYRD. What was that?

Mr. BAKER. That is not right.

Mr. ROBERT C. BYRD. The vote recurs on my substitute.

Mr. BAKER. On the Robert C. Byrd substitute.

The PRESIDING OFFICER. The Chair stated that the vote now occurs on the Robert C. Byrd substitute for his own first-degree amendment as amended by the Heinz amendment.

Mr. ROBERT C. BYRD. The vote occurs on the substitute for the first amendment which has been amended.

The PRESIDING OFFICER. Which has been amended in the prior action of the Senate.

Mr. HEINZ. I think that the Chair has accurately stated the circumstance. The first vote that we have now will be as the Chair states on the Robert C. Byrd substitute, which is a substitute for the original underlying Robert C. Byrd amendment, which has now been perfected by the Heinz-Percy amendment.

Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HEINZ. I suppose it is safe to say that those Senators who favor the Robert C. Byrd amendment vote "yea"; and those Senators who favor the Heinz-Percy amendment vote "nay."

The PRESIDING OFFICER. The Chair will state that the question now pending before the Senate is the Robert C. Byrd substitute for his own first degree amendment which has been perfected by the Heinz amendment. The Chair will not undertake to interpret the effect of such votes.

Mr. ROBERT C. BYRD. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The question is on agreeing to the amendment of the Senator from West Virginia.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Missouri (Mr. DANFORTH), the Senator from North Carolina (Mr. EAST), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina (Mr. EAST), would vote "yea."

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Arizona (Mr. DECONCINI), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Michigan (Mr. LEVIN), the Senator from Louisiana (Mr. LONG), the Senator from Montana (Mr. MELCHER), the Senator from New York (Mr. MOYNIHAN), and the Senator from Mississiippi (Mr. STENNIS) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY), is absent because of illness.

I further announce that, if present and voting, the Senator from Montana (Mr. MELCHER), would vote "yea."

The PRESIDING OFFICER (Mr. RUDMAN). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 39, nays 45, as follows:

[Rollcall Vote No. 369 Leg.]

YEAS—39

Baucus	Eagleton	Pell
Bentsen	Exon	Pressler
Biden	Ford	Proxmire
Boren	Heflin	Pryor
Bradley	Helms	Randolph
Bumpers	Hollings	Riegle

So Mr. ROBERT C. BYRD's amendment (UP No. 618) was rejected.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I would be agreeable to vitiating the yeas and nays on the amendment, as amended, and also on final passage.

Mr. BAKER. Mr. President, I am pleased to hear that. I know of no insistence that we have a rollcall vote on final passage. I ask unanimous consent that the yeas and nays on final passage be vitiated and also the yeas and nays, if there is one, on the amendment of the Senator from West Virginia.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is on agreeing to the amendment of the Senator from West Virginia.

The amendment No. 628, as modified and amended, was agreed to.

Mr. STENNIS. Mr. President, on Monday there were offered certain amendments to S. 1112, the Export Administration authorization bill. These amendments related to the problem that we all have concerning the high interest rates, and related also to the financial institutions exercising, on a voluntary basis, restraint in extending credit for the purpose of unproductive corporate takeovers.

Mr. President, I was not in the Chamber at the time these amendments were taken up because of intestinal virus that I had on that day.

Mr. President, I would have supported the amendments to which I have referred because of the extreme situation in which we find ourselves with reference to credit and interest rates in particular, high interest rates. They are a matter of concern to all of us, and, we understand, the President of the United States.

I thank the Chair for allowing me to speak at this time out of order. I thank the floor leaders for their assistance in this matter.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. Under the previous order, the Senate will proceed to the consideration of H.R. 3567, which the clerk will state by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3567) to authorize appropriations for the fiscal years 1982 and 1983 to carry out the purposes of the Export Administration Act of 1979, and for other purposes.

Mr. HEINZ. Mr. President, I move to strike all after the enacting clause and substitute therein the text of S. 1112, as amended.

The PRESIDING OFFICER. The question is on agreeing to the motion.

The motion was agreed to.

The PRESIDING OFFICER. The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

The bill (H.R. 3567), as amended, was passed, as follows:

Strike out all after the enacting clause and insert:

That this Act may be cited as the "Export Administration Amendments Act of 1981".

SEC. 2. (a) Section 18(b)(1) of the Export Administration Act of 1979 (50 U.S.C. App. 2417(b)(1)) is amended to read as follows:

"(1) $9,659,000 for fiscal year 1982, and $8,454,000 for fiscal year 1983; and".

(b) The amendment made by subsection (a) shall take effect on October 1, 1981.

SEC. 3. Section 12(c) of the Export Administration Act of 1979 (50 U.S.C. App. 2411 (c)) is amended by adding at the end thereof the following:

"(3) Departments or agencies which obtain information which is relevant to the enforcement of this Act shall furnish such information to the department or agency with enforcement responsibilities under this Act to the extent consistent with the protection of intelligence, counterintelligence, and law enforcement sources, methods, and activities, and sensitive diplomatic information. The provisions of this paragraph shall not apply to information subject to the restrictions in section 9 of title 13, United States Code; and return information, as defined in section 6103 of title 26, United States Code, may be disclosed only as authorized by such title.".

SEC. 4. (a) Section 11(b)(1) of the Export Administration Act of 1979 (50 U.S.C. App. 2410(b)(1)) is amended by striking out "purposes," and all that follows through the period at the end thereof and inserting in lieu thereof the following: "purposes—

"(A) except in the case of an individual, shall be fined not more than five times the value of the exports involved or $1,000,000, whichever is greater; and

"(B) in the case of an individual, shall be fined not more than $250,000, or imprisoned not more than ten years, or both.".

(b) Section 11(b)(2) of that Act (50 U.S.C. App. 2410(b)(2)) is amended by striking out "Defense," and all that follows through the period at the end of the first sentence and inserting in lieu thereof the following: "Defense—

"(A) except in the case of an individual, shall be fined not more than five times the value of the exports involved or $1,000,000, whichever is greater; and

"(B) in the case of an individual, shall be fined not more than $250,000, or imprisoned not more than five years, or both.".

(C) Section 11(c)(1) of that Act (50 U.S.C. App. 2410(c)(1)) is amended—

(1) by striking out the period at the end of the sentence; and

(2) by adding at the end thereof the following: ", except that the civil penalty for each such violation involving national security controls imposed pursuant to section 5 of this Act or controls imposed on the export of defense articles and defense services pursuant to section 38 of the Arms Export Control Act may not exceed $100,000.".

(d) The amendments made by this section apply with respect to violations occurring after the date of the enactment of this Act.

SEC. 5. Section 12(c)(2) of the Export Administration Act of 1979 (50 U.S.C. App. 2411) is amended to read as follows:

"(2) Nothing in this Act shall be construed as authorizing the withholding of information from the Congress or from the General Accounting Office. All information obtained at any time under this Act, or previous Acts regarding the control of exports, including any report or license application required under this Act, shall be made available to any committee or subcommittee of Congress of appropriate jurisdiction upon request of the chairman or ranking minority member of such committee or subcommittee. No such committee or subcommittee, or member thereof, shall disclose any information obtained under this Act or previous Acts regarding the control of exports which is submitted on a confidential basis unless the full committee determines that the withholding thereof is contrary to the national interest. Notwithstanding paragraph (1) of this subsection, information referred to in the second sentence of paragraph (2) of this subsection shall, consistent with the protection of intelligence, counterintelligence, and law enforcement sources, methods, and activities, and sensitive diplomatic information, as determined by the originating agency, and consistent with the provisions of the Budget and Accounting Act, 1921, as amended, be made available only by the originating agency upon request to the Comptroller General of the United States or to any of his duly authorized assistants or employees. General Accounting Office representatives shall not disclose in an individually identifiable manner any such information which is submitted on a confidential basis except to a congressional source entitled to the information under this paragraph.".

SEC. 6. (a) Section 5 of the Export Administration Act of 1979 (50 U.S.C. App. 2404) is amended by adding at the end thereof the following:

"(m) EXCLUSION FOR AGRICULTURAL COMMODITIES.—This section does not authorize export controls on agricultural commodities, including fats and oils or animal hides or skins.".

(b)(1) Section 6 of such Act (50 U.S.C. App. 2405) is amended by adding at the end thereof the following:

"(1) AGRICULTURAL COMMODITIES.—If the authority conferred by this section is exercised to prohibit or curtail the export of any agricultural commodity to carry out the policy set forth in subparagraph (B) of paragraph (2) of section 3 of this Act, other than in connection with the prohibition or curtailment of all exports, the President shall immediately report such prohibition or curtailment to the Congress, setting forth the reasons therefor in detail and specifying the length of time the prohibition or curtailment is proposed to remain in effect.

"(2)(A) If the Congress, within sixty days after the date of its receipt of such report, adopts a joint resolution approving such prohibition or curtailment pursuant to paragraph (3), then such prohibition or curtailment shall remain in effect for the period specified in the report, for one year after the close of the sixty-day period, or until terminated by the President, whichever occurs first.

"(B) If the Congress, within sixty days after the date of its receipt of such report, fails to adopt a joint resolution approving such prohibition or curtailment pursuant to paragraph (3), then such prohibition or curtailment shall cease to be effective upon the expiration of such sixty-day period.

"(3)(A) For purposes of this paragraph, the term 'resolution' means only a joint resolution the matter after the resolving clause of which is as follows: 'That, pursuant to section 6(1) of the Export Administration Act of 1979, the Congress approves the exercise of the authority conferred by section 6 of such Act as reported by the President to the Congress on .', with the blank space being filled with the appropriate date.

"(B) On the day on which a report is submitted to the House of Representatives and the Senate under paragraph (1), a resolution with respect to such report shall be introduced (by request) in the House by the majority leader of the House, for himself and the minority leader of the House, or by Members of the House designated by the majority leader and minority leader of the House; and shall be introduced (by request) in the Senate by the majority leader of the Senate, for himself and the minority leader of the Senate, or by Members of the Senate designated by the majority leader and minority leader of the Senate. If either House is not in session on the day on which such a report is submitted, the resolution shall be introduced in that House, as provided in the preceding sentence, on the first day thereafter on which that House is in session.

"(C) All resolutions introduced in the House of Representatives shall be referred to the Committee on Foreign Affairs and all

resolutions introduced in the Senate shall be referred to the Committee on Banking, Housing, and Urban Affairs.

"(D) If the committee of either House to which a resolution has been referred has not accepted it at the end of thirty days after its introduction the committee shall be discharged from further consideration of the resolution or of any other resolution introduced with respect to the same matter.

"(E)(i) A motion in the House of Representatives to proceed to the consideration of a resolution shall be highly privileged and not debatable. An amendment to the motion shall not be in order, nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(ii) Debate in the House of Representatives on a resolution shall be limited to not more than twenty hours, which shall be divided equally between those favoring and those opposing the resolution. A motion further to limit debate shall not be debatable. No amendment to, or motion to recommit, the resolution shall be in order. It shall not be in order to move to reconsider the vote by which a resolution is agreed to or disagreed to.

"(iii) Motions to postpone, made in the House of Representatives with respect to the consideration of a resolution, and motions to proceed to the consideration of other business shall be decided without debate.

"(iv) All appeals from the decisions of the Chair relating to the application of the Rules of the House of Representatives to the procedure relating to a resolution shall be decided without debate.

"(v) Except to the extent specifically provided in the preceding provisions of this subparagraph, consideration of a resolution in the House of Representatives shall be governed by the Rules of the House of Representatives applicable to other resolutions in similar circumstances.

"(F)(i) A motion in the Senate to proceed to the consideration of a resolution shall be privileged. An amendment to the motion shall not be in order, nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(ii) Debate in the Senate on a resolution, and all debatable motions and appeals in connection therewith, shall be limited to not more than twenty hours, to be equally divided between, and controlled by, the majority leader and the minority leader or their designees.

"(iii) Debate in the Senate on any debatable motion or appeal in connection with a resolution shall be limited to not more than one hour, to be equally divided between, and controlled by, the mover and the manager of the resolution, except that in the event the manager of the resolution is in favor of any such motion or appeal, the time in opposition thereto, shall be controlled by the minority leader or his designee. Such leaders, or either of them, may, from time under their control on the passage of a resolution, allot additional time to any Senator during the consideration of any debatable motion or appeal.

"(iv) A motion in the Senate to further limit debate on a resolution, debatable motion, or appeal is not debatable. No amendment to, or motion to recommit, a resolution is in order in the Senate.

"(G) In the case of a resolution described in subparagraph (A), if prior to the passage by one House of a resolution of that House, that House receives a resolution with respect to the same matter from the other House, then—

"(i) the procedure in that House shall be the same as if no resolution had been received from the other House; but

"(ii) the vote on final passage shall be on the resolution of the other House.".

(2) Section 7(g)(3) of such Act (50 U.S.C. App. 2406(g)(3) is amended by adding at the end thereof the following new sentence: "This paragraph does not apply to the prohibition or curtailment of the export of any agricultural commodity pursuant to section 6(1).".

(c) The amendments made by this section shall take effect on January 21, 1985.

SEC. 7. Since persistent high-interest rates are exacerbated by large Federal budget deficits and by inflationary expectations, since high-interest rates are having a disastrous effect on credit-sensitive sectors of the United States economy, including housing, automobiles, small business, and thrift institutions, and since the prime interest rate has declined from 22 per centum to 17 per centum, the administration shall emphasize and continue to implement policies necessary to sustain the downward movement of interest rates.

SEC. 8. (a) The Congress finds that—

(1) Continued high interest rates are contributing to the current serious slowdown in the economy.

(2) These high interest rates are a principal cause of the severe decline in agriculture, small business, the housing and automobile industries, and other productive sectors of the economy.

(3) Large corporations and banks may have compounded the problem of high interest rates and contributed to the scarcity of credit by reserving billions of dollars of credit for the takeover of other corporations.

(4) Strong measures are needed at this time to discourage wasteful uses of credit and to conserve credit for productive sectors of the economy.

(b) The President shall take appropriate actions on a voluntary basis to encourage banking or other financial institutions to exercise restraint in extending credit for the purpose of unproductive large scale corporate takeovers. Such actions shall include consultation and cooperation with the Board of Governors of the Federal Reserve System.

SEC. 9. Notwithstanding any other provision of law, no provision of this Act or any other Act shall be construed as prohibiting the use of this Act as authority for a total embargo in the event of Soviet or Warsaw Pact military action against Poland.

SEC. 10. It is the sense of the Senate that a suspension of or restriction on all exports from the United States to the Union of Soviet Socialist Republics shall be imposed if the Union of Soviet Socialist Republics, or its allies, engages in direct military action against Poland, including but not limited to an armed invasion.

Mr. HEINZ. Mr. President, I move to reconsider the vote by which the bill, as amended, was passed.

Mr. RUDMAN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HEINZ. Mr. President, I ask unanimous consent that S. 1112 be indefinitely postponed.

The PRESIDING OFFICER. Without objection, it is so ordered.

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS, 1982

The PRESIDING OFFICER. Under the previous order, the Senate will now resume consideration of H.R. 4169, which the clerk will state by title.

The assistant legislative clerk read as follows:

A bill (H.R. 4169) making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related Agencies for the fiscal year ending September 30, 1982, and for other purposes.

The Senate resumed consideration of the bill.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. BAKER. Mr. President, as I indicated earlier, there will be no more rollcall votes tonight. It would be my hope that the managers of the State, Justice appropriations bill might be able to dispose of some amendments which may not require rollcall votes within the next 5 or 10 minutes. It is not my intention to ask the Senate to remain in much longer this evening.

The PRESIDING OFFICER. The pending question is a perfecting amendment of the Senator from Connecticut to committee amendment No. 7.

Mr. WEICKER. Mr. President, I ask unanimous consent that the pending business be temporarily laid aside until such time as the manager of the bill calls it up again.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. I ask that my colleague from Florida be recognized for the purpose of offering an amendment.

UP AMENDMENT NO. 620

(Purpose: To prohibit the obligation or expenditure of funds for the detention or processing of certain aliens at facilities in the State of Florida)

Mrs. HAWKINS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Florida (Mrs. HAWKINS for herself and Mr. CHILES) proposes an unprinted amendment numbered 620.

Mrs. HAWKINS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 26, line 19, before the period insert a colon and the following: *"Provided further,* That none of the funds appropriated under this paragraph may be obligated or expended after March 1, 1982, for the detention of any entrant, any applicant for political asylum or for refugee status, or any other alien which would cause the total number of aliens to exceed 525 at the facility known as Krome North, located in the State of Florida, or to exceed 525 at the other facility in the State of Florida for the detention of aliens awaiting exclusion, deportation, or resettlement which is not used for such purpose on the date of enactment of this Act".

Mrs. HAWKINS. Mr. President, this amendment would require the Immigration and Naturalization Service to limit the population at the Krome North detention facility to 525 by March 1, 1982. I understand that without this amendment INS has said that they would be forced to release 500 Haitians onto the streets of Florida. This would be unacceptable. So, my amendment provides INS with sufficient time to prepare additional detention space.

In addition, my amendment would recognize the burden that has fallen on the whole State of Florida because of the recent inundation of Cubans and Haitians to our shores.

Mr. President, Krome North is the primary facility used by the Immigration and Naturalization Service to detain and process aliens who have illegally entered Florida. The conditions at this facility are pitiful. It was designed to hold 525 people based on a space allotment of 50 square feet per person, but currently it is holding 1,024 people. This is only 26 square feet per person, roughly the size of a single bed. The overcrowding has led to breakdowns in the water and sewage systems giving rise to unsanitary and unhealthy conditions. The Haitians are generally characterized as an obedient, passive people, but several months ago the overcrowding and unsanitary conditions at the camp led to riots and demonstrations. I believe that this overcrowding cannot be allowed to persist. The camp's population must be brought down to its designed level. We have accepted these unacceptable conditions at Krome North for too long.

In addition to the problems of overcrowding, Krome North has become a symbol of this country's inadequate immigration policy. It has become a monument to the Government's inability to deal with the immigration-related problems afflicting south Florida.

Many people discount the problems facing south Florida because fewer illegal aliens wash up on Florida's shores than cross the Rio Grande. These skeptics point to the millions of Mexicans who have crossed into this country in search of work, and compare this to the 150,000 Cubans and Haitians that have arrived in south Florida in the last year and a half. From this they conclude that the problems of south Florida are a drop in the bucket. If there are any of my colleagues in this body who hold this view, I challenge you to travel to Dade County in south Florida and learn the truth first hand. I was in Dade County this past weekend where the plight of the county was again vividly drawn to my attention. Illegal immigration has affected Dade County more than any other county in the country. One out of every nine people currently living in Dade County entered this country illegally within the last year and a half. The results of this massive influx have been devastating. Housing is tight. Police and fire departments are overworked. Sewer, water, and electric systems are strained. Jails and schools are filled beyond capacity, and unemployment is high.

Tourism has always flourished in south Florida, but with the recent and continuing influx of illegal aliens, tourism has declined. Unfortunately this decline comes as no surprise because the crime rate has shot through the roof in the last year and a half. In the city of Miami from 1979–80, robberies were up 103 percent, murders were up 59 percent, auto thefts were up 68 percent, rapes were up 23 percent, and the rest of the crime statistics were equally bleak. 1981 statistics indicate that the crime rate has leveled off at this higher rate, and in some categories gone even higher. Miami has been terrorized by many of these illegal aliens. The city of Miami further reports that the Mariel refugees, those who came from Cuba in 1980, are responsible for 40 percent of the crime statistics in 1980. In all violent crime categories, the Mariel refugees made up a greater percentage than any other single group. It is not uncommon to hear of an elderly man or woman being beaten and robbed by Mariel refugees, or to hear of brazen robberies conducted by these aliens, or to hear mysterious shots in the night. And Krome North has come to symbolize these problems for the people of south Florida. It has come to symbolize the slowness with which the Federal Government is dealing with our runaway immigration policy.

I know that the administration has announced a new immigration policy. I know that they have sent us legislation to implement this new policy. I know of the tremendous efforts by Senator SIMPSON and the members of the Immigration Subcommittee to study and treat our immigration problems.

I know that the Coast Guard has begun interdicting Haitian vessels off the coast of Haiti. I know of the resolve in the administration and the Congress to face up to and deal with our immigration problems. But all the people of south Florida see are more murders, more robberies, more theft, and more rape. We must show them this Congress' resolve to take decisive, affirmative action to solve our immigration problems. We must show them that we recognize that immigration is a Federal responsibility and that the Federal Government must help find a solution. We must show them that they have not been forgotten.

Mr. President, I would like to digress for a moment if I might. It would be a grave disservice to the Cuban community living in south Florida if, when discussing the immigration problems of south Florida, we do not distinguish between the upstanding and valuable elements of the Cuban community, and the troublemakers who came to this country during the 1980 Mariel boatlift. The Cubans who settled in south Florida prior to Mariel have worked wonders in the area. They are in large part responsible for the tremendous increase in the exporting business that is done through the Port of Miami. They have helped open doors for U.S. trade with Latin America and the Caribbean. They have attracted international banks to settle in Miami. Their culture, traditions, and language combined with Miami's tremendous climate combined to lure Latin and Caribbean tourists in large numbers who have spent their money on American goods and services. In addition, the pre-Mariel Cubans had the lowest crime rate of any ethnic group in the United States. In short, this portion of the Cuban community has been a boon to the area, and the entire country has benefited because of their hard work, diligence, and enterprise.

Now, Mr. President, if I may, let me continue my discussion of this amendment.

Some of my colleagues might be inclined to think that the newly implemented interdiction policy might in some way ease the overcrowded and unsanitary conditions at Krome North. I wish this were so, but the facts do not bear this out. Only a handful of Haitians have been returned to Haiti from the United States in the last 5 years because of a legal tangle in the District courts, and they continue to arrive in steady numbers on Florida's shores. The Coast Guard has set up its interdiction patrol off the coast of Haiti for logistical and safety reasons. Under this arrangement the Coast Guard cutters are in a good position to intercept Haitians who are now departing for Florida. However, most of the Haitians who are currently arriving left Haiti before the Coast Guard began interdiction and have been island hopping through the Bahamas and are only now reaching Florida's coast. So interdiction does hold out some hope for a long-term solution to this problem, but not short-term which is where the need lies.

Finally, this amendment would provide the INS with time to develop locations in which to detain the overflow Haitians in Krome North. INS has recently announced that they anticipate developing a new interim detention facility at Fort Drum in Watertown, N.Y. They expect this facility to be able to detain several thousand Cubans or Haitians, and they say that it can be ready in 30 to 90 days. My amendment provides ample time for INS to prepare this facility to hold the overflow from Krome North. I believe that this effectively dispells the fear that the excess Haitians will be turned loose in the streets of Miami. I have made it clear to INS that I do not consider releasing these detainees on the streets of Miami as an acceptable way of resolving this problem, and I believe that my amendment provides a way around this problem. By giving INS until February 1, they have 10 weeks to be able to work out a solution to the overcrowding at Krome North. I believe that this is more than sufficient time for them to adequately prepare Fort Drum or to possibly provide other arrangements.

Finally, our colleagues in the House have recognized the validity of these arguments and voted to accept the language without my amendment, and I believe that the House would recede in favor of my amendment in conference. So I urge support for this amendment because it would correct the deplorable conditions at the camp. I urge support for this amendment because it would show that this Congress is willing to deal decisively and effectively with our Nation's immigration problems. I urge support for this amendment because it will provide the INS with sufficient time to properly take care of the overflow at Krome North. I urge support for this amendment because action is needed now.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, I ask that the amendment of the distinguished Senator from Florida be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

FIFTH EXCEPTED COMMITTEE AMENDMENT—PAGE 26, LINES 10–19

Mr. WEICKER. Mr. President, I ask that the committee amendment on page 26, lines 10 through 19, be accepted.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The fifth excepted committee amendment was agreed to.

UP AMENDMENT NO. 620

Mr. WEICKER. Mr. President, I now ask unanimous consent that the Senate return to the amendment of the Senator from Florida.

The PRESIDING OFFICER. Without objection, it is so ordered.

● Mr. CHILES. Mr. President, I am concerned about a crisis which all of Florida is facing. The crisis I am referring to is overcrowded, unsanitary conditions at the immigration and naturalization detention facility called Krome North. The amendment which my colleague and I are offering would relieve this crisis by effectively placing a cap on the number of persons who can be held at Krome.

Krome North is an old Army post located on the outskirts of Miami, and it has been pressed into service as a processing center and holding facility for immigrants who land on south Florida's shores. The official capacity of Krome, based on an allowance of 50-square-feet per-person, is 525 people. Yet the day-to-day population of Krome far exceeds this stated capacity. In the past, the population has run as high as 1,600 persons. As of this morning, the Krome population was 1,026 persons, twice the stated capacity. That means that each person in Krome has about 24 square feet of space, an amount of space a bit larger than the average desk top.

It is not surprising that these overcrowded conditions have led to health problems, and added to the tensions in an already explosive situation. The overcrowding has caused malfunctions in the water and sewerage systems at Krome, and as a result, Krome no longer meets State and local health standards.

This unsanitary situation poses a public health hazard to the population at Krome and to south Florida in general. There have been riots and demonstrations inside Krome, and outside its gates.

To the people of south Florida, Krome stands as a symbol of the Federal Government's inability to live up to its responsibility to handle this national problem, and of the frustration all Floridians feel in trying to contend with uncontrolled immigration.

Mr. President, the Federal Government has begun to move ahead to solve some of these problems, and to bring relief to south Florida. Today in fact, we have the opportunity to approve funding for a comprehensive immigration enforcement program that, among other things, will set up a new detention center for immigrants.

I certainly support these efforts, and will do everything I can to make sure they are enacted as quickly as possible. Furthermore, I believe that our amendment is consistent with this new enforcement effort.

Mr. President, it is important to keep in mind that this amendment is a temporary measure. It recognizes that, in the future, we will have a permanent facility to accommodate immigrants. All this amendment says is that, until that facility is completed, we ought to assure that those who are being held, and the communities in which they are being held, are not subject to health and safety hazards.

Florida is already doing more than its fair share, and will continue to do so under this amendment, until that new facility is completed. It is only appropriate that we make sure that Florida is protected during the weeks and months ahead, while the new facility is under construction.

As far as I am concerned, there is another issue, one of fairness, involved in this matter. We all recognize that authority over immigration is delegated to the Federal Government under the Constitution. We all recognize that we have an immigration problem in America today. But what we all must recognize is that that problem is centered in only a few States, like Florida, and those States are helpless to do anything in the absence of Federal action.

There ought to be fairness involved in the burden the Federal Government asks each State to bear. In many instances, the Federal Government has been fair to States. We think that our State should be treated fairly, too.

Recently, the Federal Government and the Governor of Puetro Rico entered into an agreement to open a holding center for Haitian immigrants at Fort Allen, Puerto Rico. But the Federal Government agreed to place a cap on the total number of immigrants at Fort Allen. That cap—800 persons—assures that those being detained will have humane conditions, and hardship and disruption to the government and people of Puerto Rico will be minimized.

The Federal Government ought to enter into a similar agreement with the State of Florida, and that is precisely what our amendment does. It simply puts Florida on the same footing as other States.

Mr. President, the INS claims that it does not have any room available to hold these people, and some have suggested that the people at Krome would have to be released into the community under our amendment. That is highly unlikely. First, it would be inconsistent with our present and future immigration policy. Second, we in Florida have come to learn that, when pressure is applied, the Justice Department is able to find necessary space and facilities.

Just this last weekend, 125 persons at Krome were relocated to a facility at Lake Placid, N.Y., and another 60 were transferred to a Morgantown, W. Va. facility. Room can be found, especially when we recognize that we are talking about a temporary situation, one that will end when the permanent facility is opened.

Mr. President, nothing underscores the frustration the people of Florida feel more than the lawsuit which the Governor of Florida recently filed against the Federal Government. That lawsuit seeks to reduce the population at Krome, and it has been the source of much of the pressure that has resulted in finding space for Haitians at other facilities. In fact, many people in south Florida have noticed a strange coincidence.

Whenever someone from the Justice Department in Washington comes down to Miami, the Government comes up with new facilities elsewhere for the people at Krome. Our amendment is another way to put pressure on the Federal Government to resolve this problem. In doing so, we show our willingness to face up to our responsibility to handle this national problem.

Mr. President, in closing let me make it clear that we are not attacking this administration, or its immigration policies. This is a bipartisan issue. It is an issue of fairness. It is a matter of the Federal Government living up to its responsibilities.

The Krome facility remains overcrowded, and the continued overcrowding is a serious threat to the health and safety of south Florida. Over the last year and a half, south Florida has been forced to bear the brunt of what is a Federal problem, and this amendment lifts some of that weight from Florida's shoulders. It is a temporary measure, which lapses once permanent holding facilities are completed.

The amendment would have a limited impact on the rest of the country, but would be vital to the people at Krome and to south Florida. It also assures the State of Florida and the people of Florida that the Federal Government, in handling immigration matters, will treat States in a fair, evenhanded manner.●

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Florida (Mrs. HAWKINS).

The amendment (UP No. 620) was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HOLLINGS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WEICKER. Mr. President, I am searching around for more amendments, something I think we shall not have to wait for for very long. I suggest the absence of a quorum so I may find out whether or not the distinguished Senator from Kansas may have an amendment.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, may I in-

quire of the distinguished managers of the bill if there are any other amendments we can do tonight without a record vote?

I gather there are no other amendments that are available to be dealt with by the Senate this evening, and I see no contrary position asserted.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business not to extend beyond the hour of 9:30 p.m. in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

SMALL BUSINESS INNOVATION RESEARCH ACT OF 1981

Mr. SYMMS. Mr. President, our Nation stands alone in history as the standard of human initiative and freedom. Our form of government is unique in that it was established as a shield to protect God-given freedoms and liberties from usurpation by tyranny.

Because we as a nation of free men and women are able to exercise these God-given rights, we are a people known for our creativity and productivity. It is when we are not free or are in some way hindered in exercising these rights that creativity and productivity suffer.

To insure that this creativity and innovation are continued I am proud to be a cosponsor of S. 881, the Small Business Innovation Research Act of 1981. No sector of our society has added more to our national well-being than that of small business.

When unhampered by Government interference the creativity and inventiveness of men and women involved in private enterprise have led to major advances and improvements in our way of life. Much of what we enjoy every day has its origins in the creativity of small business.

Federal policymakers often forget the contributions of small firms. Small business has been our Nation's most efficient and fertile source of new technology. Between 1952 and 1973, small firms accounted for almost one-half of major U.S. innovations, and they did this 50-percent cheaper than if it had been done by large firms or the Government.

Also, small innovative businesses create jobs and stimulate economic growth. Between 1969 and 1976 small business provided 87 percent of all new jobs in the United States. We all know that innovation creates new jobs, increases productivity, adds to the competitiveness of U.S. products in overseas markets, and stimulates economic growth. Surely we are to be thankful that we have the creative force of the small businessman and woman.

But, Mr. President, I am very concerned that our Nation is not fully promoting and utilizing this vast creative resource. Over the past decade our Nation has experienced a decline in innovation. As other nations have increased their research efforts, we seem to have entered a period of little creative development.

One of the causes of this decline is the failure of Federal policymakers to fully realize the suppressive effects of Federal involvement and legislation on small business' private enterprise creativity.

We in the Federal Government must provide the leadership that will create a climate where private innovation and creativity may once again flourish.

S. 881 goes far in doing this. Not only does it recognize the abilities of the individual and the private sector; it also seeks to stimulate increased private activity in the creation of new innovations. This can be promoted by requiring Federal agencies to allocate certain amounts of research and development funds to small business. The infusion of such funds into small business, the most prolific source of new technology, will spark a creative upsurge affecting all levels of our economic life for the better and increase our competitive stance among other nations.

Mr. President, I am pleased that small business and private enterprise are once again being recognized for the contributions they offer our society.

SUPPLY-SIDE ECONOMICS

Mr. SYMMS. Mr. President, I suspect that the widely announced death of supply-side economics will turn out to be premature. Whatever one calls it, supply-side economics is nothing more than the commonsense recognition that there are limits to the amount of blood the taxman can get out of a turnip.

The program enacted so far cannot even really be called "supply-side" so far. Despite all the wringing of hands among political pundits and ersatz economists, the tax cuts so far enacted barely keep pace with the inflationary tax increases Congress has so thoughtfully built into the system over the last couple of decades.

Now the special interest groups are sharpening their pens for attacks on proposed spending cuts while at the same time they sharpen their knives for the President and his aides who have to propose those cuts. The tragedy of it is that no one points out their bias in the matter.

It is all well and good for a social worker to talk about how "the poor" will be hurt by budget cuts; what has to be recognized, but seldom is, is that it is the social worker who has done the best out of the existing system.

There is an enormous welfare bureaucracy and industry, quite as well-entrenched and fanatic as the military-industrial complex the liberal media get so exercised about. That welfare-industrial complex feels itself threatened right now, and the barricades are manned.

Above all, what is needed is political courage. Facts are facts. We do not have the money to do everything the welfare-industrial complex wants, and we cannot get that money from increasing taxes. We have tried that for so long, that one would think we would have learned. Right now is the time for leadership, for courage, and I urge my President, the leader of my party in the Senate, and all my colleagues to rally round.

If we are not able to resist the special interests now, with the results of last November's election to strengthen us, then I fear for the future of this democracy.

Mr. President, our problems have been over a generation in the making. In my view, President Reagan has put us on the right track with his economic proposals, and it is discouraging to me to see so much scrambling for a politically expedient solution.

For a problem this serious, there will be no universally popular solution, and there will be no quick solution. Time is going to be required.

What is the alternative to the Reagan program, Mr. President? Has anyone offered anything other than the ruinous taxation and uncontrolled spending that got us into the mess we are in now, with high unemployment, astronomical interest rates, a decline in productivity, and raging inflation? The answer, simply, is no. No one has. "Back to the old ways," we hear from Democratic politicians and their scribes.

Mr. President, this Senator will not go back to the old ways. We tried them and tried them, and tried them again. They failed. I am going to continue to resist the special interests, the panic-mongers, and those whose political interest in the failure of the President's program is manifest.

Mr. President, some of the connections between and among the special interests, the bureaucracy, and the Congress were perceptively outlined in an editorial in the Wall Street Journal a short time ago. It is a timely warning against "the old ways" and I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Oct. 15, 1981]

THE TREASON OF CONGRESS

In 1906, the muckraking journalist David Graham Phillips wrote a magazine series on the way leading U.S. Senators served the bidding of corporate interests. He gave his articles the collective title "The Treason of the Senate." Exaggerated as the charge might have been, it is no less appropriate now for a Congress that has let spending run out of hand, relied on unlegislated tax increases and phony bookkeeping for any semblance of budget balance, driven the nation's largest trust fund to the verge of bankruptcy, and, when confronted with a national mandate to change its ways, thrown up its hands at the "political difficulty" of reform.

The "political difficulty" is that Senators and Representatives are just as subservient now as in 1906 to the bidding of special interests. These interests masquerade under humanitarian labels, but they are even more harmful to the public good than the trusts and corporations belabored by the Progressive movement. There is the lobby for job training programs, which is less concerned with turning welfare recipients into productive workers than with protecting federal contracts for the job training industry. There is the housing lobby, which represents builders so addicted to federal rent subsidies that they can't conceive of putting up a moderate-income apartment house without them.

There are myriads more. The motives and men may be worthy, but these interests have all come to depend for a living on one or another federal line item in health, welfare or social service, and nothing arouses their energies as much as a campaign to keep Congress from cutting their program.

Washington is all too receptive to these campaigns. In a group, Congressmen make all the appropriate noises about fiscal responsibility, but each one knows in his heart that his political future is best served by staking a claim to a well-heeled, well-organized "program constituency." The arrangement is all the tighter if the Congressman holds rank on a subcommittee that controls the program's funding. In the Executive Branch, the bureaucrats who work on that program have an obvious interest in seeing it grow. And so, with the private industry that springs up around each program, you have the famous "iron triangles" which, until this year, have been the downfall of every attempt to control the budget. President Reagan's massive budget assault earlier this year threw the interests in momentary disarray; now they have regrouped and one hears on every side how hard it will be to make further cuts.

But the problem goes beyond structures. Congress lives in an isolated, self-indulgent universe, oblivious to the way its rhetoric translates into the real world. House Majority Leader Jim Wright presents budget cuts as an assault on women, children and the helpless without pausing to glance at the mound of evidence that federal social programs have bettered mainly their administrators and contractors and have often done harm to the people they were intended to help. Senators of both parties murmur that tax cuts have been overdone, even though the President's program does little more than compensate for the "bracket creep" caused by inflation. For members of Congress, Social Security remains an abstract problem interesting only for its short-term politics, since they pay no Social Security taxes and don't have to worry whether any of this considerable bite on the payroll will be around for their retirement in the next century.

Congress is one of the main victims of the elephantiasis that infects the federal government. As committees and programs have proliferated, staff members have taken over much of the legislative detail. As employes of Congress have multiplied, it has been spreading its increasingly bloated buildings over Capitol Hill, threatening to expropriate space from the Library of Congress and even the Supreme Court. This antheap of legislative aides and committee staff—the legocracy, as some call it—is even more divorced than the members from the real world back home.

Pampered, privileged, surrounded by aides who regard him with servile contempt, your Congressman has become adept at confusing the public good with his own interest and interests. Campaign reforms become a means for protecting incumbents. Budget outlays become a mutual aid arrangement with budget constituencies. The duty to the folks back home becomes a matter of winning them federal goodies, to the point that it is a question whether the Congressman is serving his electors or corrupting them.

The result has been double-digit inflation, suffocating tax increases procured in the dark of the moon, and now, the agonizing corrective of high interest rates. By any view that the public interest lies in balanced budgets, sound currency and a stable tax rate, Congress has sold us out. And now it is about to tell us that because of the "political difficulty", of real budget control, there is "no alternative" but to postpone the scheduled tax rate cuts, allow inflation once again to boost taxes surreptiously and go back to all of the old ways.

THE ECONOMIC SITUATION

Mr. SYMMS. Mr. President, as the economic recession begins to take hold, I am sure all my colleagues have received mail from constituents about the effects of the slowdown. If we have not received letters ourselves, the Washington Post is kind enough to treat us to almost daily accounts of how the Reagan economic program is devastating our country's poor and helpless.

I have received letters from home as well, and many of them are thoughtful reactions to difficult economic situations. Given the level of interest rates and the resulting housing slump, the forest products industry is among the hardest hit in the Nation. I have just received a letter from one of my constituents, a worker in that industry, whose wife is a realtor.

This constituent recognizes that our economic course was heading into the hurricane, and that a drastic course of correction was required if we were ever to emerge into the economic sunshine again. To quote this Idahoan:

> One should take a few moments to consider where the country would end up should we have remained on the same old track of spend now and pay later.

Robert A. Maxwell, the writer of this letter, points out that Government is consumptive, not productive. Whatever is produced in this country is produced by private individuals. The Reagan program is designed to stimulate that productive capacity, and I continue to believe that it will do so.

Mr. President, I ask unanimous consent that Mr. Maxwell's letter be printed in the RECORD. I think all my colleagues can profit from his insight.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OCTOBER 27, 1981.

Hon. STEVEN D. SYMMS,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR SYMMS: The present poor economic situation is close to home as I am part of the hard hit Forest Products Industry. My wife is a realtor and the high interest rate is hurting them badly as well.

One should take a few moments to consider where the country would end up should we have remained on the same old track of spend now and pay later. The government makes no products to sell. When it gives one person something it must come from someone else. There are no freebee's in this world.

The Reagan changes are hurting many, but I feel the present administration's direction is correct. The budget must be balanced. It appears the so called "entitlement programs" need looking into, and update the laws on them if required so they are realistic.

No one should get a handout without contributing. Our country must return to new but solid ideas that are realistic and not just a government dream.

Your job, like most everyone else's, is not easy but with others you must find and lead the ways to a balanced budget.

At the same time, we must keep this great country of ours stimulated, working and productive.

Yours truly,

ROBERT A. MAXWELL,
Coeur d' Alene, Idaho.

PROPOSED F-16 FIGHTER SALE TO PAKISTAN

Mr. HATFIELD. Mr. President, I would like to take the opportunity today to present the case for a resolution of disapproval on the proposed sale of F-16 fighters to Pakistan. Senator MOYNIHAN and I introduced this resolution 2 days ago. The arguments which can be leveled against this proposed sale are so numerous and so serious that I will limit my remarks to what I consider to be the principal concerns. I would like to say at the outset, Mr. President, that I do not accept this role with enthusiasm.

I am fully cognizant of the need to strengthen and revitalize our relationships with any and all nations located in areas of vital strategic concern. I would be the first to assert, Mr. President, that a friendly Pakistan would be a tremendous asset to U.S. interests in Southern Asia. But I am convinced that we are dreaming. What we would like to accomplish, and what the evidence indicates we can expect to accomplish, are worlds apart in the case of this sale.

Let me first address the question of stability. The most recent State Department report grimly notes:

> Restriction on dissent and individual freedom have grown during the past year in Pakistan, while citizens' rights have diminished.

The extremely tentative power base held by General Zia in Pakistan is well-known. His is a brutal and unstable government unable to provide even the base necessities of life for its people.

Though I would welcome evidence to the contrary, the future, as I see it, points only to General Zia's imminent demise. The people of Pakistan will not view this new security relationship as an expression of friendship; rather they will view it as an open-armed embrace of the unpopular Zia regime. Top leaders of the Pakistan Peoples' Party, the party it is generally agreed would win free elections, have warned that if this security package goes through, they will terminate the relationship when they assume the reins of power.

If we were embarking on an exploratory arrangement—a limited package of economic and military support designed to create a constructive relationship, there would be less need for concern. But we are talking about 40 sophisticated aircraft totaling over $1 billion, and an economy-military package totaling $3 billion for one of the least developed nations on the globe. This is a massive injection of aid and sophisticated hardware.

Yet I am constantly told that anything less is likely to cause Pakistan to reject it out of hand. I must say that I find this incredible. If General Zia is so deeply concerned about the Soviet threat and is so anxious to become a key ally of the United States, I seriously doubt that he would be so particular. At the same time, we are turning our backs on the party in Pakistan which would clearly win a free election if General Zia would only allow one to take place.

The second point I would like to ad-

dress is the prospect of an endlessly spiraling arms race on the Indian Subcontinent. India and Pakistan have fought three wars in the last 34 years. I fully acknowledge that India is the stronger of the two nations.

India's increasing intimacy with the Soviet Union and its bankrupt policy of noncriticism over the invasion of Afghanistan rightly concern the administration and Congress. While I am disturbed over India's pro-Soviet leanings, I do not believe that the facts in any way suggest that she has become a hopelessly pro-Soviet surrogate. India's foreign policy has always been characterized by nonalinement. But there are now disconcerting indicators that pro-Soviet factions in India, once on the defense over Afghanistan, are being rejuvenated.

Indian anxieties over the Soviet invasion of Afghanistan appear to be giving way to a renewed preoccupation with the Chinese-Pakistani-American challenge. Sentiment for a joint India-Pakistan response to the Soviet threat was once powerful, but it has been replaced with stirrings for a preemptive nuclear showdown with Islamabad.

The underlying rationale behind the Pakistan security arrangement is to deter Soviet adventurism and to reinforce our position with respect to the Persian Gulf. But let us examine this assumption carefully, Mr. President, as I believe that it is so riddled with holes as to defy logic. As recently as 4 months ago, Pakistan's foreign minister announced that the Soviet Union was not a central threat to Pakistan. It is well known that Pakistan seeks some kind of political accommodation with the Soviet Union and the Karmal regime in Afghanistan.

There has been no major redeployment of Pakistani forces since the invasion of Afghanistan. Two-thirds of the Pakistani military is deployed not along the Afghanistan border, but on the Indian border. Pakistan has expressed unqualified opposition to the administration's goals in the region, including the concept of a rapid deployment force.

Of course, it is possible that this open-armed embrace of General Zia will ultimately result in moderation of these positions. But considering the magnitude and the implications of the $4 billion we intend to invest in Pakistan, one would think that changes would have already been forthcoming. Instead, we receive signals that any tampering with the aid package will result in Pakistan's rejecting the entire idea.

Finally, significant though this aid may be when viewed in a vacuum, it is light-years away from being sufficient to deter an invasion by the Soviet Union. Interceptor aircraft would be far better suited to Pakistan's defense than F-16 fighters. I completely fail to comprehend how one can be anything but horrified at the potential for disaster we stand to create through this sale. The vision of nuclear weapons and F-16 fighters in the hands of General Zia is as fundamentally frightening a prospect as I can imagine in this volatile age.

While it is suggested that enough conventional arms might induce Pakistan to abandon the nuclear option, there is absolutely no evidence that this theory will work. A recent State Department cable reveals that Pakistan has obtained sensitive nuclear equipment from Turkey. The cable reported:

> We have strong reason to believe that Pakistan is seeking to develop a nuclear explosive capability. We have information that Pakistan is conducting a program for the design and development of a triggering package for nuclear explosive devices.

I hope this body is aware of the speculation that Pakistan could be seeking an Islamic bomb in conjunction with Colonel Qadhafi. A report by the London Observer indicates that Libya has supplied Pakistan with uranium ore. If these reports are inaccurate, the burden of proof lies with those who are promoting the gamble. I would also like to call the Senate's attention to an essay written by William Sapphire which recently appeared in the New York Times. He points out that a German-based company is now assisting Libya in developing a long-range, surface-to-surface missile.

He further suggests that it would be natural for Pakistan, rapidly developing an offensive nuclear capability, to cooperate with the Libyans on a delivery system. Both Islamic countries could then have missiles with nuclear warheads. I suggest this prospect, Mr. President, for the benefit of those who are comforted by the notion that it may be some years before Pakistan could develop an atomic bomb small enough to be carried on F-16's.

We are setting the stage for another preemptive strike against a nation suspected of developing offensive nuclear capability. I would like to point out that the provisions on aid introduced by Senator GLENN, which would necessitate an aid cutoff if a nuclear device is detonated, does not apply to the F-16 package. We are all aware of the abundance of evidence: intelligence reports, photographs of the construction of a uranium enrichment plant at Kahuta, and statements by Prime Minister Bhutto prior to his execution by General Zia.

I would now like to turn to the final point, around which all of my previous concerns revolve, and that is the question of allegiance.

I must confess that I tend to lose my objectivity when I recall the wanton act of terrorism which occurred less than 2 years ago when the Zia government stood by in passive indifference while two American personnel were killed, the U.S. Embassy was burned to the ground, and other U.S. Government facilities were destroyed. It took the Zia government more than 5 hours to respond to the desperate pleas of the Americans trapped in the Embassy. The American people have yet to be provided with an apology, let alone an explanation or full reimbursement for this murderous violation of international law.

The Pakistani Government can never replace the lives of the personnel who were killed in that incident while serving as officials of the U.S. Government. Why has the Government of Pakistan not moved to punish those who conducted the attack?

Finally, serious questions remain unanswered regarding the involvement of the Pakistani Government in this act. Does anyone in this Chamber seriously believe that these same individuals can be trusted to defend American interests? The substance of Pakistan's allegiance to the United States is even more questionable than its own stability. Even if our convenient friends in the Zia regime are in power on the day when we need them, what evidence exists that they can help us in the face of bitter domestic opposition greatly exacerbated by this jet-fighter sale?

This Nation is fast becoming the world's most compulsive gambler. With so much talk of renewed commitment to our real friends, we now move to bestow "allied status" on a regime that so recently displayed supreme disregard for this Nation and which has always displayed disregard for our ideals.

This sale represents a desperate substitute for the genius and the courage which the increasingly dangerous global situation requires of us. We are becoming the national image of a gambler who disregards his family's welfare, blinds himself to the future, and blanks out the past in a feverish effort to achieve immediate and total security. I have been as critical of the Soviet Union as any Member of this Chamber. I deplore the march of totalitarianism.

I condemn the brutality and spiritual bankruptcy of their system. But we must stand for something. This sale is a rash move. It is intended to signal strength and resolve to the Soviets, but it in fact signals confused purpose and hollow commitment. We must confront ourselves with brutal honesty. Have we come to view nonproliferation, democracy and allegiance as such hopeless goals that our only recourse is to live for the moment? It is as though we are prepared to abandon everything in deference to an all-consuming and myopic anti-Sovietism.

Mr. President, I hope and pray that this deliberative body will not allow itself to succumb to the bankrupt interpretation of national security which underlies this proposal. That which masquerades as realism is increasingly proving itself removed from reality.

I appeal to this body to reject this dangerous and compulsive toss of the dice. We cannot afford to confuse that which is desirable with that which is possible. A rejection of this sale will not make life any easier for us. It will not solve anything. It will not rid us of the dilemma which confronts us. In fact, it will add a new dimension to the already ominous responsibilities we face.

But I am certain, Mr. President, that the other alternative—the acceptance of this sale—spells disaster not only for the United States, but for mankind. Let us choose the more difficult road, secure in the knowledge that we rejected the simple answer, and maintained our historic ideals.

Mr. President, I ask unanimous consent an article to which I referred appearing in the New York Times of October 9, 1981, and the article appearing in the Christian Science Monitor of November 9, 1981 be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Oct. 1, 1981]

THE ISLAM BOMB

(By William Safire)

WASHINGTON.—You are Indira Gandhi, Prime Minister of India, a "nonaligned" country that is tightly aligned with the Soviet Union.

You pick up The New York Times and read, in an exclusive story by Judith Miller, that U.S. arms control officials suspect Pakistan may be diverting fuel from its nuclear reactor to build a bomb.

You note that the International Atomic Energy Agency has detected "irregularities" and "anomalies" at the plant site, and that Pakistan refuses surveillance that might slow development of "the Islam bomb."

You note further that President Reagan has asked the U.S. Congress to exempt Pakistan from the law barring military aid to countries building nuclear weapons, and that 40 F-16's are on their way to help Pakistan defend itself against the Russians in nearby Afghanistan.

You remember that Menachem Begin used F-16's to reach across the desert to attack the Iraqi reactor in Baghdad, and you ask your air force chief if the Pakistanis could use their F-16's to drop an atomic device on India's population centers, or to attack India's own nuclear plants.

Your air force man says yes, the F-16's could hit your nuclear facilities, but not for years could Pakistan develop an atom bomb small enough to be carried on a fighter-bomber. In the meantime, the major threat to India would be a Pakistanti nuclear device that might be delivered by a large missile such as those being developed by OTRAG.

And what, you ask, is OTRAG? You are informed that Orbital Transport und Raketen Aktien-Gesellschaft is the Munich-based private company now helping the Libyans develop a long-range surface-to-surface missile. As Pakistan builds its bomb, it would be natural to make a deal with the Libyans on a delivery system; both Islamic countries would then have missiles with nuclear warheads.

As Prime Minister of India, which not long ago crushed and dismembered Pakistan in a war, you are concerned: why don't the West Germans close down OTRAG? Answer: business is business, and the people of Munich—many of whom protest American neutron weapons being positioned there in West Germany's defense—are evidently unconcerned at the prospect of incineration if a country laid waste by a German-produced rocket lashes back in retaliation.

You ask if India has the means to remove the forthcoming nuclear threat from Pakistan. Yes, you have British Jaguar fighter-bombers with the range to reach the Karachi reactor, and the Russians are eager to explain how to penetrate Pakistan's radar.

Now switch identities. You are Marshal Ustinov, the Soviet defense chief. You have no intention of invading Pakistan, because that might trigger a war with the U.S. But if your ally India, in pre-emptive self-defense, attacks Pakistan—that would not be an East-West superpower confrontation. That would just be an old grudge fight, at the conclusion of which you could enlist Baluchi tribesmen in a simple reach through Pakistan for Soviet control of the Persian Gulf. To a Soviet marshal, the provocation of a Pakistani bomb would be a godsend.

Switch identities once more: you are now President of the United States. Your hard-line advisers tell you that the only opposition to sending F-16's to General Zia in Pakistan comes from the usual dovecote that flinches at supporting friendly dictators. You are persuaded that the only way to stand up to the Russians in the Persian Gulf is to bolster the Pakistani chief even if he tells us to get lost when we inquire about his atomic-bomb intentions.

You, as President, know which side you are on: our side, of course, alongside all those who join our strategic consensus against the Russians. But then a cloud, no bigger than a man's hand (I Kings 18:44), ariseth out of the sea: our support of the Pakistanis is directed against the Russians, but what if General Zia sees it as useful against Mrs. Gandhi? Won't our turning of a blind eye to Pakistan's atomic pretentions induce India, a Soviet ally, into doing the Russians' work for them? Common sense suggests that by attaching no strings to our aid, we may be tripping ourselves up.

Now drop all identities and be yourself. Think it over: the notion of supplying military aid to Pakistan without extracting its signature on a nonproliferation agreement is almost as foolish as supplying our most advanced weapons system to the Saudis without extracting an agreement guaranteeing our presence and joint control. Senator John Glenn seems to understand this; that is why he is trying to assure Saudi-American co-management of the Awacs, and why he is trying at the same time to amend the foreign-aid bill to limit the nuclear waiver Mr. Reagan was all too willing to grant the Pakistanis.

A parallel interest is not an alliance. We furnish arms to parallel interests like the Saudis and Pakistanis (and Chinese) for the purpose of aiding their defense against the Soviet threat. If our purpose is subverted, then those arms should be diverted to other nations whose interests parallel our own.

America's interest is in helping General Zia defend Pakistan against the Russians, and not in encouraging him to build a bomb that will make his country an irresistible target for a Soviet surrogate.

[From the Christian Science Monitor, Nov. 9, 1981]

PAKISTAN CONSIDERS FRIENDLIER LINE TOWARD MOSCOW

(By David K. Willis)

ISLAMABAD, PAKISTAN.—Pressures are growing here for Pakistan, viewed in Washington as a key strategic ally against Soviet expansionism, to consider a softer line toward Moscow.

Well-placed Pakistani sources report that the editor of a prominent weekly magazine with close ties to President Zia ul-Haq has been asked for a confidential report on how popular opinion would react to any move toward recognizing the Moscow-backed Kabul government of Babrak Karmal.

Meanwhile, Western sources in Islamabad say they detect among some senior Pakistani diplomats a growing feeling that the only way out of the impasse with Moscow is to signal some kind of recognition of Babrak Karmal and to open a new dialogue with the Soviets.

The new pressures may represent a split between President Zia's generals and the civilians who operate Pakistan's diplomacy.

The Reagan administration would strongly oppose any Pakistani softening. It is going to great lengths to assure General Zia of US support against Soviet troops next door. The US also seeks Pakistan's cooperation to counter the Soviets in the Middle East.

Some Western sources dismiss the report about the weekly newspaper, saying it represents, if true, no more than normal government contingency planning.

But other observers tie the report to the rationale they detect among Pakistan diplomats. The rationale goes this way:

Soviet troops cannot be dislodged from Afghanistan by force, just as they cannot subdue areas outside the cities unless they are strongly reinforced. Soviet strategy seems to be to hold on, to support Karmal and await developments.

(The Karmal government was installed by Soviet troops in December 1979. Some 85,000 Soviet troops remain in Afghanistan.)

The thesis argues that now is the time to send some kind of signal to Moscow that Pakistan is prepared to accept Babrak Karmal as a fact of life in Kabul. This, it is said, could break the diplomatic impasse with Moscow, lend greater flexibility to Pakistani democracy, and lead to an easing of Soviet and Afghan pressure on Pakistan's western borders.

There is even some hope, according to this thesis, that talks with Moscow might open up some kind of inducement to the 2 million Afghan refugees in Pakistan to start going home. The aim would be to cut the financial burden on Pakistan and reduce the tribal frictions that the refugee presence exacerbates.

But the hope is slim: The refugees fled Afghanistan because they dislike and fear Karmal and Soviet occupation. Pakistani recognition of Karmal could add to their fears.

So far, General Zia and his military government have rejected Moscow's demand for talks that would, in effect, grant Karmal legitimate status.

Even if so inclined, President Zia is unlikely to take new iniatives toward Moscow while the US Congress is considering an aid package.

The US Senate has just approved a $3.2 billion package of economic aid and military credits for Pakistan, on condition that President Zia does not explode the nuclear device many experts say he is building. The House of Representatives is about to take up the package.

Neither Senate nor House has yet acted on a formal administration notification Oct. 23 that the US intends to sell Pakistan 40 super-sophisticated F-16 fighter-bomber aircraft. The sale will go through unless both houses veto it within 30 days.

The choices for Pakistan seem to be to continue standing firm against Soviet diplomacy with US support and international aid for the Afghan refugees, or exploring a softer line toward Moscow while keeping as close as possible to Washington.

An important pressure on President Zia is the refugees. Two million of them (the United Nations High Commissioner for Refugees estimates 1.6 million, while Pakistan says 22.5 million) are camped along the broad arc from Peshawar in the northwest to Quetta, further south.

They have millions of head of livestock with them, all grazing on land claimed by local tribes.

Two issues confront President Zia. One is financial: Who is to pay for maintaining the refugees? The US contributed $100 million last year. Western Europe, Japan, and Australia gave another $100 million. Pakistan says it spent $200 million of its own money. For how long will other countries keep up their payments?

Already some European countries are saying privately they cannot sustain another Palestinian-type of aid program for 35 years or more.

The other major issue is tribal: The refugees are Pashto-speakers. In Baluchistan Province, where Baluchis are in the majority with 1.6 million, there are now almost 1 million Pashto-speakers (half a million local, half a million Afghans). This alarms the Baluchis. Their separatist movement appears to have quieted since the Soviet troops arrived next door, but the Soviets could try to exploit it at any time.

Despite Pakistan's present pro-American tilt, a US visitor quickly detects, even at senior levels, reservations about the United States.

Conversations recall how Washington cut off spare parts to Pakistani armed forces during the war with India in 1965. US spare parts to India also ended, but the effect was much greater here. Pakistani arms are largely US, while India's are largely Soviet and French.

The Pakistani sources who revealed the request to the weekly newspaper editor said the man is a close confidant of President Zia. His weekly is published in the Urdu language. All publications are under strict censorship during the current period of martial law. The editor is said to be still working on his report.

Mr. BUMPERS. Mr. President, I would like to be added as a cosponsor to the resolution of the Senator from Oregon, the resolution of disapproval.

Mr. HATFIELD. I thank the Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HATFIELD. I thank the distinguished Senator and welcome his vital support for this initiative.

(The name of Mr. WEICKER was also added as a cosponsor of the resolution.)

SOUTHEAST ASIA REVISITED

Mr. HAYAKAWA. Mr. President, I have just read a most perceptive article in the October 12 issue of the U.S. News & World Report on current attitudes of Southeast Asian leaders toward international politics in the region. The views expressed by the author, Marvin Stone, closely coincide with mine based on my trip to the area last August.

The article points out that many attitudes have changed since the Vietnam war. Vietnam is now perceived as the principal threat to regional security. The Soviet Union is seen by most countries to be a greater immediate threat than China. Although suspicions of the latter remain, the Association of Southeast Asian Nations (ASEAN) has grown into an important economic and political grouping. The American presence is again welcome in Southeast Asia, both in terms of trade and investment and as a guarantor of security. Southeast Asian leaders stress that they are not interested in the return of American troops, but they would welcome increased military aid. In order to keep vital Southeast Asian sealanes open, sufficient U.S. naval strength to balance Soviet naval power is seen as of paramount importance.

Because of the valuable insights this article gives us on this important part of the world, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SOUTHEAST ASIA REVISITED

(By Marvin Stone)

BANGKOK.—When I left Southeast Asia 15 years ago, it was in a mood of despair. I had become convinced in Vietnam that we were trapped in a hopeless war. America's resolve in 1966 was fast melting away. The fighting was not going well, and a corrupt regime in Saigon was unworthy of more GI blood.

Still, we pursued the war for almost another decade out of fear that all Southeast Asia would fall, country by country, like so many tumbling dominoes. America, we were told, could ill afford to abandon this rich region to the advancing Communists.

Well, we were wrong. There was no chain reaction. Non-Communist Asia still stands firm, thriving as never before. Disgrace has not followed defeat. American influence, while muted, again is gaining. In fact, the wheel has come full circle: Once more, American friendship and support are being courted.

On the personal level, the residual warmth that remains for the American people is surprisingly full and open. The present U.S. President is respected. Even the often-critical leftist press shows unusual restraint when dissecting U.S. foreign policy.

Not only has the worst not happened but, except for the unwelcome entry of the Soviet Union in these parts, there have been some unpredictable and pleasant pluses for the U.S. in Southeast Asia.

Item. Communist China has split with the Communist Hanoi regime and claims to be eager for U.S. support in its struggle against the Soviet Union.

Item. Hanoi is in disfavor everywhere but Moscow. Its aggression against neighboring Cambodia has made it an international outcast.

Item. Thailand, marked as one of the likely falling dominoes, instead is a linchpin of a defense grouping called the Association of Southeast Asian Nations (ASEAN)—along with the Philippines, Malaysia, Singapore and Indonesia. Says Adm. Robert L. J. Long, commander of U.S. forces in the Pacific: "ASEAN is one of the true success stories of the past few years."

Item. Whatever the U.S. did not accomplish in Vietnam, its sacrifice there gave countries of the region vital years to build their security—modestly in military terms, more importantly in political and economic terms. Asians, like Americans, want to share in a prosperous, nontotalitarian world. The American model is admired and its free-enterprise system is envied and emulated.

GROPING FOR A POLICY

The American resurgence in Southeast Asia has not come overnight, nor easily. In 1975, when I accompanied President Ford to Peking, then on to Indonesia and the Philippines, the U.S. was scrambling to shape a new course in the wake of the debacle in Vietnam.

On that 24,000-mile journey with Ford, we traveled with the uneasy realization that we were groping, at best, for some way to put the U.S. on a firmer footing in Asia other than through those policies of the past that had drawn the U.S. into three wars in Asia in a single generation—the Pacific action of World War II, Korea and, of course, the long struggle in Vietnam.

An Indonesian editor told me that while his countrymen did not hold the U.S. at fault for the collapse of South Vietnam—they blamed the South Vietnamese—"it is better that you stay home from now on; a white army cannot fight in Asia and have support of local people."

At that time, the U.S. had not yet found a new, natural relationship with its remaining friends. There was political trouble brewing internally throughout the region. Economies were fragile. No one knew what to expect next. America's emerging policy, wisely, was to keep hands off and let the Asians sort things out for themselves.

WELCOME BACK, AMERICA

When the United States was "invited" to withdraw its massive air and naval forces from Thailand in 1975, the retreat from Southeast Asia was complete. America simply was not regarded as having the will to defend further against Communism, and the Asian states were hopeful that, without the U.S. military presence as a lightning rod, Hanoi would be satisfied not to push beyond its unified Vietnam.

All that changed in 1978 when the regime in Hanoi, heady with ambition and hungry for Cambodia's resources, invaded the country that now calls itself Kampuchea. It became apparent that the Vietnamese would be there, and in Laos—the third of the Indo-China states—for a long time.

That invasion accomplished two things:

First, it split Communist China and Communist Vietnam. Peking not only saw Hanoi encroaching on an area it considered in its own sphere, but realized that Russia was now supporting the Vietnamese occupation of Cambodia, in a real way increasing its encirclement of the mainland. Russia today, by estimates in Bangkok, is spending 6 million dollars a day to support the 200,000 Vietnamese troops fighting off attempts by 30,000 Cambodian guerrillas to retake their country.

Second, the invasion gave real and sudden purpose to the five ASEAN allies. For the first time in history, the Soviets had made an entry into their region. Now the threat from the Communist world was a triple-header—the Soviets adding to traditional suspicions about China's ultimate designs and the aggressive ambitions of the Vietnamese.

All at once, five nervous nations started beckoning renewed American interest and support. They wanted to feel that their concern was shared by Washington. At this point, it is not so much a matter of seeking American troops as it is availability of U.S. forces in a showdown.

Thailand's Foreign Minister, Air Chief Marshall Sitthi Savetsila, in a lengthy conversation in his office, proved to be one who draws the line at inviting U.S. forces back to his country, even though Vietnamese troops stand at his borders. "Yet," he says, "if things get worse, or if your forces must go into action in the Indian Ocean area, you can count on us to make our bases available."

Not only Thailand, but Singapore and Indonesia are building new runways capable of handling the heaviest American bombers. Today, U.S. forces are present only at Subic Bay and Clark Field in the Philippines. And while only Singapore is pressing openly for a return of U.S. forces to the region, all are looking once again to the U.S. for future insurance.

THE TRIPLE THREAT

Not everyone agrees on where the danger lies. To the Thais, the grave threat today is not from the ancient antagonist, China, but the nearby Vietnamese and their Soviet backers. The Thais are going out of their way to improve relations with Peking. "Our national interests now coincide with China," a Thai official declares. "They fear the Soviets and so do we." Singapore, too, regards the Soviets and Hanoi as Enemy No. 1. "They are the hard-line states," an American diplomat reports.

Indonesia and Malaysia—half of Malaysia's population is of Chinese ancestry—continue to view Communist China as the main threat. Indonesia, after 14 years, still refuses to re-establish diplomatic relations with Peking. Says a diplomat from Singapore: "Thailand will be sorry 10 years from now that they downgraded the Chinese danger."

What of the fifth ASEAN nation—the Philippines? Reports an American official here: "They are really on the sidelines. They have enough internal problems to occupy all their attention—and then some."

AS U.S. SEES IT

Most disconcerting to American officials are Soviet designs. "They have finally been able to establish a foothold in Southeast Asia," says one. "They are in a position to expand their intelligence collection and their air reconnaissance and, with their naval forces, they pose a threat to the U.S. and Japan—and the lifeline to Southeast Asia."

In fact, the Soviets are all over Asia. In the north, they have perhaps 50 divisions facing China. To the west, they have found

a renewed ally in India. They are supporting the Vietnamese in Cambodia. They are upgrading their Pacific air forces with modern Backfire bombers. Admiral Long reports that in 1980 "the Soviets added more modern bombers—200 of them—to their Pacific forces than the U.S. has total fighters in the Pacific." Long cites the presence of the latest Soviet nuclear attack submarines, cruise-missile subs, modern cruisers and one of their two aircraft carriers.

It is Vietnam, at sword's point with China, that has opened the door to the Russians, and Moscow shows no reluctance to take advantage of the opening.

You find Soviet naval ports at two bases the U.S. spent hundreds of millions of dollars to establish—at Da Nang and Cam Ranh Bay in South Vietnam. In the view of our military experts, Moscow's aim is not only to outflank mainland China, but to sit astride the key sea-lanes of the Far East. For the first time, the Soviet Navy has broken out of the northern Pacific port of Vladivostok, free to range over thousands of more miles of Asian waters.

Martin L. Lasater, an authority on the Far East, writing in the September issue of Asia Report, makes this point:

"A conflict between the armed forces of the U.S. and the Soviet Union in the Indian Ocean [some 11,000 miles from either coast of the U.S.] would inevitably involve the Pacific fleets of both powers. Whoever gained supremacy over the sea-lanes around the periphery of Asia would determine the course of events within the Indian Ocean. For the U.S., operating at such tremendous distances from its home ports, control over the sea-lanes and local areas of operation would be essential. Conversely, the Soviets would seek to deny freedom of movement to American units. The destruction of forward deployed naval units and support facilities would be of utmost importance to both sides. Naval air, whether carrier or land-based, would play an essential role in the struggle, as would submarines and their ASW counterparts.

"Given the present force levels available to the U.S. and U.S.S.R. in the Indian and Pacific oceans, a favorable outcome of that struggle would be in doubt, especially if it were initiated by a Soviet surprise attack against our surface fleet. . . ."

Lasater concludes: "An increased military budget, tough rhetoric and more consultations with its Asian allies on military and strategic matters are important steps in the right direction. But none of these can replace the absolute necessity of increasing the size of the American military presence in the Far East."

There is no question that since the retreat from Vietnam, U.S. military strength in Asia has gone downhill. The forward island-defense line that was built after World War II has shrunk. The Pacific Fleet is stretched many thousands of miles from Pearl Harbor to the Indian Ocean. Observes Admiral Long:

"We have insufficient forces in the Pacific to handle all the contingencies simultaneously. Our forces are spread too thin. We have drawn down the naval forces in the western Pacific to move forces into the Indian Ocean, into the vital Persian Gulf area. We do not have sufficient air forces, and I have estimated that we are short somewhere around 25 to 30 percent."

WILL AMERICA RETURN?

The great guessing game in Southeast Asia is whether American interest in returning to the scene of so recent a disaster will soon be rekindled.

As many Asians see it, America's stake in this part of the world goes beyond an interest in helping contain Vietnamese-Soviet expansion beyond Indo-China. It involves a tangled web of strategic crosscurrents involving the Soviets, the Chinese, free Asian nations, oil and trade.

Since the turn of this century, the blood of a half-million Americans attests to America's historic role as a major power in the Far East. Yankee clippers carried American trade to the Pacific a century and a half ago. By 1833, we had a treaty of commerce with the Kingdom of Siam, now Thailand. Today, that country and its four ASEAN allies are our fifth largest trading partner. In all, U.S. investments in Asia, excluding Japan, run to more than 20 billion dollars, and the return on that investment is the highest anywhere in the world. Two-way trade with Asia, again excluding Japan, totals more than 113 billion dollars a year.

When a visitor tells his Asian friends that the people of the United States have no desire to return with troops to Southeast Asia, that the scars of Vietnam have not healed at home, there is universal acceptance of this explanation.

Yet some Asians believe that the wedge the Soviets are driving into the area may force Washington's hand over the next several years. "The future may depend on the clash of interests of the two superpowers in this region," says one Thai official, "and whether Peking can induce you to take Soviet pressure off China's southern flank."

That is a worrisome prospect to Asians. They no more want to see Americans fighting in Southeast Asia than Americas want to return.

What, then, do the Asians want?

A leading Thai magazine, its cover reproduced on page 91, welcomes the report that the U.S. will increase its military aid to Thailand from 50 to 80 million dollars next year. It then sums up a widely held view: "It is necessary for the U.S. to render more arms assistance to friendly countries rather than sending its men to help fight the war the same as in Vietnam. . . . The job can be done better by the Thais, and with less expense to the U.S."

Singapore's Prime Minister, Lee Kuan Yew, dealt recently with the picture this way: "The naval balance must be a rough U.S. equivalent to Soviet naval power in the area. There must be sufficient American forces to influence the thinking of governments, to assure them that outside intervention against them would not be permitted and to caution them that they themselves should not embark on ventures."

I asked the man who, as Prime-Minister of Thailand in 1975, threw the Americans out, what U.S. policy should be. Replied Kukrit Pramoj: "The American image has been restored in Thailand. Even the leftist press reflects no animosity. But the worst thing that could happen is for you to return physically to bases in Thailand. What your country should do is maintain your image as the most powerful nation on earth. Stand up to the Russians everywhere. We take heart from that."

From a U.S. diplomat: "We can increase economic aid and aid for military training. But we are not, and should not, be getting out front and forcing issues. Some may think it's not much of a policy, but it's not a bad one."

No one may be certain of where we should, or will, go next in Southeast Asia. But people here remind you that the world is menaced by the tyranny of Communist regimes. They send a message that they share in our own struggles to resist domination by these tyrants.

ARMS SALES TO TAIWAN

Mr. HAYAKAWA. Mr. President, I have just read a most persuasive article on the question of arms sales to Taiwan, which I would like to share with my colleagues. It was written by Edward N. Luttwak, senior fellow at the Georgetown University Center for Strategic and International Studies, and appeared in the November 3, 1981 issue of the Wall Street Journal.

Mr. Luttwak argues that the administration has made a serious mistake by delaying its decision on selling modern fighter aircraft to Taiwan. The delay has allowed China to mount a high-pressure campaign with the administration against further arms sales to Taiwan, and has focused attention on the issue internationally and within China—thus adding to the eventual embarrassment of Deng Ziaoping and his colleagues when the United States does supply planes to Taiwan. In addition, the delay has damaged our credibility with Taiwan in terms of our commitment under the Taiwan Relations Act to provide defensive arms.

Beyond concern for Taiwan, however, Luttwak asserts that we are risking our credibility as a security partner with both the Southeast Asians and China itself. The Asian nations are counting on us as a protective shield against Vietnam, in the short term, and China in the long run. The readiness of the United States to keep its promise to Taiwan is the obvious test case, the repudiation of which would have grave consequences for our diplomatic and strategic position in Southeast Asia. China is in the process of developing a security relationship with the United States which would help deter the Soviet threat in East Asia. While the leaders of the Peoples' Republic will no doubt express their displeasure if Washington fulfills its commitment to Taiwan, they will also recognize, albeit paradoxically, that the very act is proof of American reliabilty.

As I feel Mr. Luttwak offers some very compelling arguments on this controversial issue, I hope my colleagues will take the time to read his article. I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SELLING ARMS TO TAIWAN: THE SOONER THE BETTER

(By Edward N. Luttwak)

In a high-pressure diplomatic campaign, the Peking government is trying to force the Reagan administration to renounce further arms sales to Taiwan. American Congressmen and former officials visiting mainland China have been told that the "normalization" agreement of December 1978 included—or at least implied—a tacit promise to "phase out" the sale of weapons to Taiwan, and that the time has come to do that.

It is safe to assume that the same demand is being pressed in the diplomatic dialogue between Washington and Peking. During his China visit, former President Carter performed a major service when he flatly denied that his administration had promised to cut off arms sales to Taiwan; but then, in his very characteristic manner, Mr. Carter made further statements that weakened the impact of his clarification. Always gracious but also relentless, Chinese diplomacy, including the individual persuasion of the many important American guests so warmly received, is having its effect: A number of

Senators have already expressed support for the mainland Chinese position.

In the meantime, the administration is still acting with no great sense of urgency. Partly because of the fairly large arms sales of the last year of the Carter administration, and partly because of the understandable desire to make its own appraisal of Taiwan's military needs, Mr. Reagan's team has yet to authorize its first arms sale to that country. The Republic of China government in Taipei has also been patient, no doubt because it remains confident that the Taiwan Relations Act of 1979 and the President's personal goodwill ultimately guarantee that the weapons will be supplied.

But in the light of Peking's campaign, the administration's delay seems unfortunate: Inevitably, the diplomatic offensive is having its effect within China also, focusing attention on the issue and thus adding to the eventual embarrassment of Deng Xiaoping and his men when the U.S. does supply something to Taiwan, as it must. What could have been a minor affair some months ago may become a first-class diplomatic row if the decision is delayed much longer.

To be sure, even within the administration there are those who would simply accept the Chinese demand, and who welcome the prospect of a "peaceful reunification" that would be imposed on a disarmed Taiwan. But even if there were no Taiwan Relations Act to give the full force of law to the American commitment to do so, it would still be in our interest to supply Taiwan with the weapons it needs to deter attack.

That Taiwan's dynamic and increasingly open society of 17 million people is intrinsically worthy of our concern is obvious. So is the fact that to repudiate our promise must damage our credibility. But there is also a more specific reason for honoring our commitment to Taiwan.

As Secretary of State Haig learned during his recent visit to the region, the governments of Southeast Asia agree with the U.S. in seeing Vietnam and its Soviet patron as the salient threat to their security—but only in the short run. For the long term, it is China that presents the dominant threat to their independence, and they foresee a situation in which a Soviet-supported Vietnam could become a most useful barrier against Chinese power.

The leaders of 260 million Southeast Asians nevertheless strongly favor the growth of Sino-American cooperation, but only on the understanding that the U.S. will remain active and credible in the region as their residual guarantor against Chinese power. Otherwise, much against their inclinations, they will be forced to seek reassurance elsewhere, by developing a security relationship with China's natural counterweight, the Soviet Union. In this setting, the readiness of the U.S. to keep its promise to Taiwan is the obvious test case, and a repudiation of the commitment would have grave consequences.

In spite of the huge disparity in their overall military power, the maintenance of a deterrent balance between Taiwan and China is by no means impossible. For it is not the totality of Chinese power that must be balanced but only that small fraction that has the strategic reach to threaten Taiwan. So far, that deterrent balance is well assured, but it will take the prompt release of modern fighter aircraft and some naval munitions to maintain the balance during the rest of this decade.

The decision to sell those weapons is already greatly overdue. The U.S. can renounce neither its friendship with Peking nor its obligation to Taiwan. If Washington is resolute in fulfilling its commitment to Taiwan, the leaders of the People's Republic will no doubt express their displeasure, but they will also recognize that the very act is proof of American reliability. Whatever else Peking needs, it does not need an unreliable partner in facing an intense and growing Soviet threat to its own security.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting a withdrawal and sundry nominations which were referred to the Committee on Armed Services.

(The nominations received today are printed at the end of the Senate proceedings.)

CONTINUATION OF EMERGENCY SITUATION IN IRAN—MESSAGE FROM THE PRESIDENT—PM 90

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which was referred to the Committee on Foreign Relations:

To the Congress of the United States:

Section 202(d) of the National Emergencies Act (50 U.S.C. 1622(d)) provides for the automatic termination on the anniversary date of a declaration of emergency, unless prior to the anniversary date the President publishes in the *Federal Register* and transmits to Congress a notice that the emergency authority is to continue in effect beyond such anniversary date. On November 12, 1980 President Carter caused to be published in the *Federal Register* and transmitted to the Congress a notice that the emergency declared on November 14, 1979 with respect to Iran was to continue in effect beyond the November 14, 1980 anniversary date. I have sent to the *Federal Register* for publication the attached notice stating that the Iran emergency is to continue in effect beyond the November 14, 1981 anniversary date.

Although the crisis which existed in the fall of 1979 and throughout 1980 between the United States and Iran has substantially abated, the internal situation in Iran remains uncertain. The war between Iran and Iraq continues and the Soviet Union still occupies Afghanistan. In January 1981, Iran and the United States entered into agreements for release of the hostages and the settlement of opposing claims. An international arbitral tribunal has been established for the adjudication of claims of U.S. nationals against Iran and by Iranian nationals against the United States; but it must decide four disputes between the United States and Iran over the proper interpretation of the agreements before it can address private party claims. It appears that full normalization of commercial and diplomatic relations between the U.S. and Iran will require more time. In these circumstances, I have determined that it is necessary to maintain in force the broad authorities that may be needed to respond to the process of implementation of the January 1981 agreements with Iran and the eventual normalization of relations.

I will see that the Congress is kept informed of significant developments.

RONALD REAGAN.

THE WHITE HOUSE, *November 12, 1981.*

MESSAGE FROM THE HOUSE RECEIVED DURING THE RECESS

Under the authority of the order of the Senate of November 10, 1981, the Secretary of the Senate, on November 11, 1981, received a message from the House of Representatives announcing that the House disagrees to the amendments of the Senate to the bill (H.R. 4522) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending September 30, 1982, and for other purposes; agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. DIXON, Mr. NATCHER, Mr. STOKES, Mr. WILSON, Mr. LEHMAN, Mr. WHITTEN, Mr. COUGHLIN, Mr. GREEN, Mr. PORTER, and Mr. CONTE as managers of the conference on the part of the House.

MESSAGES FROM THE HOUSE

ENROLLED BILL SIGNED

At 1:16 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the Speaker has signed the following enrolled bill:

H.R. 4734. An act to recognize the organization known as the Italian American War Veterans of the United States.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

At 4:16 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bill, without amendment:

S. 1322. An act to designate the U.S. Department of Agriculture Boll Weevil Research Laboratory Building, located adjacent to the campus of Mississippi State University, Starkville, Miss., as the "Robey Wentworth Harned Laboratory"; to extend the delay in making any adjustment in the price support level for milk; and to extend the time for conducting the referenda with respect to the national marketing quotas for wheat and upland cotton.

The message also announced that the House disagrees to the amendment of the Senate to the bill (H.R. 3455) to authorize construction at military installations for fiscal year 1982, and for other purposes; agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. PRICE, Mr. BRINKLEY, Mr. MONTGOMERY, Mr. KAZEN, Mr. WON PAT, Mr. DICK-

INSON, Mr. TRIBLE, Mr. WHITEHURST, and Mr. MITCHELL of New York as managers of the conference on the part of the House.

The message further announced that the House disagrees to the amendment of the Senate to the bill (H.R. 3413) to authorize appropriations for the Department of Energy for national security programs for fiscal year 1982, and for other purposes; agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appointed Mr. PRICE, Mr. STRATTON, Mrs. BYRON, Mr. MAVROULES, Mr. DICKINSON, Mrs. HOLT, and Mr. HILLIS as managers of the conference on the part of the House.

The message also announced that the House disagrees to the amendments of the Senate to the bill (H.R. 4144) making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for other purposes; agrees to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and appoints Mr. BEVILL, Mr. BOLAND, Mrs. BOGGS, Mr. CHAPPELL, Mr. FAZIO, Mr. WATKINS, Mr. BENJAMIN, Mr. WHITTEN, Mr. MYERS, Mr. BURGENER, Mrs. SMITH of Nebraska, Mr. RUDD, and Mr. CONTE as managers of the conference on the part of the House.

ENROLLED BILLS SIGNED

The message also announced that the Speaker has signed the following enrolled bills:

S. 195. An act to recognize the organization known as the U.S. Submarine Veterans of World War II;

S. 999. An act to amend the Earthquake Hazards Reduction Act of 1977 and the Federal Fire Prevention and Control Act of 1974 to authorize the appropriation of funds to the Director of the Federal Emergency Management Agency to carry out the earthquake hazards reduction programs and the fire prevention and control program, and for other purposes; and

H.R. 4792. An act to amend title 10, United States Code, to improve the military justice system.

The enrolled bills were subsequently signed by the President pro tempore (Mr. THURMOND).

At 4:44 p.m., a message from the House of Representatives, delivered by Mr. Berry, announced that the House agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 4035) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1982, and for other purposes; it recedes from its disagreement to the amendments of the Senate numbered 1, 8, 22, 25, 31, 85, 92, 93, 101, and 114 to the bill, and has agreed thereto; and that the House recedes from its disagreement to the amendments of the Senate numbered 2, 4, 6, 9, 11, 12, 20, 21, 33, 35, 36, 41, 55, 64, 73, 74, 77, 78, 86, 95, 97, 104, 106, 111, 112, and 117 to the bill, and has agreed thereto, each with an amendment, in which it requests the concurrence of the Senate.

ENROLLED BILL SIGNED

At 5:39 p.m., a message from the House of Representatives, delivered by Mr. Gregory, announced that the Speaker has signed the following enrolled bill:

S. 1322. An act to designate the United States Department of Agriculture Boll Weevil Research Laboratory building, located adjacent to the campus of Mississippi State University, Starkville, Miss., as the "Robey Wentworth Harned Laboratory"; to extend the delay in making any adjustment in the price support level for milk; and to extend the time for conducting the referenda with respect to the national marketing quotas for wheat and upland cotton.

The enrolled bill was subsequently signed by the President pro tempore (Mr. THURMOND).

ENROLLED BILLS PRESENTED

The Secretary reported that on today, November 12, 1982, he had presented to the President of the United States the following enrolled bills:

S. 195. An act to recognize the organization known as the United States Submarine Veterans of World War II;

S. 999. An act to amend the Earthquake Hazards Reduction Act of 1977 and the Federal Fire Prevention and Control Act of 1974 to authorize the appropriation of funds to the Director of the Federal Emergency Management Agency to carry out the earthquake hazards reduction programs and the fire prevention and control program, and for other purposes; and

S. 1322. An act to designate the United States Department of Agriculture Boll Weevil Research Laboratory building, located adjacent to the campus of Mississippi State University, Starkville, Mississippi, as the "Robey Wentworth Harned Laboratory"; to extend the delay in making any adjustment in the price support level for milk; and to extend the time for conducting the referenda with respect to the national marketing quotas for wheat and upland cotton.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-2193. A communication from the Acting Director of the Defense Security Assistance Agency transmitting, pursuant to law, a report on a proposed foreign military sale to Thailand; to the Committee on Armed Services.

EC-2194. A communication from the Assistant Secretary of the Air Force for Research, Development, and Logistics transmitting, pursuant to law, notice of conversion of television maintenance at Wright-Patterson Air Force Base, Ohio, to performance under contract; to the Committee on Armed Services.

EC-2195. A communication from the Principal Deputy Assistant Secretary of Defense for Manpower, Reserve Affairs, and Logistics transmitting, pursuant to law, reports relative to the disposal of certain excess properties to the City of Key West, Florida; to the Committee on Armed Services.

EC-2196. A communication from the Secretary of the Treasury transmitting, pursuant to law, the annual report for fiscal year 1980 on the operations of the Exchange Stabilization Fund; to the Committee on Banking, Housing, and Urban Affairs.

EC-2197. A communication from the Under Secretary of Commerce for International Trade transmitting, pursuant to law, a report on an extension of foreign policy controls on export of aircraft equipment to Libya; to the Committee on Banking, Housing, and Urban Affairs.

EC-2198. A communication from the Administrator of the Federal Aviation Administration transmitting, pursuant to law, the Administration's semiannual report on the effectiveness of the Civil Aviation Security Program; to the Committee on Commerce, Science, and Transportation.

EC-2199. A communication from the Chairman of the National Transportation Safety Board transmitting, pursuant to law, a copy of the Board's appeal from the Administration's proposed budget reductions for the agency; to the Committee on Commerce, Science, and Transportation.

EC-2200. A communication from the Secretary of Commerce transmitting, pursuant to law, the fifth report concerning fishery management plans, regulations, and activities; to the Committee on Commerce, Science, and Transportation.

EC-2201. A communication from the Railroad Retirement Board transmitting, pursuant to law, the Board's report under the Milwaukee Railroad Restructuring Act; to the Committee on Commerce, Science, and Transportation.

EC-2202. A communication from the Administrator of the National Aeronautics and Space Administration transmitting, pursuant to law, a report on contracts negotiated by the Administration under 10 U.S.C. 2304 (a)(11) and (16) for the period January 1, 1981 through June 30, 1981; to the Committee on Commerce, Science, and Transportation.

EC-2203. A communication from the Acting Executive Secretary of the Office of the Secretary of Defense transmitting, pursuant to law, the October-August, 1981 Report on Small Business Participation in Department of Defense Procurement; to the Committee on Small Business.

EC-2204. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Improved Oversight and Guidance Needed to Achieve Regulatory Reform at DOE; to the Committee on Energy and Natural Resources.

EC-2205. A communication from the Secretary of Agriculture transmitting, pursuant to law, a multiple-use plan for the management of the National Forest System lands in the Alpine Lakes management unit in the State of Washington; to the Committee on Energy and Natural Resources.

EC-2206. A communication from the Chairman of the Nuclear Regulatory Commission, transmitting, pursuant to law, a final rule promulgated by the Commission relating to the protection of certain unclassified material; to the Committee on Environment and Public Works.

EC-2207. A communication from the Deputy Assistant Secretary of State for Congressional Relations, transmitting, a draft of proposed legislation to authorize support to Radio Broadcasting to Cuba, Incorporated; to the Committee on Foreign Relations.

EC-2208. A communication from the Acting Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the sixty day period prior to November 4, 1981; to the Committee on Foreign Relations.

EC-2209. A communication from the Acting Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the sixty day period prior to October 28, 1981; to the Committee on Foreign Relations.

EC-2210. A communication from the Director of the General Accounting Office, transmitting, pursuant to law, a report entitled "Framework For Assessing Job Vul-

nerability To Ethical Problems"; to the Committee on Governmental Affairs.

EC-2211. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Fraud In Government Programs: How Extensive Is It? How Can It Be Controlled? Volume III"; to the Committee on Governmental Affairs.

EC-2212. A communication from the Assistant Vice President and Director of Human Resources of the Farm Credit Banks of Springfield, transmitting, pursuant to law, the disclosure for the Group Retirement Plan for Federal Land Bank Associations, Production Credit Associations and Farm Credit Banks in the First Farm Credit District; to the Committee on Governmental Affairs.

EC-2213. A communication from the Assistant Secretary-Treasurer of the Trustees of the Seventh Farm Credit District Employee Benefits Program, transmitting, pursuant to law, the annual report on the financial condition of the Retirement Plan for Employees of the Seventh Farm Credit District for the year ending April 30, 1981; to the Committee on Governmental Affairs.

EC-2214. A communication from the Director of the International Communication Agency, transmitting, pursuant to law, a report on a proposed new Privacy Act system of records; to the Committee on Governmental Affairs.

EC-2215. A communication from the Inspector General of the Department of Agriculture, transmitting, pursuant to law, a matching report for a computer match of Federal employees against Farmers Home Administration records; to the Committee on Governmental Affairs.

EC-2116. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, a special report on refugee resettlement; to the Committee on the Judiciary.

EC-2217. A communication from the Secretary of Education transmitting, pursuant to law, a review of final regulations for graduate and professional study fellowships program transmitted to the Federal Register for publication; to the Committee on Labor and Human Resources.

EC-2218. A communication from the Chairman of the National Mediation Board transmitting, pursuant to law, the Annual Report of the Board; to the Committee on Labor and Human Resources.

EC-2219. A communication from the Executive Director of the Committee for Purchase from the Blind and Other Severely Handicapped transmitting, pursuant to law, the annual report of the Committee for the fiscal year ending September 30, 1980; to the Committee on Labor and Human Resources.

EC-2220. A communication from the Chairman of the National Commission for Employment Policy transmitting, pursuant to law, the annual report of the Commission; to the Committee on Labor and Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. ABDNOR, from the Committee on Environment and Public Works, with amendments:

S. 1493. A bill to deauthorize several projects within the jurisdiction of the Army Corps of Engineers (Rept. No. 97-270).

By Mr. HATFIELD, from the Committee on Appropriations, with amendments:

H.R. 4241. An act making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes (Rept. No. 97-271).

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. ZORINSKY:

S. 1837. A bill to designate the building known as the "Lincoln Federal Building and Courthouse" in Lincoln, Nebr., as the "Robert V. Denny Federal Building and Courthouse"; to the Committee on Environment and Public Works.

By Mr. PROXMIRE:

S. 1838. A bill for the relief of Cesar Noel Orantes; to the Committee on the Judiciary.

By Mr. DURENBERGER (for himself, Mr. SYMMS, Mr. MITCHELL, Mr. MOYNIHAN, Mr. ROTH, Mr. BOREN, Mr. MATSUNAGA, Mr. CHAFEE, Mr. HEINZ, Mr. WEICKER, and Mr. NUNN):

S. 1839. A bill to amend the effective-date provision of section 403(b)(3) of the Windfall Profit Tax Act of 1980 (Public Law 96-223) to further defer the effective date of certain provisions providing for the recognition as income of LIFO inventory amounts; to the Committee on Finance.

By Mr. DURENBERGER:

S. 1840. A bill to amend section 170 of the Internal Revenue Code of 1954 to increase the amounts that may be deducted for maintaining exchange students as members of the taxpayer's household; to the Committee on Finance.

S. 1841. A bill to amend the Internal Revenue Code of 1954 to allow a credit for transportation expenses incurred in connection with foreign exchange programs; to the Committee on Finance.

By Mr. DODD (for himself and Mr. WEICKER):

S. 1842. A bill to provide that certain trusts shall not be treated as private foundations; to the Committee on Finance.

By Mr. DODD:

S. 1843. A bill to repeal the additional duties imposed until 1993 under the Omnibus Reconciliation Act of 1980 on imported ethyl alcohol; to the Committee on Finance.

By Mr. JOHNSTON (for himself, Mr. WEICKER, Mr. BRADLEY, Mr. MURKOWSKI, Mrs. HAWKINS, Mr. MATSUNAGA, and Mr. BUMPERS):

S. 1844. A bill to facilitate the national distribution and utilization of coal; to the Committee on Energy and Natural Resources.

By Mr. MATHIAS (for himself, Mr. EAGLETON and Mr. RUDMAN):

S. 1845. A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act and the charter of the District of Columbia with respect to the provisions allowing the District of Columbia to issue general obligation bonds and notes and revenue bonds, notes, and other obligations; to the Committee on Governmental Affairs.

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 1846. A bill to amend title 38, United States Code, to authorize the Administrator of Veterans' Affairs to provide incentive special pay for certain dentists in the Department of Medicine and Surgery of the Veterans' Administration; to the Committee on Veterans' Affairs.

By Mr. HELMS:

S. 1847. A bill to require an annual authorization for the Federal court system excluding the Supreme Court; to the Committee on the Judiciary.

By Mr. KASTEN:

S.J. Res. 125. A joint resolution authorizing and requesting the President to proclaim National Junior Bowling Week"; to the Committee on the Judiciary.

By Mr. MURKOWSKI (for himself, Mr. ABDNOR, Mr. ANDREWS, Mr. D'AMATO, Mr. DENTON, Mr. EAST, Mr. GORTON, Mr. GRASSLEY, Mrs. HAWKINS, Mr. KASTEN, Mr. MATTINGLY, Mr. NICKLES, Mr. QUAYLE, Mr. RUDMAN, Mr. SPECTER, and Mr. SYMMS):

S.J. Res. 126. A joint resolution to authorize and request the President to designate May 7, 1982, as "Vietnam Veterans' Day"; to the Committee on the Judiciary.

By Mr. COCHRAN (for himself and Mr. STENNIS):

S.J. Res. 127. A joint resolution to grant official recognition to the International Ballet Competition; to the Committee on Labor and Human Resources.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. ZORINSKY:

S. 1837. A bill to designate the building known as the Lincoln Federal Building and Courthouse in Lincoln, Nebr., as the "Robert V. Denny Federal Building and Courthouse"; to the Committee on Environment and Public Works.

ROBERT V. DENNEY FEDERAL BUILDING AND COURTHOUSE

● Mr. ZORINSKY. Mr. President, today I am introducing S. 1837, a bill to designate the Lincoln Federal Building and Courthouse in Lincoln, Nebr., as the "Robert V. Denny Federal Building and Courthouse." I believe that designating the Lincoln Federal Building and Courthouse in honor of the late Judge Denney is fitting and reflective of his sincere devotion and lifelong commitment to the State of Nebraska.

Some men hope to conquer one dream in their lifetime. Judge Denney conquered many dreams in his short lifetime. Graduating from Creighton University Law School in 1939, Denney was a third generation attorney who carried on the tradition in his family practice in Fairbury. His list of public service accomplishments include 2 years working with the Federal Bureau of Investigation, 4 years of service to the U.S. Marine Corps, and 4 years of service to First District Nebraskans in the U.S. House of Representatives. His dedication to Nebraskans did not end at the close of his second term in the House. He served Nebraska as a U.S. Federal district court judge before his retirement and death only just this year.

Designating the Lincoln Federal Building and Courthouse in Judge Denney's honor is a proper memorial to a man who gave so generously of his time and energy on behalf of his fellow Nebraskans and Americans.●

By Mr. DURENBERGER (for himself, Mr. SYMMS, Mr. MITCHELL, Mr. MOYNIHAN, Mr. ROTH, Mr. BOREN, Mr. MATSUNAGA, Mr. CHAFEE, Mr. HEINZ, Mr. WEICKER, and Mr. NUNN):

S. 1839. A bill to amend the effective date provision of section 403(b)(3) of the Windfall Profit Tax Act of 1980 (Public Law 96-223) to further defer the effective date of certain provisions providing for the recognition as income of LIFO inventory amounts; to the Committee on Finance.

LIFO RECAPTURE LEGISLATION

Mr. DURENBERGER. Mr. President, today I am introducing, along with my colleagues Mr. SYMMS, MITCHELL, MOYNIHAN, ROTH, BOREN, MATSUNAGA, CHAFEE, HEINZ, WEICKER, and NUNN, a bill to defer for 1 year the effective date of the "Last-In/First-Out"—LIFO—reserve recapture that would tax the LIFO reserve on the liquidation of a business.

In the Economic Recovery Tax Act of 1981, Congress made it abundantly clear that it wanted to encourage the use of the "Last-In/First-Out"—LIFO—accounting method by small businesses. An amendment introduced by my distinguished colleague from Maine (Mr. MITCHELL) and cosponsored by myself and several other Senators, made it much simpler for small businesses in particular to convert from the "First-In/Last-Out"—FILO—accounting method to the more realistic LIFO method.

Unfortunately, at least one other major disincentive will soon exist for small businesses wishing to convert to LIFO. On December 31, 1981, a significant change will occur in the law due to a little known provision of the Windfall Profit Tax Act of 1980. In essence, this provision would establish for the first time an amount of income subject to taxation in cases where a corporation using the LIFO accounting method liquidates. In other words, when such a company liquidates, the Government will now tax this newly invented "LIFO reserve income."

Apparently, Mr. President, this provision is based on the assumption that the LIFO accounting method is an aberration—that there is something wrong with it as a method of sequencing inventory costs to arrive at income. In reality, however, LIFO is not only a generally accepted method of accounting, but in times of relatively high inflation, it is far superior to the FILO method for accurately valuing inventory.

Back in 1980, when this unfortunate provision was incorporated as part of the Windfall Profit Tax Act, there had been no hearings on this issue either in the Senate or in the House. Our conferees, in part out of concern that no real review of this proposal or its implications had occurred, agreed to suspend the effective date to December 31, 1981. The conferees made clear their intention that the period of suspension be used for careful and thorough congressional study of this recapture provision. Unfortunately, this consideration has not yet occurred.

Given the intent of Congress toward LIFO as expressed in the Economic Recovery Tax Act of 1981, I believe a strong case can be made for the outright repeal of this recapture provision. However, given the fact that the time remaining in this session makes serious consideration of this matter virtually impossible, I am now introducing a bill calling for a 1-year postponement of the LIFO recapture provision to December 31, 1982.

I sincerely hope my colleagues will give swift and favorable action to this 1-year extension so as to give us time to calmly and carefully consider this matter next year. It also coincides with the December 31, 1981, due date for a report on inventory accounting methods that the Treasury Department is required to file under the terms of the Economic Recovery Tax Act. Through this study, the Treasury Department can articulate their views on the retention of the LIFO recapture provision. Upon receipt of that report, Congress can then give this very important matter the consideration it deserves.

Mr. President, it is certainly not the fault of the small businesses of this Nation that we did not find the time to review a matter of such importance to them. I think it is now incumbent on us to postpone for 1 year this potentially damaging provision to give all interested parties a chance to present their arguments.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1839

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Section 403(b)(3) of Public Law 96-223 (relating to the effective date of amendments to sections 336 and 337 of the Internal Revenue Code of 1954 providing for the recognition as income of LIFO inventory amounts in connection with certain distributions and dispositions in liquidations) is hereby amended by striking out "December 31, 1981" at the end of the sentence and by inserting at the end of the sentence "December 31, 1982".

By Mr. DURENBERGER:

S. 1840. A bill to amend section 170 of the Internal Revenue Code of 1954 to increase the amounts that may be deducted for maintaining exchange students as members of the taxpayer's household; to the Committee on Finance.

S. 1841. A bill to amend the Internal Revenue Code of 1954 to allow a credit for transportation expenses incurred in connection with foreign exchange programs; to the Committee on Finance.

EXCHANGE STUDENT ASSISTANCE LEGISLATION

Mr. DURENBERGER. Mr. President, today I would like to introduce two very special bills about a very special program. Each year, tens of thousands of high school students from foreign lands come to the United States to spend a year as part of an American family. Likewise, thousands of American high school students travel each year to other countries to live with families with varied and unique lifestyles.

While we could discuss the benefits provided by foreign exchange programs in a large sense, I think it would be more effective to focus on the experience of just one of the hundreds of thousands of students that have lived with families in other lands. A young Minnesotan now on my Washington staff described for me his experience as a foreign exchange student:

I can remember clearly when the terms "hunger" and "starvation" took on a new meaning for me. I was walking with a group of friends down the streets of a huge, overcrowded city in a third-world nation. The streets of this city were lined with beggars. Often these beggars are children who have been abandoned by their parents; often, they are old people who simply have no living relatives who care; sometimes, the beggars are people that have been thrown out on the streets by their families to die.

Anyway, I was walking along a downtown street when I decided to have a piece of gum. I took out the pack, took a piece, and threw the wrapper on the ground. Suddenly, seemingly out of all the dark corners of the street, came these hideous shrieks and groans. I turned around to find a number of beggars dragging themselves along the ground toward the gum wrapper. One man had no legs, another some kind of skin disease. One mother left her baby in a pile of garbage as she fought with the men for the wrapper. There may have been others, but, after I saw the mother get to the aluminum wrapper and hungrily stuff it in her mouth, I couldn't bear to watch any more.

My friends were furious. They said I should have known better than to throw litter with sugar on it near beggars. Sure enough, as we continued on our way along the street, other beggars, roused by the scene I had caused, grabbed for the cuffs of my jeans as they begged for more wrappers.

The whole episode scared and sickened me at the time, but it taught me in a few seconds what I may never have learned for the rest of my life. It taught me what starvation and hunger do to human beings. It also taught me how lucky I was, and how, despite all the complaints and grumbling, lucky we as an American people are.

I learned many other things during my stay overseas—about the lives of average people living in vastly different cultures, about how little material possessions have to do with the happiness of those families, about life under a very different form of government. Never have I learned so much in so little time. My life was permanently shaped by those new months—I only wish every American high school student could have the same experience.

Mr. President, this member of my staff was just one of many Americans whose lives were changed by their experiences as foreign exchange students. Also, we must remember the thousands of students from foreign lands—many from Third World nations—that are allowed to experience American life directly because of the compassion of host families in this country.

I can think of no other single effort that does so much to foster mutual understanding between cultures on a person-to-person basis as student exchange programs. Year after year, foreign students make lifelong friends in this country and take home a knowledge and an experience that will help them to better understand their own lives, their countries, and even world events. And, of course, the same is true for our young students that spend time overseas.

Yet, Mr. President, foreign exchange programs are beginning to fall on hard times. Due to economic conditions, thousands of students in foreign lands are not able to come to this country because there are not enough families willing or able to host them. And thousands of American students, especially those from low- and moderate-income families, can no longer afford to go abroad.

We, as a Federal Government, have done very little to help foreign exchange programs. Back in 1960, President Eisenhower signed into a law a bill that provided a $50 a month tax deduction for the host families of foreign exchange students living in private American

homes and attending high school in the United States. In the 20 years since the legislation was enacted, inflation has clearly made that $50 figure, which was originally based on the $600 exemption for dependents, totally unrealistic.

The bill I am introducing today would raise that exemption to $100 per month, up to a maximum $1,000 per year. In other words, it would allow families who host a foreign exchange student for at least 10 consecutive months to take the equivalent of a personal exemption for that child on their income tax. Given the tremendous educational benefits provided by foreign exchange programs, and given the considerable expense incurred in adding another member to one's family, I think that raising the current deduction by $50 per month is entirely appropriate.

Also, Mr. President, my other bill would provide a 20-percent tax credit on the transportation expense incurred by a family sending a child overseas. This would make it somewhat more financially possible for struggling families to give their children this remarkable educational experience.

Mr. President, in conclusion let me point out that, at a time when we are spending billions of dollars manufacturing more efficient methods of killing people, it is appropriate to give up a few thousand dollars to support the understanding and love generated by foreign exchange programs. I hope my colleagues will give this special measure their speedy and favorable consideration. Many thousands of children in this world would be very grateful to us if we did.

Mr. President, I ask unanimous consent that the bills be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1840

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subparagraph (A) of section 170(g)(2) of the Internal Revenue Code of 1954 (relating to limitation on amounts paid to maintain certain students as members of taxpayer's household) is amended by striking out "$50" and inserting in lieu thereof "the lesser of $1,000, or $100".

(b) The amendments made by subsection (a) shall apply to taxable years beginning after December 31, 1981.

S. 1841

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits allowable) is amended by inserting immediately before section 45 the following new section:

"SEC. 44H. TRANSPORTATION EXPENSES OF FOREIGN EXCHANGE STUDENTS.

"(a) GENERAL RULE.—There shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to 25 percent of the qualified foreign exchange transportation expenses.

"(b) QUALIFIED FOREIGN EXCHANGE TRANSPORTATION EXPENSES.—For purposes of this section, the term 'qualified foreign exchange transportation expenses' means any amount paid or incurred—

"(1) by or on behalf of an individual who is a participant in a foreign exchange program which is designated by the Director of the International Communication Agency as a teenager exchange-visitor program, and

"(2) for transportation of such individual between such individual's home and the location outside of the United States where such individual is to participate in the teenager exchange-visitor program.".

(b) The table of sections for subpart A of part IV of subchapter A of chapter 1 of such Code is amended by adding after the item relating to section 44G the following new item:

"SEC. 44H. TRANSPORTATION EXPENSES OF FOREIGN EXCHANGE STUDENTS.".

(C) The amendments made by this Act shall apply to taxable years beginning after December 31, 1981.

By Mr. DODD (for himself and Mr. WEICKER):

S. 1842. A bill to provide that certain trusts shall not be treated as private foundations; to the Committee on Finance.

THE DAY OF NEW LONDON

● Mr. DODD. Mr. President, the purpose of this legislation is to permit The Day, a New London, Conn., daily publication, to continue its services as a community newspaper and as a contributor to local charities and nonprofit causes.

The Day was founded by Theodore Bodenwein, a German immigrant with ambitious and constructive ideas. In 1938, Mr. Bodenwein's will created a split-interest trust to own his paper and, upon his death, to pay 10 percent of its dividends to charitable organizations and the remaining 90 percent to his heirs until their deaths. Since the death of the last family member in 1978, all profits not reinvested in the newspaper have been distributed to charitable organizations in the community, as Mr. Bodenwein's will instructed.

However, in March, the Internal Revenue Service ruled that the trust was in fact a private foundation, and that under the terms of the Tax Reform Act of 1969, it would owe a considerable amount to the IRS. The net result would be that The Day would have to pay taxes in excess of its net income.

This legislation would allow The Day to continue to receive the tax advantages of a split-interest trust. In these times of fiscal austerity, particularly in the area of social services, it is imperative that we encourage private sector contributions of the sort provided by The Day. Mr. Bodenwein and The Day ought to serve as an example of philanthropic generosity which is admired and respected, and not taxed to the point of uselessness. For more than 40 years, The Day had set a shining example. Today, I propose that we allow this to continue with our blessing.●

By Mr. DODD:

S. 1843. A bill to repeal the additional duties imposed until 1993 under the Omnibus Reconciliation Act of 1980 on imported ethyl alcohol; to the Committee on Finance.

REPEAL OF TARIFFS ON IMPORTED ETHYL ALCOHOL

● Mr. DODD. Mr. President, I am introducing today a bill to repeal the tariff on imports of ethyl alcohol enacted as part of the Omnibus Reconciliation Act of 1980. I am hopeful that this legislation which is identical to H.R. 1989, introduced by Representative FRENZEL, will provide a focal point for an in-depth assesment of the true impact of this hastily passed tariff.

The tariff, of 10 cents per gallon in 1981, 20 cents per gallon in 1982 and 40 cents per gallon in 1983 through 1992, was attached to the 1980 Reconciliation Act at the last minute without hearings and without thoughful consideration by the Congress. It allegedly was intended to provide a boost to the domestic development of alcohol motor fuel production. Its real impact appears to be precisely the opposite.

By erecting a prohibitive barrier to imports the tariff will effectively cut off potential domestic producers from alcohol supplies needed to develop a market for alcohol blend fuels. It is essential that this market development precede substantial investments in domestic production facilities and imports constitute the only viable source of fuel grade alcohol for many potential producers, particularly those on the east coast.

This point is presented convincingly in a recent letter I received from Mr. William Kash, an alcohol fuel distributer from Southport, Conn. Mr. Kash points out that:

> Pending the development of domestic distilleries capable of supplying the needs in our region, we have been almost solely dependent on imported alcohol produced by friendly countries from renewable resources.

Mr. Kash continued, making the point that—

> The tariff has effectively interrupted imports of motor fuel grade alcohol needed to supply a marketing network established in anticipation of new domestic alcohol plants coming on-stream. Thus, if this ill-conceived sur-duty were to remain in effect, new domestic alcohol production could well find itself without a market.

Many of us from the Northeast have repeatedly emphasized the vulnerability of our region to insecure OPEC oil supplies. The development of alternative fuels and alternative sources of energy supplies is vital to the security of New England and other Northeastern and Midwestern States. Alcohol imports are an important ingredient in broadening the mix of fuels and sources of supply available to these States as well as in laying the foundation for a transition to domestic production of alcohol fuel. The extremely high tariff imposed effective January 1 of this year has all but eliminated our access to these much needed alcohol supplies.

In addition to the adverse impact on domestic fuel alcohol development, the tariff also violates two important principles of international trade law. The first is that import duties cannot be raised except under very limited circumstances and then only after certain procedures have been complied with. The second principle is that of "national treatment" whereby the United States and its major trading partners agree to treat importers no less favorably than

domestic producers with respect to internal taxes, laws, and regulations.

The imposition, by the United States, of the sur-duty on foreign alcohol constitutes a prima facie violation by this country of the General Agreement on Tariffs and Trade. Under the GATT, nations harmed by this action may take compensatory action against imports from the United States.

This prospect is not purely hypothetical. Last Friday Brazil notified United States representatives in Geneva that it was requesting consultations to negotiate compensating actions under section 28 of the GATT. It is ironic that among the major U.S. commodities shipped to Brazil are wheat and corn, the latter being the chief feed stock for domestically produced fuel alcohol. If Brazil imposes trade barriers against U.S. corn, the negative effect on domestic corn producers of our sur-duty on fuel alcohol could well be compounded. Not only would this duty reduce the potential for domestic alcohol production, which uses corn, it would also reduce the foreign demand for corn through reduced Brazilian imports.

The development of a viable domestic alcohol fuels industry is an important step in reducing this Nation's dependence on foreign oil. Alcohol imports are, somewhat ironically, an important interim step in establishing domestic production capacity. The Brazilians have consistently maintained that their chief aim in alcohol production is to meet domestic fuel needs. They are not developing production capacity to compete with our domestic alcohol industry. To the extent that Brazil's excess capacity in the short run can serve our development needs, the interest of both countries is served by eliminating trade barriers such as the sur-duty imposed by the Congress last year.

To the extent that excess capacity in Brazil, or any other nation, leads to dumping in the U.S. market, domestic producers may be protected under the antidumping provisions of the General Agreement on Tariffs and Trade. For those who argue that these procedures are too cumbersome, I would suggest that rather than resorting to actions that violate our international agreements, we should move to negotiate mutually agreeable trade arrangements with Brazil that provide the necessary protections against dumping.

In this regard it may be possible to negotiate voluntary limits on Brazilian alcohol exports to the United States with the sur-duty applying to imports that violate these levels. Alternatively, it may well be agreeable to both the United States and Brazil to postpone implementation of this sur-duty for several years. This would give U.S. producers time to develop domestic markets and production facilities and would give Brazil an outlet for its excess production capacity developed in anticipation of domestic consumption increases through increased production of alcohol-fueled automobiles.

As things now stand, we confront a classic example of a trade barrier erected allegedly to serve a domestic interest having, as I have stated, precisely the opposite effect. It is harmful to potential domestic alcohol producers, to American corn producers, and to American energy consumers. We have all seen this kind of trade barrier back fire time and time again. It should not surprise us. It should stimulate serious reconsideration by the Congress of the unilateral action that created the situation. In this case, it was hastily enacted legislation that brought about the dilemma we now face. We can and should correct this error. I hope we will do so expeditiously and urge the Committee on Finance to take up this matter at its earliest convenience.

I ask that the letter I received from Mr. William Kash and the bill be printed in the RECORD.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 1843

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) item 901.50 of the Tariff Schedules of the United States (19 U.S.C. 1202) is repealed.

(b) Subtitle G of title XI of the Omnibus Reconciliation Act of 1980 (94 Stat. 2694; Public Law 93-499) is repealed.

SEC. 2. (a) The amendment made by subsection (a) of the first section of this Act shall apply with respect to articles entered, or withdrawn from warehouse, for consumption on or after the date of enactment of this Act.

(b) Upon request therefor filed with the customs officer concerned on or before the ninetieth day after the date of the enactment of this Act, the entry or withdrawal of any article to which item 901.50 of the Tariff Schedules of the United States applied and—

(1) that was made after December 31, 1980, and before the date of the enactment of this Act; and

(2) with respect to which there would have been no duty under such item if the amendment made by subsection (a) of the first section of this Act applied to such entry or withdrawal;

shall, notwithstanding the provisions of section 514 of the Tariff Act of 1930 or any other provision of law, be liquidated or reliquidated as though such entry or withdrawal had been made on the date of the enactment of this Act.

SOUTHPORT, CONN.,
September 9, 1981.

HON. CHRISTOPHER J. DODD,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR DODD: Our Company has for some time been in the forefront of the alcohol fuel program in an effort to carry out the expressed intent of Congress and the Executive to develop a viable distribution network for such renewable fuels. Pending the development of domestic distilleries capable of supplying the needs in our region, we have been almost solely dependent on imported alcohol produced by friendly countries from renewable resources. The continuity of these supplies is now gravely threatened by a prohibitive sur-duty imposed during the lame-duck session of the last Congress.

Toward the end of the 96th Congress, against the advice of the Department of State, the Department of the Treasury, and the Special Trade Representative, a progressively increasing sur-duty not only violated our commitments under the General Agreement on Tariffs and Trade, but it threatened action by affected countries, notably Brazil, against important U.S. exports such as wheat and corn. Equally important is the fact that this sur-duty has effectively interrupted imports of motor fuel grade alcohol needed to supply a marketing network established in anticipation of new domestic alcohol plants coming on stream. Thus, if this ill-conceived sur-duty were to remain in effect, new domestic alcohol production could well find itself without a market.

Recognizing the need to correct this hastily considered bad legislation, Congressman Bill Frenzel early in the 97th Congress introduced a bill to repeal the sur-duty and in this effort had the full support of the new Administration. At hearings held on June 15, 1981, before the Subcommittee on Trade of the Committee on Ways and Means of the U.S. House of Representatives, testimony in support of repeal was presented by affected parties and by representatives of the Administration. Not a voice was raised in opposition to repeal.

Since that time, however, Members have received a flood of letters in opposition to repeal. The thrust of this opposition has been to allege that domestic production is impaired by the threats of alcohol imports and that, in fact, the sur-duty does not benefit the single current major producer, namely Archer Daniels Midland. The real facts, of course, are that ADM accounts for approximately 85 percent of current domestic production and that, therefore, ADM quite obviously benefits from a duty which has effectively barred imports of alcohol since its imposition on January 1, 1981.

A viable alcohol fuels industry must have multiple supply sources and not be dependent on what today is effectively a monopoly source. If the new distilleries under construction and planned for construction are to function effectively it is necessary that they have a distribution network ready to receive and market their supplies. It is, therefore, in our Nation's self-interest to have alcohol from friendly trading partners to establish and maintain such a distribution network. We hope that you will lend your support to the early repeal of the sur-duty so that the business which we and other have established can continue to serve the best interests of the United States and of our customers, the American consumers of alcohol fuels.

Please support the Frenzel-Gibbons Bill, H.R. 1989 and repeal this unconscionable legislation which clearly violates our international commitments and long established trade policies under both Democratic and Republican administrations.

Very truly yours,

WILLIAM B. KASH.●

By Mr. JOHNSTON (for himself, Mr. WEICKER, Mr. BRADLEY, Mr. MURKOWSKI, Mrs. HAWKINS, Mr. MATSUNAGA, and Mr. BUMPERS):

S. 1844. A bill to facilitate the national distribution and utilization of coal; to the Committee on Energy and Natural Resources.

COAL DISTRIBUTION AND UTILIZATION ACT OF 1981

● Mr. JOHNSTON. Mr. President, we are today introducing legislation that will authorize the grant of Federal eminent domain for interstate coal pipelines.

This legislation is long overdue. The failure of Congress to enact this bill has delayed the development of our coal resources, increased costs to coal consumers and jeopardized the future of a strong coal export policy.

The Coal Distribution and Utilization Act of 1981 would establish procedures whereby the Secretary of Energy, or his successor, may determine that interstate

coal pipeline distribution systems are in the national interest. Any such interstate system would have access to the Federal eminent domain authority for use in acquiring rights-of-way for the system. The act provides that any water used in such systems must be obtained pursuant to the substantive and procedural laws of the various States, and the Federal eminent domain authority may not be used to acquire rights to water. Our proposed legislation provides no Federal assistance for interstate coal pipeline systems.

This legislation is simple and straightforward but its long-term impact could be enormous. It would provide a modern alternative to existing coal transportation systems. It would help keep U.S. coal costs competitive in world coal trade. It would afford relief from the skyrocketing costs of rail transportation. Finally, it would provide an alternative to the environmental impact of massive unit coal trains crossing the countryside.

Mr. President, the concept of distributing coal through pipelines is not new. Since 1963, the Black Mesa pipeline, which is owned and operated by an affiliate of the Southern Pacific Railroad Co., has transported 4.8 million tons of coal per year from Kayenta, Ariz., to South Point, Nev. The Black Mesa pipeline has proven itself to be safe, reliable, and economic.

In coal pipeline distribution systems, coal is pulverized to the consistency of powdered sugar, mixed with water, or some other medium, and pumped through underground pipelines to the point of use. When the coal slurry reaches its destination, the coal is removed from the water in a centrifuge and is dried. The coal is then used for fuel and the water is either used in plant cooling or cleaned for disposal.

The coal pipeline transportation systems which have been proposed, would serve both western and eastern coal fields. These systems cannot be financed without the assurance that the necessary rights-of-way can be obtained. The grant of Federal eminent domain authority provided in this legislation is essential if the pipelines are to obtain rights-of-ways through the various States. Because these huge coal distribution systems will move coal from our producing centers across several States to consuming regions, State grants of eminent domain authority will not suffice.

Presently, only 10 States extend their eminent domain authority to coal pipeline systems. These State eminent domain statutes impose a variety of substantive and procedural conditions that may be incompatible with the requirements of other States through which these pipelines must pass. In addition, pipelines may encounter legal difficulty in identifying a public use or benefit to a State through which it must pass, but in which it will neither gather nor deliver coal. It may thus be precluded from receiving the right of State eminent domain.

Similar difficulties led to the grant of Federal eminent domain authority to interstate natural gas pipelines and to the adoption of the Cole Act in 1941, which granted Federal eminent domain authority to petroleum pipelines. Even the western land grant railroads, including the Union Pacific and the predecessors to the Burlington Northern and the Santa Fe Railroads, were granted Federal eminent domain authority in the mid-1860's.

Legislation to grant the right of Federal eminent domain to interstate coal pipelines was first considered by Congress in 1974. The Senate passed the Coal Pipeline Act of 1974 by voice vote on September 18, 1974, but the legislation was not considered by the House. In 1978, the House defeated coal slurry pipeline legislation. Much of the opposition to the legislation then and now has come from the pipeline's competitors, the railroads.

Mr. President, railroad coal transportation rates have increased precipitously since 1974. For instance, in the now famous case concerning San Antonio, Tex., the city-owned electric utility was quoted a railroad coal haulage rate of $11.09 per ton in 1974. On the basis of the quoted rate, the utility entered into two 20-year purchase contracts for western coal and committed to build two coal-fired electric generating plants. The coal haulage rates to San Antonio increased steadily until, on March 18, 1981, the Interstate Commerce Commission approved a rate of $23.05 per ton—a doubling in 7 years.

This is not an isolated experience, Mr. President. The rail haulage rate for moving 5 million tons of coal per year from the Powder River Basin in Wyoming to a utility near White Bluff, Ark., increased from $12.78 per ton in 1977, to $21.66 per ton on November 1, 1981. Domestic coal transportation rates have gone so high that some utilities have actually found it more economic to import coal from Poland, South Africa, and Australia. In addition, our coal export potential has not and will not be fully recognized until there is a viable alternative to rail transport.

The development of interstate coal distribution systems will provide competition for the railroads that should help moderate the increases in rail coal haulage rates. A perfect example of this is the response of the competing railroad to the 108-mile intrastate coal pipeline from Cadiz, Ohio, to Cleveland. In a successful effort to drive that pipeline out of business, the railroad cut its coal transportation rates from $3.47 per ton to $1.88 per ton. While coal pipelines will undoubtedly provide competition to the railroads, such predatory pricing should be obviated by our Nation's projected increase in coal production.

The national energy transportation study (NETS), which was issued in July 1980, projects that coal shipments will triple between 1975 and 1990. According to the NETS report:

> If all the slurry pipelines currently under consideration are built and operated at full capacity, they will be able to carry 176 million tons by 1990. This amounts to 19 percent of the increase (in coal haulage) and 13 percent of the total amount (of coal haulage). However, a recent study conducted by the Department of Energy concluded that slurry pipelines are most likely to be carrying between 70 and 126 million tons of coal in 1990. This amounts to between 5 and 9 percent of the total coal to be transported in 1990. (NETS Report, p. 76-78; parentheticals added)

Moreover, the Staggers Rail Act of 1980 has given the railroads the flexibility to compete with coal pipelines. To a large extent, railroad rates have been deregulated and railroads now have the authority to enter into long-term coal haulage contracts. Because the first interstate coal pipeline system could take at least 5 years to become operational, the railroads will have sufficient time to develop a strategy for competing with such pipelines.

The water requirements of coal pipelines have been a concern in the arid Western States where much of our low-sulfur coal is located. Yet, except for unit trains coal pipelines will be the least water consumptive method of making use of western coal. Coal pipelines require 1 ton of water per 1 ton of coal; coal gasification plants will require 2 tons of water per ton of coal; and mine-mouth electric generating plants will require 7 tons of water per ton of coal. Given the safety and environmental problems associated with the numerous unit trains required to move western coal, Western States may well determine that coal pipelines are a more than acceptable method of transport. The legislation we are introducing protects all States by providing that any water used in the pipelines must be obtained pursuant to State substantive and procedural law. In addition, the bill provides legislative protection for such State laws by stating that use of water in a coal pipelines is not a use in interstate commerce.

Mr. President, interstate coal pipelines can be as important to our Nation as interstate natural gas pipelines, interstate petroleum pipelines, and transcontinental railroads. The time has come to allow the marketplace to determine if these systems should be developed as an integral part of our national energy transportation system. Private companies stand ready and waiting to develop such systems with private funds. All they require is the impetus that is provided by this bill. We urge our colleagues to join us in assuring that the Coal Utilization and Distribution Act of 1981 is enacted during this Congress. The nation should not be forced to wait any longer.●

● Mr. MURKOWSKI. Mr. President, today I am cosponsoring legislation that will authorize the Federal right of eminent domain for coal pipelines. The time has come for Congress to permit the development of coal pipelines as an integral part of our national energy transportation and distribution system.

Coal pipelines, which will be privately financed, could be the key to unlocking much of our vast coal resources and moving them to domestic and foreign markets at reasonable cost. The existence of a temporary oil surplus should not lull us into a false sense of security. The outlook for the next 25 years is bleak. We simply will not be finding enough domestic oil to meet our needs.

We will remain heavily dependent on costly foreign oil, much of it from insecure sources. Our national energy strategy must continue to stress the development of coal, nuclear, synfuels, and other domestic energy sources in order to reduce the role of oil in meeting national energy needs.

With respect to coal, we need to begin putting in place the infrastructure that will permit the mining, transportation, and marketing of greatly increased volumes of coal. Clearly, this infrastructure must include alternatives to the transportation of coal by rail.

Mr. President, it is a fact of life that the market for coal is an international market. Domestic coal must compete in that market, not only for foreign sales but also for domestic sales. Already some of our utilities are importing foreign coal rather than relying on domestic coal, partly because long-haul domestic rail transportation costs now exceed $20 a ton. In the future, foreign coal may continue to make inroads on domestic markets in areas of the country like the Southeast where there is easy access to foreign coal.

We are also competing for a huge coal export trade. The 1980 world coal study found that world coal production must increase 2.5 to 3 times in the next 20 years if the world's projected energy demand is to be met and forecasts are that world trade in coal must grow 10 to 15 times above 1979 levels. The study found that the United States and Australia are the two countries most capable of meeting this needed growth in world coal trade, although Canada, China, and several South American nations have coal export capability. To the extent that we are able to become leading coal exporters, our Nation obviously will enjoy significant economic and foreign policy benefits.

The development of interstate coal pipelines will assist our Nation to develop our coal resources for both domestic and foreign markets. The existence of coal pipelines will help to moderate the increase in rail coal haulage rates, rates that have already increased 14 percent this year. While the front end costs of pipelines are large, the operating costs are far below railroad costs.

Mr. President, I am well aware of the concerns of some of my colleagues from Western States regarding coal pipelines and the preservation of State water rights. The language in the bill we are introducing today provides every possible protection for State water rights. Any water used for coal pipelines must be acquired pursuant to State substantive and procedural law. A grant of Federal eminent domain power is not in any way a license to acquire State water rights.

I urge my colleagues to recognize that the time has come to give coal pipelines the same right of eminent domain that we have given to other national transportation and distribution systems, including interstate natural gas pipelines, some interstate petroleum pipelines, and certain major transcontinental railroads. The national interest in a secure energy future is at stake.●

● Mrs. HAWKINS. Mr. President, I am pleased to join my distinguished colleague from Louisiana, Senator JOHNSTON, in introducing legislation that will facilitate the construction of coal-slurry pipelines. This legislation is needed to lower the cost of energy to American consumers and lessen our dependency in imported energy by establishing eminent domain authority to slurry-pipeline carriers.

If present construction plans for coal-slurry pipelines are completed, it is estimated that consumers will save a minimum of $4.5 billion in transportation charges during the 1990's. Increases in future costs to operate pipelines will be slight compared with other methods of transporting coal. Overall, once a coal-slurry pipeline is installed, it is nearly inflation proof because it has few moving parts, maintenance costs are low, and few personnel are required to operate the system. The cost advantage enjoyed by slurry pipelines will, therefore, grow in the future.

In addition to saving consumers money, this legislation addresses another pressing issue, energy independence. Presently, coal provides 21 percent of all energy produced in this country. It should supply an even higher percentage because the United States is the Saudi Arabia of coal. At present rates of consumption, this country has 300 years of known reserves. By tapping this enormous source of new energy more fully through the use of slurry pipelines, we can dramatically lower national use of imported foreign energy.

Expanding the use of slurry pipelines will not injure any other industry. Railroads presently move 65 percent of all coal, and by 1990 they will carry an even higher percentage since slurry pipelines are expected to handle only 20 percent of the 1.2 billion additional tonnage the country will need by that date.

Finally, many organizations that are often on opposite sides of development issues are in full accord with the need to expedite development of coal-slurry pipelines as proposed by this legislation. These groups are listed below:

LIST OF GROUPS

Miami Herald.

Coal is an important natural resource which could replace imported oil as an energy source. While important progress toward energy independence is being made, this important step should be taken to encourage greater use of coal as a replacement fuel for oil and gas.●

By Mr. MATHIAS (for himself, Mr. EAGLETON, and Mr. RUDMAN):

S. 1845. A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act and the charter of the District of Columbia with respect to the provisions allowing the District of Columbia to issue general obligation bonds and notes and revenue bonds, notes, and other obligations; to the Committee on Governmental Affairs.

ISSUANCE OF GENERAL REVENUE BONDS AND NOTES

● Mr. MATHIAS. Mr. President, I am today introducing legislation for myself and Senators EAGLETON and RUDMAN, to amend the District of Columbia Self-Government and Governmental Reorganization Act and the charter of the District of Columbia with respect to the provisions allowing the District of Columbia to issue general obligation bonds and notes and revenue bonds, notes, and other obligations.

As my colleagues know, the Home Rule Act grants the District of Columbia the authority to fund capital projects through borrowing on the municipal bond market, in the same manner that other municipalities operate. For several years, the District has been working diligently to put its finances in order so as to enable it to utilize this authority.

The legislation which I am introducing today is generally technical in nature. It was drafted with the assistance and collaboration of the city's financial advisers and is intended to clear up potential inconsistencies in the Home Rule Act's authorization of bonding power. It will greatly enhance the city's ability to enter the bond market in a timely fashion.

As chairman of the Subcommittee on Governmental Efficiency and the District of Columbia, I can assure my colleagues that the subcommittee will move expeditiously to consider this legislation and report it back to the full Senate. I urge my colleagues to give the bill every favorable consideration.●

By Mr. INOUYE (for himself and Mr. MATSUNAGA):

S. 1846. A bill to amend title 38, United States Code, to authorize the Administrator of Veterans' Affairs to provide incentive special pay for certain dentists in the Department of Medicine and Surgery of the Veterans' Administration; to the Committee on Veterans' Affairs.

SPECIAL PAY FOR CERTAIN VETERANS' ADMINISTRATION DENTISTS

● Mr. INOUYE. Mr. President, today I am introducing legislation, on behalf of Senator MATSUNAGA and myself, to provide for special incentive pay for those dentists in the Veterans' Administration who have received advanced professional certification/specialty board certification.

Our proposal would authorize and direct the Veterans' Administration to provide for the same $2,500 bonus as Veterans' Administration physicians

presently receive, when a member of the dental profession has passed his or her national specialty boards. This accomplishment is indeed a fine tribute to the practitioner's professional competence and the esteem for which he or she is held by his or her colleagues.

In all candor, we were surprised to recently learn that Veterans' Administration dentists are not already treated in a manner compatible with their Veterans' Administration physician colleagues.

Mr. President, I ask unanimous consent that various background materials provided me by the American Dental Association be printed in the RECORD, as well as the text of our bill.

There being no objection, the bill and other material were ordered to be printed in the RECORD, as follows:

S. 1846

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4118 of title 38, United States Code, is amended—

(1) in subsection (c)(2)—

(A) by redesignating clause (C) as clause (D); and

(B) by inserting after clause (B) the following new clause:

"(C) For board certification in a specialty, $2,500.";

(2) in subsection (c)(4)—

(A) by redesignating clause (C) as clause (D); and

(B) by inserting after clause (B) the following new clause:

"(C) For board certification in a specialty, $1,875."; and

(3) in subsection (d)—

(A) by striking out "(c)(2)(C)" and inserting in lieu thereof "(c)(2)(D)"; and

(B) by striking out "(c)(4)(C)" and inserting in lieu thereof "(c)(4)(D)".

[2] A total of 7 calendar years of experience and/or education shall have elapsed subsequent to graduation from dental school before a candidate is eligible for examination.

[3] Does not include years of advanced education.

DEFINITIONS OF SPECIAL AREAS OF DENTAL PRACTICE AS APPROVED BY THE COUNCIL ON DENTAL EDUCATION, AMERICAN DENTAL ASSOCIATION, MAY 1976

It is recognized there are overlapping responsibilities among the recognized areas of dental practice. However, as a matter of principle, a specialist shall not provide routinely procedures that are beyond the scope of his specialty.

DENTAL PUBLIC HEALTH

Dental public health is the science and art of preventing and controlling dental diseases and promoting dental health through organized community efforts. It is that form of dental practice which serves the community as a patient rather than the individual. It is concerned with the dental health education of the public, with applied dental research, and with the administration of group dental care programs as well as the prevention and control of dental diseases on a community basis.

ENDODONTICS

Endodontics is that branch of dentistry that deals with diagnosis and treatment of oral conditions which arise as a result of pathoses of the dental pulp. Its study encompasses related basic and clinical sciences including the biology of the normal pulp and supporting structures, etiology, diagnosis, prevention and treatment of diseases and injuries of the pulp and periradicular tissues. (Revised May 1977).

ORAL PATHOLOGY

Oral pathology is that branch of science which deals with the nature of the diseases affecting the oral and adjacent regions, through study of its causes, its processes and its effects, together with the associated alterations of oral structure and function. The practice of oral pathology shall include the development and application of this knowledge through the use of clinical, microscopic, radiographic, biochemical or other such laboratory examinations or procedures as may be required to establish a diagnosis and/or gain other information necessary to maintain the health of the patient, or to correct the result of structural or functional changes produced by alterations from the normal.

ORAL AND MAXILLOFACIAL SURGERY

Oral and maxillofacial surgery is that part of dental practice which deals with diagnosis, the surgical and adjunctive treatment of diseases, injuries and defects of the oral and maxillofacial region. (Revised May, 1978)

ORTHODONTICS

Orthodontics is that area of dentistry concerned with the supervision, guidance and correction of the growing or mature dentofacial structures, including those conditions that require movement of teeth or correction of malrelationships and malformations of their related structures and the adjustment of relationships between and among teeth and facial bones by the application of forces and/or the stimulation and redirection of functional forces within the craniofacial complex.

Major responsibilities of orthodontic practice include the diagnosis, prevention, interception and treatment of all forms of malocclusion of the teeth and associated alterations in their surrounding structures; the design, application, and control of functional and corrective appliances; and the guidance of the dentition and its supporting structures to attain and maintain optimum occlusal relations in physiologic and esthetic harmony among facial and cranial structures. (Revised, December, 1980)

PEDODONTICS

The specialty of pedodontics is the practice and teaching of comprehensive preventive and therapeutic oral health care of chil-

dren from birth through adolescence. It shall be construed to include care for special patients beyond the age of adolescence who demonstrate mental, physical and/or emotional problems.

PERIODONTICS

Periodontics is that branch of dentistry which deals with the diagnosis and treatment of disease of the supporting and surrounding tissues of the teeth. The maintenance of the health of these structures and tissues, achieved through periodontal treatment procedures, is also considered to be the responsibility of the periodontist. The scope shall be limited to preclude permanent restorative dentistry. (Revised, May, 1980)

PROSTHODONTICS

Prosthodontics is that branch of dentistry pertaining to the restoration and maintenance of oral functions, comfort, appearance and health of the patient by the restoration of natural teeth and/or the replacement of missing teeth and contiguous oral and maxillofacial tissues with artificial substitutes.●

By Mr. HELMS:

S. 1847. A bill to require an annual authorization for the Federal court system excluding the Supreme Court; to the Committee on the Judiciary.

FEDERAL JUDICIAL SALARY CONTROL ACT OF 1981

● Mr. HELMS. Mr. President, today I am introducing the Federal Judicial Salary Control Act. This bill would serve two purposes: It would set up an authorizing process for appropriating funds to Federal courts, and it would put an end to automatic, back-door pay raises for Federal judges.

Currently judges in the Federal court system receive generous annual salaries, ranging from a high of $96,800 awarded the Chief Justice of the Supreme Court to a low of $53,500 given bankruptcy judges. Associate Judges of the Supreme Court receive $93,000, while judges in the 12 circuits of the court of appeals, in the Court of Claims, and in the Court of Customs and Patent Appeals all receive $70,300 a year. Under present law the executive branch and not Congress sets the salaries and budgets of these judges and their staffs. As authorized by the Postal Revenue and Federal Salary Act of 1976, the President submits salary figures to Congress for its ratification. Congress has little chance to form its own coherent budget policy for the judiciary.

The first portion of the legislation I introduce today, sections 3 and 4 of the bill, would make courts of appeals, district courts, the Federal Judicial Center, and the Administrative Office of the U.S. Courts subject to Congress annual authorizing process. Covered also would be U.S. magistrates, jurors, commissioners, and attorneys appointed to represent persons under the Criminal Justice Act of 1964. Under sections 2 and 3, Congress could set up its own specific financial guidelines. It would no longer have to rely solely on the President's budget as its benchmark in setting salaries for judges and their employees or in supplying funds for operating and maintaining the judiciary.

The Federal Judicial Salary Control Act also addresses a major problem with existing legislation, a virtually automatic annual salary increase built into the present statutory system. Under the Executive Salary Cost-of-Living Adjustment Act of 1975 and the Pay Comparability Act of 1970, each year the President passes on to Congress recommendations made by the Department of Labor for increasing judicial salaries.

Should Congress manage not to vote down these increases before midnight on September 30 of a given year, they automatically take effect for the next fiscal year. This year Congress missed the deadline by only 27 minutes and, in an effort to give effect to its intent to cap judicial salaries, even went so far as to stop the clock before midnight. Despite this last minute rush of activity and even though salary increases for other Federal employees were capped, the country has still been saddled with judicial salary increases that Congress did not intend to authorize.

The reason is the Supreme Court's holding last winter in the case of *United States* v. *Will*, 449 U.S. 200. There, the Court ruled that article III of the Constitution prohibits alteration of the salaries of Federal judges on or after October 1 because the new rates vest on that date. At present, a failure by Congress to move quickly enough, even though a delay of only a few minutes, can have harmful consequences for congressional budget plans.

Section 4, the final portion of the bill I am introducing today, would put a stop to these back-door increases for Justices of the Supreme Court and for judges of the inferior courts created by Congress. Only those adjustments that Congress specifically authorizes would actually take effect.

The legislation includes the Supreme Court within its requirement that Congress affrmatively authorize all pay increases. But, it excludes the Supreme Court from the general authorizing process, not because it would be unconstitutional to do otherwise, but because it would obviate the possibility of undue congressional influence over fundamental judicial policy and decisions. Also, I believe it would be inappropriate to require annual authorization for the head of another separate branch and the only court created explicitly by the Constitution. Similarly, Congress has not made the President, the chief of the executive branch, subject to the annual authorizing process.

In its entirety the Federal Judicial Salary Control Act provides a balanced means for legislative committees, and Congress as a whole, periodically to define budgetary objectives for the judiciary. Under its provisions Congress will be able to specify a desired level of funding instead of hastily rushing to amend figures furnished by another branch of the Government.

I urge my colleagues to support this legislation, the need for which has been clearly demonstrated to us all by experience.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD at the conclusion of my remarks. I also ask unanimous consent that thereafter there be printed in the RECORD a copy of the November 1, 1981, article from the American Bar Association Journal reporting on the most recent pay raise which was provided to Federal judges contrary to congressional intent.

There being no objection, the bill and article were ordered to be printed in the RECORD, as follows:

S. 1847

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Judicial Salary Control Act of 1981".

SEC. 2. For purposes of this Act, the term "Federal judiciary" includes—

(1) the courts of appeals, the district courts constituted by chapter 5 of title 28, United States Code, including the Court of Claims, the District Court of Guam, the District Court of the Virgin Islands, the Court of Customs and Patent Appeals, and the Court of Customs;

(2) United States magistrates;

(3) jurors and commissioners;

(4) the Federal Public Defender and Community Defender organizations and attorneys appointed to represent persons under the Criminal Justice Act of 1964;

(5) Bankruptcy courts;

(6) the Federal Judicial Center;

(7) the Administrative Office of the United States Courts; and

(8) the United States Court of International Trade.

SEC. 3. Notwithstanding any other provision of law, no appropriation may be made for the Federal judiciary, including the payment of salaries of judges and employees and the expenses of operation and maintenance, for any fiscal year beginning on or after October 1, 1982, except as specifically authorized by an Act of Congress with respect to such fiscal year.

SEC. 4. Notwithstanding any other provision of law, Judges, both of the supreme and inferior Courts of the United States, shall receive, for their services, no increase in compensation during their continuance in office, or during their retirement therefrom, except as may hereafter be specifically provided by separate Act of Congress authorizing such increase and stating the amount thereof.

JUDICIAL PAY INCREASE SLIP PAST DEADLINE

Federal judges received a pay raise October 1, despite a provision in the fiscal year 1982 continuing resolution package, H.J. Res. 325, which sought to bar executive level federal employees from a recommended 4.8 percent pay increase. Under the Federal Pay Comparability Act, the President recommends an annual pay increase for all federal employees which automatically takes effect at the start of the new fiscal year—October 1—unless Congress disapproves of the raise. H.J. Res. 325, which froze federal executive level salaries at $50,112.50, was intended to cover judges but was not cleared by Congress until 12:27 a.m., October 1, and was not signed by the President until later that day. The automatic salary increases, however, took effect at midnight, and judges' salary increases may not be rescinded, according to last year's *Will* decision, once they take effect. That decision held that repealing a judicial salary increase after the beginning of the new fiscal year would violate the Compensation Clause of the Constitution prohibiting reductions in Article III judges' salaries. The raise brings the Chief Justice's salary up to $96,800 and the associate justices up to $93,000. Circuit judges now earn $74,300 and district court judges earn $70,300.●

By Mr. MURKOWSKI (for himself, Mr. ABDNOR, Mr. ANDREWS, Mr. D'AMATO, Mr. DENTON, Mr. EAST, Mr. GORTON, Mr. GRASSLEY, Mrs. HAWKINS, Mr. KASTEN, Mr. MATTINGLY, Mr. NICKLES, Mr. QUAYLE, Mr. RUDMAN, Mr. SPECTER, and Mr. SYMMS):

S.J. Res. 126. Joint resolution to authorize and request the President to designate May 7, 1982, as "Vietnam Veterans' Day"; to the Committee on the Judiciary.

VIETNAM VETERANS' DAY

Mr. MURKOWSKI. Mr. President, I rise today to introduce, on behalf of myself and Senators ABDNOR, ANDREWS, D'AMATO, DENTON, EAST, GORTON, GRASSLEY, HAWKINS, KASTEN, MATTINGLY, NICKLES, QUAYLE, RUDMAN, SPECTER, and SYMMS, a joint resolution authorizing the President to designate May 7, 1982 as "Vietnam Veterans' Day." We are introducing this measure in recognition of the particular contributions of Vietnam veterans and the many problems they continue to suffer as a result of their service to our country in Vietnam. We are introducing this measure now to allow ample time for the planning of activities that veterans and other groups would develop to honor veterans of the Vietnam war. The date of May 7 has been chosen because this was the date in 1975 that the Veterans' Administration recognizes as the official end to the Vietnam era.

Unfortunately, no date can erase the sacrifices made in that conflict and the suffering which continues for many of our Vietnam veterans. In the minds of thousands of veterans in this Nation, the war in Vietnam continues to rage on. The many problems encountered by Vietnam veterans as they continue the transition from military to civilian life are not over for some and continue to affect careers and family situations.

Many Vietnam veterans suffer from a disorder known as delayed stress syndrome (DSS), a direct result of the trauma of the Vietnam war. A publication from the veterans delayed stress seminar sponsored by the Veterans' Administration and the Veteran Centers of Seattle and Tacoma, Wash., describes some of the categories of the post-traumatic stress disorder.

The essential feature of DSS is the development of characteristic symptoms that follow a psychologically traumatic event generally outside the range of normal human experience. The trauma may be experienced alone or, as a military experience, in the company of groups of people. As the Diagnostic and Statistical Manual of Mental Disorders (third edition) explains, "the traumatic event can be reexperienced in a variety of ways. Commonly, the individual has a recurrent painful, intrusive recollections of the event or recurrent dreams or nightmares during which the event is reexperienced." A person suffering from DSS may complain of feeling detached and estranged from other people and complain of a lost ability to become interested in previously enjoyed activities.

Symptoms of depression of anxiety are common among victims of DSS and are in many cases severe. Increased irritability may be associated with sporadic and unpredictable explosions of aggressive behavior that results from minimal or no provocation. Although all of these symptoms may begin to occur immediately after the trauma, it is not unusual for the symptoms to occur after a latency period of months or years.

Delayed stress syndrome in the military experience is not, of course, limited to the veteran of the Vietnam war. Veterans of all wars have experienced some form of post-traumatic stress. But the incidence of this disorder in Vietnam veterans appears to be particularly high. The intermittent psychological effects of the Vietnam experience continue to hamper significantly some veterans' ability to maintain steady employment.

Recently established veteran centers in cities across the Nation, as well as the doctors in the veterans' hospitals are doing a great deal to ease the post-traumatic stress experienced by Vietnam veterans in order to ease the transition to a productive and useful civilian life. Time, of course, will help as well. But in spite of the time that has passed, veterans of the Vietnam war continue to suffer from the trauma experienced in that conflict.

The problems about which I have been speaking are real. I do want to say, however, that we owe a great deal of admiration to those majority of veterans of the Vietnam conflict who, through will and perseverence, have transcended the physical and psychological effects of that war and who are now making significant contributions to our society.

Mr. President, I feel the veterans of the Vietnam era deserve special recognition for their sacrifice and service to this country. These veterans returned from Vietnam to a nation that was, at best, ambivalent over our involvement in Southeast Asia, and many of them have yet to feel the sense of being welcomed home by the Nation for which they fought. I am proud of their contributions to the Nation and military service and feel that the Congress should support their continued struggle to leave Vietnam behind and to concentrate on life in these United States. I hope this joint resolution and Vietnam Veterans Day will help awaken Americans to the great debt we all have to these patriotic Americans.

By Mr. COCHRAN (for himself and Mr. STENNIS):

S.J. Res. 127. Joint resolution to grant official recognition to the International Ballet Competition; to the Committee on Labor and Human Resources.

RECOGNITION TO THE INTERNATIONAL BALLET COMPETITION

● Mr. COCHRAN. Mr. President, today I am introducing legislation to grant official recognition to the International Ballet Competition held in the United States.

The International Ballet Competitions which began in Varna, Bulgaria in 1964, bring together dancers, choreographers, and teachers from all over the world to compete in what has been termed the "olympics of dance."

This prestigious event honors excellence in human achievement, fosters international friendship, and passes on an understanding of excellence to a new generation by the recognition of the young competitors.

For a decade there had been great interest expressed by the international dance community for a competition to be held in the United States, and in June 1979, Jackson, Miss., produced the first International Ballet Competition ever held in this country. It was judged a major international success and Jackson was joined together with the other host cities of Moscow, Tokyo, and Varna in a cooperative arrangement regarding future competitions.

Next year preliminary competitions in six cities across the United States have been planned in preparation for the second International Ballet Competition to be held in Jackson, June 20 to July 4, 1982. The regional competitions are expected to encourage an even greater U.S. participation in the international event.

The United States has made outstanding contributions to the world of dance and our achievements in ballet have gained international recognition. This was exemplified last spring when Amanda McKerrow of Rockville, Md., received the gold medal at the International Ballet Competition which this year was held in Moscow.

My joint resolution will give the same official sanction and recognition to the competition held in Jackson, Miss., and its participants as is given by the governments of the other host countries.

Mr. President, I ask unanimous consent that the joint resolution be printed in the RECORD.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the United States recognizes the International Ballet Competition held in Jackson, Mississippi, under the sponsorship of the Mississippi Ballet International, Incorporated, as the official competition within the United States, and this organization and its participants as the official representatives of the United States in the International Ballet Competition cycle, which originated in Varna, Bulgaria, in 1964, and rotates among the cities of Varna, Bulgaria; Tokyo, Japan, Moscow, Union of Soviet Socialist Republics; and Jackson, Mississippi.●

ADDITIONAL COSPONSORS

S. 671

At the request of Mr. PELL, the Senator from Maryland (Mr. MATHIAS) was added as a cosponsor of S. 671, a bill to amend section 402 of title 23, United States Code, relating to establishment by each State of comprehensive alcohol-traffic safety programs as part of its highway safety program.

S. 895

At the request of Mr. MATHIAS, the Senator from Missouri (Mr. DANFORTH) was added as a cosponsor of S. 895, a bill to amend the Voting Rights Act of 1965 to extend certain provisions for an additional 10 years, to extend certain other

provisions for an additional 7 years, and for other purposes.

S. 1106

At the request of Mr. ZORINSKY, the Senator from Florida (Mr. CHILES) was added as a cosponsor of S. 1106, a bill to reform the insanity defense.

S. 1131

At the request of Mr. DANFORTH, the Senator from Maryland (Mr. SARBANES) was added as a cosponsor of S. 1131, a bill to require the Federal Government to pay interest on overdue payments and to take early payment discounts only when payment is timely made, and for other purposes.

S. 1276

At the request of Mr. DURENBERGER, the Senator from Idaho (Mr. SYMMS), and the Senator from Alabama (Mr. HEFLIN) were added as cosponsors of S. 1276, a bill to amend the Internal Revenue Code of 1954 to permit small businesses to reduce the value of excess inventory.

S. 1655

At the request of Mr. HART, the Senator from California (Mr. CRANSTON) was added as a cosponsor of S. 1655, a bill to amend the Internal Revenue Code of 1954 to reduce the deduction for business meals and to earmark the savings from such reduction for the school lunch programs.

S. 1656

At the request of Mr. DURENBERGER, the Senator from Pennsylvania (Mr. SPECTER) was added as a cosponsor of S. 1656, a bill to amend the Internal Revenue Code of 1954 to clarify certain requirements which apply to mortgage subsidy bonds, and for other purposes.

S. 1831

At the request of Mr. ROTH, the Senator from Delaware (Mr. BIDEN), and the Senator from Virginia (Mr. WARNER) were added as cosponsors of S. 1831, a bill to provide for the establishment of a national cemetery on the Delmarva Peninsula in Delaware, Maryland, or Virginia, and for other purposes.

S.J. RES. 57

At the request of Mr. SYMMS, the Senator from North Dakota (Mr. ANDREWS), the Senator from Colorado (Mr. ARMSTRONG), the Senator from Tennessee (Mr. BAKER), the Senator from Montana (Mr. BAUCUS), the Senator from Oklahoma (Mr. BOREN), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from New Jersey (Mr. BRADLEY), the Senator from North Dakota (Mr. BURDICK), the Senator from Virginia (Mr. HARRY F. BYRD, JR.) the Senator from Rhode Island (Mr. CHAFEE), the Senator from Florida (Mr. CHILES), the Senator from California (Mr. CRANSTON), the Senator from New York (Mr. D'AMATO), the Senator from Missouri (Mr. DANFORTH), the Senator from Alabama (Mr. DENTON) the Senator from Illinois (Mr. DIXON), the Senator from Connecticut (Mr. DODD), the Senator from Kansas (Mr. DOLE), the Senator from New Mexico (Mr. DOMENICI), the Senator from Minnesota (Mr. DURENBERGER), the Senator from North Carolina (Mr. EAST), the Senator from Nebraska (Mr. EXON), the Senator from Utah (Mr. GARN), the Senator from Iowa (Mr. GRASSLEY), the Senator from Colorado (Mr. HART), the Senator from Oregon (Mr. HATFIELD), the Senator from Florida (Mrs. HAWKINS), the Senator from Alabama (Mr. HEFLIN), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Iowa (Mr. JEPSEN), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Wisconsin (Mr. KASTEN), the Senator from Indiana (Mr. LUGAR), the Senator from Maryland (Mr. MATHIAS), the Senator from Idaho (Mr. McCLURE), the Senator from Montana (Mr. MELCHER), the Senator from Maine (Mr. MITCHELL), the Senator from Illinois (Mr. PERCY), the Senator from South Dakota (Mr. PRESSLER), the Senator from Indiana (Mr. QUAYLE), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Michigan (Mr. RIEGLE), the Senator from Delaware (Mr. ROTH), the Senator from New Mexico (Mr. SCHMITT), the Senator from Mississippi (Mr. STENNIS), the Senator from South Carolina (Mr. THURMOND), the Senator from Texas (Mr. TOWER), the Senator from Connecticut (Mr. WEICKER), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Nebraska (Mr. ZORINSKY), and the Senator from South Dakota (Mr. ABDNOR), were added as cosponsors of Senate Joint Resolution 57, a joint resolution to provide for the designation of February 7 through 13, 1981, as "National Scleroderma Week."

S.J. RES. 93

At the request of Mr. HAYAKAWA, the Senator from Wisconsin (Mr. KASTEN) was added as a cosponsor of Senate Joint Resolution 93, a joint resolution to clarify that it is the basic policy of the Government of the United States to rely on the competitive private enterprise system to provide needed goods and services.

S.J. RES. 111

At the request of Mr. McCLURE, the Senator from Montana (Mr. MELCHER), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Oklahoma (Mr. NICKLES), and the Senator from Wyoming (Mr. WALLOP) were added as cosponsors of Senate Joint Resolution 111, a joint resolution consenting to an extension and renewal of the interstate compact to conserve oil and gas.

S.J. RES. 113

At the request of Mr. HATCH, the Senator from Arkansas (Mr. PRYOR), the Senator from Texas (Mr. BENTSEN), the Senator from Maine (Mr. COHEN), and the Senator from Florida (Mr. CHILES) were added as cosponsors of Senate Joint Resolution 113, a joint resolution to designate the week beginning November 8, 1981, as "National Home Health Care Week."

S.J. RES. 123

At the request of Mr. HAYAKAWA, the Senator from South Carolina (Mr. HOLLINGS) was added as a cosponsor of Senate Joint Resolution 123, a joint resolution authorizing the President to proclaim "National Disabled Veterans Week."

SENATE CONCURRENT RESOLUTION 48

At the request of Mr. BUMPERS, his name was added as a cosponsor of Senate Concurrent Resolution 48, a concurrent resolution disapproving the sale to Pakistan of F-16 aircraft.

At the request of Mr. WEICKER, his name was added as a cosponsor of Senate Concurrent Resolution 48, supra.

SENATE RESOLUTION 230

At the request of Mr. HART, the Senator from Illinois (Mr. DIXON) was added as a cosponsor of Senate Resolution 230, a resolution to express the sense of the Senate on cuts in combat readiness.

AMENDMENT NO. 591

At the request of Mr. D'AMATO, the Senator from South Dakota (Mr. PRESSLER), and the Senator from Nebraska (Mr. EXON) were added as cosponsors of amendment No. 591 intended to be proposed to H.R. 4121, a bill making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1982, and for other purposes.

SENATE RESOLUTION 243—RESOLUTION RELATING TO TECHNOLOGY USED BY RADIO FREE EUROPE AND VOICE OF AMERICA.

Mr. PRESSLER submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 243

Whereas Radio Free Europe, Radio Liberty, and Voice of America contribute to the achievement of United States and world security goals; and

Whereas Radio Free Europe, Radio Liberty, and Voice of America disseminate truthful and factual reports to listeners in many societies which repress freedom of information; and

Whereas the cost of broadcasting true and accurate information to listeners in such societies represents an important investment in the protection of freedom throughout the world; and

Whereas the application of high-frequency direct broadcast satellite technology may improve the transmission of true and accurate information to such societies: Now, therefore, be it

Resolved, That it is the sense of the Senate of the United States of America that—

(1) an interagency study should be conducted by the United States Government to determine the feasibility of direct broadcast satellite use by Radio Free Europe, Radio Liberty, and Voice of America; and

(2) this study should include analysis of technical, economic, and domestic and international political aspects of direct broadcast satellite implementation; and

(3) in order to complete this study in a timely manner, the fiscal year 1983 budget requests for Radio Free Europe, Radio Liberty, and Voice of America should include requests for sufficient funds to complete the study.

● Mr. PRESSLER. Mr. President, I rise today to offer a resolution which confirms the Senate's support for the study of direct broadcast satellite technology use or leasing by Radio Free Europe/Radio Liberty and the Voice of America.

One of the most exciting developments in telecommunications technology today is that of the direct broadcast satellite or DBS. This technology, which is soon to see widespread commercial implementation, provides broadcasting transmit-

tal directly from a satellite to individual receiving antennas.

The administration, including the Departments of Commerce and Justice, has recognized the enormous potential of DBS and has expressed strong support for the rapid development of this technology. The Federal Communications Commission is currently considering a number of applications for DBS video systems in this country.

This flurry of activity is a strong indication that the telecommunications industry is on the verge of yet another breakthrough.

As a member of the Senate Communications Subcommittee and the Senate Foreign Relations Committee, I am concerned that this technology be made available to the Radio Free Europe/Radio Liberty and the Voice of America radio broadcasting operations as well as to the private sector for commercial use.

According to George Jacobs, a consultant with the Board of International Broadcasting, there are a number of advantages to DBS technology which could be of particular importance to RFE/RL and VOA.

First of all, there is the probability that direct broadcasts by satellites would be less susceptible to jamming, a current problem with transmissions to countries which do not have open broadcasting policies.

Second, use of a DBS system would reduce dependence on terrestrial broadcasting installations in foreign countries which may not always be hospitable to such operations.

Finally, there is the possibility of long-range cost effectiveness compared to current transmission practices.

In recent testimony before a House subcommittee, James B. Conkling, director of the Voice of America, identified three questions pertaining to the possible use of DBS for Voice of America broadcasting. He maintains, and I agree with his assessment, that DBS implementation is technologically feasible. But the political and economic ramifications of such implementation need to be examined further.

The resolution I am offering today would express Senate support for a study of this new technology and its possible implementation by RFF/RL and VOA. This resolution would express the Senate's intention to support and encourage this study through future appropriations.

We can be very proud of the work done by Radio Free Europe/Radio Liberty and the Voice of America. It is estimated that tens of millions of people hear these broadcasts on a regular basis. As the leader of the free world, the United States has an obligation to these millions of individuals to provide accurate, objective information concerning world events and problems. It is important that these radio networks have the opportunity to take advantage of every technological innovation if and when it is practical to implement.

As Mr. Jacobs has said:

We do not want to risk missing any unpredictable technological breakthroughs because of inaction. We believe that the potential of satellite technology justifies the relative small amount of funding and resources required for feasibility studies.

I strongly agree with Mr. Jacobs' statement and today I urge my colleagues to join with me to insure that the great telecommunications revolution will be available to the public as well as the private sector of this important industry.●

AMENDMENTS SUBMITTED FOR PRINTING

COMMERCE, JUSTICE, STATE, AND THE JUDICIARY APPROPRIATIONS

AMENDMENT NO. 629

(Ordered to be printed.)

Mr. WEICKER proposed an amendment to the bill (H.R. 4169) making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

NOTICES OF HEARINGS

SELECT COMMITTEE ON INDIAN AFFAIRS

Mr. COHEN. Mr. President, I would like to announce for the information of the Senate and the public, the scheduling of a public hearing before the Senate Select Committee on Indian Affairs.

A hearing is scheduled for November 18, 1981, beginning at 9 a.m., in room 1318 of the Dirksen Senate Office Building, on S. 1613, a bill to confer jurisdiction on the U.S. Court of Claims with respect to certain claims of the Navajo Indian Tribe, and, S. 1468, a bill to provide for the designation of the Burns Paiute Indian Tribe as the beneficiary of a public domain allotment, and to provide that all future similarly situated lands in Harney County, Oreg., will be held in trust by the United States for the benefit of the Burns Paiute Indian Colony.

For further information regarding the hearing, you may wish to contact the committee staff on 224–2251.

Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Select Committee on Indian Affairs on S. 1370, a bill to authorize the Secretary of the Army to acquire a subordination, by condemnation or otherwise, in such interests in the oil, gas, coal, or other minerals owned by the Osage Tribe of Indians needed for Skiatook Lake, Osage County, Okla.

The hearing is scheduled for November 23, 1981, beginning at 9:30 a.m. in room 5302 Dirksen Senate Office Building. For further information regarding the hearing, you may wish to contact Timothy Woodcock, staff director, or Peter Taylor, general counsel of the Select Committee on Indian Affairs at 202–224–2251. Those wishing to testify or who wish to submit a written statement for the hearing record should write to the Select Committee on Indian Affairs, U.S. Senate, Washington, D.C. 20510.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce, for the information of the Senate and the public, the scheduling of a public hearing before the Committee on Energy and Natural Resources to consider the nominations of Pedro San Juan, of the District of Columbia, to be an Assistant Secretary of the Interior for Territorial and International Affairs; and Vernon R. Wiggins, of Alaska, to be Federal Cochairman of the Alaska Land Use Council. The hearing will be held on Thursday, November 19, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, room 3104 Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding this hearing, you may wish to contact Mr. Gary Ellsworth of the committee staff at 224–7146.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Thursday, November 12, to hold a business meeting on pending calendar business.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON THE CONSTITUTION

Mr. TOWER. Mr. President, I ask unanimous consent that the Subcommittee on the Constitution, of the Judiciary Committee, be authorized to hold a hearing at 2 p.m. today, Thursday, November 12, to discuss freedom of information.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

NATIONAL DISABLED VETERANS WEEK

● Mr. HAYAKAWA. Mr. President, I am pleased that Senator PRYOR and Senator HEINZ have requested to be added as cosponsors of my resolution which requests the President to proclaim the week of November 7 through November 13, 1981, as "National Disabled Veterans Week."

Both Senator PRYOR and Senator HEINZ requested to be added as cosponsors last Tuesday, November 10, the day I introduced this resolution. I thank them for their endorsement and look forward to working with them and all 33 of my cosponsors in planning many beneficial and supportive programs to commemorate this week.

I believe together we can make this week a very valuable and worthwhile experience. Disabled veterans deserve to be shown that this resolution can generate immediate and widespread support. The momentum is with us and I anxiously await final passage by both House of Congress and eventual signing by the President.●

PANAMA CANAL

● Mr. TOWER. Mr. President, I wish to express concern over a situation which many in the Congress of the United States were assured in 1979 during the Panama Canal implementation debates would be resolved by now. I refer specifically to outstanding claims of U.S. citizens against the Republic of Panama for seizure of assets owned by U.S. citizens and for which no compensation has been made by the Government of Panama. One of these, a claim by the Boston-Panama Co., dates back to 1970 and the other, a claim by an American-controlled citrus fruit company, dates back to 1974.

These two companies have, since the time of the seizure of their assets, tried without success to have the Republic of Panama make prompt and adequate compensation. The subject of these two outstanding claims was discussed on the floor of the U.S. Senate in February 1978 at the time of the Senate consideration of ratification of the Panama Canal treaty. At that time, concern was expressed that if the Senate consented to the treaty prior to these companies being paid for their seized assets, then the hope of any recovery, according to Senator Curtis of Nebraska, would be "very, very dim." Senator Curtis' fear has been realized.

This same matter was also the subject of extensive floor debates in the House of Representatives in June 1979 at the time the Congress was considering the Panama Canal Implementation Act (H.R. 111). At that time, the Congress was assured by officials of the Carter administration that the Republic of Panama would very soon resolve these outstanding claims and discharge their responsibility under law by making payment to the U.S. citizen owners.

Mr. President, I am sorry to say that not only has that not happened, but it is my understanding that there is at the present time very little prospect of that evenuality in the foreseeable future.

The subject of the United States paying moneys to the Republic of Panama with appropriated public funds while that government simultaneously benefits from production of assets seized from U.S. citizens and for which payment is denied these U.S. citizens is a matter which, if not resolved in the near term, may require congressional action.●

STOP LINES OF CREDIT FOR CORPORATE MERGERS

● Mr. KENNEDY. Mr. President, earlier this week, the Senate adopted a bipartisan amendment I sponsored urging the President and the Federal Reserve Board to discourage the use of credit for large-scale corporate takeovers.

In order to insure that firms interested in such takeovers do not succeed in obtaining new lines of credit before the amendment takes effect, I have written today to Chairman Volcker of the Federal Reserve Board to urge him to exercise his current authority to block any such anticipatory abuses of credit. I ask that the text of my letter to Chairman Volcker may be printed in the RECORD.

The letter follows:

U.S. SENATE,
Washington, D.C., November 12, 1981.

Hon. PAUL A. VOLCKER,
Chairman, Board of Governors, Federal Reserve System, Washington, D.C.

DEAR CHAIRMAN VOLCKER: Last Tuesday, during debate on S. 1112, the Export Administration Authorization Act, the Senate adopted by a vote of 77–12 an amendment I sponsored directing the President, in conjunction with the Board of Governors of the Federal Reserve System, to take appropriate actions to restrain the extension of credit for unproductive large scale corporate takeovers.

There was strong bipartisan support in the Senate for the amendment. The adoption of the amendment is a clear signal of the concern in Congress over high interest rates and over the fact that large amounts of credit are being diverted to oil company and other mergers from vital credit-starved sectors of the economy such as the housing and automobile industries, small business, and small farms.

I hope that the Senate-House conferees on the Export Act will approve the amendment and that it will soon be enacted into law. Pending final legislative action, however, corporations with mergers on their minds should not be permitted to beat the date for action taken pursuant to this legislation. For example, my office has already received several inquiries this morning from representatives of large energy corporations about the amendment.

I believe that the Federal Reserve Board has authority to act on its own to discourage the extension of credit for unproductive purposes. At a time when credit is urgently needed by productive sectors of our economy, it would be unconscionable to permit large corporations to open new lines of credit or to expand existing lines of credit in order to carry out their merger battles.

I urge you, therefore, in light of the action of the Senate, to take immediate steps to discourage banking and other financial institutions from extending credit for such purposes.

Sincerely,

EDWARD M. KENNEDY.●

TAPS BEING PLAYED AT VIETNAM VETERANS MEMORIAL

● Mr. HAYAKAWA. Mr. President, I wish to express my support of Senate Joint Resolution 124 introduced by Senator DANFORTH on November 10, 1981, and originally cosponsored by myself. This resolution seeks to enhance the honor and dignity of the soon to be constructed Vietnam Veterans Memorial. This resolution requests taps be played at the memorial every evening at sunset. America as a whole has finally seen fit to honor the sacrifices of veterans of the Vietnam war. While feelings and emotions regarding this war are mixed, I believe everyone agrees that the brave who died felt they were serving their country and defending its policies. These are the feelings of loyalty to which this memorial pays tribute.

Besides giving honor to the dead, it gives Vietnam-era veterans a feeling of acceptance. Readjustment has been difficult for many of them. When they returned home after serving their country, they were not greeted by cheers and warm words of welcome like veterans from other wars in which America was involved. There was little recognition of bravery and patriotism. Often they were ignored and sometimes even ridiculed. We cannot let Vietnam veterans continue to feel unappreciated. It is tremendously important to let these veterans know that America will not forget their loyalty and courage. This memorial can be a beginning.●

IT IS TIME TO END HANDGUN VIOLENCE

● Mr. KENNEDY. Mr. President, we read daily of the mounting toll of handgun violence across the country and the tragic consequences which these assaults have on the lives of the victims and their families.

One of the most shocking incidents this year was the attack on President Reagan and the wounding of the President, his Press Secretary, James Brady, and two others. Thankfully, none of them was killed—yet they all bear the scars of handgun violence.

The brave struggle of James Brady is particularly in our minds, after his visit to the White House Press Room last Monday. His courage and perseverance are an eloquent tribute to the power of the human spirit, and all of us wish him well in his continuing recuperation.

An eloquent column by Richard Cohen in today's Washington Post gives well-deserved praise to Mr. Brady, and reminds us yet again of the urgent need for responsible action on handgun control to end these senseless tragedies.

Mr. President, I ask that Mr. Cohen's column may be printed in the RECORD.

The column follows:

[From the Washington Post, Nov. 12, 1981]

"GUNS"

(By Richard Cohen)

Among my colleagues, James Brady is a much-loved man. He was President Reagan's press secretary for just a short time before he was shot, but his humor and his warmth and his honesty quickly made him many friends. His story is a poignant one. One wishes him only the best. And one wishes that only the best will come from what has happened to him.

But that does not seem to be the case. The tragedy of Jim Brady is treated in some sort of vacuum. From time to time stories appear about his medical condition, his occasional trips home and his recent appearance in the White House press room where he bantered with the press, the president and Nancy Reagan. Always, though, his injury is discussed without context. You would be forgiven for thinking that he had been struck by some disease and not a bullet.

But it was a bullet that struck James Brady. It was a bullet that entered his skull and smashed his brain. This is what paralyzed him on one side, that has kept him in the hospital since March that has required four operations, and that, for a time, left him emotionally infantile—likely to cry if he stumbled. This was not an act of God, it was an act of man.

And man could do something about it. It was a man, after all, who shot Brady. John Hinckley, the man accused of the shooting, bought a gun with incredible ease. No one asked him why he wanted the gun, whether, say, he wanted to kill someone—and when he was caught with a gun trying to get on an airplane, none of these same questions were asked then, either.

It is more difficult to bring fruit into America from a foreign country than to buy a gun. It is also harder to drive a car—certainly harder to buy a car than a gun. It takes some time to get married and a lot more time to get divorced, but it takes no time to buy a gun. This is possible because of an archaic interpretation of the Second Amendment which deals with the right of the people to bear arms. That refers to the right of the people to raise a militia, not the right of some deranged young man to buy a gun.

The obvious lesson to come out of all this is that the nation needs a gun control law. It needs a national law, because to have a law in one state and not to have one in the next state is pure folly. These laws accomplish nothing except to allow those who are opposed to gun control to say that legislation never works. It could be that even a national gun control law will not work, but we will never know until we try it. It is not too much to imagine that a Hinckley—no hardened killer he—would have quit his task if he found it hard to get a gun.

However obvious these lessons are they are lost on Ronald Reagan. He can stare down at a Jim Brady in his wheelchair and see no connection between Brady's condition and the gun that caused it. He, like so many Americans, seems to have accepted the event as a natural tragedy—like polio. He can see Brady as the regrettable price you sometimes have to pay for yet another American freedom.

Gun control advocates ought to understand this argument. It is not much different from what others say when it comes to civil liberties. For instance, no murder committed by someone out on bail is going to convince bail advocates that bail is not a good idea. And the occasional case where the guilty walks free because, say, the evidence was tainted, does not deter civil libertarians from believing in strict laws of evidence.

But that is because these laws serve a greater good. They are designed to protect the rights of us all. The gun, though, is a different matter. It protects only those who have it—and then only in theory. In fact, it works best for whoever takes the initiative—usually the criminal. This is what happened with James Brady. He and the president were surrounded by armed men—trained, armed men—yet a single man with a gun and an obsession for an actress shot them both.

The president recovered, but Brady still ails. His recovery has been miraculous. His bravery is undisputed. What is disputed, though, is his status. The president, it seems, would prefer to see him as a victim. It does not do him justice. He is, instead, a lesson.●

RETIREMENT OF JUDGE JAMES A. RAVELLA

● Mr. METZENBAUM. I take great pleasure in rising today to honor a man who has performed outstanding judicial service for citizens in my own State of Ohio. Judge James A. Ravella will be retiring after 31 years as judge of the Warren Municipal Court. Over those years Judge Ravella has compiled a most impressive judicial record. Appointed to the bench in 1955, Judge Ravella has been elected to five successive terms.

His list of honors as municipal court judge are too numerous to mention in full. For every year between 1955 and 1971 Judge Ravella has received an American Bar Association National Award for Outstanding Progress in the improvement of traffic court practice and procedures. On six separate occasions Judge Ravella has been honored by the Supreme Court of Ohio for his outstanding judicial service. He received the American Bar Association continued outstanding performance in traffic court practices and procedures award of excellence for 1971–72. He received a certificate of recognition from the State of Ohio's Department of Highway Safety in 1957 and 1965. And in 1969 he was selected as one of four judges to receive the American Bar Association's 1969 Traffic Court Judges Award.

Judge Ravella's contributions to his community have been equally impressive. He is a member of the chamber of commerce, the Elks, the Fraternal Order of Eagles, the American Legion, the Knights of Columbus, and the Ohio Grange. He is a trustee of the Warren YMCA, a member of the advisory board of the Oblate Sisters of the Sacred Heart of Jesus, a trustee of the Trumbull County Humane Society, and former chairman of employ the physically handicapped to name just a few.

I am sure Judge Ravella will be sorely missed by his colleagues. He is to be commended for his enormous contributions to the bench, to the citizens of his community and to the administration of justice. I want to wish him well in his retirement and to thank him for his years of stellar public service on and off the bench.

Mr. President, I ask that some information on Judge Ravella be printed in the RECORD.

The material follows:

BIOGRAPHICAL BACKGROUND OF JUDGE JAMES A. RAVELLA

Born, Niles, Ohio, April 16, 1906.

Graduate, Ohio Northern University College of Law, 1928.

Admitted to Bar, 1928.

Married, one daughter.

Member, The Church of The Blessed Sacrament.

Served in United States Navy as Gunnery Officer, rank of Lieutenant.

Agent United States Treasury Department.

Special counsel to the Attorney General of the State of Ohio.

Police prosecutor.

Appointed Judge of the Warren Municipal Court by Governor Frank J. Lausche, June, 1950.

Elected five times to office subsequently.

Member Chamber of Commerce, Elks, Fraternal Order of Eagles, American Legion, Knights of Columbus, Ohio Grange.

Ohio Traffic Court League.

Ohio Municipal Judges Association.

Trustee of the Warren Y.M.C.A.

Sustaining member of the Boy Scouts of America.

Member of the Executive Committee of the Governor's Traffic Safety Committee.

Former state chairman of the Courts Committee of the Governor's Traffic Safety Committee.

Member of the State Bar Association Traffic Committee.

Member of the Mayor's Traffic Committee.

Member, Trumbull County Bar Association.

Member, Ohio State Bar Association.

Member, American Bar Association.

Member of the Advisory Board of the Oblate Sisters of the Sacred Heart of Jesus.

Former Chairman, Employ the Physically Handicapped.

Trustee, Trumbull County Humane Society.

AWARDS

Warren Municipal Court, recipient first first place national award for outstanding progress in the improvement of traffic court practice and procedures by the American Bar Association, 1955–1956.

Warren Municipal Court, recipient special citation national award for same by the American Bar Association, 1956–1957.

Warren Municipal Court, recipient first place national award for same by the American Bar Association, 1957–1958.

Warren Municipal Court, recipient national honorable mention for same by the American Bar Association, 1958–1959.

Warren Municipal Court, recipient special citation national award for same by the American Bar Association, 1959–1960.

Warren Municipal Court, recipient first place national award by the American Bar Association, 1960–1961.

Warren Municipal Court, recipient second place national award for same by the American Bar Association, 1961–1962.

Warren Municipal Court, recipient national special commendation for same by the American Bar Association, 1962–1963.

Warren Municipal Court, recipient second place national award for same by the American Bar Association, 1963–1964.

Warren Municipal Court, recipient second place national award for same by the American Bar Association, 1964–1965.

Warren Municipal Court, recipient first place national award for same by the American Bar Association, 1965–1966.

Warren Municipal Court, recipient first place national award for same by the American Bar Association, 1966–1967.

Warren Municipal Court, recipient national special commendation for same by the American Bar Association, 1967–1968.

Warren Municipal Court, recipient national special commendation for same by the American Bar Association, 1968–1969.

Warren Municipal Court, recipient national special commendation for same by the American Bar Association, 1969–1970.

Warren Municipal Court, recipient first place national award for same by the American Bar Association, 1970–1971.

Certificate of Recognition, Department of Highway Safety, State of Ohio, 1957.

Certificate of Recognition, Department of of Highway Safety, State of Ohio, 1965.

1961 Judge James A. Ravella received the Fraternal Order of Eagles Award of Merit.

Judge James A. Ravella was selected as one of four judges to receive the American Bar Association's 1969 Traffic Court Judges Award.

Award presented to Judge James A. Ravella by the Supreme Court of Ohio for Outstanding Judicial Service, 1975.

Award presented to Judge James A. Ravella by the Supreme Court of Ohio for Excellent Judicial Service, 1975.

Award presented to Judge James A. Ravella by the Supreme Court of Ohio for Excellent Judicial Service, 1976.

Award presented to Judge James A. Ravella by the Supreme Court of Ohio for Excellent Judicial Service, 1977.

Award presented to Judge James A. Ravella by the Supreme Court to Ohio for Excellent Judicial Service, 1978.

Award presented to Judge James A. Ravella by the Supreme Court of Ohio for Excellent Judicial Service, 1979.

Award presented to Judge James A. Ravella by the Supreme Court of Ohio for Excellent Judicial Service, 1980.

Award presented to Judge James A. Ravella by the American Bar Association for continued outstanding performance in Traffic Court Practices and Procedures Award of Excellence, 1971–1972.

Fifty year Certificate presented to Judge James A. Ravella by the Ohio State Bar Association.

Commissioned Kentucky Colonel, 1978.●

NOTICE OF DETERMINATIONS BY THE SELECT COMMITTEE ON ETHICS

● Mr. WALLOP. Mr. President, it is required by paragraph 4 of rule 35 that I

place in the CONGRESSIONAL RECORD this notice of a Senate employee who proposes to participate in a program, the principal objective of which is educational, sponsored by a foreign government or a foreign educational or charitable organization involving travel to a foreign country paid for by that foreign government or organization.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Mr. Timothy P. O'Neill, a legislative assistant to Senator DAN QUAYLE, to participate in a program sponsored by a foreign educational organization, Tamkang University, in the Republic of China from November 22 to December 2, 1981.

The committee has determined that participation by Mr. O'Neill in the program in the Republic of China, at the expense of Tamkang University, to discuss foreign policy and international relations, is in the interests of the Senate and the United States.

The Select Committee on Ethics has received a request for a determination under rule 35 which would permit Dr. Constance Hilliard, a staff member of the Republican Policy Committee, to participate in a program sponsored by a foreign educational organization, Tamkang University, in the Republic of China from November 22 to November 29, 1981.

The committee has determined that participation by Dr. Hilliard in the program in the Republic of China, at the expense of Tamkang University, to discuss foreign policy and international relations, is in the interests of the Senate and the United States.●

AMERICA'S SPACE PROGRAM

● Mrs. HAWKINS. Mr. President, today, October 12, 1981, marked a historical point in America's space program. This morning at 10:10 a.m., *Columbia* soared into glistening Florida skies in the second dramatic launch of the U.S. Space Shuttle program. With the orbiting of astronauts Joe Henry Engle and Richard H. Truly, Americans have pioneered and crossed the threshold of a new era in space technology. A space vehicle has orbited and returned to Earth and has now been launched again.

This achievement has many lasting benefits for the United States. In the future, it will be possible for us to send satellites into Earth's orbit for one-half to one-fourth the cost of throw-away launch vehicles and will save millions of dollars in communications costs alone. This new and unique sophistication in our space efforts will enable us to retrieve and repair worn out and malfunctioning satellites, thus saving many millions of dollars of investments which otherwise would be lost. Furthermore, this great technological development will be of immeasurable importance to our national security.

The promise of reduced costs of traveling to the celestial realm thousands of miles above us is now a reality, and we can expect to see in this century new American industrial initiatives that will spur all sectors of our economy. I am especially pleased that our Florida spaceport stands as the entrance to this new world which we will continue to explore. What today is a $10 billion investment in research and development will tomorrow yield untold rewards and knowledge.

My pride and faith, along with that of all other Americans, was lifted today as I and millions of others witnessed the second flight of *Columbia*. American inventiveness, enterprise and determination prevail once more. I congratulate the courageous crew and the thousands of National Aeronautics and Space Administration staff members and other individuals whose great efforts made this exciting and monumental journey into outerspace possible.●

KANSAS COL. JOE ENGLE, U.S.S. "COLUMBIA"

● Mr. DOLE. Mr. President, this morning, two outstanding Americans were lifted from Earth aboard the U.S.S. *Columbia*. Air Force Col. Joe Engle and Navy Capt. Richard Truly are the crew for America's second Space Shuttle voyage.

For Kansas, this event holds a special interest because Captain Engle is the hometown pride of Chapman, Kans., a University of Kansas alumnus, and a former employee of Cessna Aircraft Corp. of Wichita. He married Mary Lawrence, of Mission, Kans., in 1955.

Mr. President, Joe Engle's career has been one of direction, dedication, and accomplishment. In 1956, the Air Force called Joe into active duty, and 7 years later he was assigned to a prestigious squadron of X–15 pilots. Colonel Engle served in the Apollo program, and he and Captain Truly were the backup crew for *Columbia*'s first flight last April.

It is, however, Joe Engle's friendship that the citizens of Chapman hold so dear. In 1965, his hometown honored him with a Labor Day gala. He was America's youngest astronaut and his return to Chapman was a memorable celebration. Now, Chapman is planning its 1982 Labor Day celebration, with its returning hometown hero in mind once again.

Mr. President, the Senator from Kansas would like to congratulate Colonel Engle, Captain Truly, and everyone at NASA on yet another historic achievement.●

● Mrs. KASSEBAUM. Mr. President, I want to join Senator DOLE in his praise for the successful beginning of the second mission of the *Columbia* Space Shuttle. All Americans share the pride we feel in our continuing achievements in space.

On this particular day, Kansans feel a special pride because Col. Joe Henry Engle, the commander of the second flight, is a native of Chapman, Kans. The residents of Chapman have waited anxiously for this day ever since Colonel Engle became the youngest astronaut in 1965. As a former student in Chapman, a graduate of the University of Kansas, and a past employee of Cessna Aircraft, Joe Engle has a lot of friends in Kansas who share the joy he must feel today. If anyone questions his allegiance to Chapman, the presence of a Chapman High School flag, a congratulatory letter signed by the school's 424 students, an athletic letter "C," similar to the one he earned as a student-athlete, and a shamrock on this mission should remove all doubt. Conversely, the pride felt by Chapman's residents is evident in their plans to honor him on Labor Day 1982.

Joe's career has been extraordinary since he joined the Air Force in 1956. Senator DOLE has already mentioned some of his more notable achievements and they underscore the long, hard training demanded of him. I congratulate him for his success and join the people of Chapman in extending my best wishes for continued good fortune.●

SALE OF TAX CREDITS

● Mr. BOREN. Mr. President, last Friday, I spoke here on the floor about my concerns over a number of proposals that had been put forward concerning the economy and the goal of balancing the Federal budget by 1984.

During the course of those remarks, I said that if additional revenues were going to be needed, that one of the areas which should be examined is the leasing provision in the recent tax bill. This provision allows one firm to sell tax credits to another. It has created a loophole totally unintended by myself and other members of the Finance Committee—a loophole that is estimated to cost the Treasury $80 to $90 billion in revenue over the next 10 years.

I cited a story which had appeared in the press that very morning of a $200 million sale of tax breaks from one corporation to another.

Today, a similar story appears in the Washington Post which says that Occidental Petroleum Corp. has sold tax breaks on $94.8 million worth of equipment to Marsh & McLennan Co., a New York insurance and investment company. Under no definition could Occidental be termed a needy company.

Mr. President, if we are looking for revenue enhancement proposals, I say again that this is exactly the kind of thing we ought to be reexamining.

Mr. President, I ask that the article be printed in the RECORD.

The article follows:

PROFITABLE FIRM CAPITALIZES ON TAX LAW

(By Thomas B. Edsall)

Occidental Petroleum Corp., one of the fastest growing oil companies with earnings of nearly three quarters of a billion dollars last year, capitalized yesterday on a controversial section of the 1981 tax bill designed to help ailing companies like Chrysler or International Harvester.

The Los Angeles-based firm with major oil holdings in the North Sea, Peru and Libya "sold" tax breaks on $94.8 million worth of equipment to Marsh and McLennan Co., a New York insurance and investment company.

The oil company qualified for the tax break despite its high earnings because it makes almost all its profits from foreign sources. Over the past three years, Occidental has paid no federal tax in the United States.

The deal is based on a section of the tax bill that allows corporations with little or no profits to sell off tax credits and depreciation to profitable firms that can then use the shelters to protect earnings from federal tax liability.

These deals—which amount to the buying and selling of corporate tax breaks—are consummated under paper transactions called leases.

The leasing provision was added to the Reagan administration tax bill to give marginal companies a share of sharp reductions in corporate tax liabilities so that the ailing companies could better compete.

Yesterday, in fact the Treasury Department issued revised regulations governing leases that lawyers involved in private deals said were designed to allow Chrysler and other firms facing the possibility of bankruptcy to sell off their tax credits and depreciations.

What makes the Occidental transaction unusual is the fact that the oil firm, while reporting profits last year of $710.8 million, has almost no domestic earnings against which to write off tax credits and depreciation.

"We are a very profitable company," George Reese, an Occidental spokesman said. "The champion growth company of the Fortune 500."

Reese noted that despite the profits, which through the third quarter of this year have reached $456 million, Occidental is "not making enough [domestic] earnings to take advantage of our tax credits."

Instead, the firm will get a cash payment of somewhere between $20 million and $30 million from Marsh and McLennan in return for selling the tax breaks on the $94.8 million in investments Occidental has made in chemical plant and coal mining equipment.

In its 1980 annual report, Occidental said it paid no U.S. federal taxes in 1980, 1979 or 1978, although it paid foreign taxes of $1.95 billion in '80, $1.36 billion in '79 and $827 million in '78.

During those three years Occidental showed losses in the United States while reporting a profit of $5.7 billion overseas.

The firm was able to achieve this distribution of taxation while reporting that $7 billion of the $12.7 billion in total revenues in 1980 were from locations in the United States, and $3.9 billion of $6.2 billion in identifiable assets were in the United States last year.

Of the oil production, which is the major source of revenue, only 5,000 barrels a day were produced in the United States, while 573,000 barrels a day came from Libya, Peru, the United Kingdom, Bolivia and Canada.

For the insurance and investment firm of Marsh and McLennan, the tax breaks will mean, according to William Duggan, vice president for accounting and taxation, increased earnings per share of 3 cents to 5 cents this year and a total of about 50 cents over the 15-year life of the leases.

While both firms refused to discuss precise terms of the lease arrangement, the basic pattern of most such transactions under the new law goes as follows:

A company that has invested in equipment but has low or no profits against which to write off the tax breaks can "sell" the equipment to a profitable firm. The purchase price is based on a negotiated percentage of the value of the tax breaks to the profitable company.

The profitable company then "leases" the equipment back to the firm that originally bought it for a rent equivalent to the cost of paying off the purchase price. At the end of the lease, the transaction normally calls for the equipment to be sold back to the original purchaser at a nominal price.●

VETERANS DAY

● Mr. QUAYLE. Mr. President, yesterday we paid tribute to the men and women who have honorably served our Nation in time of war. Veterans Day is set aside to recognize the personal sacrifice our war veterans have made in defense of America's most cherished asset—freedom. Over 1 million Americans have died defending that freedom since 1776. We now honor over 25 million Americans.

The origin of Veterans Day traces back to World War I. At the 11th hour, of the 11th day, of the 11th month in 1918, a cease-fire was announced to end the fighting in "The War to End All Wars"—World War I. It has been customary to honor American veterans on November 11, formerly known as Armistice Day. Hopes of undisturbed peace were shattered when World War II broke out in Europe. In 1954, Armistice Day became Veterans Day by an act of Congress. Veterans Day is now observed by civic and religious ceremonies in virtually every locality in the United States. I took part in Veterans Day ceremonies in Indianapolis to honor those Hoosiers who have served their country. There are presently over 729,000 veterans in Indiana who we recognize as outstanding individuals. However, my thoughts would be incomplete if I did not remember those Hoosiers who gave their lives for our country. Approximately 975 Hoosiers died on the battlefields in World War I, 7,534 in World War II, 892 in Korea, and 1,593 during the Vietnam era. My prayers are with those men and women who lost their lives or who suffered wounds and with their families.

It has been said that the uninitiated can never understand the trauma of combat. Perhaps not, but every American ought to remember in his or her own individual way, the great sacrifice veterans have made in defense of American society. One group of veterans that I would like to especially remember this Veterans Day are the men and women who served their country in the most difficult of times—the Vietnam era.

Vietnam was different from any foreign war in which the United States has fought. There were no battle fronts. The enemy may have been a friend during the day but carried an AK–47 at night. As one writer put it, "reality tended to melt into layers of unknowability."

The Americans in Vietnam were fighting in a war that became unpopular back home.

A Vietnam veteran and author, James Webb, has best explained the viewpoint of many Americans during this period in his novel Fields of Fire.

You know what we've lost . . . ? We've lost a sense of responsibility, at least on the individual level. We have too many people . . . who believe that the government owes them total undisciplined freedom. If everyone felt that way, there would be no society. We're so big, so strong now, that people seem to have forgotten that a part of our strength comes from each person surrendering a portion of his individual urges to the common good.

Each man and woman who served in Vietnam recognized this individual responsibility. Now it is time for America to truly deserve. Vietnam should no longer be treated as a nasty secret, nor should the special needs of the Vietnam vet.

Another group which are to be especially remembered are the Disabled American veterans. I am pleased to be a cosponsor of legislation designating this week as "National Disabled Veterans Week."

The pride and continuing strength of the disabled veteran are true examples of perseverance under the most difficult of circumstances. As the DAV National Chaplain, Rev. Thomas J. Meersman wrote:

Disabled vets are experts in pain, shock, stress, weakness, which might be physical, mental or spiritual. This is our offering to our beloved land, proudly made because of our complete commitment to what America professes . . . The dignity of man, and the God-given right to life, liberty and the pursuit of happiness.

As the greatest nation on Earth, America remains a beacon of hope for all those who struggle against tyranny. We must never take freedom for granted. The presence of the veteran among us is a continuing reminder of the sacrifice which freedom demands. As we count our blessings, then, let us count the veterans among the greatest of those blessings and honor them as they deserve to be honored.●

SAUDI CRITICISM OF OMAN

● Mr. BOREN. Mr. President, I am disturbed by an article which appeared in yesterday's Washington Post in which writer David Ottaway reported that the Saudi Arabian Foreign Minister had criticized the country of Oman for participating in U.S. military exercises in the Middle East.

The article reported that the Saudis had made it clear that Oman's participation in operation "Bright Star" was contrary to the principle of nonalinement, to which the Gulf Cooperation Council adhered.

Mr. President, in casting my vote on the sale of AWACS aircraft to Saudi Arabia, one of my main points was that this country would have 4 years in which to observe Saudi actions in regard to a closer friendship with the United States. At that time I said:

If we find that Saudi Arabia does not turn out to be the friend we believe her to be, we will have adequate time to reverse our decision.

Mr. President, I meant exactly what I said, and I am very disappointed at this report. I can only hope that the article does not accurately reflect the attitude of the Saudi kingdom.

I am one Senator who will continue to watch the actions of Saudi Arabia very closely.

Mr. President, I ask that the article be printed in the RECORD.

The article follows:

[From the Washington Post, Nov. 11, 1981]

SAUDIS DECRY OMAN'S U.S. TIES AT GULF SUMMIT

(By David B. Ottaway)

RIYADH, SAUDI ARABIA, Nov. 10.—The Saudi foreign minister, Prince Saud, criticized Oman today for its participation in the U.S. military exercises under way in the Middle East and also said the kingdom had not used American surveillance aircraft to detect the Israeli warplanes that violated Saudi airspace Monday.

At a press conference opening the second summit of the six-nation Gulf Cooperation Council, the prince said that the four Amer-

ican AWACS planes presently stationed here had played "no role" in the incident because, he said, "they are not operating in that region."

A Saudi military communique issued last night said a number of Israeli planes violated Saudi airspace by flying over the northwestern area of the kingdom but were met by Saudi jets and forced to turn back.

Prince Saud said such Israeli violations had "of course" occurred before and reflected the "nature of Israel" in its attitude toward the Arab world.

The Saudis have not usually publicized these violations in the past, and it appears they are giving this one special attention because of the conference taking place here and their desire to impress upon the five other Persian Gulf states the need for a collective security system.

Saud also made it clear that Oman's participation in the current Bright Star military exercises of the U.S. Rapid Deployment Force was contrary to the principle of nonalignment to which the council adhered, and he said the summit planned to take up the issue formally.

"These principles [of nonalignment] were accepted by all member countries of the Gulf Cooperation Council, and the role of this conference is to review the practical steps in applying these principles," he said.

"As to the effect of that on the military exercises, this will have to be assessed and evaluated in the summit conference," he added.

His comments highlighted the difficult position Oman has been placed in even with its conservative Arab neighbors by its participation, albeit a minor one, in the month-long "military maneuvers."

The council of the six kings, sheiks and sultans of Arabia, the heartland of the Arab world, is also scheduled to discuss the Saudi plan for a comprehensive Middle East peace settlement and approve a project for a gulf security pact and a common economic agreement.

The council, which was organized in February, has become increasingly preoccupied with the issue of security because of the 14-month-old Iranian-Iraqi war and Israeli strikes this summer into Lebanon and on the Iraqi nuclear reactor outside Baghdad.

Despite vast differences of size, wealth and relations with the superpowers, the six Persian Gulf Arab states have similar political systems and have been driven together by events to agree on the need for some kind of joint security arrangement to protect themselves from outside interference.

The six—Saudi Arabia, Kuwait, the United Arab Emirates, Qatar, Bahrain and Oman—are of crucial importance to the West because they are located in the center of the Arab world. Together they provide roughly half the daily production of the Organization of Petroleum Exporting Countries (OPEC) and with a combined annual income of around $150 billion, they have become the center of the financial world outside the industrialized countries.

Their continued stability and the possibility of Soviet or other outside interference to overthrow their ruling monarchies has been the subject of growing concern and debate in U.S. policy-making circles.

The Reagan administration recently confirmed a Washington Post report that it has been discussing with Saudi officials an "integrated defense" system to protect the conservative Arab states in the Persian Gulf. An agreement here this summer on closer security among the six would seem crucial to implementation of such a strategy.

However, the six council members are not necessarily in agreement with Washington on what constitutes the most serious threat to their security. Nor do they concur among themselves about how openly or closely they should be linked to the West generally and the United States in particular.

"These people are on a different wave length. Apart from Oman they don't see any imminency to a Soviet threat," remarked John Duke Anthony, a gulf specialist from Johns Hopkins Foreign Policy Institute in Washington, who is here attending the summit as an observer. "They are far more interested with regional, intraregional and internal security issues."

Their most immediate common concern, according to Anthony, is the spillover of the Iranian-Iraqi war into their territories and the call by Iran's Shiite leader, Ayatollah Ruhollah Khomeini, to the Shiite minorities in their societies to rise up to overthrow their governments.

Neither Iran nor, more significantly Iraq, a fellow Arab gulf state, has been invited to join the council. The official reason is that the members do not want to get involved in the war between the two more militarily powerful nations.

But it is no secret that many of the council's members regard both Iran's Islamic revolution and Iraq's socialist Baath government as major sources of their security concerns. In addition, Iraq has a longstanding border dispute with Kuwait, which was part of Iraq during the 19th century Ottoman rule.

Even Kuwait, which earlier this year downplayed the need for a joint defense policy, seems to have changed its mind after several Iranian attacks on its territory, the last one in late September when Iranian warplanes hit one of its oil fields.

Iran in particular seems to have served as a catalyst in convincing all six states to take more seriously the security issue, which Oman, at the other end of the gulf, has been pressing the council from its beginning to make a priority.

Oman has submitted a working paper calling for the creation of a joint naval force and military maneuvers, the unification of air defense systems to cover the entire gulf, an integrated early warning system and the building of a north-south pipeline linking all the oil fields to an Indian Ocean terminal bypassing the highly vulnerable Hormuz Strait.

The Sultanate of Oman has been the one gulf state preoccupied by Soviet moves in the region because it fought a long war against Soviet- and Cuban-supported guerrillas based in neighboring South Yemen.

Oman is also the only one of the six that has signed a formal written agreement allowing the United States to make limited use of its naval and air facilities. It is the sole gulf Arab state participating in this month's Bright Star exercise.

Several council members, particularly Kuwait, have been trying to wean Oman away from its formal military ties with the United States and to convince South Yemen to end Soviet access to Yemeni facilities.

Kuwait is the only one of the six that now has diplomatic ties with Moscow. Only Oman and Kuwait have relations with Peking.

In the council debate over its members' links to the superpowers, Saudi Arabia seems to stand in the middle. The kingdom's leaders repeatedly have come out against any formal agreements for bases or facilities with any of the superpowers, arguing that they only serve as "lightning rods" attracting greater Soviet-American involvement in the region.

On the other hand, it has apparently agreed to discuss American use of Saudi facilities on an informal basis much as Egypt now permits. Its special military and political relationship with Washington is expected to become even closer following the Senate's approval of the sale of five Airborne Warning and Control System (AWACS) planes to the kingdom as part of an $8.5 billion arms package.

These surveillance planes would appear to be the key link to any joint early warning and defense system set-up in the future under the Gulf Cooperation Council.

The additional urgency the council is attaching to the security question is underlined by the presence here for the summit of the chiefs of staff of the six members. They already held a separate preparatory four-day meeting here in September, the first ever, an event Anthony called "a major breakthrough" in intraregional military cooperation.

In addition to approving a plan for military cooperation, the council's summit is also expected to endorse the eight-point plan of Saudi Crown Prince Fahd for a comprehensive Middle East peace settlement serving as an alternative to the American-sponsored Camp David approach.

The Saudi plan calls for Israeli withdrawal from all Arab lands captured in the 1967 Arab-Israeli War, including East Jerusalem, and the establishment of an independent Palestinian state in return for Arab recognition of Israel and its right to live in peace.

The third main point on the council's agenda is discussion of a draft economic agreement, the first of its kind serving to harmonize their often competing industrial projects and development plans.

SENATOR HEINZ ADDRESSES THE NATIONAL FOREIGN TRADE COUNCIL

● Mr. GARN. Mr. President, international trade is becoming increasingly important to the U.S. economy. Recent studies have suggested that the current recession is at least in part related to the decline in our export competitiveness. Unfortunately, America faces a whole variety of disincentives, both foreign and domestic, to our exports. We face unfair competition from trading partners whose governments heavily subsidize credits for the purchase of their exports.

While maintaining the world's largest and most open economy, we find other countries placing severe, and often disguised, barriers to exports from the United States. To this we add our own problems, such as inappropriate levels of taxation of Americans living and working abroad. The Foreign Corrupt Practices Act is notorious for the chilling effect that its ambiguous and sweeping provisions have on U.S. companies that would engage in greater exports but fear finding themselves unintentionally in violation of the law.

Mr. President, the distinguished chairman of the Banking Subcommittee on International Finance and Monetary Policy, Senator HEINZ, has been a tireless advocate of U.S. trade. He has been, and currently is, involved in various measures that would improve the American export posture. I could cite his involvement in legislation such as the Export Trading Company Act, improvements to the Export Administration Act, the Competitive Export Financing Act, revision of the Foreign Corrupt Practices Act, and his work on barriers to our trade in goods and services.

Recently, Senator HEINZ had the opportunity to address the National Foreign Trade Council, where he outlined many of the important trade issues facing this country, along with some thought provoking ideas as to how the growing tide of world protectionism can

be turned back. I recommend the Senator's remarks to my colleagues, and I ask that they be printed in the RECORD.

The remarks follow:

REMARKS OF SENATOR JOHN HEINZ

Mr. Anderson, Mr. Roberts, Friends:

It is indeed an honor and privilege to be asked here today to speak to such a distinguished audience.

The National Foreign Trade Council membership is known nationally and internationally for its active and aggressive involvement in trade. Your policies and positions are the products of hands-on experience, of classic American entrepreneurial skill.

And I am here today to urge you to test that skill again. The world in which Americans trade is fast changing, and we have to run to catch up. I am concerned that the basic principles of an open world trading system are being deeply and dangerously undermined. America commendably still respects the principles of free market access and reciprocity.

Other partners in world trade are increasingly ignoring these principles.

While this poses obvious threats to American economic interests, what I fear most is the increasingly heavy blows to the free market principle that we know and believe the best.

That's why I believe our trade policy is at a crossroads.

The Multilateral Trade Negotiations and the Trade Agreements Act that grew out of the MTN really represent a watershed for American trade policy. They signal the end of the postwar era of Western European and American domination of the international economic system.

Today, we face a new economic world with new economic realities and new challenges for the United States.

Economic growth is no longer a luxury of the Western Industrial nations. As the world economic pie grows, others are taking larger and larger slices.

Economic power is no longer located just in the industrial west. We now live in a multipolar world in which new economic centers are becoming more and more powerful.

No longer are non-Western nations silent. The level of rhetorical confrontation is rising. The new international economic order is not the idle dreaming of Third World bureaucrats anxious to justify their nations' own selfish policies. It is a case of the "have nots" realizing how much more the "haves" have. And there is frustration at the lack of institutional means of changing that.

As Third World economic power and control of resources inevitably grow, impatience will grow with it—and the LDCs' capacity to do something about it. While the U.S. and Western Europe are still leading economic forces in the world, we can no longer control events through a simple exercise of will.

As a great power, the United States has a responsibility to face this new world and its challenges four-square.

As I see it, we must do two things for the economic well-being of ourselves and of the whole world. First, as a world leader we must consistently promote the twin principles of the free market and reciprocity. And second, we must build more effective economic institutions that promote these principles.

This morning I want to share with you, first, some thoughts on how the Reagan administration is managing trade policy given the new realities . . . and then, second, some thoughts on how the U.S. can take the lead in establishing a freer and fairer world trading system.

But before I do so, I want to point out the number one problem facing world trade, and that problem is growing—soaring—world protectionism.

Ironically, one reads in the press that our number one trade problem is growing American protectionism. In fact, our number one problem is the protectionist extremism practiced by others—both by our developed and less developed trading partners in the form of non-tariff measures, subsidies, performance requirements and other such trade distorting practices. These activities are growing, and they allow nations to avoid facing their real economic problems.

A good example is the Japanese practice of severely restricting our market access until their industries are big enough to threaten us. To many Americans, it may sound trivial that NTT, which recently bought 100 Motorola pagers, will not allow the purchase of any more until they complete a year of so-called testing. But when this is multiplied by autos, computers, and other semiconducters, the result is massive protectionism. And it certainly is neither free market economics nor reciprocity, and it's time for people to wake up about this.

The Reagan Administration is beginning its attack on protectionism by breaking down our own self-imposed barriers to exports and trade. Every President since John F. Kennedy has commissioned studies on how to increase exports. And the equivalent of the P.E.C. of each of the last four Presidents has made the same recommendations, over and over again, because so few of them have been implemented. Now, under the leadership of the Reagan Administration, we are finally acting.

Export trading company legislation has passed the Senate, and I am optimistic it will pass the House and be signed into law in this Congress. It will create new exporters and help small ones expand by giving them access to bank capital. It will also protect exporters from uncertain antitrust enforcement.

Amendments to the Foreign Corrupt Practices Act (S. 708) have been reported by the Senate Banking Committee and should shortly be on the Senate Floor. I personally urged Congressman Tim Wirth on the House side, about the need for action, and I am hopeful we will soon proceed to a bill.

On another front, we have enacted reforms in the tax treatment of Americans working abroad, Sections 911 and 913, that will solve the problems created by the 1976 Tax Reform Act.

I submit we have made a good start—the best start in the last 20 years. If we succeed in enacting this body of legislation into law, we will allow American companies to become far more aggressive—in short, to compete again in the world market.

Adlai Stevenson, my predecessor as Subcommittee Chairman, used to say we always shot ourselves in the foot. I have always been amazed at our ability to quickly reload and repeat the process.

The question still remains whether our aim is even going to improve.

While I have nothing but admiration for the Administration's policy of allowing our own companies to compete more freely abroad, I am less enthusiastic about its face-to-face dealings with other countries.

We have an Administration, as evidenced by statements to the World Bank, the International Monetary Fund, and the Cancun Summit, that has correctly and forthrightly advocated the private sector, private investment and free-market principles as in the best interest of LDC development.

Ironically, at the negotiating table, this Administration, like others before it, has too often forgotten its own free-market prescription. It has, as in the subsidy case involving toy balloons from Mexico, succumbed to the tendency to subordinate law—and principle—to political expediency.

At other times, as in its decision on LDC subsidies to grant India the injury test in the wake of the Carter Administration's similar move on Pakistan, the Administration has taken the path of least resistance—in this case in cleaning up problems created by the previous Administration.

In still other areas, like the debate over DISC, it has fallen into the old trap of maintaining smooth relations with our trading partners at the expense of our legitimate rights. Why should we give up DISC while other countries rebate the VAT? Diplomats from other countries usually criticize American negotiators for being both too impatient and too intent on reaching agreement. The former causes us to concede too much too soon. The latter causes us to measure success in terms of the number of signed agreements we bring back—rather than in terms of their contents.

It is still unclear what will happen to DISC. But I do know that regardless of GATT action, Congress will not repeal it without enacting a substitute that is at least equivalent to it.

Finally, wih respect to the Export-Import Bank, I believe we have failed to seize the initiative at the OECD. The European community has offered one-quarter of the loaf, and we have declared victory and come home.

Raising the interest rate floor from 7.75 percent to 10 percent when our prime rate is 18 percent or better, however, is no victory. And I fear the Administration still does not understand how to use assets like the Eximbank as leverage to bring other nations' practices in line with ours.

It is also ironic that the Administration, which has so skillfully moved our domestic economy toward a freer market, is making so many of the same old mistakes internationally. A freer world trading economy will take more than rhetoric. We have to be willing to use our clout to get the results we want.

I believe we need broad new legislation to deal with the growing problem of world protectionism. Important as the 1979 Trade Agreements Act was, I think we may already need a new trade bill.

Such legislation could, and to my mind should, include a better means of dealing with unfair trade practices by nonmarket economies, a program of trade incentives for the developing countries that does not discriminate against the poorest, a domestic adjustment program that is comprehensive and effective once injury has been found, a better governmental structure to give trade the emphasis it deserves in government policy making, and broad new authority to act against performance requirements and other limitations on the free market.

Needed though these changes are, I have to admit that a trade bill is nonetheless a unilateral initiative that can't do the entire job. We have a multilateral effort as well.

Frankly, the fabric of international trade rules is too badly torn at this point for modest repairs to suffice. The forthcoming GATT ministerial won't do the job. Another Tokyo round won't do the job. And our existing world trade institutions generally are not up to this task. In part they have failed to build consensus. UNCTAD suffers from LDC domination and is perceived in the west as the revenge of the have-nots against the haves.

Conversely, the GATT is too legalistic, too representative of the past, and too much a creature of the developed world establishment to have broad credibility.

Clear solutions, however, don't spring full blown from the minds of Senators—or anyone else. They develop through discussion and debate. It is time, therefore, for us to lead the way toward those discussions.

To do so, I think we should return spiritually and perhaps physically to Bretton Woods. The Bretton Woods Conference of 1944 produced an era of both consensus and remarkable prosperity.

This new Bretton Woods Conference I am proposing should be different from its predecessor in two ways. First, it should be broader.

Representatives of all nations that want to participate will be welcome.

Second, it should be unofficial. Open exchange of views and narrowing of differences is the objective, not the development of a sterile communique in the official language of the bureaucracy. This means others besides government officials will be welcome. Scholars, jurists, economists, political scientists, can all contribute to the creative process.

What we should look for at a new Bretton Woods is the development of a new set of economic rules and a new institution to deal with them. The rules should embody the principles of the free market access and reciprocity that most countries already say they believe in. The institution, if it is to be successful, will have to be different from what we have now in two respects. It must operate on a non-consensual basis, and it must have the authority and resources to enforce its decision.

Insistence on consensus—unanimity—in decision making is making policy—I am talking about enforcement policy—through the least common denominator and surrendering the initiative to the least responsible power. The right to make judgments that will make one or more parties unhappy is critical to success. Obviously trade rules must be based on a broad consensus. An institution, however, enforces those rules, and it can only succeed if it has enough authority to make decisions and make them stick.

Free market access and reciprocity—these are the two principles upon which any trade policy and our institution to implement it must be based.

The world is rapidly changing. Maintaining world trading principles is harder with each passing month. But succeeding at that is as important to our long-term survival as our national security policy and defense capability. You—with your long experience in the international marketplace—know better than anyone what we are up against. Our choice is to adopt a bold strategy, or to economically wither and succumb.

I ask you to join with me to launch this process. I urge you to rededicate yourselves to fighting world protectionism—so that we can preserve not just our own economic strength, but the free market system that we know from experience will better all the peoples of the world.●

ROBEY WENTWORTH HARNED LABORATORY

● Mr. COCHRAN. Mr. President, I appreciate the prompt consideration by the Senate on S. 1322, naming the U.S. Department of Agriculture Boll Weevil Research Laboratory near Mississippi State University for Dr. Robey Wentworth Harned.

This legislation means a great deal to the university and to the agricultural community as a whole in my State, who have looked for a meaningful way to honor Dr. Harned.

The action is particularly appropriate because he is considered a pioneer entomologist and is known for his many accomplishments in the field. Dr. Harned is one of those responsible for the establishment of the State plant board in Mississippi. He served for years as head of the department of zoology and entomology at Mississippi A. & M. College, now Mississippi State University, and as entomologist at the Mississippi Agricultural Experiment Station. In 1931, he began 20 years of service as head of cotton insect research in the U.S. Bureau of Entomology and Plant Quarantine here in Washington.

Dr. Harned is highly respected among entomologists because of the enthusiasm and professional interest he generated for his chosen field. The construction of this Boll Weevil Research Laboratory is proof of his inspiration and dedication and is the fulfillment of one of his lifetime goals.

The Mississippi Entomological Association had requested enactment of this legislation, expressing the importance of recognizing his outstanding service. I want to commend the Senate for approving the naming of the U.S. Department of Agriculture Boll Weevil Research Laboratory at Mississippi State University for Dr. Robey Wentworth Harned.●

PUBLIC SCHOOLS: NAVIGATING ROUGH SEAS

● Mr. STAFFORD. Mr. President, it is my privilege today to request that a recent speech on our public schools, delivered by my good friend and colleague, Senator MATHIAS, be printed in the RECORD for all my colleagues to review. I find myself in complete agreement with Senator MATHIAS' observations regarding the state of public education today and the proper Federal response and role in public elementary and secondary education.

This year, the Congress has enacted sweeping changes to Federal elementary and secondary education legislation in order to eliminate many of the constraints of Federal law which school board members, superintendents, principals, and teachers had complained about for many years. This was done while continuing to maintain the proper Federal role of promoting equality and access in all education programs, but particularly through programs such as title I of the Elementary and Secondary Education Act, and Public Law 94–142, the Education for All Handicapped Children Act. Senator MATHIAS' observations on these important laws as well as his insights into further developments in education are extremely interesting, and I commend his remarks to all Members of the Senate.

The speech follows:

PUBLIC SCHOOLS: NAVIGATING ROUGH SEAS

(By Senator CHARLES MCC. MATHIAS, JR.)

I am delighted to have this opportunity to address the Northeast Regional Meeting of the National School Boards Association and to welcome you to one of the most beautiful places in the beautiful State of Maryland—the Eastern Shore.

American education is perhaps the most ambitious social undertaking in the history of any civilization. There has never been a society that has said, as ours now says, "Let us educate all our citizens, regardless of race or handicap or background. Let us build a diverse system that respects the individuality of every student and taps the gifts of each one".

The accomplishments of our system of education—and your contributions to it—are and should be a source of national pride. But this system is not without problems.

You, as leaders of state school board associations from all the northeastern states (as well as the Virgin Islands), face about as daunting an array of challenges as any local officials in this nation.

The litany of problems is familiar: thousands of functionally illiterate high school graduates; a decade of declining scholastic achievement test scores; violence in the schools; changing enrollment patterns; labor strife and teacher layoffs; major budget problems; and more.

Things seem to be topsy-turvy in our schools. This year, for example, the dropouts outnumbered the graduates from Baltimore high schools. The wrong things are going down: test scores and revenues. And the wrong things are going up: costs, the number of tasks schools are asked to perform and the number of legislative mandates or regulatory restrictions they are asked to follow.

Meanwhile, a skeptical public is quite sure that schools are neither running efficiently nor doing a top quality job. And the puzzling controversy over test scores hasn't done much to allay public concern. On the one hand, schools say that test scores cannot be used to rate teachers or to compare one school with another. On the other hand, how well or how poorly students perform on national tests clearly does play a significant part in what academic doors are open or closed to them.

As a result, the taxpayer's willingness to support public schools is often closely related to test scores. So you have a Proposition 13 in California, a Proposition 2½ in Massachusetts and a TRIM resolution in Maryland; bond issues are voted down; and school budgets are reduced.

But no one seems to be asking the logical question: If test scores are going down and if this accurately reflects a decline in teaching quality, then shouldn't revenues go up in order to compensate for the deficiencies?

To complicate the problem, school costs continue to rise. Teachers' salaries are setting the pace but utilities, heat, books, paper, maintenance, transportation and support staff salaries are close behind.

In addition, judges and legislators have been compelling schools not only to take on more and more responsibilities, but also to offer costly, accelerated special-aid programs for some students.

For example, the school board which did little to achieve racial balance by building its schools to accommodate housing patterns must now spend thousands of extra dollars on transportation.

Or the school board which has not been hiring or training teachers who know how to cope with the learning problems of disadvantaged children must now add thousands of dollars to the budget to make up for lost time.

The school board which for years shunted handicapped children aside and ignored their special needs must now offer an appropriate education at enormously increased costs.

In the three areas I have just described—equal access, compensatory education and education of the handicapped—I think you can continue to count on some extra help from the federal government. In these areas, the President's long-term education goal—to return almost all power over federal education dollars to state and local governments—met with only limited success in Congress this year.

With the start of the 1982–83 school year, the Omnibus Budget Reconciliation Act consolidates into one block grant program 20 education appropriations and repeals legislative authorizations for over 40 federal education programs. Most of the money will be distributed by the states among local schools districts to use largely as they see fit.

All of you recognize that enactment of the Reconciliation measure signals a dramatic change of the federal role in elementary and secondary education. More decisions about educational priorities and needs will be shifted to states and local school systems.

Congress excluded from the block grant and left as separate programs the centerpieces of federal school aid—the Title I pro-

gram for the educationally disadvantaged and Public Law 94–142 program for handicapped children. Also continuing as separate programs—at least for now—are vocational education, bilingual education, adult education and the very small women's educational equity program.

You will be glad to know that the Act modifies the Title I program for the educationally disadvantaged to reduce regulation and paperwork and to permit greater state and local discretion.

I believe that Congress acted wisely in assuring that such traditional national priorities as education of the handicapped continue to receive federal attention.

In 1974 an amendment of mine to P.L. 93–380, the precursor to P.L. 94–142, established the principle that the federal government should help shoulder the extra costs for funding education of handicapped children. It also established the formula for this funding.

At the beginning of P.L. 94–142, the federal government promised to be a responsible financial partner with state and local agencies in providing the services mandated by the Act. And for the first two years under the law, the federal government honored that commitment. But then things began to slide.

I still bear battle scars from later fights in the Appropriations Committee to get the federal government to live up to its pledges. But, as you well know, the actual funds annually requested by the President and finally appropriated by Congress are considerably less than the full funding levels authorized.

Now, I am deeply concerned about the future funding of the program. The Reconciliation Act authorizes a 10 percent increase for next year. But, in light of President Reagan's latest budget cutting proposals, it is doubtful that this increase can hold up through the entire Congressional appropriations process. Its future will depend in part on the public response.

I know that many of you think the federal government should become involved in funding the operational cost of your regular or basic educational programs. Your interest in non-restricted federal aid for elementary and secondary education may become greater if pressures continue for easing local property tax burdens and if support grows—as it has in Maryland—for interests equalization in educational funding. The broad-based revenue generating power of the federal government may be an irresistible attraction for those who seek to maintain or increase the level of funding for public education.

Others of you, I know, take the opposite view. You think that federal aid programs for education should be cut back more deeply or even terminated. In fact, some feel that going without federal funds is vastly preferable to having to submit to the complex and extensive administrative, planning and paperwork burdens associated with federal funds.

Whichever view you take about the role of federal funds, I know that every day, as school board members, you see the empirical evidence of the picture I have sketched.

Public education is in a period when the public wants to pay less, not more; a period when the number of pupils is going down, thus calling for school closings and staff cuts; and a period when pupils with few academic skills are being tested along with the brightest, hence lowering the average.

These problems are not going to disappear. So the question that confronts us is: Are we going to let them fester or are we going to try to do something about them?

Admittedly, there are no easy, obvious solutions. But I think there are some approaches that might prove helpful. I'd like to suggest a few.

Treat enrollment drops as a positive development. Look for efficiencies both in management and in classroom delivery of basic skills, use more aides and fewer administrators. Call on community volunteers, use students to teach other students, welcome part-time qualified teachers into classrooms and learning centers.

Review state legislation; eliminate or change laws which are too costly, too restrictive, too negative or inappropriate.

Push for new state legislation which will bring state revenues in to cover extraordinary costs including special education, transportation, vocational training, inservice teaching; and tie local revenues to basic and appropriate school needs.

Ask private industry to help with accounting, distribution, transportation, food, maintenance and energy saving.

Consider giving national tests more selectively. Give most students local tests instead. Ask concerned community and business people to help you devise appropriate tests for those who will end their formal education in your schools.

Tailor school tests to reveal what you need to know about your students. Make some of them diagnostic tests and use them to alter both teaching methods and levels of material. Use diagnostic tests to evaluate individual teachers.

Finally, let me remind you that responsible public officials know you did not create the problems in public education. They know you are putting forth your best efforts to overcome some pretty formidable obstacles. They know it is a big job and that you need—and our children deserve—all the help we can give you.

But some in Congress have doubts. So, before Congress pares education down any farther, you had better remind your legislators that, without a doubt, education has proven to be the greatest engine we have for economic opportunity and social justice. When you invest a dollar in education in America, you are investing in America's future. You are buying this nation something it sorely needs. An investment in education improves our economy; it strengthens our democracy; it enhances our true national security; and it enriches our lives.

Everyone, whether he has a child in school or not, has a stake in education. Well-educated citizens—not new oil or mineral discoveries—are our society's primary natural resource as we seek to compete in an increasingly technological world.

More than a century ago, British Prime Minister Benjamin Disraeli told the House of Commons that:

"Upon the education of the people of this country the fate of this country depends."

Those words were never more true than they are today. Young people today make up two-fifths of our population but all of our future. Each young adult deserves the chance to prepare for a worthwhile career and the opportunity to enjoy the satisfaction that comes with making a productive contribution to society. That is our moral imperative.

Our practical imperative is that no modern nation can survive, much less prosper, without an educated citizenry capable of mastering the complexities of high technology.

Those two imperatives—moral and practical—underline the importance of maintaining the necessary national investment in our schools. I believe we can do this without abandoning our fiscal responsibilities.

I can think of no group of people better prepared or better qualified than school board members to stand up and account for our public investment in education. I urge you to work with your Association and to do all you can to insure that education retains its priority in the federal budget.

Our future depends on it, for as H. G. Wells observed:

"The salvaging of civilization is a race between education and catastrophe." ●

UNDERSTANDING THE NATURE OF FREEDOM

● Mr. GRASSLEY. Mr. President, over the years I have received monthly copies of a publication titled "The Freeman," published by The Foundation for Economic Education, Inc., of Irvington-on-Hudson, N.Y. This publication is concerned with advancing the cause of economic and political freedom; I have found the articles to be well written, thoughtful, and generally in line with my own beliefs.

This month's mail brought a copy of the foundation's monthly newsletter, Notes from FEE, which I would like to share with my colleagues. The writer makes the point that those of us concerned with freedom and individual liberty must not limit our efforts to the political sphere; we also have an obligation to improve our own understanding of the nature of freedom and then communicate the knowledge we gain to others.

Mr. President, I ask that the article be printed in the RECORD.

The article follows:

THE FIRST ORDER OF BUSINESS

In noting the condition of the economy a generation ago, it seemed to us then that the first order of business was to upgrade our thinking. Recent changes in political leadership call for review of the current condition and today's priorities.

For some time in the USA, Ye Olde Federal Mill has been turning out socialistic grist. Many of us have no stomach for this product, and we agitate for a variety of remedies.

Some persons of our persuasion, who are politically oriented, insist that the first order of business is to see that "the right men" are put into office. Others give top priority to a repair of the governmental structure. The Constitution and Bill of Rights have been warped into shapes which the builders would never recognize as their handiwork. The tax apparatus is cluttered with inequities. Government is burning up the people's income at an accelerating rate. To keep itself running in its overextended role, it is inflating and thus eroding the medium of exchange. Its socialistic grist bears ever-increasing price tags; and the people are compelled to take the grist whether or not they want it. Confronted with "a long train of abuses and usurpations," these well-meaning mechanics see repairing the machinery as the first order of business: constitutional amendments, repeal of outrageous statutes, new laws to nullify bad ones, and so on.

Among those of us who dislike socialism, however, are some who seek to combat it through education rather than political reform. We respect those in positions of leadership and wish them well in their new programs. But as we see it, grist mills grind what is put into them, be it No. 1 hard red winter wheat or weed seed. Sure, we prefer a mill with competent operators. And, just as surely, an efficient mill is preferable to one with a misshapen millstone and a wobbly waterwheel. But the fact remains that no mill can yield grist of higher quality than the raw material put into it.

What is being put into the USA's federal mill? All too much of it has been intellectual weed seed! Socialistic thoughts! What is being fed into the mill is representative of what we are and that is all there is for grinding.

Unless we can in some manner contribute to bettering what we are—unless we can, as an absolute minimum, attract individuals away from collectivist thinking as to the function of government—we might as well forget the whole thing.

We cannot even hope for better men in

government than we now have, assuming no better thinking than we now have, and assuming free elections.

Let us imagine a complete reconstruction of the federal machinery along sound legal and organizational lines. It would make no significant difference. The new mill would continue to grind only what is put into it.

More is wrong with the political emphasis, however, than its futility. If this approach were simply futile—without any accomplishment at all—we could let the matter pass. But it inflicts a positive damage to whatever extent it diverts attention from the educational emphasis. The political approach, plausible and popular as it is—particularly among businessmen—robs the all-important educational approach of the most competent talents in the land by focusing these talents on efforts to cure what are at best mere effects.

Perhaps this whole question would be better resolved in our minds were we to realize that it was not the Declaration of Independence, the Constitution, and the Bill of Rights which made America what it was. These remarkable documents were but formalizations of remarkable thinking. It was the remarkable thinking of a few men of superlative stature, and the following they gained, which accounted for the America that was. Later, when the thinking became inferior, these formalizations correspondingly lost their meaning.

There is in America today no lack of potential leadership for improved thinking. In instance after instance over the past fifty years, I have observed men and women of uncommon intellectual and spiritual stature expending their energies in fruitless attempts to change the political reflections of socialistic thinking. They were largely lost to the cause of freedom by their error in emphasis.

On the other hand, over the same period, I have observed ever so many individuals of seemingly lesser potentialities actually attract others into a reversal of their socialistic thinking. They have done this simply by concentrating on the development of their own powers to understand and to explain. They have become sources or wellsprings of the freedom philosophy, for others do, in fact, seek their counsel. Now, let the potentially great emulate these methods of the near great, let them concentrate on the educational approach, let them put first things first, let them focus their attentions on self-realization, and we shall witness a reversal of present trends. The solution, in my view, is that simple and, of course, that difficult. For, what is more alluring and less sensible than the project of reforming another adult? And what is less alluring and more sensible than the project of perfecting self?

A feeling of hopelessness is the straw that could break the back of the freedom movement—for freedom will never be achieved without faith. In any event, this feeling of futility more seriously threatens the continance of FEE's work than does any other discernible influence. People do not continue to work at a problem after its solution appears hopeless to them.

Too many opponents of socialism—once convinced that there is no simple remedy at hand, and aware that the problem at issue is nothing less than altering the mores of a vast society—tend to give up the ghost. Unnerved by the dimensions of the job, they say, "Oh, what's the use!"

The tale of two frogs, dumped into a can of milk, comes to mind. One frog, quick to concede the hopelessness of his situation, gave up and promptly drowned. The other frog was of sterner stuff:

"So he kicked and splashed and he slammed and thrashed,
And he kept on top through all;
And he churned that milk in first-class shape
In a great big butter ball"*

*Holman F. Day. Story of a Kicker.

Experience leads one to believe that the forces which have to do with shaping human destiny are of no help to those of little faith. Indeed, they appear to have no truck with people who lack confidence in what determined effort can accomplish.

On the other hand, these forces—call them by your own name—tend to cooperate with those who believe they can accomplish the seemingly impossible and never call it quits until the game is over. There are men, be it observed, who do, in fact, move mountains. *But they are not the men who doubt that mountains can be moved.*

Take note, for instance, of golfers on putting greens. There are those who doubt they can sink any but the simplest putts. And there are those who have confidence that they can sink every putt—they actually believe this! The former are miserable peformers. Among the latter are to be found the skilled and all the miracle putters.

Miracles are all about us—a common loaf of bread is packed with wonders. Those who have no sense of the miraculous, who have no faith in achieving anything beyond what the unaided individual can accomplish, will be of little help in ridding our society of socialism. The problem seems too hopelessly impossible to them and they quit. But the undaunted, those who know the magic of believing, will make progress, for the forces which are available to those who believe will lend a hand to multiply their efforts. Too bad there aren't more such efforts for them to multiply!

One need have no concern about the quality of men in public office or the condition of the federal mechanism and its statutes once the thinking is right. Public figures and governmental machinery are but effects, reflections, echoes of leadership thinking, whatever that thinking happens to be. Improve the thinking and these hoped-for effects will follow as naturally and as spontaneously as light comes from the rising sun. Therefore, an eye to one's own thinking, to one's own understanding and exposition of freedom, is what should be emphasized.

Enclosed with this issue of Notes from FEE is the latest "Literature of Freedom" catalogue and order form—the best source we know of better ideas on liberty.●

ORDERS FOR FRIDAY

ORDER FOR RECESS UNTIL 9:30 A.M.

Mr. BAKER. Mr. President, is there an order for the convening of the Senate tomorrow?

The PRESIDING OFFICER. There is not.

Mr. BAKER. I ask unanimous consent that, when the Senate completes its business this evening, it stand in recess until the hour of 9:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR COCHRAN TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order, the distinguished Senator from Mississippi (Mr. COCHRAN) be recognized on special order for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RESUMPTION OF CONSIDERATION OF H.R. 4169

Mr. BAKER. Mr. President, I ask unanimous consent that, after the time allocated to the Senator from Mississippi on special order has expired or been yielded back tomorrow, the Senate resume consideration of the Commerce-State-Justice appropriations bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL TOMORROW AT 9:30 A.M.

Mr. BAKER. Mr. President, I know of no further business to come before the Senate. I move, in accordance with the order previously entered, that the Senate stand in recess until 9:30 a.m. tomorrow.

The motion was agreed to and, at 9:29 p.m., the Senate recessed until Friday, November 13, 1981, at 9:30 a.m.

NOMINATIONS

Executive nominations received by the Senate November 12, 1981:

IN THE NAVY

The following-named commanders of the Reserve of the U.S. Navy for permanent promotion to the grade of captain in the line, as indicated, pursuant to the provisions of title 10, United States Code, section 5912:

Abrahams, Paul F.
Abrell, Gary A.
Aisthorpe, John E.
Alafetich, Jack M.
Allen, Martyn A.
Ambrose, Robert C.
Andre, William A.
Antonio, Robert J.
Ardleigh, Paul D.
Armstrong, Melvin R.
Arseneault, Walter A.
Ashbaugh, Charles I.
Avery, Francis A.
Bailey, James G.
Baker, Arthur Jr., III
Baker, Robert P.
Baker, William E.
Baldes, Joseph J.
Bauer, Douglas C.
Beam, Henry H.
Beavins, Robert C.
Beck, Luther B., Jr.
Bendel, James D.
Bergquist, John C.
Bertoneau, George A.
Bidwell, John B.
Biggers, James C.
Biss, Joseph E.
Bittle, Lehner K.
Blalock, Leonard K.
Block, John A.
Bloore, John L.
Blunt, William G.
Boaz, David M.
Bowers, Henry K. W.
Bowman, John L.
Braswell, Joel H.
Brown, Edward A.
Brown, James H.
Buford, Manville T., III
Burns, Robert N.
Burrud, Richard J.
Byrne, Robert A.
Campbell, George R.
Carter, James E.
Centodocati, Anthony A.
Chapman, Craig B.
Clendenon, Claude E.
Coburn, George H.
Coolican, Donald J.
Coughlan, George R., III
Cox, Larry G.
Crownover, James E., Jr.
Davidson, Barrett K.
Davis, Charles S., III
Dawson, Herbert C.
Deloach, Robert D.
Delprincipe, Ronald F.
Deveau, Roger L.
Dighton, Anthony E., Jr.
Dismuke, Newton B., Jr.
Donnelly, William J., Jr.
Drake, Robert L.
Driesen, Jeffrey M.
Drummond, Richard C.
Duffey, Charles J.
Eastham, Clarence S., Jr.
Edwards, James D., III
Ellis, Donald D.
Embree, Frank G.
Englehardt, Dan T.
Essary, Wilburn D.
Everman, Jerry D.
Falco, James F.
Fasano, Vincent P.
Favrot, Richmond G.
Fawthrop, Roland P., Jr.
Feld, Gerald A.
Ferrera, John J.
Flagg, Wilson F.
Flynn, Martin R.
Forrest, "L" A.
Foster, John C., Jr.
Frye, David B.
Gardner, Chester R.
Gause, Gasden S.
Geaney, John R.
Gick, Robert P.
Gill, Henry A., Jr.
Glenn, Robert C.
Gnaedinger, Wallace R.
Godshall, Douglas R.
Good, Edwin M.
Goorjian, Paul M.
Gore, Diane D.
Gorena, Rolando R.
Gosda, Gary L.
Gott, Carl F.
Grimson, James A.
Guthrie, Wallace N., Jr.
Hahn, Carl G.
Hahn, Peter W.
Hall, Arthur H.
Hanke, Harold W.
Harryman, Carrel R.
Hart, Harold J., Jr.
Heavey, James L.
Heimerdinger, Walter L.
Hellewell, Martin S.
Henry, Thomas E.
Herbein, John G.

Herman, Richard M.
Hilf, Paul T.
Hill, Terrance G.
Hopkins, David H., Jr.
Howlett, Frederick J.
Hughes, Arthur L.
Jamison, Lyle C.
Jarmer, Elwood R.
Jeffery, Samuel D.
Jennings, George R.
Johnson, Clinton B.
Johnson, Donald L.
Jory, Jerrold G.
Keller, Donald G.
Kerr, William B.
King, George S.
Kizer, Clyde R.
Klocek, Matthew W.
Knowles, Charles E.
Knutsen, Edward W.
Koonce, William G.
Kroner, Frank R., Jr.
Lammers, Charles M.
Land, Walter R.
Langan, John J., Jr.
Larson, Frederick R.
Larson, Richard H.
Lawler. Albert M.
Lazzaretti, Anthony F.
Leahy, John H.
Leathem, Douglas B.
Lekebusch, Adolf O.
Lennon, John E.
Leonardy, Donald B.
Levenson, Saul
Liddle, Donald J.
Litchfield, Rodger A.
Lockland, Walter G.
Locklin, Ralph H.
Lukinbeal, Donald L.
Lyman, Charles W., III
Magers, Francis D., Jr.
Malmberg, Norman R.
Martin, Roman G., Jr.
Matthews, Robert S.
McBride, Donald J.
McCarthy, Matthew A.
McCloskey, Henry F.
McCravy, Frank E., Jr.
McEnery, Thomas A.
McMahon, John P.
McSharry, Dennis M.
McWilliams, Samuel E.
Meagher, Maurice F., Jr.
Meeks, Harman T.
Miller, Robert L.
Milotich, Alexander A.
Minzner, Allan L.
Moir, Edwin L.
Moore, Andrew J., Jr.
Moore, Dudley B., III
Morrison, Todd H.
Mullenhoff, Paul F.
Murray, Alen C.
Nannini, Albert A.
Newman, Jack G.
Nix, Carleton D.
Nutt, Andrew T.
O'Brien, Ward J.
Odonnell, William P., Jr.
Oneil, William D., Jr.
Osucha, Harold D.
Pace, William F.
Pacheco, Leonard J.
Pate, Allen S.
Patterson, William H.
Paty, Charles R.
Payne, Harvey M.
Pencek, Edward A.
Pendergast, Thomas P.
Perrault, Robert A.
Peterson, James E.
Pierce, Huey L.
Poffenberger, Richard L.
Polenski, James J.
Prebola, George J.
Previ, Ronald W.
Raack, James D.
Rasmus, Ronald C.
Raudabaugh, Richard L.
Ravetta, Richard C.
Raymond, David A.
Rhodes, Thomas W.
Richards, Harry K.
Ridgway, Paul M., Jr.
Riley, Thomas F.
Ringelberg, John M.
Ripberger, Raymond J.
Ripsom, George A.
Roberts, James E., Jr.
Roberts, John S., Jr.
Roberts, Lawrence W.
Robeson, Ross K.
Robinson, David G.
Robison, Earl L.
Rosseau, Charles E.
Roy, Robert L.
Rudnik, James D.
Russell, Kenneth M.
Sasser, Lyle B.
Savio, Leo J.
Schnauffer, Patrick M.
Schulz, Roy S.
Schwartz, Ronald L.
Seeley, Jimmie W.
Segrest, Joe E.
Sergio, Frederick A.
Sibold, Robert D.
Sidler, Norman F., Jr.
Sisley, Dale L.
Smith, Fred B., Jr.
Smith, Gerald A.
Smith, Robert E.
Smoot, William T.
Spencer, Edmund B.
Staes, James P.
Stephens, Clinton T., Jr.
Storer, Arthur E.
Stout, Peter C.
Styers, James D.
Sweeney, Jeremiah J.
Terry, John T.
Tharnish, John L.
Thiele, Gary F.
Thompson, David A.
Thweatt, Frank M., Jr.
Titus, James R.
Tobin, Daniel J.
Trout, Ben T.
Tuleya, Raymond R.
Tutt, Billy D.
Tweden, Wallace D.
Twilla, William M., Jr.
Umstead, Robert L.
Unger, Verner B.
Vandermyde, Philip L.
Vatter, Robert B.
Veccia, James E.
Vikdal, Allen C.
Vonfischer, Eduard L., III
Vongarlem, Thomas A.
Wales, William D.
Walsh, James W.
Walsh, Joseph F., Jr.
Warren, John A.
Weaver, David K.
Webb, Robert E.
Webber, Kent S.
Weitgenant, Harold R.
Wetzel, Robert E.

WITHDRAWAL

Executive nomination withdrawn November 12, 1981:

Richard J. Bishirjian, of New York, to be an Associate Director of the International Communication Agency, vice Alice Stone Ilchman, which was sent to the Senate on September 10, 1981.

EXTENSION OF REMARKS

CAN ONE MAN STOP THE GUN LOBBY?

HON. BILL GREEN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. GREEN. Mr. Speaker, last month's issue of Prime Time carried a cover story about Pete Shields, the chairman of Handgun Control, Inc. It is an important story about one family's personal tragedy and today's effort to bring reasonableness to our Nation's gun control laws. I commend it to our colleagues.

CAN ONE MAN STOP THE GUN LOBBY?

"Another street slaying—the 18th 'zebra' victim." It was a headline chilling in its familiarity. "A Visitor to Bay Area Shot Down."

It went on. "A young man was shot to death on an Ingleside district street last night, the 18th in a series of shocking, unprovoked shootings that have become the terror of San Francisco since January 28.

"Nelson T. Shields IV, 23, who came to the Bay Area only two weeks ago, became the latest victim in the shootings the police list under 'Code Zebra.'

"Shields, a member of a socially prominent Delaware family, was killed at 9:30 p.m. while he and a friend were preparing to pick up a rug at 231 Vernon Street in the Ingleside District. . . .

"Until the witness spoke to police, it was thought that Shields had been shot by a sniper. But the girl told officers what she had seen, and inspectors found two .32 caliber cartridge casings, one of them in the victim's automobile. That was the same kind of weapon used in other 'Code Zebra' shootings. . . ."

It was April 17, 1974, early morning, when the San Francisco Chronicle story appeared, by which time Nelson T. "Pete" Shields III was already packing in Delaware. A late phone call the night before had informed him of the shooting and so, as San Franciscans read of the killing over breakfast, a father prepared to retrieve the corpse an assassin's cheap handgun had made of "Nick," his son.

Here, Pete Shields recalls, is how a young man wound up in the wrong place at the wrong time: "Nick had been working in Denver. He had dropped out of college a year before, a year and a half before. He had reapplied and gotten back into college in the next term, transferring from Hobart to Rochester. He had left his job in Denver and decided to go out to the West Coast and see some friends in San Francisco and then go down to Los Angeles and see his sister before he went back East and started the new term.

"He had only been in San Francisco six or seven days, staying with friends. He was a great lacrosse player, captain of his team in school. This friend of his was a lacrosse player too, and coaching a kind of little-league lacrosse team down in the center of the city. So as soon as Nick got to town he got involved with that, working with the kids. They were coming back from practice about nine-thirty at night and his friend had made arrangements to pick up a rug from a person he worked with who was selling it second hand. They stopped by the home of the associate. While Nick's friend went into the house to get the rug, Nick was cleaning the back of the station wagon to make room for the rug among the lacrosse equipment. Someone came up behind him and shot three shots right into him from close range. He never saw him. Shot in the back. Died instantaneously."

People may indeed kill people, but handguns are their weapon of choice. One American dies in a handgun murder every fifty minutes, or put another way, twenty-nine more will be dead by this time tomorrow, or another, almost 11,000 lives ended the same time next year, all thanks to handguns. In addition to murders, there are more than 250,000 other handgun crimes committed annually—nonfatal shootings, assaults, robberies, rapes. During the Vietnam War, more than 56,000 U.S. soldiers died; during the same period, some 110,000 Americans were killed with handguns. Handguns are used in 50 percent of all murders, compared to knives in 19 percent and rifles in 5 percent. There are currently 60 million handguns circulating in this country, and 2.5 million more introduced every year. At that rate, 100 million handguns will be floating around come the year 2000, or one deadly pistol in the hands of roughly every third man, woman and child.

How we must perplex the rest of the world. Great Britain, with one-quarter of our population had just fifty-five handgun killings in 1979. Japan, with half as many people, had only 171 handgun crimes, fatal and nonfatal, during the same period. Figures for West Germany, France and Canada are similarly small. In these countries and many others throughout the civilized world, the sale of handguns is restricted to those licensed for their ownership, and then only under strict conditions involving certification by the police.

How we vex ourselves. For almost fifty years public-opinion samplings have shown strong support for handgun controls among a majority of Americans. An August 1979 ABC News-Harris Survey found 78 percent in favor of "a federal law requiring that all handguns people own be registered by federal authorities." A January 1981 Gallup poll showed 62 percent urging stricter handgun control legislation. And a Washington Post-ABC News poll in March, following the attempted assassination of President Reagan, put 65 percent of all Americans behind "stronger legislation controlling the distribution of handguns."

Those who do oppose handgun control frequently base their opinion upon a mistaken belief that the Constitution grants Americans an inalienable right to own a gun. Certainly, we are historically and culturally a pistol-packing lot, what with Wyatt Earp and John Wayne and the six-shooter and all, but in precise legal terms the founding fathers never ordained that this be so. The Second Amendment to the Constitution reads, "A Well-Regulated Militia, Being Necessary To The Security of a Free State, the Right of the People to Keep and Bear Arms, Shall Not Be Infringed." On five separate occasions, the Supreme Court has ruled that the Second Amendment was intended to prevent members of the state militias—i.e., the National Guard—from being disarmed by the federal government, and not to secure a handgun at the bottom of father's dresser drawer. As long ago as 1875, in *United States* v. *Cruickshank*, the High Court wrote, "The bearing of arms for a lawful purpose . . . is not a right granted by the Constitution." Furthermore, the American Bar Association states that "every Federal Court decision involving the amendment has given the amendment a collective, militia interpretation and/or held that firearms control laws enacted under state's police power are constitutional."

There is hardly a city or county in this country without its target range where firearm enthusiasts may take their guns to shoot tiny holes in "official" bull's eye grids, courtesy of the NRA, and hob nob with other members of the local gun club, which is usually connected in one way or another with the NRA. For over a century, these ranges and clubs have provided the organization with a grass-roots network ideal for generating national membership, financial support and local political pressure to neutralize attempts at enacting gun control laws. Up against such opposition, a sense of futility is hard to avoid. Presidents, artists, even the Pope, can be struck down, and still nothing seems capable of shaking the NRA's grip on our spineless legislators.

But Pete and Jeanne Shields think they can. At the time of their son's murder, the Shieldses were just another suburban couple like so many other suburban couples. The kids had grown and the house was quiet; that was new, yet they continued to lead the life they had constructed for themselves over more than two decades of marriage: he, a middle-management marketing executive for the Du Pont Chemical Company; she, a homemaker and active member of their community. So much has changed since then. Pete is now chairman of Handgun Control, Inc., a national "citizens lobby" with the goal of keeping pistols out of the hands of maniacs *by law*, and Jeanne is one of the group's principal volunteers, currently setting up a "victims' network" to organize people like themselves who have suffered directly or indirectly from the wanton use of a handgun. They have stolen a page from the NRA's own manual, coalescing a concerned citizenry and collaring politicians and demanding results.

In calling itself a citizens lobby, Handgun Control means two things. First, it attempts to represent the general public in contrast to any specific industry or economic group. The issue of handgun control truly affects everyone; its adherents range from wealthy industrialists to the poor, from doctors and educators to daylaborers. Second, the organization terms itself a citizens lobby since it is supported almost exclusively by membership dues (fifteen dollars annually) and small donations (usually in the twenty-five to one-hundred-dollar area). It draws precious few foundation grants and little business support, nor does it receive government

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

grants, obviously. "Ninety-five percent of our money comes from average everyday folks," says its chairman.

Strangely enough, Handgun Control has no notion of its total membership—so quickly has it grown. Before John Lennon's assassination, it had reached a new highwater mark of 80,000, reflecting a respectable growth of between 10–15,000 a year since its founding in 1974. Outrage over the rock star's brutal, inexplicable death, however, flooded the lobby with 50,000 new members in just twelve weeks. Then President Reagan suffered his assault and, well, all hell broke loose. Handgun Control received mail by the sackful, actually the dozens of sacksful. Then came the shooting of Pope John Paul II, and the organization still hasn't had a moment to tally up its gains, much less catch its breath. Pete Shields estimates that, barring another electrifying act of handgun violence, his group will move into 1982 with a membership of between 250,000 and 400,000, plus a network of active, letter-writing nonmembers numbering perhaps 150,000 or more.

By no small design, victims of handgun violence now occupy an expanding role in the lobby and its efforts. Handgun Control publishes a monthly "Handgun Body Count," patterned after those grim Vietnam War listings, and it attempts to identify and contact survivors. Printed right on the membership blank is a box to check if the donor has ever sustained or had a loved one perish in a handgun assault. "We try to identify and motivate them," says Pete Shields, "which is a difficult task. A lot of them—in fact, the majority of them—don't want to go public. Typically, people want to bury their grief with the dead. But if they can and are willing to talk about their experience, then they can be very useful and very powerful. It's tough for a congressman to ignore a mother telling him about the loss of a son, or a son telling about the loss of a father. It's tough for a congressman, for anyone; to ignore that type of commitment."

Tactics such as these inspire controversy and do raise the question of exploitation, but Shields had given it all a bit of thought and he has a strong answer for his critics. "A lot of people say we're too emotional. I say, bull! That's what the name of the game is. If they, the NRA, can get emotional over that piece of steel, I can get emotional over life and death. This is the difference: they act like they're debating an economic issue—maybe the decontrol of an industry. We're not! We're not debating what President Reagan's economic policy is going to do to the gross national product, or if a 5 percent unemployment rate is tolerable. We see this issue as a life-and-death issue, a human-rights issue. In my book there's no 'acceptable' death rate. They talk about the 11,000 people murdered by handguns each year in the same sense as any other statistic. It's disgusting."

The Shieldses may personally wish for the banning of handguns entirely, but it is not something their organization is working toward—merely strict control. For all of their emotion, they are pragmatists, and they don't think—as some of their colleagues do—that handguns will ever be outlawed and driven out of circulation in this country. They appreciate the desires of those who use firearms for sport. Pete Shields is himself a hunter and owns several long guns; he instructed both his sons in marksmanship and bought them shotguns when they reached the age and maturity to handle them. It's the "Saturday night specials" that raise his fury. A hood can terrorize a neighborhood and a racist nut kill a young boy with these cheap, inaccurate, but deadly, handguns, available for thirty to forty dollars in almost any pawnshop. State laws alone are not enough: the pistol that killed John Lennon was purchased in Hawaii and smuggled all the way to New York, while the one fired at President Reagan was acquired at a Dallas pawnshop. If they cannot be banned, Handgun Control reasons, then at least license their owners and try to keep them out of the hands of the hoods and the nuts. Isn't it simple common sense?

"That's part of my own tragedy," Pete Shields says in one of his flashing segues between professional lobbyist and grieving father. "We tend to be so apathetic. I don't know if it's an American trait or a trait of our time. Until something has literally struck us personally, we tend to leave it to Joe, leave it to the other guy. I was aware of the handgun control debate over the years, read about it after the assassination of the Kennedy brothers, Martin Luther King, Jr., the shooting of George Wallace. But I didn't get involved. I didn't take a position. I didn't write my congressman—until it was too late."

Both he and Jeanne involved themselves in church and civic affairs around Wilmington. Once they helped start up a community drug clinic. They were Republicans like their neighbors. They socialized, played tennis; and it does take a lot of time to raise five kids. They were happy, content. A phone call in the night changed all that.

"Our whole emotion at the time," he remembers, "was built around not the tragedy, not vindictiveness toward the killers, but around the loss of a son. You know, one of our staff members, a woman whose son was also murdered, says, 'When you lose a parent, you lose the past; when you lose a child, you lose the future.'

"When I went out to California to identify the body and bring it back and the media wanted to interview me, they were amazed that I did not show more outrage, more anger, that I didn't want revenge. All the other victims were groping for—you know, 'Gimme a gun so I can go out and get that bastard.'"

Nothing made much sense after that. Not work. Not civic affairs. Not even friends. Pete Shields just knew he was angry, that his son had died for no earthly reason and that something had to be done about it. Now, too late perhaps, but now he began looking into the issue of handgun control. He read books and articles on the topic. He wrote his congressman. Finally, through a mutual friend, he heard about a year-old group called the National Council to Control Handguns. Shields first volunteered his time on evenings and weekends—it felt right, it was making some kind of sense out of his life. After agonizing over the decision, he asked Du Pont for a leave of absence, an unprecedented request. They granted it and he started going into the Washington, D.C. office part-time, eventually full-time, ultimately becoming chairman of the council. He took his thirty years and cashed them in for early retirement from Du Pont.

Jeanne threw hereself into handgun control about a year after her husband. Today, she is virtually a full-time volunteer, working four days a week in the cramped and frenetic office. She writes many of the letters and makes many of the calls that go out to those the organization has identified as handgun violence victims. It is not a pleasant job especially for her, but it is important, val, in fact, and so she does it without complaint—just an occasional breather. Every once in awhile, I do have to take a week off and get away from it. When you keep seeing the letters that come in and hering the things that keep happening to other people, it get to you. It conjures up all the memories. You have to come up for air."

Each in their own way, all the Shieldses, father mother and the four remaining children, are involved in the handgun control issue. But perhaps most involved is Nick. Jeanne remembers, "We did talk it over as a family when we decided to do this full time. It meant that in order to do this and make an impact—talking about Nick and making him the focal point, and going public, was necessary. We wanted the children to be part of that decision; we wanted them to really understand why. They understood and agreed, provided it didn't become, as one of them said, 'maudlin and icky.' I don't think we have been." Even so, it's never easy. "Oh yes, it's seven years now, and often it's perfectly simple to talk about, and then there are times when a phrase or something somebody says sort of triggers an emotion—and then tears come.

"What I'm running into now are people who say that their sons or husbands have been shot and are paraplegics. That went through my mind at the time of Nick's death and again later: what if Nicky had lived but had been paralyzed for the rest of his life? In many ways, that would have been a worse burden, not on us, but on a young man who was very athletic and full of life. I don't think I would want that for him—it's really hell on earth. Yet, on the other hand, at least he would have had his mind. Then I think I probably shouldn't dwell on it. So I don't."

In theory, Pete and Jeanne Shields took on their cause as a means of tempering their personal grief. In effect, they have tendered their lives to the issue.

The first, most obvious hardship was financial. During his leave, Pete drew no salary from Du Pont, living instead off some investment income and savings. Later, he had his early retirement pay, plus a modest stipend from the organization. Now, he estimates his income has once again reached the point where it was when he left Du Pont, seven years ago.

And there were logistical strains. At first Pete commuted, a five-hour round trip from Wilmington to Washington. He used up what welcomes he had, spending the nights on sofas and floors of city friends. He then took a shabby furnished room, which was wearing after awhile. Finally, every other option exhausted, the Shieldses bought themselves a livable condominium in the capital for weekdays, saving their old house for the weekends. Says Jeanne, "You get more organized. You make more lists. And then you let certain things slide, and you find it doesn't make that much difference. If you don't get the house cleaned as often as possible, you soon discover that dirt's not going anywhere. It's no big shakes." Still, her husband explains, "Once you've found a 'solution' the question remains: where is what part of your life? It's worked out that this is our working life and that's our social life—Wilmington is where the roots are. It's hard. We're out of town five days a week and in for two; whether we like it or not, those roots tend to get disrupted. It's very hard to keep the old ties."

Nor does the issue they have chosen make things any more comfortable. "What are the three emotional issues of our time?" Pete Shields asks. "Abortion, busing and gun control. We have friends who are polite and still friends, but not like it used to be, because they disagree with us. There are others who think I've kind of gone off my rocker. It has nothing to do with the issue. They just think: how could I give up a job and go off and live this crazy life, half in Washington, half in Wilmington? And then there are some wonderful people on the other side, people who have been so supportive and strong in their support that it makes up for all the rest."

"It's a bitter pill to swallow," says Jeanne Shields of their new life, "in that we know we're in it because we had a son who was shot. That's always there. But it's a happy life; if we can make the world a better place for someone else, I think that's a pretty great thing to have accomplished. I like to think that there's going to be an end to this. Maybe I'm too optimistic, but I have to be."

Pete Shields has his sanguine moments. "I wish I could say that we'd passed a whole bunch of bills. We haven't. And I wish I could say that our increase in membership wasn't a function of tragedy, but it is.

"Yet, we don't find the battle hopeless. We know we have 75 percent of the American people on our side. That prevents the hopelessness. We know that they are with us, that they know it makes commonsense to keep such deadly weapons out of the hands of the felons and the sick people and the drug addicts of this country. They can't prove it will reduce crime by 1 percent or 12 percent. It just makes sense. But, what do they do about it?

"Our job is getting them to act on that commonsensical belief. We want that belief to affect them at the voting booth, to affect their choice of candidates. That's why we consciously emotionalize the issue: to get people off their intellectual asses. Look, the proliferation of handgun violence affects everyone. If they aren't themselves victims, they live in fear of becoming victims."

No law is going to eliminate all crime. And the wrong people will always have guns. But somehow, and someday soon, something must be done to halt the arming of America. It really is as simple as that.

One person shot every fifty minutes. Twenty-nine people every day. Eleven thousand every year. Who will be next in this insane lottery? Another politician? Another pop star? Another religious leader? Another Nick Shields? Or you?●

POLAND REMEMBERS ITS INDEPENDENCE OF THE PAST—WITH AN EYE TOWARD THE FUTURE

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. BIAGGI. Mr. Speaker, yesterday the people of Poland celebrated the 63d anniversary of Polish Independence Day. This year's observance was especially significant as Polish Communist officials, apparently with the consent of the Soviet Union, permitted a national day of observance of this important day in Poland's history.

While the duration of Poland's status as an independent nation was brief—the memory of freedom has endured throughout these six decades. Yesterday's activities in Poland focused on events of the past but clearly on the minds of the people of Poland is the future. Fourteen months ago, the Solidarity labor movement entered Poland's political scene—and in this short time period has had an enormous impact on Polish life. Two years ago when a group of Polish citizens marked November 11 with a rally, they were attacked by officials and their banners and signs were ripped up and destroyed. Yesterday the entire nation was permitted to observe Independence Day. In fact, according to an account in this morning's New York Times,

In addition to the official ceremony at noon, there was a nighttime rally that drew some 10,000 to 15,000 people. The procession was led by dozens of Boy Scouts bearing torches and dressed in the camouflage uniforms that youths wore during the Varsaw uprising in 1944 against the German occupation. The wreath laying and hymn singing went on for almost two hours.

One can only hope that the events of yesterday may signal the acknowledgement by the Soviet Government that the Solidarity movement is a potent political force which accurately reflects the sentiments and aspirations of the Polish people. The Soviet Union must abandon its dogmatic philosophy that it can only rule through coercion and oppression. Solidarity has shown the world the extent to which the quest for freedom and justice is a predominant part of the Polish spirit. Polish Solidarity has captured world attention and has made it difficult for the Soviet Union to impose its customary suppression of these aspirations. The saber rattling of the Kremlin, including threats of invasion of Poland, have drawn strong world criticism.

I hope that history records the events of yesterday as a catalyst for the rebirth of independence in Poland.●

THATCHER-REAGAN COMPARISON IS UNFAIR

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. PARRIS. Mr. Speaker, hardly a day goes by without some new declaration of why and how the economic recovery program will not work. After 40 years of fiscal excess, these critics demand miracles in the first 40 days of this dramatic change in Federal tax and spending policies.

Some of these doomsayers predict that America is following the course of Britain's Thatcher government. I recently read an interesting paper by Edwin Feulner, Jr., president of the Heritage Foundation, which dispels many of the false claims that have been circulated about the shortcomings of the Reagan economic program.

I am inserting a copy of this paper for my colleagues' information and use. This paper follows:

REAGAN TEAM AVOIDS BRITISH FACTIONALISM

(By Edwin J. Feulner, Jr.)

One by one over the past few months, some of America's leading political pundits have declared the "Thatcher experiment" a failure in Britain, and in appropriately somber tones (somber except for the sounds of joy that occasionally ring through) warn that President Reagan won't have long to wait before he too trips over his conservative baggage.

The equation sounds so appealingly simple that it seems to have gone unchallenged.

But what of the Thatcher-Reagan comparison? Is there substance behind the hot air? Is the Thatcher experiment over, and has the Reagan experiment failed before even getting off the ground?

I think not. First of all, Ronald Reagan isn't Margaret Thatcher, the United States isn't the United Kingdom, and the Thatcher experiment is far from dead. Mrs. Thatcher can still rescue Britain's economy; but even if she fails, it would hardly be a repudiation of Reaganomics.

When Mrs. Thatcher took office the British economy was in a shambles—far worse than the American economy which Ronald Reagan inherited. True, the diseases were very similar. However, in the British case, the symptoms were much more marked. For example:

1. British budget deficits constituted a larger proportion of the gross national product. Consequently, the British government's borrowing "crowded out" much more investment capital.

2. British tax rates had soared as high as 98 percent on "unearned" income.

3. Britain's annual industrial product had slipped back to the level which it had held in 1966.

4. Trade unions are much stronger and more militant in Britain than in the United States.

5. Many key industries (railroads, British Airways, steel, medicine, coal, electricity, gas, telephone, British Leyland, and the BBC) were already under government control, and thus, managed with political rather than economic objectives in mind.

6. More than half of Britain's workers belong to labor unions, compared to less than one-fifth of workers in the United States.

As if all of these problems were not enough, Margaret Thatcher did not assemble a Cabinet which was ideologically united. Until the recent shake-up, her Cabinet included an assortment of members ranging from hard-core Thatcherites—such as Sir Geoffrey Howe, the Chancellor of the Exchequer—to the "Wets"—practitioners of the old brand of Edward Heath Tory paternalism, such as James Prior, the ex-Secretary for Employment. Consequently, Mrs. Thatcher's Cabinet quickly divided into a variety of warring factions which proved incapable of supporting a consistent, coherent, cohesive economic policy. Throughout her tenure in office, the Cabinet has proved to be Mrs. Thatcher's most intractable (and least understood) problem.

Mrs. Thatcher's Cabinet, therefore, presents a sad contrast with that of President Reagan. While the British haggle about where to increase spending, the U.S. Cabinet has thrown itself into the fight to cut federal spending. In Britain, public spending equals 40% of the nation's GNP. Whereas, in the United States, total spending of federal, state and local governments was only 32% in 1980.

Malcolm Baldrige, the Secretary for Commerce, and certainly not one of the strongest of the "Reaganauts," is said to have declared in one of the early Cabinet meetings, "Yes, I can absorb $300 million in cuts. In fact, I'll see you 300 and raise you 50!" Determination such as this has launched the Reagan Administration upon a path which Mrs. Thatcher's feet have not yet touched.

Because the Thatcher Cabinet has no solid, principled commitment to economic reforms, there have been a number of strange anomalies in British government policy. The education ministry cut a relatively minor amount from its annual budget for higher education, to the detriment of some venerable British universities. However, Sir Keith Joseph, Mrs. Thatcher's supposedly free-market guru, is still subsidizing the British Leyland auto company, British steel, and other inefficient nationalized industries. Indeed, Sir Keith's industrial subsidies have been larger than those of the previous labor government. This hodgepodge of policies has not made for good economic policy, nor has it made for good politics.

Moreover, when Ronald Reagan assumed the Presidency he also had David Stockman on his team. Stockman is a savvy (some would say brilliant) Cabinet member who possesses detailed knowledge of the minutiae of the federal budget. Margaret Thatcher has no such individual at her side. Consequently, when her Cabinet split along ideological lines, she had no knowledge, ideological force to back up her prescription. As a result, the Cabinet lost sight of any overall objectives it had ever had and collapsed into a collection of squabbling ministers, each representing his own particular interest group.

Finally, the Thatcher government encountered a characteristically British problem—the transition period or, to be more accurate, the lack of a transition period. Great Britain does not have a transition period between elections and the beginning of the new government's tenure in office. When Margaret Thatcher defeated James Callaghan she had less than a day to form a government and assume power. The Conservatives had a "Shadow Cabinet" in opposition, but not all its members were called into the government. In view of the radical differences between the Callaghan and Thatcher programs, this was certainly not enough of a base or enough time to form a coherent program.

The Reagan Administration, on the other hand, had ample time to study issues, make political appointments several layers deep, construct a broad policy outline, and hear suggestions from outside groups as well as its own transition task forces. The difference in preparation is, of course, tremendous.

In light of all these differences, it should come as no surprise that the Reagan Administration has been much more successful in putting its plans into action. With an informed, unified Cabinet, and with members of Congress fully briefed in advance, President Reagan was able to take advantage of the "honeymoon period" to enact sweeping changes in federal policies. (It is worth pointing out, to the benefit of the Reagan team, that Congress is less homogenous than the House of Commons.) Mrs. Thatcher, on the other hand, was pushed and pulled in different directions during her own "honeymoon period," and the results were often directly contradictory to her campaign promises. For instance, the Thatcher Government has not cut taxes overall; it has increased them.

In the wake of her recent Cabinet re-shuffling, Mrs. Thatcher might be presented with a new opportuntiy to utilize this new "honeymoon period" for a burst of direct action on the economic front. She might ask each new Cabinet minister for firm budget-cutting commitments. She could ask every Cabinet member to pledge support for legislation that would restore her government's ability to enforce the rule of law on trade unions. Such basic social changes would be more in keeping with the spirit of the Thatcher experiment—a restoration of British economic freedoms.

There is one more intriguing idea currently under discussion among British observers Mrs. Thatcher might choose to appoint a outside group—possibly one composed of retired civil servants and academics—to compile a master list of budget cuts. Such a pan could constitute the blueprint for the new Thatcher experiment, and would form the backbone of the new government efforts toward economic restoration.

As things stand, the confusion of the Thatcher forces has meant that the Prime Minister is blamed for a policy which she is not following. That is, she is condemned for her monetarism although her policies have been anything but strict. Moreover, she is condemned by her friend and foe alike; her friends criticize her for not sticking to her plans, while her foes argue that she is inflexible in her ideology. Unless she constructs a consistent economic sance, with the full support of a reconstructed Cabinet, she cannot possibly muster the political strength to win her legislative battles.

What lessons can the United States learn from the mistakes of the Thacher government? Should we think, as many of the pundits are telling us, that the Reagan program is doomed to the same fate? On the contrary, the record points in exactly the opposite direction. If the Reagan Administration loses its commitment to boll economic reforms, it will become the same indecisive, vacillating government that Mrs. Thatcher's Cabinet has been. President Reagan won the 1980 election by presenting the voters with a clear slate of economic reforms; a pledge that it would not be "business as usual" in Washington any bnger. If he and his team back off from thoie commitments, they will be inviting the sane sort of problems that Mrs. Thatcher must now seek to correct. We hope that Mrs. Thatcher will succeed in conquering these problems, but we must not wish them upon ourselves.●

HUMBUG ON THE HILL

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRISENTATIVES

Thursday, November 12, 1981

● Mr. BEREUTER. Mr. Speaker, the following column by James J. Kilpatrick, appearing in the Washington Post on November 4, 1981, is inserted to be read or reread by Members of the U.S. House of Representatives now, and to assure that it is a part of our ready accessible record of public events in this Nation:

HUMBUG ON THE HILL

(By James J. Kilpatrick)

There is a little bit of bad in the best of us, so the saying goes, and a little bit of good in the worst of us. In our town there is a little bit of humbug in practically everybody. Consider, if you will, three recent events.

The first has to do with tourists, the second with tobacco, the third with milk.

Back in January the Senate approved the National Tourism Policy Act. In July the House added some amendments. The bill went to conference in September. A few weeks ago it reached the White House, and on Oct. 16 with President Reagan's signature it became Public Law 97-63.

The National Tourism Policy Act, you will observe, is the product of an administration absolutely dedicated to reducing the federal bureaucracy. The law drifts onto the statutory beaches on waves of austerity. It was signed by a president who constantly reminds us of his preference for the private sector as distinguished from the public sector.

Well. The act will abolish the old U.S. Travel Service, whose function was to encourage foreign tourists to come to our shores. In its place the law creates a new U.S. Travel and Tourism Administration to do the same thing. This "administration," God save the mark, will be headed by an undersecretary of commerce. The agency also will benefit from an assistant secretary of commerce. We are to have a nine-member Tourism Policy Council and a 15-member Travel and Tourism Advisory Board. A notable provision of the act will bind the grasping hands of budget director David Stockman: no matter what the budget and staff of the administration cannot be cut below 1979 levels. So much for tourism. So much for austerity.

On Oct. 21, by a vote of 231-184, the House killed what was know as the Shamansky amendment to the farm bill. The amendment, had it passed, would have put an end to the program of tobacco acreage allotments and commodity loans that has operated since 1933.

In the House the debate ran on for hours. The chamber rang with pathos, bathos and bum statistics. As the orators dwelled upon the plight of 171,000 small family farmers—or 300,000 or 550,000 or 700,000 small family farmers, for the number kept escalating—the floor of the chamber was flooded with tears. "Man the boats!" cried Speaker O'Neill. Only a roll call vote forestalled a tragedy of ghastly proportions.

The principal speakers in opposition to the Shamansky amendment, as you will have surmised, were the gentlemen from the tobacco-growing states of Dixie—from Virginia, Kentucky, Georgia and the Carolinas. It is an interesting thing about these gentlemen: almost to a man, they are fierce defenders of free enterprise, free competition and deregulation. Emblazoned upon their conservative coat of arms is a motto for the ages: "Get the Gummint Off Our Backs!" But on the afternoon of Oct. 21, that venerable motto had been turned to the wall.

While all this was going on over on the Senate side the greatest shoat economizer of them all, William Proxmire of Wisconsin, was interminably holding the floor. The senator's chief claim to fame lies in his monthly Golden Fleece Award given to especially deplorable examples of governmental extravagance. But on this occasion, what was the senator's purpose? Why, sir, his purpose was to defend that especially deplorable extravagance by which millions of tax dollars are spent to buy surplus milk and cheese from the dairy farmers of Wisconsin.

At this point perhaps I should turn purple, clear the old tonsils and fulminate against the hyprocrisy of man, but 9 years in legislative galleries have run down my reservoirs of outrage. This is the way lawmakers have been, are now, and ever will be, roll calls without end, amen. You keep hoping to see principle rise consistently above politics, but after a while you don't hope much.●

PAYING TRIBUTE TO OUR VIETNAM VETERANS

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. WHITEHURST. Mr. Speaker, I want to join my colleagues today in paying special tribute to our veterans of the Vietnam war. There can be no denying the fact that those who were called to serve in this conflict did so under immensely unpopular conditions. There can also be no denying the fact that these individuals made enormous personal sacrifices, which have not always been fully appreciated. Even though the final round of artillery in Vietnam was fired long ago, the horridness and anguish of that conflict, unfortunately, continue to haunt many of these brave soldiers.

Mr. Speaker, our words alone certainly will not erase the tragic events of the Vietnam war years and heal the physical and emotional wounds of those involved. It is my hope, however, that those who served in that war will come to realize that the sacrifices they made for their country have not gone unappreciated. The 97th Congress has taken note of this and passed several pieces of legislation in recent months, some of which is designed to help those veterans still having readjustment problems.

Thank you.●

DO NOT DELAY NEXT ROUND OF TAX CUTS

HON. ROBERT S. WALKER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. WALKER. Mr. Speaker, the raging debate over how best to stimulate genuine economic recovery is intensifying. Unfortunately, it has become clear that we are still suffering an economic hangover from the fiscal policies implemented by the Carter administration. Incredibly, as an alternative to the program offered by the Reagan administration, there are those who are actually recommended that the next round of tax rate cuts be delayed. Nothing could be worse. We are in a recession; you don't raise taxes in a recession.

For those of us who have faith in the President's prescription, the solution to our problem is clear: We need to cut taxes again, and we need to do it quickly. Today, the Wall Street Journal, in a brilliantly incisive lead editorial, described our current economic problems; the evolution of the Reagan solution to them; and pinpoints precisely our future course of action: We should move the effective dates of the next round of rate cuts forward. I am inserting this editorial in the RECORD, and highly command its final recommendation to my colleagues.

RECESSION SPECTACLE

With recession breaking around us, we should record for posterity the current conventional wisdom: The recession is caused by high interest rates. High interest rates are caused by the fiscal 1984 deficit. The 1984 deficit is caused by tax cuts. Therefore, you must fight the recession by raising taxes.

This collection of non sequiturs is currently being offered by the same people who throw around epithets about "voodoo economics." In fact, it has not been accepted economics anywhere since similar thinking caused Herbert Hoover to boost taxes in 1932. And amid the peals of this conventional wisdom we are hearing the first whispers of what, as the recession deepens, will predictably be the next conventional wisdom.

To wit: A recession is no time to control government spending. The government must "offset" the fall in private spending with "countercyclical stimulus." "Stimulus" means a high deficit, for you see, deficits are not a bad thing, they are a good thing. This of course really is "standard" economics, the conventional Keynesianism that got us where we are today. (Unless, of course, you think that the economy was dandy until last Jan. 20.)

It will be fascinating to watch the Hooveresque tax-boosters evolve into Keynesian free spenders. We see that putative Democratic presidential nominee Walter Mondale jumped on the tax-boost ship this week, just as the water started to come over the gunwales. The Republican Senators will be even more amusing; by the third budget resolution Pete Domnici will be repeating Richard Nixon's immortal words that we are all Keynesians now. The deficit is sometimes an argument for higher taxes, and sometimes an argument for higher spending; the one constant is that either way it is an excuse for ducking expenditure restraint and increasing government's role in the economy.

Given the developing spectacle, it's clever of Ronald Reagan to put off his next round of economic proposals until January. We need a little time for countermarching so everyone can find his position before the battle. And perhaps Mr. Reagan can use the time to restore some order in his own economic councils. He is not going to be able to get anything done if his administration offers Congressmen a Chinese menu of economic theories from which they can pick and choose to suit their political convenience. Even without the new flap over David Stockman quotations in The Atlantic Monthly, the cacophony of voices on economic policy has come to approach that on foreign policy.

Which brings us to supply-side economics. The fundamental premise uniting the various thinkers collected under this umbrella, remember, is this: You fight inflation with a tight monetary policy. And you offset the possible recessionary impact of tight monetary policy with the incentive effects of reductions in marginal tax rates. Since we are now having a recession, you could claim the formula has failed, except for one detail: We've had the tight money all right, but, dear friends, we haven't had any tax cut.

The drama now being played out was predicted in the midst of the tax-cut debate by various supply-side theoreticians. Last June, for example, A. B. Laffer Associates published this commentary by Howard Segermark: "The danger is in the concessions on the timing of the tax cut. One possible compromise—a 5 percent cut effective Oct. 1 of this year followed by 10 percent cuts on July 1 of 1982 and 1983—means a 1.25 percent tax cut for 1981 and only 10 percent for the first two years of the Reagan presidency. That could mean little of the positive effects of the tax cuts would be evident by the November 1982 elections."

Precisely this compromise was enacted, after concern over deficits watered down the Reagan campaign proposal of 10 percent reductions in each calendar year 1981, 1982 and 1983. Restrained money growth succeeded in turning inflation down more rapidly than most economists expected, but there was nothing to offset the effects on the real economy. Recession started in September. The puny October tax rate reductions were more than offset by bracket creep. And the tax-boosters blame "voodoo economics" for causing recession.

As for the outlook: On Jan. 1 taxpayers will have a New Year's gift of a boost in Social Security taxes. Further adjustment of their withholding rates will wait until July. On the brighter side, business tax reductions and the end of the 70 percent top rate on income from savings will take effect in January. This will surely boost the savings pool and lower interest rates. Along with normal cyclical factors like a run-off of inventory, this may be enough to spark a recovery. We have little choice but to wait and see.

There would be far more reason for confidence, though, if that next 10 percent personal tax cut were coming into effect in January rather than July. That is, if taxes were cut not less but more.●

CITIZENS ADVISORY COMMITTEE ON CRIME

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. DYSON. Mr. Speaker, a recent poll conducted by the Baltimore Sun

and verified by my own poll indicated that 33 percent of Marylanders polled named crime as the No. 1 local problem. The perception of crime as the worst community problem was fairly uniform at all income and age levels. It was this concern about crime that led me to form a Citizens Advisory Committee on Crime. The purpose of the committee is to initiate a dialog between our local and State law enforcement of officials, our attorneys, the citizens of the First District of Maryland, and myself, so that we can address this serious problem and come up with some meaningful solutions.

To date, I have held two meetings in Washington, D.C. and a public forum in Salisbury, Md. The testimony of the involved citizens has been informative and enlightening. I would like to enter into the RECORD a letter which I received from Mr. Richard Holloway, president of the Salisbury Chamber of Commerce:

SALISBURY AREA CHAMBER OF COMMERCE,
Salisbury, Md., October 28, 1981.

Congressman ROY P. DYSON,
Longworth House Office Building,
Washington, D.C.

DEAR CONGRESSMAN DYSON: The Salisbury Area Chamber of Commerce appreciates the opportunity to participate in the public hearing conducted by you on October 29, 1981. As the representative of the business community in the Wicomico County area we are vitally concerned with the impact of crime on the businessman. On the other hand, we have growing concerns for the attitude of society toward these crimes. It is our contention that a criminal act represents a deterioration of the moral code of our society in addition to an infraction of a law. To the extent that society respects its historical precedents, its present leaders, and its laws, it is less likely to commit a crime. Unfortunately, many people have little respect for laws which they judge to be unfair, unjust, and injurious to their best interest. Education is probably the best long-term measure which will be effective to provide these people with an insight to our democratic processes and procedures.

On the other hand, the violent criminal is not concerned with values and precedent and personal morals. For him the penalty is the solution. This solution must be coupled, of course, with a fair and expeditious rendering of the law. An even handed approach coupled by the rule of law will insure that justice will prevail.

It is important that such crimes as shoplifting, burglary, murder and personal injury be treated as serious crime. It is important that, while the burden of proof belongs to the prosecution, that his hands are not tied by judicial conservatism.

Mandatory jail terms for persons using a gun in the commission of a crime would be a positive step. Also, the model law used in Oregon and Washington for the prosecution of shoplifters should be considered.

It is our position that the law shall protect the innocent, punish the guilty, and preserve society for future generations.

Thank you.

Sincerely yours,
W. RICHARD HOLLOWAY,
President.●

ABORTION DOES CAUSE PAIN TO ITS VICTIMS

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. SMITH of New Jersey. Mr. Speaker, I want to ask all of my colleagues to consider an article by George F. Will which appeared in the November 5 Washington Post, "Abortion Does Cause Pain To Its Victims." Mr. Will sheds light on an area which has gained little attention since abortion became an issue of national interest—the cruel and inhuman techniques used in aborting an unborn child

Mr. Speaker, in all the years we have debated this issue, have we ever taken a hard look at the reality of pain to the unborn? As Prof. John Noonan has suggested,

All of our knowledge of pain is by empathy: we do not feel another's pain directly. That is why the pain of others is so tolerable for us. But if we begin to empathize, we may begin to feel what is intolerable.

Mr. Speaker, I'm certain that once my colleagues take to mind the hard facts contained in this study, some will reconsider their position favoring abortion-on-demand through the 9 months of pregnancy. Thank you for taking the time to consider this article.

ABORTION DOES CAUSE PAIN TO ITS VICTIMS
(By George F. Will)

In the eight years since the Supreme Court nationalized the abortion controversy, one facet of that subject has been neglected: pain. Abortion is painful for the aborted.

The neglect is explainable. To opponents of abortion, death, not pain, is the paramount issue. And proponents of abortion need (emotionally or logically, or both) to deny the possibility of fetal pain.

In its 1973 decision legislating abortion on demand, the Supreme Court announced that fetal life is not alive. At least that is what the court seems to have meant (if it can be said to have meant anything) when it described the fetus as "potential life." Those who support the 1973 decision are committed to the idea that a fetus, being only "potential" life, cannot feel pain, pain being an attribute of actual life.

Thus does a legal absurdity breed a biological falsehood. This intellectual train wreck is the subject of an essay in The Human Life Review by Prof. John Noonan of the University of California (Berkeley) Law School. There are, he notes, four principal means of abortion.

Sharp curettage involves a knife killing the fetus (if the amateur embryologists on the court will allow us to speak of "killing" life that is merely "potential"). In suction curettage, a vacuum pump sucks out the fetus in bits (and a knife cleans out any remnants). In second trimester and later abortions a saline solution is injected into the amniotic fluid. The salt seems to act as a poison; the skin of the fetus, when delivered, resembles skin scaked in acid. If by accident the solution leaks into the body of the mother, she experiences pain that is described as "severe." The fetus can be in this solution for two hours before its heart (a stubborn bit of "potential" life) stops beating. Alternatively, the mother can be given a dosage of a chemical sufficient to impair the circulation and cardiac functioning of the fetus, which will be delivered dead or dying.

A fetus, like an infant or an animal, has no language in which to express pain. But we infer, and empathize with, the pain of creatures such as baby seals, which lack language to express pain.

There are uncertainties about the precise points in fetal development at which particular kinds of sensations are experienced. But observations of development and behavior indicate that by the 56th day, a fetus can move. Discomfort may occasion the movement. Tactile stimulation of the mouth produces reflex action about day 59 or 60. By day 77 the fetus develops sensitivity to touch on hands, feet, genital and anal areas, and begins to swallow. Noonan believes that the physiological literature teaches that "beginning with the presence of sense receptors and spinal responses, there is as much reason to believe that the unborn are capable of pain as that they are capable of sensation."

Americans are proud of their humane feelings and are moved by empathy. Thus, we regulate the ways animals can be killed. Certain kinds of traps are banned. Cattle cannot be slaughtered in ways deemed careless about pain. Stray dogs and cats must be killed in certain humane ways.

But no laws regulate the suffering of the aborted. Indeed, Planned Parenthood, the most extreme pro-abortion lobby, won a Supreme Court ruling that it is unconstitutional to ban the saline abortion technique. That's right: the court discovered that the "privacy" right to abortion, which right the framers of the Constitution neglected to mention, even confers a right to particular abortion techniques.

Most pro-abortion persons have a deeply felt and understandable need to keep the discussion of abortion as abstract as possible. They become bitter when opponents use photographs to document early fetal development. The sight of something that looks so much like a child complicates the task of trying to believe that there is nothing there but "potential" life. And if fetal pain is acknowledged, America has a problem: its easy conscience about 1.6 million abortions a year depends on the supposition that such pain is impossible.

Magda Denes, in her book, "In Necessity and Sorrow: Life and Death in an Abortion Hospital," brought to her subject not anti-abortion convictions but a reporter's eye for concrete detail. Examining the body of an aborted child, she described the face as showing "the agonized tautness of one forced to die too soon." That is a description to bear in mind this day, as many thousands of abortions occur.●

PARRIS INTRODUCES MARRIAGE PENALTY REFORM BILL

HON. STAN PARRIS

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. PARRIS. Mr. Speaker, I am today introducing legislation to correct what I believe to have been an oversight during the consideration of H.R. 4242, the Economic Recovery Tax Act of 1981.

In that legislation, the Congress took an important first step toward eliminating the so-called marriage penalty which taxes the combined income of a married couple at a rate higher than the rate which would apply if the couple were not married and filed individual returns.

While I applaud that action by the Congress, I believe the definition of income included in the bill applies unfairly to those couples whose combined income is not derived from wages and salaries but rather results in payments from pensions and annuities.

The unfairness of the marriage penalty affects all duel income married couples and to limit the application of the marriage penatly relief only to those whose income is derived from wages and salaries discriminates against the disabled and retired.

I hope the Ways and Means Committee will correct this oversight when they consider the technical corrections for the Economic Recovery Act.

I urge my colleagues to join me in supporting this correction of the definition of income for the purposes of the marriage penalty provisions of Public Law 97-34.●

ECONOMIC GOALS

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. HAMILTON. Mr. Speaker, I am inserting my Washington report for Wednesday, November 11, 1981, into the CONGRESSIONAL RECORD:

ECONOMIC GOALS

The United States has passed through a decade of frustration with the performance of the economy. We enter the 1980's with an unsatisfactory rate of growth and high rates of interest, inflation, and unemployment. One often encounters doubt that our current economic system can weather the storm, but free enterprise is resilient and dynamic. Proposals to reinvigorate America's productive capacity and to restore her competitive edge should build on the economy's underlying strengths. Our approach to the economy should be marked by an emphasis on the free market, a reorientation of policy toward long-term solutions, and an acknowledgement that the system is not working as well as we would like, that major changes are needed, and that no one has all the answers. Our long-term strategy must consider the institutions in which economic decisions are made, and it must deal directly with lagging productivity, inflation, and joblessness.

INSTITUTIONS

We must begin to think about better ways of governing, doing business, and working. A reassessment of these institutions may be required. We have lost the consensus which provided the basis for American leadership abroad and rising prosperity at home. The consensus must be forged anew.

We cannot craft a successful economic policy without the broad support of these key institutions and the public. To achieve that support, cuts in spending and taxes must result in a fair sharing of burdens and benefits. Incentives for saving must include the middle class, and government must work to find new patterns of cooperation among business and labor to marshall our resources in a new effort to foster economic growth.

PRODUCTIVITY

For most of the period since World War II, the average worker produced from 2 percent to 3 percent more every year, but in the 1970's the growth of productiviy slowed and then stopped.

Various steps can help us work "smarter" and produce more. Liberalized depreciation and recent cuts in taxes on capital gains and coporate profits should be helpful incentives in modernizing our plant and equipment. Tax incentives to spur research and development by business are long overdue. The government should consider direct support for such efforts when the benefits would outweigh the costs. We must speed the arrival and harness the potential of the revolution in telecommunications, biotechnology, computers, and other areas to assure that America stays competitive.

Beyond these steps, there are many others to be taken. Problems of morale in the workplace might be corrected by joint labor-management committees. Inexperienced workers should be helped by on-the-job training. Regulation must be reduced wherever possible. Several of our basic industries will have to undergo retooling before they can return to prosperity, and the deterioration of roads, sewers, and other public investments will have to reversed.

INFLATION

Throughout the 1970's, high rates of inflation have discouraged investment, pushed up interest rates, eroded savings, and clouded our future with uncertainty.

We should attack inflation across a broad front. The best weapon is an increase in productivity. We cannot rely on tight money alone. We need to correct the imbalance between monetary and fiscal policies by ending regular and massive deficit spending at the federal level. Reduced deficits would ease many of the pressures which keep interest rates and inflation high. Overall, government expenditures should be reduced as a percentage of the gross national product.

Other steps should be taken as well. Indexation of programs itself is inflationary, so it should be avoided as much as possible. The Consumer Price Index should be revised since it overstates housing costs and, because of indexation, contributes to inflation. Competition must be promoted because it forces prices down, and special incentives must be used to boost growth among small businesses. Trade barriers should be lowered, and protectionism should be resisted because it means less competition and more inflation. Exports should be increased because a loss of exports weakens the dollar, and a weak dollar is inflationary.

We must continue to make progress in reducing our dependence on foreign oil. Huge increases in oil prices have sent inflationary shocks through the economy. Programs to diminish the use of oil by conservation and the development of substitute fuels are essential.

The government must handle better the demands of many small but powerful interests. In treating such demands, the government may give long-term price stability too low a priority. The government should not be an inflationary wage or price setter, and it should encourage labor and business to support voluntary wage and price restraint.

UNEMPLOYMENT

Despite considerable expansion in recent years, the economy has not been able to provide enough jobs for an expanding work force. The rate of unemployment still hovers above 7 percent. Rapid increases in the number of workers and the fevered pace of industrial change have contributed to the gloomy picture.

Getting the economy growing again is the single most important thing we can do to bring joblessness under control. A new emphasis must be placed on the creation of jobs. Our aim should be new jobs through the production of more goods and services. Growth, however, will not solve all our problems.

Because millions lack the specialized skills to make their way in a specialized economy, government, business, and labor must cooperate to open up new opportunities for work. The targeted jobs tax credit is one device management and labor may use to train workers. We must continue to remove the barriers which have kept many from productive work. The transition from school to work often leaves the young jobless. Vocational training programs are not always geared to the modern workplace, and the general level of technical education has been a problem. We should make every effort to see that the transition from school to work takes place smoothly.●

BERNICE ROSS

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. SKELTON. Mr. Speaker, I bring to the attention of this body, an outstanding lady from my district who was recently elected president of the Missouri Federation of Democratic Women's Club. Bernice Ross, of Holden, Johnson County, Mo., was elected president of the Federation in a meeting held in Hannibal, Mo.

Through the years, Mrs. Ross has made a significant contribution to our State and to the political process. She has been member of the Johnson County Democratic Central Committee for 30 years and has twice served as chairman and three terms as secretary. Also, Mrs. Ross has been a delegate and alternate to the National

Democratic Convention and in 1976, she was presidential elector. I congratulate Mrs. Ross on her continued dedication to the political system as well as her husband, Marion, for the years of dedication they have shown.●

WASHINGTON COUNTERATTACK

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. WHITEHURST. Mr. Speaker, in light of the recent alarming headlines about deficits, I believe that the editorial which appeared in the Thursday, November 5, Wall Street Journal deserves consideration, since it serves to put the matter in its proper perspective. I commend it to all of my colleagues.

WASHINGTON COUNTERATTACK

Since August signs of panic over economic policy have been emanating from Washington, and we have been attributing them to the stickiness of high interest rates. Unless rates started to fall with the lowering of inflation, we confessed, we might need an entirely new theory of the economy.

But now interest rates have started to decline, and stock prices are rallying. Yet the panic in Washington continues unabated; Senator Domenici, Senator Dole, OMB Director Stockman and the like are trying to boost taxes on the theory that higher taxes would raise bond prices, fight recession and bolster the administration's credibility. Apparently what we need is not a new theory of the economy but a new theory of the panic.

Perhaps there is a clue in the cast of characters. The tax-boost drive is led in the Senate by the chairman of the Budget Committee. It is led within the administration by the Director of the Budget. It is resisted in the House by the Republicans, who do not control the House Budget Committee. It is cheered in the press by Joseph Kraft, David Broder and George Will, who are distinguished not by their grasp of economics but by their eminence in the Washington establishment.

Everyone who lives more than 50 miles from the Washington monument understands what's going on. The panic has little to do with interest rates. Nor does it have much to do with deficits, which have never previously caused any ripple of panic on the Potomac. What the current tax-boost drive is all about is protecting the power of Washington.

The talisman of this effort is of course the horror of the deficit and the splendor of a balanced budget. While this may seem ironic at first blush, Washington has long understood the use of the balanced budget as a lever for increasing taxes and thus its own sway over the nation. Every administration budget and congressional budget resolution within memory has shown a balanced budget, located safely in the mythical future. Usually balance was achieved by boosting taxes; the last budget of the Carter administration, for example, had a recipe for a balanced budget. Outlays were to drop from 22.6 percent of GNP in 1980 to 22 percent in 1984, while receipts were to rise from 20.3 percent to 22.8 percent. Presto, a 1984 surplus of 0.8 percent of GNP. If you chose to believe.

The Reagan promise was to balance the budget at 19 percent of GNP, meanwhile returning 2 percent or so of GNP to defense, from which it had been taken over the last decade in order to boost social spending even faster than total outlays. Accordingly the first congressional budget resolution showed a balanced budget in 1984 at 18.7 percent of GNP. As time comes for a second resolution, Congress is in full cry to boost this number back toward Mr. Carter's.

Driving this process is, not interest rates, but Congress' unwillingness to meet its own spending targets. Most of the major appropriations bills are coming in substantially above the targets in the first resolution, and this naturally leads to pressure for higher spending targets, which naturally leads to pressure for higher taxes. It happens every year, and is happening again with nonpartisan impartiality. This is, of course, precisely the game Mr. Reagan was elected to stop.

In this game economics scarcely matters, but for the record the current deficit is running about 2% of GNP, compared with 2.3% in fiscal 1980, 3.4% in the 1975-76 period and vastly higher numbers in many foreign economies. The Congressional Budget Office September forecast showed the deficit falling to 1% of GNP by 1984. Recession will push it higher, as will further progress against inflation. The economy would be healthier if it were lower, but it is an exercise in hypocrisy to use this fear not to cut spending but to boost taxes. Those in charge of spending control should be forbidden to ever mention revenues or deficits, and should be judged solely by how well they contain outlays. If Mr. Domenici or Mr. Stockman ever comes forward with the proposals implicit in the current tax-boost drive, the only test ought to be whether they hold 1984 outlays to 19% of GNP.

Mr. Reagan seems to understand this despite living within sight of the Washington monument. It is far from clear that his economic program has failed, and even less clear that tax boosts would be the proper remedy if it does. To throw in the towel in this early round would be a capitulation not merely on the Reagan administration's economic theories but on the view of government it was elected to pursue.●

THE RESOLVE TO PERSEVERE

HON. HAROLD C. HOLLENBECK

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. HOLLENBECK. Mr. Speaker, it is with great pride that I take this opportunity to rise and commemorate the 63d anniversary of Polish independence. As we all know, November 11, 1918, is recognized by Poles and their descendants worldwide as Polish Independence Day. In terms of the Polish people's love of freedom and basic liberties, I believe that little has changed between 1918 and 1981. Whereas 63 years ago, we know that the Polish people declared their freedom from the Germans, Austro-Hungarians, and the Russians, today we have a situation in which the Polish people are successfully expressing their will on the mighty Soviet military and political machine.

Since the creation of Solidarity, the 10-million-member independent trade union and the first of its kind in a Soviet bloc country, Poles once again have been showing their resolve to persevere. By establishing the Communist bloc's first independent trade union, they have shown the world that their commitment is based on the strength of a determined grassroots movement.

Mr. Speaker, I believe the United States must do all that it can to support the movement toward increased freedom in Poland. For this reason, I have joined some of my colleagues in cosponsoring House Resolution 233, urging the President to extend additional agricultural credits to Poland beyond the $670 million provided in 1980. I believe that with the agricultural reserves held in this country by the Commodity Credit Corporation and those held by farmers, we have a staggering surplus that can be put to use in alleviating some of the sacrifices being made by the Polish people. Because economic breakdowns may do more to cripple Polish resolve than Soviet tanks, it is essential that we in the United States do all that we can to help relieve Poland of its current shortages.

The people of Poland have found themselves at a crossroads. On one hand they could acquiesce to Soviet demands and, in all likelihood, lose their independent labor union. On the other hand, they can continue their resistance to Soviet policies which restrict their fundamental freedoms and stifle their well-being.

On this 63d anniversary of Polish independence, I think that there can be little doubt as to which of the two alternatives the Polish people will select, and I pledge to do all that I can to support their struggle against Soviet domination as well as their efforts to secure badly needed reforms.

The people of America have always had a close bond with the people of Poland. With our help, Poles can continue to stand up to Soviet abuses and make the next anniversary of their 1918 Independence Day observance even more significant.●

WNVT-TV COMMENDED FOR TELECASTING ACTIVITIES OF THE HOUSE

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. WOLF. Mr. Speaker, the legislative process enacted here in Washington, D.C. remains to be a greater mystery to millions of people throughout all of America. While a limited

number of people have the opportunity to witness the Congress in action, too little effort has been made to make our activities visible to most of the people in this country.

It is vital for the American people to have greater access to any opportunity that provides them a better understanding of the legislative process.

Sadly enough this is the case right here in Washington, D.C., the Nation's Capital, until today. WNVT-TV, an independent television station in northern Virginia, has stepped in to fill a tremendous void by telecasting the activities of the House throughout the Metropolitan Washington, D.C., area.

This is another good example of the expanding role independent television stations play for countless receivers, not only in northern Virginia, but throughout the entire United States.

WNVT-TV has an outstanding record of public service and has performed admirably in providing programing of local, regional, and national interest and scope.

By extending its coverage to include the House proceedings, WNVT extends its commitment and addresses itself to a community with a very close bond to Government.

WNVT is to be commended for realizing the importance and value such programing provides for the viewing public.●

MIRROR FUSION TEST FACILITY DEDICATION

HON. SID MORRISON

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. MORRISON. Mr. Speaker, under the capable leadership of my predecessor in the Congress, the Honorable Mike McCormack, legislation was passed establishing a plan for the development of fusion energy for this country. As the various elements of this plan fall into place, Members should be reminded that fusion energy holds great potential to solve many of our energy supply problems, but at a price. The price is a continuing commitment to fund the necessary research on a timely basis, or the goal of energy self-sufficiency will be pushed further into the next century.

In light of the need for continuing understanding and support of the fusion energy program. I am asking that the presentation by W. Kenneth Davis, Deputy Secretary, Department of Energy, at the dedication of the Mirror Fusion Test Facility be made a part of the record.

REMARKS PRESENTED BY W. KENNETH DAVIS, DEPUTY SECRETARY AT THE MFTF DEDICATION

It is a real personal pleasure for me to be able to return to California to participate in this dedication of the Mirror Fusion Test Facility. In June of this year I had the opportunity to visit the construction site in Building 431. Seeing the large MFTF vacuum vessel there brought back many memories of Ernest Lawrence's visionary but realistic MTA project that I worked on in that building 30 years ago. I am pleased to see that MFTF is carrying on in the tradition set by Lawrence.

During my visit I saw and climbed on the first MFTF magnet, which is the most ambitious superconducting magnet yet attempted by the fusion community. All eyes will be on Livermore as the MFTF magnet undergoes final testing over the next few weeks. Project Manager Victor Karpenko and the MFTF engineering staff are to be congratulated on their achievements thus far in completing the construction of the MFTF magnet, and I wish them the best of luck in the upcoming tests. The MFTF team is also to be congratulated on its proven dedication to the control of cost and schedule. Like technical performance, the cost and schedule performance of MFTF and other fusion construction projects will provide an important measure of the maturity of fusion technology as a viable energy option for the future. You are now midway through the MFTF project that has grown in scope to capitalize on exciting advances in mirror reactor concepts. As you proceed on the second phase to extend MFTF to a tandem mirror configuration, I trust you will continue to exercise the fiscal discipline that has characterized this project thus far.

Besides superconducting magnets, the MFTF project has already led to important technical advances in the areas of neutral beams, cryogenics, vacuum systems and controls. Important as they are, these technologies concern only the special paraphenalia of plasma physics. To become a real energy option, it is now time for the magnetic fusion program to embark on nuclear engineering with all that this implies in developing the materials, blanket designs, power conversion and reactor safety features essential to turn fusion neutrons into a useful and economically competitive power source. The Department of Energy is fully committed to taking this step, in an orderly manner. I look forward to continuing work with Dr. Trivelpiece, Mr. Kintner and members of the fusion community in formulating a realistic plan for the engineering development of magnetic fusion.

There must be no illusions about the difficulty, the cost or the time likely to be required for the engineering development. Some have suggested that the present fusion R&D expenditure rate will have to double. In the long run that may be an underestimate, for experience shows that engineering development is expensive. Moreover, the scientific research program must continue to be strong and innovative. In view of its protracted development and ultimate promise, the fusion program must not narrow its options too soon nor cease to improve its basic concepts. There is still much work for the physicists.

Engineering development will enlarge the fusion community, with a greater role for engineering and for industry. A number of companies are gaining valuable experience through their participation in MFTF and other fusion projects. In that regard, I would like to acknowledge the contributions of Aydin Industries who designed and constructed the MFTF neutral beam power system; RCA who built the beam modules; CVI and PDM who constructed the fusion chamber; CBI who constructed the magnet case; and General Dynamics for its role in magnet design, to name a few. As engineering development accelerates, companies like these and others not yet involved in fusion research will assume an increasingly important role. Over the past two years, the fusion physics community has widely acknowledged the timeliness of this transition. Still, many challenges lie ahead as fusion evolves from physics research to engineering development in what may be the most extensive experiment in technology development and transfer ever attempted.

The road ahead is long and risky with no certainty of success. Yet, the potential of fusion is so great that these risks must be taken, with the support of the government for years to come. This Administration is committed to Federal support of long-range R&D, such as fusion, to achieve a secure energy future in the next century.

While it is a "fact of life" that because of the extreme pressure on budgets we may not be able to proceed as rapidly as we would like or on as many parallel paths as might otherwise seem desirable, we are committed to, and will pursue, our major potential options for the future including fusion. I must also express my conviction that "restructuring" of energy activities in the Federal Government will not affect that dedication.

We are constructing and implementing an energy policy based on maximum reliance on the initiatives and management expertise of our industry with the free market and industrial decisions playing the key roles. We believe our programs will only be of value if they are ultimately utilized by industry to serve real needs of the public sector and that industry and the private sector should be brought into the program planning to make sure our work is likely to be useful. We are looking for cooperation and mutually desirable programs and are seeking to do away with the adversary relationship which evolved over the last several years. These concepts will be utilized as magnetic fusion moves toward practical industrial use.

It must also be recognized that the industry most likely to utilize magnetic fusion at least in the early stages of its use, the electric utility industry is unique in several ways which relate to development of electric energy sources. Today it uses one-third of all the energy used in the United States. It is the most capital intensive of all major industries. At the same time it is fragmented geographically and heavily regulated as to revenues and rates—and is largely without the financial resources or initiatives available to other industries to support long-range, large-scale developments such as fusion or even the breeder which is nearer commercial realization. Thus, it is necessary that our approach be different than that for some other developments such as that of synthetic fuels.

Even if fusion succeeds technically, to enter the marketplace it must not only be economic but be accepted by the public. Fusion is a nuclear technology. Like the fission reactors of today, fusion reactors will face public scrutiny on the issues of cost, safety and waste disposal. It is important that fusion advocates address these issues squarely and realistically as public awareness of fusion increases.

Finally, I cannot visit Livermore without publicly acknowledging the great debt of the Nation to this Laboratory, its leaders, and its personnel, for its role in maintaining a strong defense. The Department of Energy is proud of its nuclear weapons lab-

oratories and the roles they have played in maintaining the peace. We are fortunate that this great technical strength can now be brought to bear, through projects like the MFTF, to solve the energy problems of tomorrow.

Roger, distinguished guests, it is a pleasure on behalf of the Department of Energy for me to dedicate the Mirror Fusion Test Facility. It will soon be 50 years since the discovery of fusion, and 30 years since it was first put to use militarily. Let us hope that the MFTF and its companion projects around the world will help make fusion power a reality in the next century.●

RESOLUTION ON TITLE IX OF THE EDUCATION AMENDMENTS OF 1972

HON. CLAUDINE SCHNEIDER

OF RHODE ISLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mrs. SCHNEIDER. Mr. Speaker, today I introduced a resolution stating my support for Title IX of the Education Amendments of 1972.

Over the past several decades, substantial gains have been made in insuring fair treatment of women. This has been, in large part, as a result of statutes and guidelines which have been enacted by Congress to correct past discrimination policies which have worked to deny equal opportunities for women.

Title IX of the Education Amendments of 1972 is one such piece of legislation. It prohibits sex discrimination in education programs receiving Federal financial assistance. Title IX touches upon nearly all facets of education and applies to students from preschool through graduate programs.

A report recently released by the National Advisory Council on Women's Educational Programs, "Title IX: The Half Full, Half Empty Glass," illustrates how effective this statute has been in promoting education opportunities for women. This is a law that has made a difference:

The number of women enrolled in professional schools has increased substantially over the past nine years: Dental Schools: 1,011 percent. Veterinary Schools: 120 percent. Law Schools: 337 percent. Medical Schools: 296 percent.

Counseling has often limited the career aspirations of boys and girls. Counselors use the Stong Vocational Interest Blank to evaluate a student's interest. At one point there were two versions, a pink one for the girls and a blue one for the boys. The pink one contained lower paying career possibilities such as nurse or science teacher. The blue one contained such occupations as physician or scientist. Title IX requirements have changed this.

Over the past nine years the enrollment increase for women in vocational education was greater than men. Women increased by 60 percent while men increased by 32 percent.

Great strides have been made, however, economic realities continue to indicate the need for the implementation of such legislation. The average working woman continues to earn only 59 cents for every dollar earned by her male counterpart. Equal education opportunities provide women with the tools to earn a decent wage and to pursue career advancement.

While many sectors of our society do indeed need relief from overly burdensome regulations, corrective action must not be taken at the expense of women who are at long last seeing the barriers fall.

The resolution which I have introduced today, along with a number of my colleagues from both sides of the aisle, simply states our view that title IX should not be repealed or altered in a manner which will deny any person equal access to education. I would like to urge my colleagues to support and cosponsor this resolution to insure continued equal opportunity for women in education.●

VETERANS DAY

HON. GUS YATRON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. YATRON. Mr. Speaker, yesterday, November 11, was a day of thanksgiving for all Americans. It is on this day every year that we pay tribute to the veterans of our Nation. Originally celebrated as Armistice Day to mark the end of World War I in 1918, Veterans Day has come to mean much more to us. It is the day that we honor the outstanding contributions of all veterans.

Over 1 million Americans have died in battle, and an estimated 30 million have served in the Armed Forces starting with the Revolution, to preserve our freedom. We survive today as one nation because Americans were willing to fight and lay down their lives for their fellow citizens. We remain the greatest country on Earth because our veterans were, and still are, willing to pay the price.

The courage, sacrifice, and endurance of our veterans cannot be overemphasized. It is only fitting that we honor them with medals, ceremonies, and parades. However, our country owes them much more than just 1 day a year. Our responsibility to the veterans does not stop on November 12.

This year the Congress passed several bills which seek to address the needs of our veterans. Veterans disability, dependency, and indemnity compensation were increased by an average of 11.2 percent. The Veterans' Administration was ordered to operate an adequate number of hospital beds. Priority medical care will now be given to Vietnam veterans suffering from the effects of agent orange. The psychological readjustment counseling was extended until at least 1984.

America is a free land today because our veterans have always performed above and beyond the call of duty. We can help guarantee our future freedom by caring for those who have done so much for us.●

WHY CAN'T JOHNNY READ OR WRITE?

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. BIAGGI. Mr. Speaker, for those of us who have dedicated their public careers to promoting educational equity and quality in our schools, we have just reason to be alarmed by the recently released report by the National Assessment on Education Progress. Despite the millions of Federal, State, and local dollars which are spent on education, the sad result is that our children cannot explain—in writing—exactly what it is that they read.

The national assessment, funded by the federally supported National Institute of Education, has been testing our schoolchildren since 1969 on their skills and their classroom performance. Never have the results of such a survey, which looked at 106,000 students between 9 and 17, been so onerous for our educational system and the products it is vested to train—our young people.

The report findings show clear deterioration since the last such survey was conducted in 1970–71 to test students on reading and literature and in 1974 on reading alone. In asking students to read and analyze poems, a shaggy-dog story and other works, three-quarters of the 17-year-olds responded to multiple-choice questions correctly but only 5 to 10 percent showed "strong analytic skills and about 10 to 15 percent showed no evidence of being able to do the analytic tasks at all." In 1970–71, 51 percent of those surveyed could write a response as compared to the 41 percent who could for this survey—a decline of 10 percent in 10 years.

This survey has important implications for our educational system. First, it points to the vital work which is being conducted by the National Institute of Education, whose mission is to monitor educational progress in this Nation and underscores the need for adequate funding of such research which has national significance.

Second, this report indicates that we are not teaching our student skills which will assist them in adulthood and will train them to be effective communicators in whatever walk of life they choose. A dialog must begin within the educational community to

refocus attention on our educational priorities and reexamination of those priorities is clearly in order.

Finally, in an era of shrinking resources for local schools we must be diligent in targeting existing resources where they are most needed. We must demand excellence in education, not merely equity at the expense of quality. I was pleased to see that Secretary of Education Bell has appointed a commission on this very topic and I am anxious to see their agenda. Clearly, this report will be an important base upon which to build their priorities for the next 18 months and I plan to monitor this situation closely.

The danger in not immediately and directly addressing the issue of reading and writing by our students has long-term liabilities for our strength as a Nation. If we cannot train young people to articulate their thoughts and ideas, the skills of our work force will deteriorate over time—and our economy and productivity will suffer irreparably because of this. I urge my colleagues attention to this matter and invite them to share these concerns with their own communities.●

MEN'S DAY AT BETHEL A.M.E.

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. DYSON. Mr. Speaker, while the rest of the country went about its business on Sunday, November 8, 1981, the men of Bethel African Methodist Episcopal Church in Easton, Md., celebrated their annual Men's Day.

I was honored to be able to share in the afternoon worship with the men of Bethel, and to hear our colleague, Hon. PARREN J. MITCHELL, speak. The service was impressive, combining a devotion to Christ with a strong feeling of purpose and hope.

I was struck by the sense of commitment that the men of Bethel exhibited. The church and service told of their tremendous energy and devotion to the Christian cause, a trademark of Bethel A.M.E. throughout its long history.

Bethel was founded in Easton in 1818 by a group of 15 concerned men who saw the need for racial leadership and self-help in the struggle to gain their freedom. Enslaved and impoverished, the founding members were unable to provide lavishly for their church, but they gave an invaluable dedication and undisturbed faith in its place. My visit last Sunday convinced me that their tradition of selfless devotion continues today.

I would like to commend the Reverend Earle M. Brooks and the following men who worked so hard to make Men's Day such a meaningful event: Mr. Albert Brooks, Jr., Mr. Clyde Jeffries, Mr. Sheldon L. Scott, Mr. Richard Gardner, Mr. Andre Blackwell, Mr. Lawrence Niskey, Mr. Edward Fountain, Mr. Richard Brooks, Mr. Clarence Pritchett, Mr. Albert Brooks, Sr., Mr. Charles Gale, Mr. Otis Rhynes, Mr. J. Walter Blake, Mr. Ronald Turner, Mr. Francis W. Gates, Mr. Albert Brooks, Jr., Mr. Sheldon L. Scott, Mr. Arnold Fields, Mr. William Caldwell, Mr. Bruce Freeman, Mr. Darrin Williams, Mr. Ronald Turner, Jr.

Mr. Speaker, the dedication and hard work of the Bethel A.M.E. congregation is a tribute to the First District and a fine example for Christians everywhere.●

AMENDMENTS TO OUTLAW ABORTION

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. WEISS. Mr. Speaker, I am greatly disturbed by the constitutional amendments to outlaw abortion that are currenty pending before this Congress. I believe that these amendments strike at the very basis of our free society. They would grant Congress and State legislative bodies unprecedented power to deny citizens what are now guaranteed as constitutional rights, regulate the most intimate aspects of their lives, and dictate moral and religious beliefs to the American people. Beyond law and custom, the proposed amendments jeopardize the physical and mental health, and in some cases the lives, of women in this country.

I would like to focus my remarks on the human life federalism amendment, introduced by the distinguished Senator from Utah, Senator HATCH, which grants both Congress and the States the power to restrict and prohibit abortion. This amendment has been described and promoted as a fair and reasonable middle ground that can be supported by all, regardless of one's position on abortion. However, I am afraid that this amendment is really no compromise at all. If enacted, Senate Joint Resolution 110 would imperil the right to choose by permitting a statute restricting or outlawing abortion to pass Congress or any State legislature by a simple majority vote. And what should be even greater cause for concern is that these abortion statutes would then be insulated from the Supreme Court's scrutiny. In other words, the Congress or any State, would be enabled to pass a human life statute that would be immune from challenge on constitutional grounds. This amendment overhauls our Government's system of checks and balances that has protected our constitutional rights.

Senator HATCH has stated that his amendment simply reenfranchises elected representatives on this issue. I believe, however, it would do so by enacting the views of a vocal and well-funded minority, while ignoring the majority of Americans who support freedom of choice. It would use, and abuse, governmental authority to impose particular moral beliefs and codes of personal conduct on all citizens, without respect for their divergent convictions.

Furthermore, the amendment would establish a dangerous precedent which would enable Congress to violate or repeal constitutional rights at the whim of an apparent majority. It would open up a Pandora's box of legislating personal morality at the expense of constitutional liberties and civil rights. Who is to say, or guarantee, where this stripping away of individual freedoms will end? With abortion? Freedom of religion? Right to privacy? Freedom of speech? The amendment would bring us one step closer to a climate in which the abridgment of personal rights would be an acceptable practice. We cannot allow this to happen.

As we are all aware, in 1973 the Supreme Court ruled that the right to privacy and the concept of personal liberty embodied in the 14th amendment guaranteed the right of a woman, in the first trimester of her pregnancy, to make her own decision, in accord with her conscience, to bear a child or terminate her pregnancy. This decision rescued women from the horror of backroom illegal abortions. Finally, abortion became a safe and legal choice for both a woman and her doctor.

Opponents of the right to choose claim that the Justices improperly imposed their personal views on the Nation. I must emphatically disagree. In reality, the Court chose a path that least interferes with an intensely private and personal aspect of our lives. No one is forced to have an abortion as a result of Roe against Wade. Similarly, no one is forced to carry an unwanted or unintended pregnancy to term. This freedom of choice is also extended to doctors, who may or may not perform abortions; to medical facilities that may or may not offer abortion services; and even to both Congress and the States, which may or may not use public money to fund abortion.

The significance of this decision, therefore, is more basic than a woman's right to abortion. Roe against Wade showed that the right of individuals to be free from unreasonable and unwarranted governmental interference in their personal lives applies to abortion, as it does to other individual liberties. This decision is consistent with the Court's history of restricting

undue limitations on individual freedoms. In cases dealing with family relationships, marriage, childrearing, contraception, and procreation, the Court has preserved individual and family choices by invoking the right to privacy. To do otherwise, with respect to abortion, would compromise the welfare and integrity not only of women, but of their families as well.

The Supreme Court decision also recognized how deeply divided we are as a people when confronted with the complexities of the abortion issue. The Justices found that a variety of factors color one's thinking on the issue including, and I quote—"one's philosophy, one's experiences, one's exposure to the raw edges of human existence, one's religious training, one's attitudes toward life and family, and the moral standards one establishes and seeks to observe." I think that we would all agree with the Court's finding that there is no consensus and, certainly, no overwhelming public mandate on this deeply personal and moral question.

Given this spectrum of competing values and opinions, the Supreme Court appropriately chose not to impose one doctrine of religious and moral thought on the men and women of this country. In keeping with our first amendment traditions, the Court elected to leave the decision in the private domain, as a matter of individual conscience.

For these reasons, I believe that the Roe against Wade decision should mark the last governmental declaration on this difficult and controversial issue. The decision provides sufficient guidance to lawmakers to insure that constitutional rights are not abridged by unchecked governmental intrusions while maintaining the States' interest in the regulation of late-term abortions. I see absolutely no justification for amending the Constitution with the purpose of overturning this decision.

Certainly, the legal implications of constitutional amendments outlawing abortion must be carefully scrutinized. However, I believe that this scholarly discussion should not be allowed to obscure the very real nightmare of pain, suffering, and death that will result from a ban on legal abortions. A constitutional amendment cannot eradicate the compelling circumstances that lead women to terminate their pregnancies. A constitutional amendment cannot miraculously guarantee infallible contraceptive devices any more than it can perfect human behavior. As experience painfully teaches us, a constitutional amendment does not prevent abortion; it only stops abortions that are legal and safe.

Mr. Speaker, approximately 25 years ago, as a young assistant district attorney in New York, one of my responsibilities was the investigation and prosecution of illegal abortionists. For the most part, they were without medical knowledge or training; the few who were trained had lost their license or capacity to practice medicine. Neither group was comprised of individuals to whom one would want to entrust the life of a loved one. I saw results of their butchery, the maiming and the killing of women who did not have a freedom of choice.

What I witnessed was only a small segment of the atrocities that occurred daily in this country before 1973. It is estimated that between 200,000 and 1.2 million women a year were subjected to life and health endangering abortions, that hundreds of women died annually as a result of botched abortions, and thousands of women suffered permanent disability as a consequence of the procedures used by this underground network. Women who were morally and physically trapped by inhumane laws often had no alternative but self-induced abortions, performed with coat- hangers, turpentine, and other lethal devices. As we consider action on these legislative proposals, I urge that we not close out the reality of those past years, and to avoid condemning women to relive them.

It is time that we as a society recognize that circumstances will always exist in which some women will decide, after consulting their doctors, evaluating their options, and struggling with their consciences, that abortion is their only reasonable, responsible, and healthful choice. To preserve this freedom of choice, the Congress should reject these constitutional attacks.●

VA HEALTH FACILITIES MUST BE EXEMPT FROM OMB CIRCULAR A-76

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. RAHALL. Mr. Speaker, in its effort to reduce Federal Government involvement in the affairs of the Nation, the administration, through OMB Circular A-76, is seeking to create a policy where the Government would rely on the private sector to provide needed goods and services for functions it believes could be provided to it at less expense by private enterprise.

Of late, the impact of A-76 on the Veterans' Administration's Department of Medicine and Surgery has been the subject of hearings in the Committee on Veterans' Affairs. According to a witness from the VA, the agency has begun studies to determine whether it would be more cost-effective to contract out custodial, food preparation, and service and maintenance functions. However, during both the July 14 Subcommittee on Oversight and Investigations hearing, and the full committee's October 20 hearing on this subject, outside of the VA and OMB representatives, every other witness was overwhelmingly opposed to the implementation of A-76 with regard to the Department of Medicine and Surgery.

I share the same concerns of those who do not believe OMB Circular A-76 would be beneficial in the area of health care, a group which includes the distinguished chairman of the Veterans' Committee, SONNY MONTGOMERY.

Recently, I was contacted by employees of the VA Medical Center in Beckley, W. Va., who are disturbed over the effect A-76 would have on the quality of service they provide to their patients. These employees work daily with the patients and know their needs more than any outside contractor. A patient builds a healthy bond with the VA professional staff and depends on that staff for caring health service. I doubt an outside contractor would have the compassion and understanding of the professional staff. To quote from one of the letters I received from an employee at the Beckley Medical Center: "Contracting out in the VA will, in our opinion, result in reduced health care to the most deserving group of Americans—our Nation's veterans." Another letter stated that A-76 would be "detrimental to the veterans of this country, not only reducing the amount of care that they receive but the quality of care as well. These individuals who have already given more than their fair share toward the care of this Nation, are now being expected * * * to bear the brunt of the administration's budget cuts, and once again give till it hurts."

Mr. Speaker, surely we owe it to the brave men who served this Nation in its darkest hours the finest in health treatment. Surely, we cannot allow this treatment to be jeopardized by inconsiderate measures which could reduce the quality of their health care. Without a doubt, we owe the veterans of this Nation that much.

With this in mind, I applaud the actions taken by the Committee on Veterans' Affairs and the House for approving a provision in H.R. 3995, the recently passed Veterans' Disability Compensation, Housing and Memorial Benefits Amendments of 1981 (Public Law 97-66), which states that funds appropriated for VA medical care, research, and administration may not be used for the conduct of Circular A-76 cost-comparision studies. I also would like to congratulate employees of the VA Medical Centers in Beckley, Huntington, and Clarksburg, W. Va., for having the courage to stand up for the rights of their pateints. These dedicat-

ed employees are doing a great service and are a shining example of what is most needed in public employees: Compassion, justice, and commitment.●

IVAN HILL—PROMOTING ETHICS IN OUR SOCIETY

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mrs. SCHROEDER. Mr. Speaker, I offer for the record the text of an interview with Ivan Hill which recently appeared in the U.S. News and World Report. Mr. Hill has been at the forefront of setting an example for honesty and responsibility in American society. I share his view that honesty increases efficiency and productivity in business and Government and applaud his selfless efforts in instilling openness in Government.

ETHICS IN OUR SOCIETY

(By Marvin Stone)

Almost eight years ago, Ivan Hill gave up a lucrative career in industry for an unpaid job as president of a nonprofit, nonpartisan organization working for honesty and social responsibility in government and business. Out of that grew the Ethics Resource Center in Washington, D.C. When Hill retired recently from the presidency of the Ethics Resource Center, we asked him how he views the present state of American society and what he foresees for the future.

Q. Mr. Hill, what was it that inspired a successful businessman to quit and spend his entire time chasing what many would consider an impossible dream?

A. It was a recognition that the most urgent task in the country was being neglected—that of trying to strengthen our ethical under pinnings.

Q. How would you define ethics?

A. Albert Schweitzer said that in a general sense, ethics is the name we give to our concern for good behavior. We feel an obligation to consider not only our personal wellbeing but also that of others and of human society as a whole.

If early man had not identified his own welfare with that of others, he could not have survied and mankind wouldn't have developed. In recent books on anthropology, such as Richard Leakey and Roger Lewin's People of the Lake, cooperation and sharing were given as basic reasons for man's survival. Honesty and ethics are basic, working social principles, not just moral guidelines.

Incidentally, there was another compelling reason for my new pursuit: I have three children, and I hated to see them, in 5 to 10 years, living in a closed or almost closed society?

Q. Are you saying that lack of ethical conduct in the U.S. will lead to a closed society?

A. When trust in one another diminishes to a point where we can no longer do business without pervasive dishonesty and corruption, an open society cannot function efficiently and will become unmanageable. If business decides it cannot do business honestly and make a profit, that will severely undermine the private-enterprise system itself. A change in the system will then become inevitable.

It is my opinion that an open society cannot function efficiently and remain manageable unless about 80 to 85 percent of the people are honest about 80 to 85 percent of the time.

Q. What happens if 80 percent are not honest 80 percent of the time?

A. The result I see is a great deal of power concentration, centralization of authority, in a kind of messy oligarchic system which is likely to become so inefficient by the crosscutting of various special interests, that we will move into authoritarianism. I think this is the probable outlook for the United States in the foreseeable future.

Historian Arnold Toynbee observed: "Freedom is expendable, stability is indispensable." And order and stability in a society would take precedence over a multiplicity of freedoms.

Q. You've said in the past that you believe it's in the interest of the corporations themselves to pursue ethical conduct. Does business have an especially bad record?

A. Most of the large corporations—if they could ever get the next guy, their peer competitor, to move first—could do all their business honestly and make a good profit and be very happy doing so. Honesty increases efficiency and productivity in business and government.

I don't feel that big business is any more or less honest than little business or individual citizens. We are not going to solve our problems until the country as a whole takes a different attitude, until cultural and social changes are made that will make honesty "all right" and "safe" or even fashionable. This has to be a total cultural movement. That is the method we recently recommended to the Office of Government Ethics, the Justice Department's Task Force on Crime and the President's Council on Integrity and Efficiency.

Q. How do you get a thing like that going?

A. We have recommended making six or eight different TV commercials, six or eight radio commercials and newspaper adaptations of the TV storyboard cartoons. Go into test markets, like Rochester and Columbus. Form local committees with the League of Women Voters, the Rotary, law-enforcement agencies, the churches, schools and business and conduct intensive local campaigns, placing at least 30 to 40 TV and radio spots daily on a public-interest basis through these local committees—you must have a high-volume, massive exposure of the message in order to break the prison of peer-group pressure. We should measure the effectiveness of these efforts every 30 days—the effect on crimes against property, burglaries, arson, shoplifting, all of those things.

Kits would be developed—the films and the tapes and the newspaper ads—and they would be passed to other communities for locally sponsored campaigns. These TV spots would not be preachy or admonitory or didactic.

Q. You say these programs are not preachy. Exactly what do they say to people?

A. A typical illustration would be this: A teen-age girl is seen stealing some cosmetics in a department store. And then we follow the teen-ager home on the bus. And she thinks that everybody is looking at her; she's looking around. Then an unseen announcer asks: "How do you feel when you steal?" The next morning when she walks through the steno pool in the office, she thinks that everyone knows she stole her cosmetics. And all the announcer says is: "How do you feel when you steal?"

No matter what other steps are taken or considered, we must understand that crime is bred in a bed of dishonesty. The progression is easy, from lying to stealing, from robbery to homicide.

Q. Is the government active in promoting ethics—say among its civilian employees?

A. We sponsored a bill, which was passed unanimously by the Congress, to mandate the public display of the United States Code of Ethics for Government Service in federal buildings. We have about 90,000 of these codes posted now in more than 10,000 buildings. If we could display the amount of codes that we have printed, 205,000, a person coming to work would probably see the code three or four times a day. He would thus become assured that it is all right for him to be honest and not to goof off, and become aware that it might not be the "in" thing for him to be absent or irresponsible.

There have been various estimates as to what is being lost to fraud and waste and absenteeism and such. We took a range of 25 to 50 billion dollars. If these codes are only 10 percent effective, we will save 2.5 to 5 billion dollars a year in government operations alone.

Q. Are you optimistic about spreading the word in the future?

A. To some extent. There's a great deal of talk about ethics; there are great numbers of corporate and professional and governmental codes. If we keep increasing awareness throughout the country, we're going to make this breakthrough into acceptance of much higher standards of values.

I have been surprised to find that the leadership of the armed forces is far more concerned about, more knowledgeable about, and doing more about ethics than are our educational institutions and our large corporations.

I see more progress in industry than I do in the educational institutions. In industry, many of the companies have teaching programs and bring in ethics counselors now.

During the last three or four years, there has been a tremendous increase in the number of corporations using codes of ethics and much more interest in ethics. But we find that interest has declined in the last six or eight months. My supposition—and that's all that I can say—is that businessmen believe they don't need ethics codes now; they don't need to be as self-governing as they should be because they have President Reagan taking care of them. It's a wrong concept. They should be taking just the opposite view: Now that Mr. Reagan's in, business should focus on developing more-effective means of self-regulation through stronger codes and do everything possible to make it unnecessary for government to intervene. Let's deserve more economic freedom.●

NO MORE SOCIAL SECURITY CUTS

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. HUBBARD. Mr. Speaker, a larger portion of the heavy volume of mail that I receive each day comes from people increasingly concerned about the status of the social security

system. My constitutents are asking me if time is running out on the social security system. And will there be enough to pay their benefits when they retire? Frances Williams, a constitutent of mine in Madisonville, Ky., has written to express some of her feelings about the social security system. I feel her letter is one which should be shared with my colleagues and I wish to do so at this time. The letter follows:

MADISONVILLE, KY.

DEAR CONGRESSMAN HUBBARD: This is to express my feelings once again on the Social Security program. I do not think any more cuts should be made in that area. President Reagan says the American people expect too much. Well I don't think so when you have worked all your adult life paying into social security and then to have it taken away from you. If anything, the program should provide higher benefits for the ones who pay the most into it.

If my husband and I could put what is taken from our paycheck and deposit it into savings drawing interest, we would have far more than we will ever draw from the social security. I still think we do far too much for foreign aid and not enough for the true Americans who would and want to work if given a chance. There are always those who would rather get all they can from government and not work at all. When I read and hear about those people in New York who live on the streets and in an abandoned sewer (I just read one was found dead who made his home in one) that is just unbelievable to think we have people in this wealthy country of ours living in those conditions.

President Reagan knows if you work beyond 65 before you retire then you are not going to draw benefits too long because you will not live to do that. Of course being 70 years old and a millionaire makes all the difference.

Sincerely,

FRANCES WILLIAMS.●

THE BUDGET PROCESS—A HIDDEN AGENDA

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. OBERSTAR. Mr. Speaker, I have become increasingly disturbed by mounting evidence that the Reagan administration is using the budget process not just to reduce expenditures but to destroy entire programs. The budget process has become the means to the end of abdicating the responsibility of Government which Abraham Lincoln described as doing for the people that which they cannot do for themselves.

In that spirit, the Members of this House should be aware of the remarks of former Labor Department official, John W. Leslie, who last week received the 1981 Communicator of the Year Award from the National Association of Government Communicators. Members should recognize the implications of Mr. Leslie's remarks in regard to the direction in which the Reagan administration is leading other Departments and Agencies.

Mr. Leslie worked 32 years at the Department of Labor, serving for 22 years as public information director under 12 Secretaries of Labor, in both Democratic and Republican administrations, in both the brightest days of the Kennedy administration and the depths of Watergate.

Earlier this year, he resigned after serving 6 months under the Reagan administration.

Of his resignation, Leslie said:

I sat for six months and watched a department in which I had worked most of my adult life systematically dismantled. I watched programs to serve and protect working people, which I helped develop and promote, be slowly strangled or gutted.

In his remarks, Leslie compared his reaction to that of the people of Rome upon the arrival of the Barbarians at the city gates.

I submit a report of Mr. Leslie's remarks from the Washington Post of November 9, 1981, to be included in the RECORD. His remarks are important not only to the working people of America interested in the future of the Labor Department, but to all concerned about the course of Government set by this administration to terminate programs established over the past 40 years to improve the quality of life for all Americans. Mr. Leslie's description of life in the Labor Department is characteristic of what is happening throughout the Government as the Reagan administration works to close off access to information the public is entitled to have about the erosion of programs.

I ask my colleagues to consider carefully the implications of the process described by John Leslie.

The article follows:

FORMER LABOR SPOKESMAN SPEAKS HIS OWN MIND

(By Warren Brown)

In his 22 years as public relations director of the Labor Department, John W. Leslie built a solid reputation as a thoroughgoing, dispassionate professional who did well by Republicans and Democrats alike.

Therefore, it was no surprise when the National Association of Government Communications named Leslie the recipient of its 1981 Communicator of the Year Award.

The surprise came late last week when the normally reticent Leslie, 57, used his acceptance speech to blast the Reagan administration in general and Labor Secretary Raymond Donovan in particular.

The communicators group "told me I could say anything I wanted," Leslie, who now is employed by The Kamber Group, a Washington-based labor lobby, said later. "So I told them what a lot of my former career government colleagues have been telling me, and what I have been feeling, myself."

After 32 years in the Labor Department, 10 of them before becoming public information director, and working for 12 successive secretaries of Labor in that position, Leslie said he left under the Reagan administration because "in the six months that I served . . . during this administration, no one asked me what I did, what my office did, who we served, why we existed, or what would happen if we disappeared."

Leslie said, "I sat for six months and watched a department in which I had worked most of my adult life systematically dismantled. I watched programs to serve and protect working people, which I had helped develop and promote, be slowly strangled or gutted." he said he began "to understand . . . how those of sensitivity and understanding must have felt when the barbarians sacked Rome.

"I claim, without qualification, that the efforts today throughout government to cut public information and public affairs activities are based not on a desire to save money, but are a cyncial attempt by this administration to cover up efforts to destroy programs and services people want and need."

Leslie's speech has been circulating among some department careerists who agree with his position and who find some solace in the idea that one of their own, so to speak, can criticize the administration publicly without fear of retribution. But Reagan-Donovan loyalists such as Earl Cox, who holds Leslie's old position, understandably are unhappy.

"I regret that Mr. Leslie feels he was mistreated," Cox said last week. "No effort was made to sidestep him. Frankly, I was surprised by his remarks."●

EDUCATIONAL PARTICIPATION IN COMMUNITIES PROGRAMS

HON. EDWARD R. ROYBAL

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. ROYBAL. Mr. Speaker, I would like to share with my colleagues information on and recognition of the 10th anniversary of the EPIC Consortium in Los Angeles. The consortium is a regional association of five educational participation in communities EPIC programs operating at five universities in the Los Angeles area. These EPIC programs are student-volunteer and community service operations sponsored by California State University, Los Angeles; California State University, Long Beach; California State University, Dominguez Hills; California State University, Northridge; and Loyola-Marymount University.

During the last 10 years, these programs have recruited over 25,000 university students to work as paraprofessional volunteers in low-income, minority, and disadvantaged communities throughout Los Angeles. EPIC volunteers have contributed over 1½ million hours of valuable work-time in these communities working with youth, senior citizens, the disabled, the mentally handicapped, women, minority persons of all ages, and more. The estimated value of this university-sponsored service to the poor and disadvantaged communities is over $7 million worth of volunteer time,

energy, and dedication. Hundreds of public and human service agencies depend on EPIC volunteers to assist them each year.

Congress had a direct role in making these worthwhile programs possible. The original EPIC program at California State University, Los Angeles, was established in 1966 and was supported through funds from title I of the Higher Education Act of 1965. Due to the great success of this original program, in 1971 the EPIC Consortium was founded and expanded the EPIC concept to other universities in the Los Angeles area. Here again, title I provided the impetus and means for this to be accomplished.

EPIC programs have become institutionalized and self-sustaining on each of their respective campuses. They continue to collectively operate as a regional consortium to coordinate and share resources between campuses and are continually striving to improve their collective assistance to communities under stress.

The sponsoring universities also have gained much from these title I-initiated programs. EPIC student volunteers not only provide valuable services to the community, but are themselves provided with real-life learning and work experiences through their participation. They learn more about themselves, about the careers or majors they are pursuing, and about the concrete societal questions which they as responsible citizens must address. Last but not least, many learn or are trained in concrete job skills that will help them when they graduate and enter the increasingly difficult job market. Thus, the EPIC programs have also become important additions to each university's overall academic program. In fact, many EPIC students today receive academic credit for their field work from their sponsoring institutions.

In a period when the problems of the poor and the disadvantaged of our communities grow larger each day in the face of economic turmoil and budget constraints, it is remarkable that community-student programs of the quality of EPIC have survived. I would like to commend the EPIC programs and the universities which support them for their fine and outstanding efforts, and I congratulate them on the 10th anniversary of their regional consortium.●

TRIBUTE TO RICHARD HENSON

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. DYSON. Mr. Speaker, I would like to bring to the attention of my colleagues a man who has done the First Congressional District of Maryland a great service over the last 20 years. Mr. Richard A. Henson is a pioneer, an innovator, and a man whose life reads like an American success story.

It is little wonder that Mr. Henson was recently honored with the Bill Pate Award for outstanding economic achievement in the State of Maryland. In the early 1960's, he formed his own commuter airline service with one four-seat plane that he flew between Hagerstown and Washington. He had a strong belief that improved air service and the vitality of outlying Maryland communities would go hand in hand. With hard work and perseverence his belief paid off, for today Mr. Henson is the president of one of the largest commuter airlines in the Nation. Last year alone, Henson Aviation, Inc., transported nearly one-half of a million people.

The Pate Award that Richard Henson received is awarded each year for outstanding economic achievement in Maryland. The winners are selected by the Maryland Department of Economic and Community Development Advisory Commission from among 28 firms and individuals nominated locally. The Bendix Field Engineering Corp. and H. G. Parks, Inc., were also honored, although Mr. Henson was the only individual to win this year. Gov. Harry Hughes presented the award before nearly 1,000 government and business leaders.

Mr. Speaker, I have met Richard Henson on numerous occasions, and I am always struck by his dedication to the economic development of Maryland. He has recently opened a main office in Salisbury, which he refers to as "the model commuter city in the United States." His belief in rural Maryland and its economic potential is obvious to all those who have met him.

Mr. Henson has done the Eastern Shore of Maryland a great service over the past 20 years. His airline provides the small communities of rural Maryland with a vital link to the markets and resources of the Nation's major cities. As Henson Airlines has grown, the First District of Maryland has profited.

Mr. Speaker, I join the business leaders, government officials, and citizens of Maryland in applauding Mr. Richard Henson, and in thanking him for his enormous contribution to Maryland.●

JAMES BRADY: NOT JUST A VICTIM BUT A LESSON

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. RODINO. Mr. Speaker, in this morning's Washington Post, there was a column by Richard Cohen regarding James Brady, President Reagan's press secretary, who was gunned down with the President and two others last March.

The column is a moving tribute to the character and courage of this brave man whose recovery from his terrible wound is miraculous. It is also a well-reasoned plea that we in the Congress enact handgun legislation that might keep these weapons out of the possession of persons such as Mr. Brady's assailant.

The lesson drawn from the James Brady tragedy is this: Mr. Brady would not have suffered his ordeal if only we would have made it harder for his assailant to get a gun.

The article follows:

[From the Washington Post, Nov. 12, 1981]

GUNS

(By Richard Cohen)

Among my colleagues, James Brady is a much-loved man. He was President Reagan's press secretary for just a short time before he was shot, but his humor and his warmth and his honesty quickly made him many friends. His story is a poignant one. One wishes him only the best. And one wishes that only the best will come from what has happened to him.

But that does not seem to be the case. The tragedy of Jim Brady is treated in some sort of vacuum. From time to time stories appear about his medical condition, his occasional trips home and his recent appearance in the White House press room where he bantered with the press, the president and Nancy Reagan. Always, though, his injury is discussed without context. You would be forgiven for thinking that he had been struck by some disease and not a bullet.

But it was a bullet that struck James Brady. It was a bullet that entered his skull and smashed his brain. This is what paralyzed him on one side, that has kept him in the hospital since March, that has required four operations, and that, for a time, left him emotionally infantile—likely to cry if he stumbled. This was not an act of God, it was an act of man.

And man could do something about it. It was a man, after all, who shot Brady. John Hinckley, the man accused of the shooting, bought a gun with incredible ease. No one asked him why he wanted the gun, whether, say, he wanted to kill someone—and when he was caught with a gun trying to get on an airplane, none of these same questions were asked then, either.

It is more difficult to bring fruit into America from a foreign country than to buy a gun. It is also harder to drive a car—certainly harder to buy a car than a gun. It takes some time to get married and a lot more time to get divorced, but it takes no time to buy a gun. This is possible because of an archaic interpretation of the Second

Amendment which deals with the right of the people to bear arms. That refers to the right of the people to raise a militia, not the right of some deranged young man to buy a gun.

The obvious lesson to come out of all this is that the nation needs a gun control law. It needs a national law, because to have a law in one state and not to have one in the next state is pure folly. These laws accomplish nothing except to allow those who are opposed to gun control to say that legislation never works. It could be that even a national gun control law will not work, but we will never know until we try it. It is not too much to imagine that a Hinckley—no hardened killer he—would have quit his task if he found it hard to get a gun.

However obvious these lessons are, they are lost on Ronald Reagan. He can stare down at a Jim Brady in his wheelchair and see no connection between Brady's condition and the gun that caused it. He, like so many Americans, seems to have accepted the event as a natural tragedy—like polio. He can see Brady as the regrettable price you sometimes have to pay for yet another American freedom.

Gun control advocates ought to understand this argument. It is not much different from what others say when it comes to civil liberties. For instance, no murder committed by someone out on bail is going to convince bail advocates that bail is not a good idea. And the occasional case where the guilty walks free because, say, the evidence was tainted, does not deter civil libertarians from believing in strict laws of evidence.

But that is because these laws serve a greater good. They are designed to protect the rights of us all. The gun, though, is a different matter. It protects only those who have it—and then only in theory. In fact, it works best for whoever takes the initiative—usually the criminal. This is what happened with James Brady. He and the president were surrounded by armed men—trained, armed men—yet a single man with a gun and a obsession for an actress shot them both.

The president recovered, but Brady still ails. His recovery has been miraculous. His bravery is undisputed. What is disputed, though, is his status. The president, it seems, would prefer to see him as a victim. It does not do him justice. He is, instead, a lesson.●

CASEIN IMPORTS

HON. TOBY ROTH

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. ROTH. Mr. Speaker, today I am introducing legislation to impose a 50-percent quota on casein imports into the United States.

The USDA has concluded that these imports interfere significantly with the success of our dairy price support program by displacing our own supplies of nonfat dry milk. At a time when we seek to decrease Federal expenditures in the farm bill and decrease surpluses of dairy products, we simply cannot fail to act to save as much as $150 million per year by curtailing casein.

In 1980, 152.2 million pounds of imported casein displaced 333 million pounds of nonfat dry milk. The Federal Government purchased this product at a cost to the taxpayer of $300 million.

Countries in the European Economic Community account for a large portion of our casein imports. The EEC subsidizes its casein production and disposes of its excess products in the United States. What we are experiencing, Mr. Speaker, is a situation in which the American taxpayer is paying twice for the same commodity. We are paying the EEC to subsidize casein production by allowing it to export so generously to the United States its surpluses. Simultaneously, we are buying our own nonfat dry milk which has been displaced by the casein imports. This is an intolerable waste of American tax dollars.

The quota to be imposed would be 50 percent of the average of yearly imports of casein to the United States during the period of January 1, 1977, to December 1, 1981. Under section 22 of the Agricultural Adjustment Act, the President would have authority to review and change the quota as conditions dictate in the future.

Today, the evidence is clear that casein imports interfere directly with the dairy price support program. Milk protein product imports have shifted in use from industrial application to food and feed products. In its report, "U.S. Casein and Lactalbumin Imports: An Economic and Policy Perspective," the Department of Agriculture concluded that 53 percent of the casein used in the United States in 1980 was used in products for which domestic milk solids could be used.

In 1935, the Congress enacted section 22 of the Agricultural Adjustment Act, which provided for the orderly imposition of quotas on imported products determined to interfere with domestic agricultural policy.

A 50-percent limitation on casein imports would not restrict availability for uses for which there is no available substitute or for which domestic milk or milk products would not be used.

Should casein imports continue unchecked, we will simply see rapid increases in the cost of the dairy price support program to taxpayers, an increase which all of my colleagues, be they from dairy regions or urban areas, are trying to avoid.

Added costs of casein imports account for 15 to 30 percent of the total cost of the dairy price support program. It is imperative that we learn to consider casein as a dairy issue as much as a typical trade issue. I would assert that the effects on domestic food policy of this import even supercede its colorations as a trade matter.

We have at our command legislation that allows us to insure that our dairy price support program can operate to the best interests of the taxpayer, the farmer, and the consumer. We also have conclusive evidence that we must employ the provisions of that law to protect our domestic policy from unwarranted interference by the rapidly expanding influence of casein imports.

It is incumbent upon the Congress to act to curtail the counterproductive import of casein, and I urge my colleagues to support my legislation to accomplish this goal.

By doing so we will see positive results for America that include decreased Federal expenditures for the dairy price support program, acceleration of domestic milk protein product production, and the triumph of commonsense over laissez-faire trade policies that so often put the interest of America last.●

ECONOMIC RECOVERY TAX ACT OF 1981

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. AuCOIN. Mr. Speaker, the Economic Recovery Tax Act of 1981 creates a variety of tax incentives for the rehabilitation and restoration of historic buildings. In the November-December issue of Historic Preservation published by the National Trust, Editor Thomas Colin writes about the effects of the tax act on preservation projects. At the center of this article is Mr. Robertson E. Collins, a businessman in Medford, Oreg., and a member of the National Trust Board of Trustees. The Trust regards him highly as "* * * a fount of wisdom that reflects both his global interests in preservation as well as his deep concern for people * * *."

I share this article with my colleagues in order that they may better understand tax incentives for historic preservation.

[From the Historic Preservation, November-December Issue]

A GURU LOOKS AT THE NEW TAX ACT

(By Thomas Colin)

We are fortunate in the historic preservation movement to have a rather special guru in our ranks. Possessed of boundless energy, he is a fount of wisdom that reflects both his global interests in preservation as well as his deep concern for people—refreshing in a field that, necessarily, talks a lot about inanimate objects.

Robertson E. Collins—Robbie to everyone—is a businessman in Oregon and a member of the National Trust Board of Trustees, among many others. But first and foremost he is a preservationist. Robbie is one of many activists in the preservation community who celebrated the hard-won passage of the new Economic Recovery Tax Act in 1981.

But, as befits a guru, Robbie has tried to envision what the future will be like with

this new legislation, and, while he's still enthusiastic, he sees some potential side effects.

The law, born with the strong leadership of the National Trust, Preservation Action, several statewide groups and the support of Secretary of the Interior James G. Watts, creates a variety of investment tax credits for the substantial rehabilitation of older buildings. The highest credit, moreover, applies only to historic structures.

Under the law, investors get a 15 percent tax credit for rehabilitation of buildings that are at least 30 years old, a 20 percent credit for buildings that are at least 40 years old and an alluring 25 percent tax credit for quality rehabilitation work on structures that are certified as historic. The Secretary of the Interior's standards for rehabilitation assure that the work is compatible with the historic character of the building. The law applies only to expenditures incurred after December 31, 1981.

Although subsequent amendments will be needed to iron out a few bugs in the law, clearly it surpasses the Tax Reform Act of 1976 in making the restoration of historic buildings attractive to everyone from developers and investors to Main Street merchants. According to a recent analysis by Cythia R. Field and Charles G. Field, the new law will have the greatest effect on the rehabilitation of historic buildings because, in large measure, the 25 percent investment tax credit extends to income-producing residential property as well as to commercial. On the other hand, the 15 and 20 percent credits (which apply to nonhistoric older buildings) can be used only in commercial rehabilitations.

And, the Fields say, the new law is also more alluring to rehabbers of historic buildings because the "depreciable basis of the nonhistoric older buildings is reduced by the amount of the credit."

The National Trust worked hard for a greater differential between certified historic buildings and other older buildings so that people would have an incentive to go through the designation process and not perform harmful rehabilitations on significant, but as yet undesignated, buildings.

Moreover, the 25 percent credit is against income tax owed, it is not just an accelerated deduction from income before taxes.

For all these reasons, the Fields conclude that "An investor will realize a greater profitability from using the 25 percent investment tax credit on historic properties . . . even with a marginal amount of extra paperwork that is required."

Robbie Collins likes the new tax credits, too, but he sees potential problems. "While we all love the new tax act, we have to remember that the glass-panel people and the aluminum-grill-panel people and all that crowd can also use the tax breaks. There is a good chance that they could wipe out two decades of standing architecture—buildings built in the 1950s that could be the historic buildings of the future."

This is possible because, under the new law, standards for quality rehabilitation are required only for rehab work on historic buildings. What Robbie would like to see, optimally, is the creation of standards of excellence for the rehabilitation of nonhistoric structures. At the least he wants to build awareness now that there are significant buildings that aren't 50 years old.

Understandably, most of us nongurus have enough trouble just dealing with threats to our beloved Federal-style buildings and other classic structures without worrying about distant dangers. It's the same stick-your-head-in-the-sand phenomenon that permits smokers to disregard the warnings on their cigarette packs.

Nonetheless, Robbie proposes nothing less than vigilance for our future historic buildings—vigilance tempered by careful evaluation. "We must avoid failing in love with too many diners and gas stations. The challenge is to chart our way through the solid professional work of the recent era, to work through our current disenchantment with much of it to find the jewels, the benchmarks that history will recognize."

This will mean a new role for the architectural scholars and critics, and Robbie has no illusions about the difficulty of the task. "Predicting future history is not easy, but we simply must allow for continuous evaluations as 30-year-old buildings mature to 50.

"It is not something the preservation field has done before. We have often identified excellence, seldom forecast it."●

CHANGE NEEDED IN TAX LAWS TO PROTECT MUTUAL AID SOCIETIES

HON. DAN GLICKMAN

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. GLICKMAN. Mr. Speaker, under present law, the Internal Revenue Code exempts numerous insurance organizations under both the general exemption provisions of section 501(c) of the IRS Code as well as certain specific insurance exemption provisions. For example, fraternal benefit societies are entitled to an income tax exemption where they provide life, sick, accident or other benefits to the members of that society, or their dependents where they operate under the lodge system. Voluntary employee beneficiary associations are also exempt when they provide similar benefits. Other exemption statutes include exemptions for certain life insurance companies under section 501(c)(12) and mutual insurance companies under section 501(c)(15). In fact, the exemption language is sufficiently broad that the Nation's largest health insurer, the Blue Cross system, is exempt. There is very little litigation in this area and consequently the construction of terms found in the specific exemption provisions for insurance carriers is rather limited. Unfortunately, that has left some anomalies in the application of the exemption provisions.

A number of religious organizations, including the Amish, the Mennonites, and the Church of the Brethren, are brotherhood types of churches which operate independently of any hierarchy like some of the more familiar religious institutions. Congregations of these particular churches are generally independent of one another yet have a long history of close supporting relationships not only within their own congregation, but with other congregations. One form of this mutual support taken by members of these religions is local participation in assisting or mitigating in the losses or other hardships which occur when a disaster strikes such as a tornado, hailstorm or devastating fire. To meet that need a number of mutual aid associations have been created be the Amish and the Mennonites. Over the years they have been exempt under various provisions of the Internal Revenue laws including section 501(c)(4), dealing with social welfare organizations, section 501(c)(8) dealing with fraternal benefit societies, and section 501(c)(15) dealing with mutual insurance companies, other than life and marine. With the publication of Revenue Ruling 75-199, certain of these section 501(c)(4) organizations, previously treated as social welfare organizations, were denied their tax exempt status because the Internal Revenue Service claimed that they were not promoting the welfare of the community, but merely the welfare of their membership. That revenue ruling revoked Revenue Ruling 55-495 which had held these religious insurance societies to be tax exempt.

Clearly, these mutal aid societies of these nonhierarchical churches have been excluded from an exemption to which they would otherwise be entitled merely because of the organization of their church. It only makes sense that we should act to assure equity in the application of these exemptions.

In order to restore the tax benefits that had been enjoyed by so many of these organizations for so many years until the publication of Revenue Ruling 75-199 and which has been available to many under other provisions of the tax code, I am today introducing legislation to treat them as exempt organizations by creating a new class to be known as section 501(c)(22) of the Internal Revenue Code. My bill would return application of law to that in effect prior to 1975. It will clearly correct an inequity that needs attention.●

THE VERY SURVIVAL OF THE HUMAN RACE IS AT STAKE

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Ms. OAKAR. Mr. Speaker, a sermon delivered by the Reverend John R. Quinn, archbishop of the San Francisco Catholic Diocese on October 4, 1981, was recently brought to my attention by Edward D. Cone of San Leandro, Calif. Given the fact that just last week we considered the Nuclear Regulatory Commission authorization (H.R. 2330), Archbishop

Quinn's epistle which punctuates the unveiled threat of nuclear destruction is fearfully topical.

The archbishop's message trumpets a clarion call to rethink our national and international priorities. As Mr. Edward Cone, retired teacher and current community activist so simply and directly said, "An unchecked arms race promises the end of the human race."

THE VERY SURVIVAL OF THE HUMAN RACE IS AT STAKE

(The Rev. John R. Quinn is archbishop of the San Francisco Catholic Archdiocese. These remarks are excerpts from this sermon delivered from the pulpit of St. Mary's Cathedral on October 4, 1981.)

The continued existence of the human race is seriously endangered today by the threat of nuclear destruction.

The famous German theologian, Romano Guardini, commented at the end of World War II that the pre-eminent human question for the last half of the 20th century would be whether we could develop the moral capacity to control the power we had created. The phrasing here is important: Our dilemma arises from the fact that we have created a vast military technology without thinking through its moral implications.

This same dilemma was raised by Albert Einstein who, at the dawn of the nuclear age, recognized the enormous and terrible impact of nuclear bombs: "The splitting of the atom has changed everything save our modes of thinking, and thus we drift toward unparalleled catastrophe."

In considering a Christian response to the arms race, we must, as Einstein warns, change our very ways of thinking. Nuclear weapons are not simply conventional weapons on a larger scale. They are qualitatively of a whole different order of destructiveness. Their tremendous explosive force, as well as their enourmous and terrible side effects, will irrevocably alter our ecological system, genetic structures for generations to come, and the fundamental fabric of our social systems. The neutron bomb, for example, even though it is bring promoted as a "clean" bomb for use only as a "theater" or "tactical" weapon, is a deadly instrument of mass destruction, and its use could easily ignite a global nuclear conflagration. It contributes to the dangerous illusion that a "limited" nuclear war can be fought and won.

At the present time, the United States has a stockpile of nuclear weapons equivalent to 615,000 times the explosive force of the bomb dropped at Hiroshima. With that stockpile we can destroy every major Soviet city 40 times over. The Soviet Union, in its turn, can destroy every major American city 17 times over. The Soviet and U.S. stockpiles together contain the equivalent of 12 tons to TNT for every man, woman and child in the entire world.

At the end of the 1950s, both Russia and America had already amassed enough weapons to absorb a first strike and still destroy the other's society completely. Nevertheless, the U.S. continues to build three nuclear warheads every day. The madness has continued year after year, and it accounts for a large portion of the $1.6 trillion which has been budgeted for the Pentagon over the next five years. The military research and procurement budget for 1986 is set at just under $1 billion per day.

In human terms, excessive spending on arms production takes lives just as surely as if the weapons produced had actually been put to use. The extreme poverty that is endured by one-third of the human race is in large part a direct by-product of an arms race out of control. The billions of dollars presently being spent on arms each year throughout the world are surely an appalling form of theft in a world where so many persons die each day of starvation and privation.

The obsessive drive for security through nuclear weaponry has not brought security, either for the six nations which now have strategic nuclear capacity or for the 40 other nations who will possess that capacity by 1985. Rather, by straining the world economy and diverting resources from urgent human needs, the arms race has intensified international instability and has itself become the major threat to security among nations.

The physical and social destruction which would result from a nuclear blast borders on the unthinkable. It is now clear to a growing segment of the medical community that no effective medical response can be conceived to deal with the human suffering and damage that would result. All efforts must therefore be directed toward prevention; healing after the fact will be beyond the physicians' art.

My brothers and sisters, not only the peace of the world but the very survival of the human experiment is at stake. If we accept the inescapable conclusion that, as the Catholic Church clearly teaches, nuclear weapons and the arms race are essentially evil, what kind of response are we called upon to make?

First, there is a growing national campaign calling for a "nuclear arms freeze," i.e., a halt right now to any further development or deployment of nuclear weapons by the United States or the Soviet Union. As a first realistic step toward a process of bilateral disarmament, I urge your active cooperation with religious and community groups in this campaign.

Second, since many in the medical community are now convinced that it is dangerously deceptive to pretend there can be any effective medical response in the case of a thermonuclear attack. I urge the administrators and staff of Catholic Health Facilities to join all those who are vigorously opposing the intentions of the Department of Defense to establish a "Civilian-Military Contingency Hospital System" if this system is based on the illusion that there can be an effective medical response in the case of nuclear war.

Third, much greater support is needed for developing creative proposals for converting military weapons technology to civilian production uses. Such a restructuring of national priorities must begin at the local level and in a variety of industries. I urge you to become aware of the alternatives which are being explored in this important area, and to express your active interest and concern to legislative representatives at every level.

I call upon all the Catholic people of the Archdiocese of San Francisco, as well as all people of peace and non-violence, to work for bilateral disarmament and the elimination of nuclear weapons. Let us replace violence and mistrust and hate with confidence and caring.●

RENAISSANCE MAN—HENRY SCHACHT

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. COELHO. Mr. Speaker, in this age of specialization, it is a pleasure to have the opportunity to recognize the accomplishments of a renaissance man in the field of California agriculture. The man is Mr. Henry Schacht, and the opportunity is the occasion of his retirement from active service from California Canners and Growers. Mr. Schacht's 45 year career has spanned the growth of California, which has become America's number one agricultural state.

Mr. Schacht was born in Pasadena, Calif., February 28, 1916, and attended Polytechnic High School at Long Beach and Long Beach Junior College. At the University of California, Berkeley, he was editor of the student newspaper, a member of the Order of Golden Bear, Senior Men's Honor Society, and the president of Pi Delta Epsilon, and honorary journalistic fraternity.

Upon graduation from the University of California in 1936, he joined the university's news service as a radio writer scripting the university explorer program, a network feature on NBC.

In 1939 Schacht was appointed director of press and radio for the University of California College of Agriculture, a post he held until 1942.

From 1942 to 1961 he was director of agriculture for KNBC and later KOG, San Francisco. His morning broadcast, sponsored by Standard Oil Co. of California, become one of the nation's outstanding farm programs. He also did TV news on KGO-TV.

From 1956–60 he escorted farm groups to Australia, New Zealand, Fiji, South America and the Orient. In 1962–64 he also traveled in Europe, conducting foreign trade surveys.

He was the San Francisco liaison for the NBC network's National Farm and Home Hour and was head on NBC's news of the World and Monitor. He was a member of the NBC news team at the United Nations conference and the Japanese Peace Conference.

From January 1, 1961, to November 15, 1965, Schacht served as director of information for the division of agricultural sciences of the University of California. In this position he supervised the agricultural information staff on the Berkeley, Davis, and Riverside campuses.

From November 15, 1965, to October 1, 1981, Henry Schacht has served as vice president of corporate relations, and corporate secretary of the California Canners and Growers, a grower-

owned cooperative which processes and markets a full line of fruits and vegetables in this country and abroad. Responsibilities included communications, public and governmental relations, and the functions of corporate secretary. He continues his association with the company as a consultant on governmental affairs.

Among the many accomplishments during his career Mr. Schacht has: Since 1959 written the Twice-weekly Farm Reporter column in the San Francisco Chronicle;

Received the Asta Award, symbolic of the Nation's best agricultural writing in newspapers;

Won the Pfizer Award for effectively communicating agriculture's story to the general public;

Received a special award from the National Agricultural Advertising and Marketing Association for the San Francisco Chronicle column;

In 1963, at the invitation of the Food and Agricultural Organization of the United Nations, served on the faculty of the World's First International Seminar on Farm Broadcasting in Cairo, U.A.R., and in seminars for Central America and the Caribbean in Mexico, and for the Pacific Basin in Tokyo;

Been a member of the Agricultural Relations Round Table. He organized and was for 8 years chairman of region 8 of the National Association of Farm Broadcasters;

Served as chairman of the advisory council to the University of California Division of Agricultural Sciences. He is an honorary member of the 4-H Clubs and the Future Farmers of America, and a past member of the Alumni Council of the University of California;

Headed the First California Agricultural Trade Mission to the Soviet Union in 1967;

Accompanied the official California Agricultural Trade Mission to the People's Republic of China in 1979;

Served as director of the National Canners Association, 1966-72;

Served for 2 years as president of the U.S. National Fruit Export Council and is presently a member of the Agricultural Policy Advisory Committee to the U.S. Department of Agriculture and the President's Special Representative for Trade Negotiations, he is a director of the California Council for International Trade.

He is a director of Parrott Ranch Co., operating 40,000 acres in California's Scaramento Valley.

His writing on scientific and agricultural subjects has been carried in national publications. One of his articles on atomic energy was translated into eight languages.

Mr. Speaker, I think at this time it is fitting that we take the opportunity to recognize the many accomplishments of Mr. Schacht in the areas of public education, agricultural broadcasting, Government service and private industry. His presence has most certainly enriched California agriculture.●

CONSEQUENCES OF CHANGES IN STATISTICAL INDICATORS

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. GARCIA. Mr. Speaker, last Tuesday the Subcommittee on Census and Population, which I chair, examined the real-life consequences of the changes the administration proposed for the Government's statistical indicators for inflation and unemployment. Specifically, the administration is attempting to redefine inflation. They are doing this by revising the Consumer Price Index, or CPI. Although the changes in the CPI will not appear officially until at least 1983, I am nonetheless concerned that the net effect of this revision will reflect an apparent slowing of inflation. The CPI may even move downward, when the revision first occurs. This, of course, would fit in nicely with the administration's prescription for economic recovery. The truth is, however, that the proposed revision will create the illusion that inflation has been reduced, but it will not treat the underlying economic problems of our country. The CPI revision will not make it easier for Americans to buy a home or a loaf of bread. In fact, wage earners, social security recipients, and Federal retirees whose pay and benefits are linked to the CPI could face sharp cutbacks as a result of this revision.

Why make changes now? Although the Bureau of Labor Statistics, which produces the CPI, assured us at the hearing that politics was not a consideration in the revision, I, nonetheless, believe that the appropriate steps must be taken to safeguard against an artificial and political drop in the CPI.

Similarly, I believe, this House should be concerned with the impact of the administration's budget reductions on the collection of adequate employment data. The administration's demand for better labor force data is simply not matched by a commitment to fund data collection initiatives such as the current population survey, which is the basic source of labor force data. The administration is also not willing to collect data on the contributions volunteers make to our labor force picture. Volunteers are a highly integrated part of our economic structure; the increased role of volunteers also represents a major initiative of the administration to lessen certain economic difficulties. Further, I fear the administration's myopic vision of Federal expenditures may undermine State's ability to identify and serve the needy under their proposed block grant scheme because of a lack of sufficient information which will be certified if the budget cuts are upheld.●

A TRIBUTE TO OUR DEDICATED AMERICAN NURSES

HON. BERNARD J. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. DWYER. Mr. Speaker, there are over 1.4 million registered nurses in the United States who comprise the largest segment of professional health care workers in the United States.

The contributions that professional nurses make to our Nation's health care is of great importance. I would like to share with my colleagues an article which was published in the New Jersey Star-Ledger. This article provides a unique view of the role of registered nurses and of the conditions under which they work:

[From the New Jersey Star-Ledger, Sept. 27, 1981]

DOCTOR TURNS NURSE, GETS THE TREATMENT

(By Joan Whitlow)

For one week, Dr. Aloysius Cuyjet, cardiologist and director of intensive care at United Hospitals Medical Center of Newark, stopped being a doctor and became a nurse.

For one week, he took care of incontinent patients, and made beds with patients in them who were too sick to be moved. He carried out doctors' orders for tests, therapy and medications, and then assessed the patients' response.

He monitored pulses, blood pressures, respiration and heart function. He took care of patients on intravenous therapy and those on respirators, inserting tubes and suctioning patients to keep them breathing.

It was his job to measure how much fluid a patient was taking in, how much the patient was putting out and whether the combination meant the kidneys were still working. It was his job to see that everything that was supposed to be done was done and on time, his job to decide if there was something wrong and if the patient's doctor should be contacted.

As a doctor he would have been involved in this process of care, by writing an order that someone else carried out. As a nurse, Cuyjet said he hustled more than he ever had in his life—including his internship.

At about 2 a.m. on a Monday morning, with five more hours to go in his career as a nurse, Cuyjet was asked what he thought of nursing.

"It's complex, hard, physical labor. And they don't get paid enough. Doctors have no idea what this job is like. I thought I did. After the first day I was physically beat.

"When the doctor comes in and sees the patient he writes an order on the chart or says what tests are to be done, and that's it. He leaves. He might see the patient 15 minutes," said Cuyjet.

As director of the unit his involvement with the patients is much more extensive than the average doctor. "But the nurse is with the patient all day—actually knows

that patient better than anyone else," Cuyjet said.

"Doctors make a lot of assumptions without understanding what the mechanics are," he continued.

Cuyjet decided to "become a nurse" to better understand the rapid turnover rate among critical care nurses.

On Cuyjet's service there is a new cardiac care unit that was completed a year ago, but never opened. The hospital says it cannot find enough trained critical care nurses to staff it.

On the night Cuyjet was interviewed every bed in the intensive care unit was filled, some of them with heart patients who could have been treated in the cardiac care unit, had it been opened. At 2:10 a.m. the emergency room called with a patient who needed intensive care. That patient had to be transferred to College Hospital. There was no room for him.

Most parts of a hospital are quiet at night and early in the morning, but until about 2 a.m., the intensive care unit was bustling.

Three patients had been brought in a few hours before, all needing respirators, and each patient on a respirator gets one nurse assigned exclusively to that case.

Nurses who work that unit say they like it because of the excitement, and because the work is never the same from day to day.

Never the same, they say, except for the stress and responsibility. And several also cited the attitude of the doctors they work with as major reasons for their negative feelings about the job.

The doctors do not see them as coprofessionals, they claimed, and frequently show no respect for the amount of work the nurses perform, or for their professional judgment.

One nurse said that sometimes a nurse will question a doctor's order, asking if a medication dose should be adjusted, given the patient's previous reaction, or if a test can be rescheduled, so it won't conflict with the patient's therapy.

"You can make it a suggestion, a question, you can say it as nicely as you please, but the doctor usually takes your head off for questioning his judgment," she said.

"Some of these doctors think they are God," said another. "They can be standing in the room with the patient, and if the patient asks for a bedpan, instead of handing it to the patient, the doctor will ring for the nurse," she said.

"I was trying to get one patient out of bed and into a chair, and a doctor was there. He wouldn't help me. He said it was not part of his professionalism," she added.

The nurses said they were apprehensive when they first learned Cuyjet would be rotating through the unit as a nurse.

"But I think it's a very good idea. The only way to learn what it's like to be a nurse is to be one. I think it will set a good example for the other doctors, even if they don't do it themselves," was one opinion.

Cuyjet said one reason for working as a nurse was to get a better idea as to how all the people who must work together—doctors, nurses and technicians—do, in fact, work together, and whether changes can be made on the unit to improve things.

As medical director of the unit, he has responsibilities for education of the medical students, interns and residents who are assigned there. Cuyjet said he is considering having some of them spend time as nurses.

"And I guess the next logical step would be for me to become a patient," he added.●

BROOKS HAYS—AN OUTSTANDING AMERICAN

HON. L. H. FOUNTAIN

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 4, 1981

● Mr. FOUNTAIN. Mr. Speaker, I am grateful for the opportunity to join in paying tribute to our former colleague and good friend, the late Brooks Hays. I had the good fortune to serve with Brooks during my first three terms in the House, and I enjoyed his warm fellowship for many years thereafter at meetings of the House prayer breakfast group.

Although his involuntary retirement from this body in 1958 was a great loss to the House and to the Nation, this energetic and dedicated man continued his distinguished public life by serving three Presidents in a variety of Government posts. He also engaged in university teaching—including a professorship at Wake Forest in my home State—and devoted a lifetime to religion. A deeply religious man, Brooks Hays had the honor of being the first layman elected to the presidency of the 8-million member Southern ●Baptist Convention.

Brooks Hays was widely known for his humor and keen wit. The primary purpose of his stories, however, was not simply entertainment. Rather, he would use his great gift to attract the attention of his listeners in order to dramatize an important point in the discussion.

This wise, gentle, and unassuming man was consistently motivated by high principles, and he worked diligently throughout his life to promote better human relations. He was truly a rare and extraordinary person who will be greatly missed.

Christine and I extend our deepest sympathy to his wonderful wife, Marian, and to their children.●

TRIBUTE TO VETERANS

HON. ROY DYSON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. DYSON. Mr. Speaker, I would like to take this opportunity to express my own gratitude and appreciation to all Americans who have set aside their lives for the cause of freedom and justice. For those who have died in this service and for their families, too, there must be a source of deep consolation in knowing that their lives were offered up in the pursuit and perpetuation of freedom and justice. All across this land we acknowledge this contribution. In Maryland's First Congressional District alone there are nearly 70,000 veterans—thousands more have died—who have this Nation's deepest gratitude and appreciation.

On November 11, the Nation paid tribute to over 1 million Americans who have died in defense of their country in all American wars since 1776.

Clearly, the gratitude this Nation feels and acknowledges on this day of national observance must never be diminished. We owe a debt to recent veterans which we are just beginning to pay. At the same time, I believe, our obligation to veterans of other eras remains as compelling as ever.

This year, I am pleased to report, the Congress has approved rights, benefits, and medical services for veterans in recognition of their special contribution to the national interest through their military services. Within the budget limitations, this Congress has enacted three major bills that will greatly benefit veterans.

On July 30 the House passed the Former Prisoner of the War Benefits Act of 1981. This measure provides priority hospital care and outpatient treatment to former POW's and service-connected benefits for psychosis and any anxiety states.

It also reduces from 6 months to 30 days the requisite prisoner-of-war incarceration period for presumptions relating to certain disabilities and diseases. Further, it requires the Administrator of Veterans Affairs to maintain a centralized record of claims of former POW's and of disposition of such claims.

On October 2, the House passed the Veterans Disability Compensation, Housing, and Memorial Benefits Amendments of 1981.

This important measure was signed into law on October 17 and provides an 11.2 percent cost-of-living increase in disability compensation and dependency and indemnity compensation effective October 1, 1981, for over 2½ million veterans and dependents.

It also requires the Administrator to include in the annual budget any plans to make major reductions in personnel or to close VA offices.

It provides that such plans cannot be implemented until the beginning of the next fiscal year, thereby giving the Congress an opportunity to take legislative action to prevent such closings or reductions.

It prevents the VA from using medical care funds to conduct cost comparison studies related to contracting-out of functions now being performed in-house at local VA hospitals.

It increases Serviceman's Group Life Insurance coverage from $20,000 to $35,000 effective December 1, 1981.

On the same day the House passed the final version of the Veterans Health Care, Training, and Small Business Loan Act of 1981.

This legislation is particularly significant in light of the fact that the number of citizens served by the Veterans' Administration has risen to an all-time high. By 1985 it is estimated there will be 10 million veterans 65 and over.

A major provision of this bill requires that the VA operate not less than 90,000 hospital and nursing home care beds and maintain the availability of such additional beds and facilities to fulfill VA's contingency responsibilities for assistance to the Department of Defense.

Equally important, this measure will greatly enhance the benefits of Vietnam-era veterans.

It provides priority hospital and outpatient care for Vietnam veterans who believe their current medical conditions may be the result of exposure to agent orange or other defoliants used in Vietnam, as well as for other veterans who may have been exposed to ionizing radiation from nuclear testings following World War II.

Notwithstanding these improvements in veterans' programs and benefits, still much remains to be done to meet the changing needs of veterans and the changing demands of society.

"A nation reveals itself not only by the men it produces but also by the men it honors, the men it remembers," said John F. Kennedy. We owe a continuing debt to those men and women who have put aside their lives to serve in the country's armed services.●

NATIONAL SHUT-IN DAY WOULD PROVE COMPASSION LIVES ON IN THE HEART OF CONGRESS

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. RAHALL. Mr. Speaker, in every congressional district lives an often neglected segment of our society commonly called "shut-ins." These are people who live within the confines of their homes due to physical impairment and old age. In general, they have been left by the wayside, done with only their thoughts and memories for company.

However, shut-ins have contributed to society by being good parents, concerned citizens, and hard workers. They are valuable for the qualities they possess as individuals with a rich past which can be shared with those who have not enjoyed their experiences.

It is for this reason I introduced House Joint Resolution 145, which requests the President to proclaim the first Sunday in June as "National Shut-In Day." In light of the drastic budget cuts made this year in many social programs, passage of this resolution would prove that compassion does indeed live on in the heart of Congress.

I might also add that there is a Shut-In Day Association with representatives in Alabama, Kansas, Maryland, New Jersey, New York, Massachusetts, Ohio, Oklahoma, Rhode Island, Texas, Virginia, West Virginia, Pennsylvania, Utah, Washington, and Hawaii. If any of my colleagues would like the name of the Shut-In Day Association contact in their State, or would like to cosponsor House Joint Resolution 145, please contact my office.

Finally, following is a humorous, but informational, article which recently appeared in the Huntington, W. Va., Herald Dispatch on the designation of special days by Congress.

SHUT-INS' DAY

(By James E. Casto)

There's a Bosses' Day, a Secretary's Day, a Grandparents' Day and even a Mothers'-in-law Day.

So why shouldn't there be a Shut-ins' Day?

Why not, indeed, asks Judy Boone of Logan, W. Va.

For something like 20 years now, Mrs. Boone, 74, has been conducting a one-woman crusade aimed at convincing Congress and the White House to designate the first Sunday in June as Shut-ins' Day.

At her urging, legislation to the effect has been introduced in the Senate by Robert C. Byrd, D-W. Va., and in the House by Nick Rahall, D-W. Va.

Byrd's bill has been referred to the Senate Judiciary Committee, and Rahall reports that, with 218 co-sponsors needed for his measure, he has thus far arm-twisted 59 of his colleagues into adding their names to it.

All this may prompt most of us to smile a bit and shake our heads, but Mrs. Boone is dead serious, and as you listen to her, what she says makes a great deal of sense.

"Our shut-ins," she explains, "are an often-neglected part of our society."

Congressman Rahall agrees, saying in remarks delivered last year on the House floor:

"These persons have contributed in the past to the happiness and well-being of others by being parents, children, hard workers, and concerned citizens. Although in most instances they are older or physically impaired, they are valuable for the qualities they possess as individuals with a rich past that can be shared with those who have not enjoyed their experiences.

"The shut-in people of our country have a great deal of warmth and friendship to offer, and those who observe National Shut-in Day will gain richly by the experience."

Mrs. Boone learned about shut-ins at an early age when, as a young girl in Logan, she would deliver pies and cakes made by her mother to those shut-ins in her community.

She continued to do so all through her life as an adult and in 1962, beginning with the shut-in members of her church, organized a Shut-ins Association. Later she spearheaded the establishment of chapters all over West Virginia.

Then, in 1971, Mrs. Boone was installed as president of the National Shut-ins' Day Association.

Says Rahall, "'Dedicated' is too little a word to describe Mrs. Boone. She lets nothing deter her in her efforts for others, wherever, whenever she can."

This year she was able to convert Gov. Jay Rockefeller to her cause, persuading him to issue an official gubernatorial proclamation designating June 7 as Shut-in Day in West Virginia.

For whatever it might be worth, this newspaperman is happy to enlist in Mrs. Boone's crusade.

After all, if there's room on America's calendar for a Billy the Kid Day (July 15), a National Aviation Day (Aug. 19), a Leif Ericsson Day (Oct. 9), a Huey Long Day (Aug. 30) in Louisiana and some other Southern states), a National Inventors Day (Feb. 11) and a World Poetry Day (Oct. 15), then surely there ought to be room, too, for a National Shut-ins' Day.●

VETERANS DAY—1981

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. BIAGGI. Mr. Speaker, yesterday, the Nation observed Veterans Day. I am especially pleased that the observance has been returned to the traditional November 11 date after several years of having Veterans Day scheduled in order to give Americans a 3-day weekend. The contributions which veterans have made to our Nation's history deserve its own individual day which is November 11 which was chosen because it was on the 11th hour of the 11th day of the 11th month of 1918 that World War I was ended and America's freedom preserved.

Yesterday there were ceremonies and parades held in all corners of this great Nation to pay tribute to those men and women who have served our Nation in the Armed Forces. On Veterans Day we honor those who gave up their lives so that we might live in freedom. In addition we honor those veterans who survived wars.

This year's observance was marked by a long overdue recognition of the contributions made by Vietnam war veterans. Our Nation has failed to accord proper respect to the hundreds of thousands of Americans who fought in Vietnam. The unpopularity of the war combined with the unfavorable outcome served as an incentive for many in this Nation—including the Federal Government—to practically shun these Americans including those in urgent need of help.

Perhaps the most poignant and meaningful scenes from yesterday's observances were those pictures of veterans from World Wars I and II standing side by side with veterans from the Vietnam era hearing their collective contributions praised and honored.

Yet as we all should know, it is not enough merely to acknowledge and pay tribute to the contributions made by our veterans. We must also rededi-

cate ourselves to insuring that those who fought to keep our Nation free are not asked to fight another battle of survival in their own nation. For the medically needy veterans of World War I and II let us insure that proper medical care is available including the all important long-term care. For the Vietnam era veteran we must insure proper and specialized medical attention is available including counseling services. Further unemployment rates among Vietnam era veterans has always been too high and we must make a conscious effort to find more employment opportunities for these Americans.

On November 11, 1981, we do not find any American servicemen engaged in combat anywhere in the world. We hope this will continue for years to come. However, we must not become complacent about the fact that there is peace in the world. The Soviet Union remains poised and ready in many areas of the world ranging from Poland to Central America to the Third World. To remain free we must remain strong. American veterans have kept us strong and free in the past and for that they are owed a great deal of gratitude which should be shown daily not just 1 day a year.●

NICHOLAS JOHN STEBLAY

HON. JAMES J. HOWARD

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. HOWARD. Mr. Speaker, the universal magic and beauty of St. Francis of Assisi lie in his selflessness. The other day I received a letter which reminded me of St. Francis and indicated there are people in our Nation who have his selfless qualities. Mr. Nicholas John Steblay of Minneapolis, Minn., in his letter asked for nothing but God's blessing for all those who travel. Because of its simplicity, beauty, and altruism, I wish to include it in the RECORD so that all travelers may be touched by the concern of this gentleman from Minnesota.

To Whom It May Concern:

I am writing to give my support and blessings for the systems of mass transportation and private transportation. May God bless and keep safe all who use these systems to travel. May all reach their destination in health and joy. Amen.

In truth,

NICHOLAS JOHN STEBLAY.●

WIDESPREAD CONCERN ABOUT BUDGET CUTS IN THE CIVILIAN SPACE PROGRAM

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. BROWN of California. Mr. Speaker, the rumors and facts of budget cuts in the civilian space program, while not as well known as many budget cuts nor of as much immediate concern, are nevertheless quite serious.

Perhaps the most serious aspect of these cuts is the lack of coherent thought or planning behind them. Supply-side economics and a belief in the majesty of the marketplace seem to dictate these cuts, regardless of how absurd the thought that "free enterprise" will pick up the slack.

Mr. Speaker, I need not dwell on this subject now. I have introduced legislation to establish a long-range civilian space policy and have made these points over and over again. At this time I simply wish to place in the RECORD a few editorials which underline the point I am making.

The editorials follow:

[From the Christian Science Monitor, Oct. 28, 1981]

SPACE: INVESTING IN THE FUTURE

(By Robert Sherman Wolff)

While the American people's support for basic space exploration is by and large very strong, it is often asked: What benefits does planetary exploration yield? Is space exploration good for the United States? Is it worth the money put into it?

On the utilitarian side, "spinoffs" have often been cited as the main reason why the U.S. should continue to explore. However, spinoffs are not the reason we explore space, and the tremendous economic and technological benefits we have derived from spinoff technologies should not be confused with why we explore—namely, our desire and curiosity as human beings to probe the unknown.

From a strictly economic point of view, basic exploration has always been important to an evolving, expanding society. Exploration, in this sense, includes basic research and development (R&D) and, over the last 30 years or so, a number of studies have been done to estimate the economic impact of R&D spending on the U.S. economy.

The most comprehensive of these, with regard to NASA funding, was the 1976 work performed by Chase Econometrics Associates of Bala Cynwyd, Pa. Although the analysis was performed specifically with the 1975 economy in mind, the results are most likely applicable to the present economy.

The principal conclusions reached by the Chase study are twofold. First, a $1 billion increase in NASA spending, coupled with a $1 billion reduction of other federal expenditures in any single year would likely: (a) reduce the inflation pressures on the economy, (b) increase employment, (c) increase productivity.

Second, a sustained increase in NASA spending of $1 billion per year over 10 years would significantly: (a) increase the GNP, (b) reduce the consumer price index, (c) reduce unemployment, (d) increase the productivity of the nonfarm sector of the economy.

Overall, the Chase study claims a 43 percent return on investment for every dollar invested in NASA R&D, with the net effects on various aspects of the economy roughly linearly proportional to the amount invested.

However, it is a well-known fact that economic modeling is an inexact science. Consequently, even the best of models is open to substantial criticism, even if that criticism amounts to simply a divergence of economic philosophy. In that sense, it is not the absolute magnitude of the results of the Chase study, but rather the direction and approximate range of the estimated returns on investment.

Historically, exploration has always tied the natural human desire to explore with the drive to acquire more and better material goods. In the past, a number of societies have chosen to get away from exploration, to turn their attention towards more immediately pressing needs at home. For those peoples, the Vikings, Chinese, Romans, Dutch, Spanish, Portuguese, and English, to name a few, such a drawing away from expansion and exploration has always marked a turning point in that society's power and influence. Once the decision was made to cease exploring, the society began to contract, and its empire subsequently weakened.

Perhaps the US is at such a point. If we are, then let us use history to guide us in our decisions.

Today, our leaders are telling us that they have made the decision for us. We will not fly to Halley's Comet, although the Soviets. Europeans, and Japanese will be there. We have canceled our half of the International Solar Polar Mission, leaving the Europeans with only one-half of a two-spacecraft mission to study the sun. We have delayed our next mission to Venus, the Venus Orbiting Imaging Radar, until at least 1988; and even then it will likely be equipped to do far less science than originally planned. And Project Galileo, NASA's next mission to Jupiter, and the only funded planetary mission for the 1980s, has an increasingly difficult battle with Congress for funding each year.

We are rapidly losing the desire, and along with it, the capability to explore the solar system. And the sad thing is, the cost in dollars is tiny. A mission like Voyager or Galileo costs each American the equivalent of a pack of chewing gum a year for the entire lifetime of the mission. Moreover, the total annual cost necessary to maintain a vigorous planetary exploration and general space science R&D program is less than one tenth of one percent of the federal budget—less than the cost of one B-1 bomber, or less than one day's worth of the Health and Human Services budget.

All we have done in space exploration to date is only a beginning. If we stop now, if we turn our eyes inward and refuse to look further than our hands can reach, then we will lower our sights on all things and, as a society, we will likely meet the same fate as the Vikings, Romans, and Europeans of old.

(Robert Sherman Wolff is senior scientist, space physics section, at Jet Propulsion Laboratory.)

[From the Christian Science Monitor, Oct. 28, 1981]

DON'T CRIPPLE U.S. SPACE PROGRAM

(By Robert C. Cowen)

As the two letters reproduced on this page indicate, the highly successful U.S. space program is deeply threatened.

President Reagan's additional 12 percent across-the-board cut in discretionary spending by federal agencies, which is considered for the National Aeronautics and Space Administration (NASA), among others, would emasculate the U.S. capacity to carry out space research and apply its fruits usefully. It would also restrict, although not destroy, the country's capacity for manned spaceflight by slowing development of practical uses of the space shuttle.

In fact, the industry journal Aviation Week & Space Technology reports that the extent of the cutbacks being discussed has raised concern within NASA that they "would end 23 years of federal support for broad civil space research areas, possibly violating the National Aeronautics and Space Act of 1958 that founded NASA in the first place."

At this writing, it was not known how much of the cutback talk was just a trial balloon and how much was a deadly serious proposal. A definitive statement from the administration is expected sometime in November. There is no doubt at all, however, that the cutbacks under discussion would forfeit U.S. preeminence in space.

In fiscal terms, NASA would be asked to absorb cuts of $1 billion each for fiscal years 1983 and '84, plus $367 million in 1982, the current fiscal year. These cuts are over and above what was already included in the administration's earlier financial planning, which had put NASA on a tight budget that space scientists felt dangerously restricted prospects for US space exploration.

What now is proposed goes far beyond that kind of limitation. Virtually all solar-system research would be terminated. The Voyage spacecraft now heading for Uranus and Neptune would be shut down and the deep-space tracking network scrapped. Future planetary missions would probably be unlikely for an indefinite period. The Jet Propulsion Laboratory—the preeminent space research facility in the world—might well be closed, its capacities and personnel lost as a useful national resource. Most space applications would be canceled, with the exception of the latest resources surveillance satellite, Landsat D. Much aeronautical research would be stopped.

In short, the United States would weaken itself substantially in both space and aeronautical capacity. It is hard to square this prospect with the recent statement of presidential science adviser George Keyworth that "in setting our priorities in the support of science and technology . . . the principal criterion for the fundamental pursuit of knowledge must be excellence—excellence in the investigators and in the subject. An additional criterion for the support of areas of research directed toward technological advances is pertinence—and this means pertinence to the recognizable economic and societal needs of the nation."

What has achieved a higher standard of excellence than the space research that has opened a new era of exploration and revolutionized earth and planetary science? What could be more pertinent than those satellite photos that augment so powerfuly the daily weather forecast?

[From the Christian Science Monitor, Oct. 28, 1981]

TWO PERSPECTIVES ON CONTINUATION OF THE SPACE PROGRAM

(Following is an open letter originally sent to the White House.)

Mr. EDWIN MEESE,
Special Counselor to the President,
The White House,
Washington, D.C.

DEAR MR. MEESE: We are writing out of deep concern for the future of this nation's commitment to the exploration of the solar system—and extraordinary technological triumph in which American spacecraft have visited, for the first time in human history, 40 new worlds. Our two organizations represent a part of the professional and public constituency of planetary exploration: approximately 1,000 scientists engaged in planetary research, and 100,000 other citizens who have joined The Planetary Society during the past year because of their commitment to planetary exploration. The Planetary Society is in fact the fastest growing membership organization of any sort in America over the past decade.

We recognize the efforts being made to reduce unnecessary federal spending. but we also recognize that there are some activities that can only be supported by the Federal government, and that are critical to our national and global future. Much of basic scientific research represents just such a critical area. Planetary exploration is on the leading edge of our efforts to advance high technology and to increase or understanding of the Earth and its place in the universe. In two decades, we have developed a unique capability to send sophisticated robot vehicles to the farthest reaches of the solar system. The pioneering accomplishments of the Vikings and Voyagers and their predecessors have captured the interest and imagination, not only of millions of Americans, But of multitudes around the world. Even those dubious about the policies of the United States have acknowledged the benign influence and technical leadership represented by this endeavor. It is hard to think of another federal program that has been so successful in accomplishing its goals, or so generally recognized as positive in its effects. It is an example of what we do best.

If we back off from the enterprise of the planets, we will be losing on many levels simultaneously. By examining other worlds—their weather, their climate, their geology, their organic chemistry, the possibility of life—we calibrate our own world. We learn better how to understand and improve the Earth. Planetary exploration is an activity involving high technology which has many important applications to the national and global economy—robotics and computer systems being two of many examples. It uses aerospace technology in an enterprise which is a credit to our nation, our species and our epoch. And planetary exploration is an adventure of historic proportions. A thousand years from now our age will be remembered because this was the moment when we first set sail for the planets.

In the decades of the 1960s and 1970s, dozens of American missions were launched to the Moon and the Planets. For the decade of the 1980s at most one such launch has been approved, and even it is in jeopardy. We write to ask your support to ensure the survival of planetary exploration in the United States. Survival truly is at stake, because once the engineering teams are dispersed, the scientists demoralized, and the facilities closed or redirected to other functions, it would take many years and a great deal of money to return us to our present capabilities. The minimum level of effort essential for such survival is to complete the Galileo orbiter and probe for launch to Jupiter in 1985, to approve at least one other new planetary mission for launch in this decade and to maintain the base support for science and engineering necessary to revitalize the program when a stronger economy can support it.

We and millions of Americans will appreciate any help you give to the enterprise of the planets.

CARL SAGAN,
President.
DAVID MORRISON,
Chairman, American Astronomical Society, Division for Planetary Sciences.

(And a scientist's plea from the heart.)

To the EDITOR:

It is true that out of every $100 the US spends, the planetary program costs three cents. The result of this 0.03 percent investment, however, is supporting a great deal more than its share of our present US economy with such offshoots as communication satellites, image processing of satellite data (weather photos, lake pollution, crop growth, mineral and coal deposits, for example), a vast computer, calculator, and microelectronics industry, and the whole solar voltaics industry, to name but a few. Some of the top industries in the US today are direct space science spinoffs.

Most of today's great technological breakthroughs have come from the space program, and the present satellite surveillance, jet propulsion, computer missile monitoring and so on that give our country its present military edge are results of military applications of basic space science developed technology. And these are but some of the offshoots of trying to learn how worlds work—ours included.

We must watch our level of man-made CO_2 pollution, the Venusian atmosphere has taught us. And the ozone layer must be kept intact or the ultraviolet rays from the sun will kill off our plant life, as arid Mars attests. What amazing insights into our own hurricanes and tornadoes, and what causes them, have been gained by studying them in the atmospheres of Jupiter and Saturn. One need only mention the earthquake-like faults on Jupiter's moon Ganymede and Saturn's Enceladus, and the volcanoes on Jupiter's moon Io to indicate how much our knowledge of such things has grown toward understanding, predicting, and some day perhaps preventing such uncontrolled forces on Earth.

And how vital is our understanding of the Sun, the source of all energy on Earth, if we are to solve an "energy crisis." Finally, the prestige of the US is never more enhanced, (not with military might nor with economic clout), than when we demonstrate what freedom means by overcoming the confines of Earth for the peaceful purpose of discovering knowledge of our place in the universe for all mankind.

Thus you see I feel a great injustice is being done, to the vital scientific community in the immediate place, but to the entire US population in the very near run, by the present annihilation of what amounts to the space exploration part of NASA. The plane-

tary program has sacrificed many years worth of funding and development time to get the space shuttle built—the promised source for much cheaper planetary probe launches among other things. Now that it is built, such planetary projects are being cancelled outright, virtually reducing NASA, (if this trend continues), to a mostly military orbital trucking service.

To put things in perspective, it may be helpful, for example, to point out that the cancelled US Halley's comet mission would have cost the US a little less than nine hours worth of its yearly military or welfare budget. And yet we are far better protected, far better fed, and I dare say, far more inspired as a people for such explorations.

The history of mankind's civilization and enlightenment is directly linked to [its] searching and growing awareness of [its] environment. I believe this pioneering spirit, a prime essential in the history of our country is still undying in the hearts of our people. It is of essential importance now for them to let their government know.

LAURANCE REEVE DOYLE,
Space Image Processing Group,
NASA Jet Propulsion Laboratory.●

A REACTION TO STOCKMAN

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. FORD of Michigan. Mr. Speaker, there will be a lot written about Budget Director Stockman during the next few weeks, but today's Detroit Free Press lead editorial has done an excellent job of assessing the situation. I want to take this opportunity to call this editorial to your attention.

BAD MEDICINE: CYNICISM AND GUESSWORK MARK THE REAGAN ECONOMIC CURE

Budget Director David Stockman's revelations on how the Reagan economic plan was shaped show how much of that plan was based on guesswork, cynicism and outright deception. "Supply-side economics" turns out to be a slogan to mask the old trickle-down policies, in which the chief object is slashing the income tax rates of the rich. In Mr. Stockman's words, the Kemp-Roth tax plan "was always a Trojan horse to bring down the top rate" paid by wealthy taxpayers from 70 percent to 50 percent.

Some of the problematic results of the Reagan program, Mr. Stockman indicates, became visible as early as April, though the administration still keeps up the pretense that a combination of budget cuts that hurt the poor, tax cuts that benefit the rich and increased defense spending will somehow lead to a burst of renewed prosperity. Meanwhile, the "swamp" of waste Mr. Stockman saw in the Defense Department is still ignored by the president. The budget director believed as much as $30 billion could be cut; Mr. Reagan is resisting even a token cut of $2 billion.

Coincidentally with the publication of Mr. Stockman's remarks in the Atlantic Monthly, President Reagan admitted Wednesday that the recession may last for months and the balanced budget is but a distant dream. This is no surprise to anyone who has watched the economic forecasts. The news is not that the Reagan plan isn't working, only that at last the numbers have made an impression upon Mr. Reagan himself.

The question is, what is he going to do about it? The answer, apparently, is that he will continue to tiptoe around the swelling military budget and hack some more from social programs that have already been mutilated. The safety net, like the balanced budget, now exists only in the imagination.

It should be more evident than ever that what Mr. Reagan offers us is a budget more concerned with ideology than with either economics or reality. Its goal is to buoy the rich, to dismantle the social services and income maintenance programs that so offend rockbound conservatives and to cut back the role of the federal government for the sake of cutting; without regard to the merits of what is being done. How else to explain why a president who talked so tough about cracking down on crime a few weeks ago by seeking budget cuts that will leave federal law enforcement agencies too poor to gas up the investigators' cars, to protect informants or to illustrate the runaway drug trade?

Mr. Reagan has never had a program for eliminating deficit spending, merely for transferring it from social services and entitlement programs to the military budget—although spending on superfluous weapons systems is inflationary, creates no jobs for those who need them most and is skewed geographically against the regions is greatest need of help.

And Mr. Stockman's comments confirm the fraudulent nature of supply-side theory. The budget director, nonetheless, has engaged in a remarkable exercise in cynicism, using supply-side mumbo-jumbo to get the Reagan program through Congress. The Democrats now hastening to hang him share the guilt for swallowing the scheme and for competing with Mr. Reagan in the rush to cut taxes helter-shelter.

There is, at last, growing alarm and skepticism abut the president's course even among influential Republican Senators. The Senate leaders who met with Mr. Reagan last week pressed him to moderate the budget-cutting and consider ways to raise taxes. They were unsuccessful, but the latest proposals for cutting the budget are almost certain to face bipartisan resistance. And while Mr. Reagan is backing off even from the tax increases he himself proposed in September, "revenue enhancement" is gaining adherents in Congress.

Even the president now concedes his economic medicine isn't working. His budget director admits much of it is quackery. On the heels of those remarkable admissions, what is needed is not the stiffening of the administration's stance that Mr. Reagan has called for, but for Congress to force a change in the prescription.●

TRIBUTE TO LIVINGSTON L. BIDDLE, JR.

HON. SIDNEY R. YATES

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. YATES. Mr. Speaker, the Chairman of the National Endowment for the Arts must be an especially gifted individual, able to support artists and artistic institutions, yet without creating or sanctioning an "official" art. One who has performed this task with skill, dedication, and compassion is Livingston L. Biddle, Jr., whose tenure as Chairman of the NEA ended this week.

Liv Biddle encouraged private support of the arts and created programs to assist artists and institutions in management and fund raising. He made the peer panel review system, the heart of the Endowment's grant making process, more representative and made the presidentially appointed National Council on the Arts a far more active advisory body. He assembled one of the most dedicated and talented staffs that I have seen in my years in the Congress.

As chairman of the Appropriations Subcommittee, which oversees the Endowments, I have had an opportunity to work closely with Liv over the years as he implemented the policies he helped draft into law in 1965. He was always candid and knew when to rely on his own considerable knowledge and when to defer to the views of others. He was rare among administrators not only in his ability to delegate responsibility to his staff, but in his willingness to give them credit for a job well done.

I am sorry to see Livingston Biddle leave public service after so many years. I am not sure what his and his dear wife Catherina's future plans include—perhaps writing another novel or running another ballet. I hope he will not engage in singing as a profession. He deserves the thanks of the Congress for his service on behalf of the people and our wishes for a happy and healthy future.●

NATIONAL OPERATING ROOM NURSES' DAY

HON. JAMES M. SHANNON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. SHANNON. Mr. Speaker, I would like to take this opportunity to congratulate the Operating Room Nurses of America. November 14, 1981, has been proclaimed Operating Room Nurses' Day, in recognition of the Nation's registered nurses who practice in the operating room. Surgery today is hightly technical, sophisticated, and exacting, and operating room nurses are trained both to provide nursing care and to manage the operating room environment. They are to be highly commended for these skills, which they exhibit daily in caring for patients in medical centers across the country. Their job is indeed a multifaceted one, in which they must be prepared to meet the patient's physical and emotional needs before, during and after surgery. The operating room nurse must possess not only medical knowledge and technical expertise, but also great resources of human compassion and understanding. They are

highly depended on by both doctor and patient, often acting as a go-between for these two parties. In these ways, and by recognizing that the surgical patient is going through a major crisis in his life, they greatly humanize the hospital or clinical atmosphere. The personal attentions and reassuring, capable manner of the operating room nurse do much to allay a patient's fears and make his hospital stay a less trying experience. I am sure that you will all join me in recognizing the outstanding contributions of this fine group of skilled professionals on National Operating Room Nurses' Day.●

SPECIAL INTERESTS OR ENERGY INDEPENDENCE?

HON. RICHARD L. OTTINGER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. OTTINGER. Mr. Speaker, I was pleased to see in the November 4 issue of the Washington Post an editorial in support of expanding daylight saving time. As you know, the bipartisan bill that I and my distinguished colleague from California (Mr. MOORHEAD) introduced, passed the House on October 28. Our bill will expand daylight saving time by 2 months. The simple task of turning back our clocks 1 hour for the additional months of March and April will save our country 6 million barrels of oil every year.

It is my hope that the Senate will move the companion bill (S. 49 introduced by Senators CRANSTON and TSONGAS). With Americans favoring an extension of daylight saving time by a 2-to-1 margin, how can the Senate do anything else?

CLOCK-WATCHING ON CAPITOL HILL

Do cows really care what time the clock says when they're being milked, or is it a case of the milker caring more than the milkee? Every other year or so, Congress considers legislation to allow more than the current six months of daylight saving time—and every time the farmers and their cows are cited as reasons not to give up another minute of standard time. But this year, the House has passed a bill—a perfectly reasonable modification of the current arrangement—that would extend daylight saving time for an additional two months every year by starting it on the first Sunday in March instead of the last Sunday in April.

Supporters of this change note that having another hour of daylight in the afternoons of March and April would not only allow more time for outdoor work and recreation, but would also result in some energy savings because less electricity would be used. In urban areas, the light at the end of the day is also popular with people who don't particularly enjoy going home from work in the twilight or dark.

The change would make sunrise an hour later, but by March this wouldn't put schoolchildren out the door in the dark, except possibly in the westernmost section of each time zone, and only then for a matters of days. Backers of the bill also say the change in March would not result in any increase in traffic fatalities for schoolchildren. And any state could exempt itself from daylight-saving time for the whole summer.

Whether more daylight in the afternoon would actually save approximately 100,000 barrels of oil a day, as claimed, is difficult to know without a trial, but 243 members of the House voted to give the change a try. They may have seen opinion polls, cited by backers of the bill, that show the public favoring the change by a 2-to-1 margin. Or they may have recognized this year's bill as the most sensible one on a subject that by now is wasting more congressional time than it should. With Senate approval, a harmless, popular change could take effect next year.●

A TRIBUTE TO MING QUONG CHILDREN'S CENTER

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. MINETA. Mr. Speaker, I would like to rise today to pay tribute to Ming Quong Children's Center on their 100th anniversary for the contributions the center has made to San Francisco Bay Area children and their families.

The center, located in Los Gatos, Calif., has dedicated 100 years of service to providing a comprehensive treatment program for emotionally disturbed young people. Organized in 1881 by a group of San Francisco churchwomen, the center was originally established as a rescue mission for young Chinese slave girls. The center has changed with time from a rescue shelter to an orphanage, and currently to a treatment program for young people with special needs. Many of their clients have been referred from local law enforcement agencies.

Today, the Ming Quong Center distinguishes itself as a private, charitable children's center which offers both day and residential treatment for youngsters. An impressive and dedicated staff of administrators and educators are essential components of this high quality program. The staff focuses on academic, social, and emotional goals to be achieved in a family-oriented therapeutic program. A family atmosphere which places great emphasis on an individual's special needs is a top priority of the center.

A combination of qualified staff, effective program development, expanded facilities, and the pressing need for the center's efforts make Ming Quong an easily supportable organization for governmental agencies as well as private groups and individuals. Mr. Speaker, I would like to ask you and all my colleagues in the House of Representatives to join with me in expressing our appreciation to Ming Quong for all their fine work and outstanding programs and to wish them continued success in treating emotionally disturbed children.●

CONGRESSMAN BOLAND SPEAKS OUT ON THE SPACE PROGRAM

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. BROWN of California. Mr. Speaker, last week I came across an insightful and important essay written by our colleague, EDDIE BOLAND, on the dangerous drift in U.S. space policy. Given the two hats Congressman BOLAND wears on the Appropriations Committee and the Permanent Select Committee on Intelligence, he is perhaps in the best position in the Congress to critique U.S. space policy.

The essay, which I will insert in the RECORD at the end of these remarks, deals with more than the steadily decreasing civilian space program due to budget cuts. The implications of those cuts are clearly laid out, specifically the "militarization" of the NASA, the civilian space agency. Not only does Congressman BOLAND warn (or should I say predict?) of the conversion of NASA into a trucking company for the Department of Defense, but he describes the almost inevitable shift of civilian space technologies to Europe and Japan, who are seeking markets in this field of U.S. leadership.

It is clear that the United States needs a long-term civilian space policy that will demonstrate our commitment to this area of human development. It is also clear that we are considering random budget cuts without such a policy, and with little thought to the implications of those budget cuts.

As one who has introduced a modest civilian space policy bill, I welcome the calls by leaders like EDDIE BOLAND for the United States to set out a coherent space policy.

I commend the following essay to my colleagues:

[From the Los Angeles Times, Nov. 2, 1981]

SQUEEZING THE BRIGHT PROMISE OUT OF THE SPACE PROGRAM

(By Edward P. Boland)

When the space shuttle Columbia returned to the California desert last spring, we were all filled with pride and renewed hope. After years of discouragement and setbacks, the shuttle flew a perfect mission, meeting every objective. We celebrated the accomplishment of that day. If the truth were known, never was this nation's space program beset by more uncertainty, greater disarray and a cloudier future in all its 30-year history.

What has gone wrong? There is no simple answer to that question. But it is clear that too few dollars are chasing too many

projects with too many technological problems.

In a talk given 3½ years ago, before the American Association for the Advancement of Science, I made the observation that, "after all the uncontrollables are funded, the remaining 25 percent (of the budget) comes under increasing pressure to make cuts. The National Aeronautics and Space Administration is one of those agencies that are within that 25 percent—and any President who is struggling to balance a budget, whether it is 1980 or 1981 or 1982 or 1983, will continue to squeeze all 'controllable' programs."

That is what has been happening. And from all indications it will continue to happen. The President's latest budget reductions only serve to emphasize this, and successive efforts to cut hundreds of millions of dollars from an already shrinking NASA budget have resulted in a space program with little or no direction.

In the past 18 months, NASA has faced three separate budget retrenchments.

The first occurred in March, 1980, when President Jimmy Carter proposed a reduction of $220 million below the original 1981 budget request. NASA's response was predictable. The agency attempted to absorb the budget reduction by stretching out all programs and canceling none of them.

While at first glance this appears attractive—and certainly can be expected as a natural reaction of NASA to placate all its constitutencies—the "stretch-everything-out" policy inevitably leads to unacceptably high costs, which in turn can only serve to complicate the allocation of already scarce dollars. When a President does not support the entire NASA program on the schedule that was originally planned, some programs must be pared or canceled and new priorities must be struck. Stretching it all out is not the answer.

The second major budget retrenchment occurred in March, 1981, when the President proposed slicing $600 million from the original 1982 NASA request.

That was followed by a third budget tremor sent to Congress in the past month. It proposes cutting an additional $367 million below the March reductions. These 1982 budget crunches have had the effect of throwing a hand grenade into the middle of programs that are already beset by both funding constraints and technological problems.

Perhaps the most tragic victim of the dollar crunch has been the space shuttle. Tragic because, although its funding has been partially "held harmless," the promise of the shuttle appears dimmer with each new NASA announcement.

At the beginning of 1981, 48 shuttle flights had been scheduled by NASA through 1985. After the Reagan reductions were sent to Congress, that target was trimmed by 14 missions. We now hear that there is a $700 million problem with development and production of shuttle orbiters in fiscal 1983. Unless that money is found within the total federal budget—or unless some cost-saving measures can be implemented—the number of shuttle flights through 1985 could be reduced to only 24. This would, for all practical purposes, force almost every commercial satellite back into more expensive expandable launchers or—even worse—onto the European Ariane launcher.

On the eve of the shuttle's second launch, that is not a happy picture. But the shuttle has not had a model development history. It has been plagued by expensive main-engine and thermal-tile problems. It is overweight and overcost and, as if that weren't enough, the Air Force has always been a reluctant bride in this joint venture. Even after a successful first flight, there are those in the Air Force who would still like to see the shuttle die an early death. Regrettably, in the halls of the Pentagon, the shuttle suffers from the "Not Invented Here" syndrome.

Still, when you discard bureaucratic rivalries and technological mishaps, it all comes back to a problem of dollars. It is not possible to squeeze a major shuttle development program and new planetary missions and new application missions and aeronautical research out of a continually contracting budget. It is like trying to put 10 pounds of potatoes into a 5-pound bag. Understandably, NASA has attempted to do just that. But it defies the laws of physics, and simply will not work.

And so NASA is at the crossroads. Decisions must be made, and made soon, on the future role of the U.S. civilian space agency. What will happen to the space shuttle? Will it become a $15 billion white elephant? Clearly, it can never be a reliable and profitable civilian space transportation system unless the turnaround time between flights can be drastically reduced. That cannot be done without sufficient money to fund enough flights to demonstrate its workability.

So the shuttle is caught in a vicious circle, and, painful as it is to admit, perhaps its promise as a cheap reusable civilian launch system may never be realized. Ironically, the shuttle may gradually evolve primarily into a military vehicle. That would be a particularly difficult pill to swallow because, in trying to hold the shuttle's funding harmless, nearly all NASA's science and applications programs are being sacrificed. That tragic and frustrating scenario appears to be the trend.

NASA faces other problems—potentially even more difficult. The fiscal 1983 budget process is now under way at the Office of Management and Budget. If the 1982 cuts are repeated in 1983, we may be seeing the beginning of the end of NASA as a civilian space agency.

In effect, we may be witnessing the gradual "militarization" of NASA. Sadly, we may see NASA become nothing more than an arm of the Department of Defense tasked with running a trucking company. That would abrogate to the Japanese and the Europeans many science, applications and communications programs in the next decade. Perhaps the picture is not that bleak. But, again, when one looks at the trends, it is hard to escape these conclusions.

Whatever ultimately comes from these and other questions, it is clear that in the past three years NASA's budgets have not been sufficient to support the space program justified before Congress. But the important point is that the shrinkage of those budgets and the stretchout of programs has not saved money. It has cost more money. And, until a space policy is set out that succeeding Administrations and Congresses will stick with, we are going to continue to pay more for less.●

H.R. 2456—THE U.S. FLAGSHIP FAIR COMPETITION ACT

HON. TONY P. HALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. HALL of Ohio. Mr. Speaker, during this period of austere budgeting, the Congress must recognize and assign priority to those tax expenditures from which our Nation realizes multiple benefits. Because H.R. 2456, the U.S. Flagship Fair Competition Act, ultimates in more than a single benefit for America, I want to speak in its support, and urge prompt consideration by the full House.

We easily recognize that a strong U.S.-flag fleet of merchant vessels working the oceans of the world both encourages and serves domestic/foreign commerce. Thus, this fleet contributes to our economc well-being, both through the merchandising of commodities and manufactured goods as well as the gainful employment of American workers across the entire spectrum of the job market. However, we may tend not to recognize that this same strong U.S.-flag fleet is—as General Eisenhower called it—our fourth line of defense.

Alfred Thayer Mahan, who was and remains one of America's most respected authorities on the influence of seapower on history, reduced the problems of operating freely on the seas to a simple formula: Navy plus bases plus merchant marine equals seapower.

Even today, in this age of the airplane and rocket, the efficient movement of men and materials by sea is still vital to our national defense. The essence of this vital role was recently stated in current terms we all can recognize:

> In a Persian Gulf conflict, the Soviets drive to work, while we have an 8,000-mile nautical fire hose to string.

Mr. Speaker, it behooves the Congress to see that the United States is not found "on the short end of the string."

Recent figures indicate a fourfold increase in the Soviet Union's merchant fleet within only 17 years. Such an achievement was not happenstance, but the targeted result of purposeful Soviet national policies that increased shipbuilding capabilities, supported healthy maritime markets, and created a supply of ships and trained seamen.

Navy Secretary Lehman pinpoints one of the shocking side effects of such Russian policies: "There are more Soviet . . . than American ships operating in (our own) country's foreign trade."

During these same years, the U.S. sea merchant policy seems to have been no policy at all.

At long last, we are hearing from many corners the call for a reversal of such nonpolicy. I feel that H.R. 2456 is such a call. Obviously, no one piece of congressional legislation of itself will achieve the reversal necessary to achieve the strong merchant marine we all desire to see. An important step was the transfer of the Maritime Administration from the Commerce Department to the Transporation Department—authorized this past July by the Congress and signed into law by the President the following month. Soon thereafter, the Secretary of Transportation was designated as official spokesman for the Maritime Administration.

The proposal of H.R. 2456 to reduce the depreciation period for American-built vessels from 14.5 to 5 years, together with other capital cost recovery provisions included in this measure, should be another vital step toward encouraging increased American shipbuilding on a basis that will be competitive in the world market.

We must get our ships built and out to sea quickly. Then we need to develop those further policies which will strenthen our maritime industry's commercial services, while at the same time enlarging its potential for serving as the U.S. fourth line of defense.●

EDUCATION AT THE CROSSROADS

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. FORD of Michigan. Mr. Speaker, I rise today on a matter of great concern to me and the residents of my home town of Taylor, Mich. During recent weeks, the national media has focused attention on the fiscal dilemma of the Taylor Public School District, our State educational system as a whole, and the plight of the school children in Taylor, who may soon be left out in the educational cold.

While the potential closing of schools is a situation my constituents and I are very distressed about, it could very well arise in each and every Member's congressional district. The schools of the Nation are in desperate financial trouble. Some local school districts are facing more difficult situations that others. But unfortunately my home State of Michigan and its schools are suffering under the absolute worst economic conditions in the country, and there is no more vivid example of this anguish than the Taylor School District.

The citizens of Taylor have gone to the polls three times to vote on millage to support their schools. And, each time, out of absolute desperation, they have rejected the millage. I believe that, to a great extent, my constituents have rejected these millages because the school tax is the only tax which is put before them, for an up or down vote. With it, they can express their current attitude on their economic situation.

Mr. Speaker, I make these comments as a warning to my colleagues to make them aware of the challenges before our system of public school financing.

I would like to point out that there are a number of false assumptions being made about the crisis which has beset the Taylor School District. The first—and the most widely held—is that in some fashion, the State can take over the schools and the funding for them. I would like to set the record straight. There is absolutely no provision under State law which permits a financial takeover of a local school district by the State. And, even if there were, the State is not in any position financially to do so. While President Reagan has now declared that the Nation is in a recession, Michigan is suffering from a depression. Not meaning to bring humor into what I see as a very serious situation, the old, worn story about when the Nation's economy has a cold, Michigan suffers from pneumonia, certainly applies in 1981.

Under the State's constitution, Michigan is required to balance its budget annually. Because the economic predictions of the Governor, the legislature, the department of management and budget and even the prestigious research seminar in quantitative economics at the University of Michigan predicted a considerable shortfall in State revenue, the Governor has already been forced to impose a $270 million executive order cutting back on State spending. And this move was taken in only the very first month of the fiscal year.

It is anticipated that more such orders will come in the months ahead.

Our nationally respected State superintendent of public instruction, Dr. Phillip E. Runkel, made it clear on October 29, 1981:

> There will be no state bailout for financially-troubled school districts. I have met with the Governor, the Speaker of the House, the Senate Majority Leader and the minority leaders of both houses in the State legislature, and they are unanimous in this decision—no bailout for the districts.

I have every reason to believe, given my long and close friendship with Dr. Runkel, that he is giving us straight talk.

Attorney General Frank J. Kelley also has confirmed that the State cannot take over the district financially. On October 18, he said:

> The Governor, the legislature, State school officials and others have already said there is no pot of gold available in Lansing. They have repeatedly said the financial fate of the local school district is in the hands of local voters.
>
> The Michigan Constitution does not impose a duty on the Michigan Legislature to appropriate additional State funds to those school districts where the electors have refused to approve property tax limitation increases for school operating purposes. It is a mistake for anyone to believe that the State has funds available for aid to school districts which run out of funds, Attorney General Kelley said.

Wayne County Circuit Judge Joseph B. Sullivan ruled on November 3 that the State must advance the Taylor School District $2.1 million on its State school aid payment account to enable the schools to stay open until the millage election on December 3. Some believe that since the judge was able to rule in this way, that it proves that the State could step in financially. But this payment is strictly an advance on future State aid, and the district has already been reimbursed for 65 days of instruction, even though it has only been open for 35 days. So, even without this new payment, the district has been operating in the hole. Without a new infusion of funding, which the millage would provide, the school district cannot afford to stay open.

Another false assumption of the residents of Taylor is that they are "overtaxed" compared to neighboring school districts. It should be pointed out that even though Taylor has a high total tax rate, at 16th out of the 36 school districts in Wayne County, it is clearly not at the top. The Taylor School District at the same time ranks 27th out of the 36 districts in local wealth—State equalized value—and is, in fact, just below the average in the county in per pupil operating expenditures.

That the fate of the school district and its 16,000 students lies with the will of the local voters is a trusted—and for the most part—respected tradition in Michigan. Local control of the schools is a policy I fought for as a young attorney for the then-Taylor Township schools, as a delegate to the State constitutional convention, and as a State senator. I continue to work diligently to maintain this posture in writing Federal education statutes on the House Subcommittee on Elementary, Secondary, and Vocational Education.

Our schools in Michigan rank as some of the best in the United States. From its very beginning under the provisions of the Northwest Ordinance of 1787 and the State's first constitution in 1835, Michigan has pledged to its citizens that "the means of education shall forever be encouraged," and that a "system of free public elementary and secondary schools" shall be maintained.

The December 3 millage vote gives the Taylor voters the opportunity to maintain and enrich that commitment. It gives them the prerogative of

insuring that their children and my grandchildren receive the same chance for a successful future that we had. For the 1,246 seniors expecting to graduate in June, it means that they can fulfill their long held plans—and dreams—first, of course, to receive the diplomas they've worked toward for 13 years of their lives, and then to go on to school, or hold a responsible job. But, without a renewed commitment on the part of the voters, these children have less of a future than most of their parents had. The voters cannot afford to shut the school doors, and rob their children of just 1 year of education, because they could well be robbing them of their entire futures or setting back their educational progress irreparably.

There is no question that the Taylor schools have faced some very difficult times in the last few years. But I firmly believe that it now is the time to put that all behind us. There are many achievements that the schools are responsible for that Taylor residents can point to with pride and enthusiasm:

Accreditation by the North Central Association and the University of Michigan.

A State leadership role in developing a comprehensive reading and math program which combines State and Federal programs and funding.

Selection as a national sample for compensatory education distribution formulas.

A model preschool program.

Outstanding success in "mainstreaming" handicapped children into regular classrooms.

A successful public works grant application for a new vocational-technical education center.

A highly acclaimed teacher in-service training program, conducted in conjunction with Eastern Michigan University and Wayne State University, which has been adopted statewide as the "Taylor Model."

Not only does the passage of the millage make good sense for the future of our children, it makes good economic sense. If the millage is not approved, Taylor could well be the only municipality in the entire State without public schools. What impact would this have on home values, and on the ability of our mayor and city council to attract new business which we so desperately need? I can assure you that not only would home values plummet, but any hope of bringing in new businesses would be quashed.

I cannot stress enough how strongly I believe in the value of education and the importance of providing it for our young people. My ballot will be cast in the affirmative on December 3. I truly hope that position is in the majority when the votes are counted.●

AMERICAN LEGION CALLS FOR THE RECOGNITION OF NAMIBIA

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. FIELDS. Mr. Speaker, I sincerely find it increasingly difficult to understand why more leaders in our Nation are not aware of the serious threat that the Soviet Union poses to the Govenment of South West Africa/Namibia, and therefore to U.S. national security.

Namibia has the largest uranium mine in the world, exceeding one-sixth of all the known uranium in the Western World. Namibia also holds vast quantities of copper, zinc, and gem diamonds. Namibia's importance as a trading partner will be even more significant and vital should the United States become a signatory to the Law of the Sea Treaty in its present inferior form.

In addition, the deepwater port at Walvis Bay on Namibia's southwest coast is ideally suited for harboring Soviet nuclear submarines in a position to bisect the oil lifeline from the Persian Gulf to the United States and our European allies in NATO. Over 26,000 ships a year pass from the Persian Gulf around the Cape of Good Hope, and as much as 70 percent of the critical minerals needed by the West. It is obvious that Soviet control of those sea lanes and the South Atlantic would nearly give the Soviets a complete victory in its resource war with the United States and its Western allies.

Mr. Speaker, it is time that more of us speak out boldly against the Soviet Union's active participation in SWAPO's terrorist war against Namibia's nonracial, representative government. SWAPO terrorists engage in hit-and-run raids of the type that has become all too familiar in many parts of the world where Soviet financed, trained, and equipped terrorist movements are at work. SWAPO terrorists plant Russian landmines in front of schools, stores, and other civilian localities in the black communities, using murder as a tool with which to wrench the government from the hands of Namibia's free people.

I am proud of the American Legion for raising its voice in defense of the peoples of South West Africa/Namibia. At the Legion's 63d national convention held this past September 1 through September 3, a resolution was adopted concerning Namibia. The text of resolution follows:

RESOLUTION 20—NAMIBIA/SOUTH WEST AFRICA

(63d National Convention of the American Legion, Honolulu, Hawaii, September 1 to 3, 1981)

Whereas, The Nation of South West Africa have been friends and allies of the United States during our national crisis, continues to be so, and

Whereas, free elections have been held with a multiracially balanced government being formed named the DTA in the majority, and

Whereas, the United Nations have failed to recognize it as a legitimate government because of Walvis Bay naval base controlled by South Africa, was not included in the transfer of properties along the Atlantic seaboard, the Communist and Third World countries refuse to recognize the legitimate elected Government of South West Africa, namely Namibia, and

Whereas, with the Communists in control of South West Africa would give the red belt across the entire Continent of Africa, controlling the sea lanes of the Indian, Pacific and Atlantic Oceans, and

Whereas, the industrialized nations of the western world are dependent upon the minerals and defense of the sea lanes, dependent upon for our survival;

Now, therefore, be it resolved by the American Legion in National Convention assembled in Honolulu, Hawaii, September 1 to 3, 1981, that we go on record as requesting that the United States Government recognize the present legitimately elected Government of Namibia as the legal government.●

LET'S LABEL CIGARETTES FOR WHAT THEY ARE: A MAJOR CAUSE OF DEATH AND ILLNESS

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. WAXMAN. Mr. Speaker, I am pleased to announce the introduction of H.R. 4957, the Comprehensive Smoking Prevention Education Act of 1981. This legislation will result in a dramatic increase in public knowledge about the significant adverse health effects of smoking.

The need for this legislation is clear. An estimated 54 million Americans smoke and the number of young smokers—particularly young women—is disturbingly high. There can be no question that the health of smokers suffers as a result of the smoking habit. The increased risk of serious illness is well documented.

Today we know much more about the adverse health effects of smoking than we did when the first report of the Surgeon General was issued in 1964. Today we know that smoking is our Nation's most preventable cause of illness.

Smoking is the No. 1 cause of lung cancer and is a significant cause of

larynx, oral cavity, esophagus, and bladder cancer.

Smoking accounts for one-third of all heart disease deaths and nearly doubles a persons risk of heart attack.

Smoking is a major cause of emphysema and chronic bronchitis.

Smoking significantly increases the risk of birth defects or spontaneous abortion during pregnancy.

Simply put, smoking is a major health risk factor and is directly responsible for the death of over 300,000 Americans each year. The costs in terms of unnecessary health care expenditures and lost productivity to the U.S. economy are a multibillion-dollar national embarrassment.

Tragically, a significant portion of the public—particularly smokers—are unaware of this information.

The Federal Trade Commission recently reviewed a large number of studies concerning the extent of consumer knowledge about the health effects of smoking. Its conclusions were published in a May 1981 Staff Report. The report notes:

> . . . the evidence indicates that many consumers do not have enough information about the health risks of smoking in order to know how dangerous smoking is, i.e. what is the nature and extent of the health risk of smoking. Many consumers also do not know whether the general health risks of smoking have any personal relevance to themselves or whether they are among those groups of people who may be uniquely vulnerable to these health hazards. Finally, without more specific, concrete information, consumers have a more difficult time remembering and are less likely to consider health information at all in making their smoking decision.

The level of public ignorance and misunderstanding about the health effects of smoking and the trend of smokers to start at younger and younger ages highlights the need for legislative action. Steps must be taken to make smokers and potential smokers more aware that smoking is a certain and most potent killer.

For years now the cigarette industry has sponsored advertising campaigns which attribute positive lifestyle values to smoking. These efforts have been all too effective and have served to blunt and undercut both Federal and private sector smoking education activities. Its time to take a new look at developing more effective antismoking activities. Enactment of H.R. 4957 will be a positive step toward developing more successful smoking prevention campaigns.

H.R. 4957, provides statutory standing to the Office on Smoking and Health within the Department of Health and Human Resources. It charges the Office with establishment and administration of a national smoking education program. It requires the Office to become more actively involved in the preparation and dissemination of educational and scientific information on smoking and to actively involve a wide range of Federal agencies and private sector organizations in these activities.

In addition, the bill replaces the current cigarette warning label with six new health warnings. Unlike the current label, the new warnings are specific and reflect the most current scientific knowledge about the relationship between smoking and disease. The warnings will rotate among cigarette packages and advertising on an annual basis in order to enhance their visibility and assure the widest dissemination of their health message.

I am pleased to say that H.R. 4957 has broad support among private voluntary health associations. I would like to express my personal appreciation to the American Heart Association for their technical assistance in the preparation of this legislation. Through their leadership, H.R. 4957 can now claim the endorsement of virtually every major private health organization concerned about public health and disease prevention.

Mr. Speaker, the body of scientific knowledge documenting the adverse health effects of smoking is overwhelming. The linkage between smoking and serious illness or death is unequivocal. I believe our national smoking habit can be reduced if the public is better informed of the risks they take when they light up.

Increasing the level of public knowledge about these health risks will require the commitment of the Federal Government as well as voluntary health organizations to work together in initiating a vigorous nationwide campaign of smoking education. Passage of H.R. 4957 is an integral step in initiating this campaign and forging such a partnership.

I urge all Members to join with me as cosponsors of this important health promotion initiative.●

STATESMANSHIP NEEDED TO RESCUE SOCIAL SECURITY

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. McCLORY. Mr. Speaker, a recent editorial in the Christian Science Monitor illustrates well, in my view, the crisis of social security's future. Change will be difficult but letting luck take care of the very bread and butter of many of our citizens is inexcusable. We have a duty and responsibility to our constituency to make every effort in their behalf.

I ask permission to have the editorial from the Monitor issue of October 19 printed in full following these remarks and commend it to the attention of my colleagues:

SOCIAL SECURITY'S FUTURE

A great sigh of relief seemed to go up from Congress and the White House when the thin ice of social security reform was once more skated over with no one actually falling through. But the future lies ahead, as the comedian said, whether Washington acknowledges it or not. An increasing elderly population will have to be taken care of one way or another. While Congress gets off the hook with short-term remedies, and the President gets off the hook with a bipartisan study commission, the American public ought to be demanding that the momentum for saving a humane and valuable system not be lost entirely. It is good to see that at least House Speaker O'Neill and Senate Majority Leader Baker have agreed that the commission ought to report back by April 15 rather than in a year or two as mentioned by Mr. Reagan.

The place to start is with the facts which the commission will have to consider—and which the President will have to act upon to regain the bold image achieved by his original social security initiatives. These facts begin with the well-publicized postwar "baby boom" generation reaching retirement age in the first half of the next century—with an added social security drain on the working generation then. But they add up to a picture of the U.S. population that has encouraging as well as sobering aspects.

For one thing, the people who would now be called elderly are projected to have "younger" characteristics than the word suggests: more years ahead of them, better health, more education than their present counterparts—and a greater place for them in the working world. The latter would be due to slowed growth in the labor force, to an increase in the economy's service sector with physical demands suitable to older people, and to improved educational backgrounds enabling them to adapt to technological change.

One dramatic way of putting the trend is to note the actuarial calculations that retiring in 1980 at 69 years of age was equivalent to retiring in 1940 at 65—and in the year 2000 the figure rises to 71 years. Such factors have to be taken into account when the social security commission considers increasing the age of retirment for full social security benefits. It appears that many people would be well prepared to benefit both themselves and society by staying longer in the work force.

Yet the picture is complicated. And we are indebted to such a social security expert as Alicia Munnell, vice-president and economist of the Federal Reserve Bank of Boston, for interpreting the statistics as she has for the Senate's Special Committee on Aging. Considering such matters as disability and technological displacement, she finds that proposals for a gradual increase of the retirement age from 65 to 68 would yield a long-term reduction in costs of only about 1 percent of taxable payroll, with somewhat more in later years. A question for the commission is whether such cost reductions are really worth the restructuring of the system and the risk of leaving some unemployed elderly without a sound means of support.

For Mrs. Munnell notes that past experience indicates lower-paid workers are not able to save for their own retirement and even middle-income workers are not likely to plan enough retirement savings. As for private pension plans, less than half of the private nonfarm workforce is covered by them. Pension benefits go mainly to highly

paid people; low-wage workers receive almost none.

So, for all the lengthened years of activity open to tomorrow's older people there would remain many dependent on children or other sources if not social security. In other words, the costs of their keep will be borne somehow. Though the idea of raising taxes instead of reducing benefits has not been popular of late, Mrs. Munnell puts it in perspective. The upshot is that the system would have sufficient revenue to run well through the first decade of the 21st century if the present proposals for borrowing within the social security trust funds were combined with payroll tax increases costing $45 a year for a worker earning $15,000 a year. This would mean .3 percent for an employee for three years compared with scheduled taxes.

On into the next century the combined employee and employer tax rate would become 17 percent of taxable payroll. This seems high in relation to the present 11 percent for the pension portion of social security. But it is less than what a number of European countries already pay—more than 20 percent of payroll in Italy, Sweden, and the Netherlands, for example, with West Germany at 18 percent. And the rate would have to be seen in conjunction with a reduced outlay on dependents at the younger end of the spectrum. The proportion of the combined younger and older generations to the working generation is called the dependency ratio. It reached a peak of .95 in 1965 and fell to .75 by last year. Under birth rate projections rising to 2,100 births for every 1,000 women, the ratio continues to fall until 2005 and then rises to a plateau of .69 in 2035–2055—still not as high as in 1965.

Should Americans, then, invest more in social security rather than receive less out of it? This is the kind of question the commission will be having to go into, getting across that thin ice, this time onto solid ground.●

TO LOWER INTEREST RATES, GO FORWARD TO GOLD

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. KEMP. Mr. Speaker, the administration has made great progress in reforming tax, spending and regulatory policy. But the final pillar of economic recovery—monetary reform—has not yet been established. The thinking of the Federal Reserve, as explained recently in the Wall Street Journal, is that it is necessary to slow down the economy and raise unemployment, in order to lower interest rates. While the most significant of President Reagan's tax incentives will not begin until next year, the economy is now suffering from recession, with the highest unemployment rates since 1975. The problem—the tragedy—is that, despite the human suffering caused by current Federal Reserve policy, it will not cure the underlying problem of inflation and high interest rates. Once the "going out of business" sale is over, interest rates will remain high, because people have no long-term confidence in money.

The answer, I am convinced, is to go forward with a monetary reform which will make the dollar once again as good as gold. Jude Wanniski, president of Polyconomics Inc., recently explained this fact in an excellent column in the Washington Post. I commend the article to my colleagues.

The article follows:

TO LOWER INTEREST RATES, GO BACK TO GOLD

(By Jude Wanniski)

There are only two ways to bring down interest rates: decrease the demand for credit or increase the supply of credit.

President Reagan has been struggling with record-shattering interest rates because his administration has been almost wholly occupied with the first of these two options. The Keynesian and monetarist "demand-side" economists have dominated thinking about the interest-rate dilemma. They focus on trying to reduce the demand for credit.

Budget director David Stockman, once a supply-sider, has been drawn into this demand-side exercise, hacking away at school-lunch programs, Medicaid and national defense in a desperate attempt to reduce the federal government's demand for credit.

The monetarists sprinkled through the administration likewise have no interest in the supply of credit. Indeed, they specifically argue that the Federal Reserve should pay no attention whatever to the price of credit, i.e., interest rates. They aim at control of the "money supply," as they define money. If there is less "money," people will be able to demand less in the way of wage and price increases.

For the monetarist solution to work, we are told, there must be a period of recession and unemployment in which "people" realize they can't ask for more, because there isn't enough "money" in the system.

Federal Reserve Chairman Paul Volcker is not a monetarist per se, but he is a big believer in recessions a way of bringing down interest rates. He believes that inflation is caused by workers asking for more money and businessmen granting those demands. He thus will support any idea to induce a recession, a goal he has now achieved.

The supply-side economists put their focus on the supply of credit. If we could increase the supply of credit we could avoid using a recession as a way of lowering interest rates. If we could increase the supply of credit rapidly enough, we could even experience a rising demand for credit with falling interest rates.

The chief instrument to bring down interest rates, though, could not be fiscal policy. Supply-side economists (excepting a few supply-side fiscalists such as Treasury Undersecretary Norman Ture) have always asserted that monetary policy is the key to interest rates. Of course, they believe any assault on credit demand is doomed to failure. The recession only shrinks the economy and its tax base, setting the stage for lower interest rates next year.

The only way to break this spiral is by increasing the supply of credit, basically by making it so much more attractive to be a creditor that people will once again be happy to lend long at low interest rates.

How can this be done? The supply-siders say it can only be done with a gold standard.

Only by announcing that we are going to move toward the opening of the gold window that President Nixon closed in 1971 will people be encouraged to lend long again. Only by guaranteeing the dollar's value as a unit of account, in a specified weight of gold, can the current global liquidity crisis end without inflation. And it surely is a global crisis. It was Robert Mundell, the Canadian economist, who observed 10 years ago when the gold window was closed that it was the first time in 1,500 years that the world was without a single currency convertible into gold or silver. We are in a Greenback era, in which all governments can change the value of their currencies annually, monthly, weekly, daily, hourly.

In the past decade, the U.S. government has repeatedly defaulted on its debt to bondholders—by devaluing the dollar relative to real goods. Prospective lenders to either government or the private sector demand enormous premiums in the form of interest rates. Why should anyone lend to anyone else when the banking is done in dollars or other non-convertible currencies that constantly melt in real value?

It is, after all, not only government that defaults on debt when the monetary standard shrinks, all creditors lose. The more they lose, the less they lend. For this reason, there is almost nothing better that the government can do for its people than maintain a constant value of its unit of account, its currency. People make most of the important decisions of their lives around the value of the government official unit of account. When the government alters its value, or "floats" it, as Nixon did, everyone loses. The debtors may momentarily gain, but inflation poisons the community at large in which debtors live too.

When the dollar is convertible into gold, this is impossible. There are no windfall losses or windfall gains. Debtors pay what they promised; creditors receive what was pledged. As a result, there are no inflation premiums in the interest rate. Once again, people lend long at low interest rates.

If Reagan tomorrow announced a return to covertibility, the rest of the world would rush to join the system. No nation could afford to stay on the paper standard if it wished to continue conducting international banking services. Who would bank in floating Deutschemarks, yen, sterling, francs or lira if the dollar were as good as gold?

We abandoned convertiblity, remember, not because we were in a credit crunch, but because Nixon was sold the Keynesian idea that a devalued U.S. dollar would make us more competitive with the Japanese. The monetarists persuaded Nixon to float the dollar altogether in 1973 so they could try another of history's periodic experiments with a paper standard.

Stockman believes convertiblity would mean an initial period of illiquidity, a wave of bankruptcies. But, that is what we are now experiencing. Gold ends the liquidity crisis that is endemic on a global scale because there is no international monetary standard of value. When the supply of credit expands, interest rates tumble and relieved debtors and creditors can happily refinance.

Before we get to that point, though, there must be a general awareness in Washington—in the White House and on Capitol Hill—that there is more than one way to bring down interest rates. Cutting the demand for credit, the method attempted thus far, is the wrong way. The "cure" is

worse than the affliction in that it embraces poverty and unemployment as necessary side effects to lowering interest rates.

Expanding the supply of credit is the only positive solution. It can only be done by reestablishing the dollar's link with gold, reestablishing the value of the accounting unit in real terms. Until the President moves decisively toward this positive solution, he and his administration and the world economy will continue to suffer, and it will get worse.●

VETERANS NOT RECEIVING NEEDED BENEFITS

HON. MIKE SYNAR

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. SYNAR. Mr. Speaker, yesterday, November 11, 1981, ceremonies were held all around this country celebrating Veterans Day, the anniversary of the armistice signed at the end of the First World War. Unfortunately, that war did not mark the end to the armed conflicts the young men and women of the United States have been asked to fight in. The battle to preserve the rights of a free society was continued in another world war and in the Korean and Vietnamese conflicts. It is only fitting that Americans take the time to commemorate friends and relatives who have sacrificed so much of their own personal well-being for their country. Veterans of each of these wars need to know that we appreciate their sacrifices and we are willing to do all we can to pay back our debts. Recently, however, our veterans have been alarmed by signals they are receiving from Washington, and rightly so.

I am concerned about the recent proposals being circulated through Congress calling for additional spending cuts in the range of $450 million in VA health care programs. We have sent our men and women to war and they have come home suffering from physical and psychological ailments. We have an obligation to these veterans to insure the availability of proper medical care to tend to their lingering wounds.

Our veterans, recognizing the budget problems facing this Nation, have taken the first round of budget cuts they were dealt this year in stride; $110 million was cut from the veterans' budget during reconciliation, affecting their burial benefits, dental care, and education programs. Now, veterans are being asked to accept drastic spending cuts in their medical care programs. Direct medcial care would be affected as well as medical research and veterans' hospital construction. This would be a ruinous blow to the veterans' health care system.

I appreciate the pressures facing our economy and the need to cut spending by the Federal Government. Projections for our budget deficits over the next several years are devastating. However, we have to insure the viability of the veterans' health care system. We can correct the problems facing our Nation's economy without turning our backs on our veterans.

At existing levels, there is clear evidence that our veterans are not receiving the benefits the Congress had intended for them to receive. My Oklahoma colleague, GLENN ENGLISH, recently held a hearing in his Government Information Subcommittee, which brought out the fact that $16.2 million had been appropriated for services at the Vietnam Vet Outreach Centers in the last 2 years which they never received. In addition, between $1 and $4 million in operating funds for these Centers never reached them because it was lost at the VA due to confused accounting procedures.

When services are not reaching our veterans that Congress has approved funding for already, how can we honestly contemplate cutting the veterans' budget even further?●

STATE DEPARTMENT BILL H.R. 3518

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. DERWINSKI. Mr. Speaker, when the State Department authorization bill, H.R. 3518, was finally passed on October 29, title II of the bill was designed to provide a means to remedy a serious and growing imbalance between treatment accorded by many countries to official missions of the United States abroad, and that accorded to foreign missions in the United States.

This matter was overlooked in the other controversies, primarily budget matters, that plagued this measure.

Basically, the United States is getting the short end of the deal in its diplomatic arrangements with many other countries. Our State Department does not now have the authority to enforce reciprocity with these countries. The bill would give it the authority.

For a firsthand point of view on the subject of reciprocity, I recommend the following article on problems we have with so-called diplomatic service bureaus with which we have to deal in foreign countries. It was written by the State Department's branch public affairs officer in our embassy in Beijing and appeared in the State Department professional publication, Open Forum, in September 1981:

TAKE YOUR DAMN THUMB OFF THE SCALE

(By David W. Hess)[1]

For years, Foreign Service personnel serving in Communist countries have been harassed by the activities of the so-called Diplomatic Service Bureaus, such as the DSB in Beijing and the UPDK in Moscow. All commercial transactions (hiring local staff; arranging housing; internal travel; hotel, dinner, and ticket reservations; etc.) made between Foreign Service personnel and local organizations must be handled through these Bureaus. Their uncooperative manner often results in unequal and debilitating conditions for our colleagues.

As the Service Bureaus control our housing, they tell us where to live (often in ghettos under constant surveillance) and determine our personnel ceilings by the slow rate with which they provide working and living space. At one point, detente with the Soviet Union may have been growing, but the UPDK, in refusing to give us more working and living space, put an effective brake on our ability to respond to new policy directions in Moscow. Meanwhile, Soviet diplomats in Washington are relatively unrestricted as to the location and size of their living accommodations. Now, even as our relationship with the PRC rapidly expands, Embassy Beijing is under duress. The average person reporting for duty will live at least 6 months in a hotel before receiving a small apartment. Because we lack the necessary working space, we cannot make the increases in our American staff we need to fulfill the responsibilities to which our two governments have been committed.

In Moscow and Beijing, we cannot hire anyone directly. The local staff works for the UPDK and the DSB. Often, our requests for local personnel, translators, typists, administrators, or "golfers" languish in the Bureaus for months. When we insist, we are told that out of the 250 million people in the Soviet Union or the 1 billion in China, there is no one qualified to fill the position. We suspect there is no one with those qualifications ideologically suited to survive long-term, close contact with Americans. The Bureaus evidently feel that in refusing to provide these workers, they can reduce Foreign Service personnel to baggage handlers and warehouse workers. "Since they are all spies anyway, we will at least reduce their effectiveness." Whatever the reason, the result is a serious labor shortage and inefficiency in responding to diplomatic responsibilities.

In many Communist countries, the Foreign Ministry rigidly controls the internal travel of Foreign Service personnel. Such travel must be requested in advance—often it is not approved. If granted, all travel arrangements must be made through the Service Bureaus. Thus, the lucky traveller is faced with one of the most aggravating elements of serving in the Communist world.

We all know that traveling on second-class airlines and living in third-class hotels are the conditions of service, but the Service Bureaus charge top dollar, as though we were flying United and staying at the Hilton. This overcharging is even more galling because ordinary citizens pay a much lower price. For example, while an American diplomat would pay $45 for a hotel room, the cost to a Russian citizen would be $7.50—its real worth. A flight from Beijing to Shanghai costs our diplomat $100, but

[1] David W. Hess is currently Branch Public Affairs Officer at our Embassy in Beijing.

the Chinese passenger only pays $40. The excuse is: "We are so much poorer than you; you can afford it." We should answer that "We will choose our own charities." Admittedly, we live under a different economic system with dissimilar inflationary effects, but the Communist state officials withhold the information that would allow comparisons leading to reasonable adjustments. Instead, they give their assumptions the force of law and sock it to us.

Why have we failed to press for a quid pro quo for our diplomats? Our senior diplomats resist taking a strong position on these issues, fearing that: (a) they will appear small, haggling for pennies and handling administrative rather than substantive work; and (b) pressing for equal living conditions will somehow reduce the possible successful results from such substantive issues as SALT, detente, MBFR, etc.

The leaders of these Communist states—in believing their way to be the wave of the future and ours destined for the trash heap of history—strive to hasten our demise. They may see achievement of their goal as near or far and disagree as to how far away it may be. Nevertheless, as long as this goal remains undiminished as a principal rationale for their regimes, we will be viewed as enemies. They will test us often, in various ways, and point to their successes as proof of their version of historical development.

Officially, we seek detente, equality, and peace, but this must be changed to include reciprocity. Because this testing will continue, we must respond in a manner that is consistent and understandable to the Communists. If our senior diplomats have to involve themselves in administrative issues, then so be it. When equality and reciprocity are uniformly established as the sine qua non of our relationship, we will be acting in the interests of substantive issues, not in spite of them.

How can we get fair treatment from the Diplomatic Service Bureaus? Simple. The Department of State, in cooperation with the F.B.I., should establish the United States Diplomatic Service Bureau, which would give the same type of service to those diplomats who force us to use their DSB's. These diplomats would have to arrange their travel and hotel accommodations through the USDSB, and would be charged the same exorbitant rate our diplomats are made to pay in their country. The Bureau would approve every lease, thus exercising effective control over the whereabouts of these diplomats. In restricting local staff, we would also closely adhere to the Communist state example.

Present U.S. law would not block this plan since diplomats do not have rights under our law—they have immunity supervised by the State Department. The Department could thus expand its mandate.

If present international diplomatic conventions block this plan, these conventions could also be used to reduce the control Service Bureaus have over our diplomats.

Many Foreign Service personnel who have served in Communist countries with Diplomatic Service Bureaus would like to "get even." That is not the thrust of this proposal. In fact, it would be best if such an organization were not necessary. The purpose of this proposal is to establish some of the leverage necessary to negotiate more normal working and living conditions in the Communist countries for our diplomats and to emphasize that the United States insists on equality and reciprocity in all of its relationships.●

REAR ADMIRAL KIDD'S NAVAL ORDER MEDAL FOUND IN U.S.S. "ARIZONA"

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. RUDD. Mr. Speaker, recently, I had the distinct honor of speaking before the Naval Order of the United States at its biennial congress held in San Diego. Present at the congress were many of the distinguished members of the Naval Order who have so nobly served America in the U.S. naval service.

Of interest to all of us, particularly Arizonans and those families and friends of the brave men aboard at the time of its sinking, is the relationship of the Naval Order to the U.S.S. *Arizona* which is now a national monument.

Following the attack and destruction of the fleet at Pearl Harbor, attempts were made to raise the sunken U.S.S. *Arizona* and to bring up the bodies of the men entombed, including the remains of Rear Adm. Isaac Kidd, Sr. These attempts were abandoned because of the loss of life. However, the ship continued to be used as a training school for divers. In one of these dives, the jewelry box of Rear Admiral Kidd was retrieved and is now in the possession of his son, Adm. Isaac Kidd, Jr. The box contained mementos of the cruise of the Great White Fleet, including medals and decorations received from foreign nations. Among them was a medal that Isaac Kidd, Jr. could not at first identify. Recently, the admiral identified the questioned decoration as the medal of the Naval Order of the United States.

Rear Adm. Isaac Kidd's Naval Order Medal, signifying his membership in the order, had been brought up from the historic U.S.S. *Arizona* lying as a national monument on the bottom at Pearl Harbor. It is even more significant to know that his son, Admiral Kidd, Jr., dedicated the beautiful Arizona Memorial near the Cincpacflt landing at Pearl Harbor, which is visited by thousands each year.

While the story of Rear Admiral Kidd's Naval Order association is special to all of its members, there are many other famous, some illustrious, companions in the Naval Order. Among them: Adm. George Dewey, Loyall Farragut (son of David Farragut), Rear Adm. John Grimes Walker, Capt. Jon Codman Soley, all founders; and, Admirals King, Nimitz, Leahy, Halsey, Spruance, Blandy, Clark, and many others.

Some of my Arizona friends who are privileged to wear the Naval Order Medal and have brought honor to our Nation are Lt. Cmdr. Guy Stillman, Lt. H. T. Aardweg, Capt. E. B. Waldman and Capt. Merrill Hammond. I, too, am proud and humble to wear this same medal.●

MEDIA WATCHDOG

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. LaFALCE. Mr. Speaker, every Member of Congress deals on a regular basis with members of the news media.

From frequent contact with members of America's press corps, one can develop a deep respect for the talents and powers of the fourth estate. As a profession, they share our concerns for the Nation and the ever-present demands of timeliness and accuracy. However, sometimes those demands, especially the latter, are not met. What then?

Sixty-five years ago, the first national press council was established in Sweden. In the nation known as the birthplace of the modern-day ombudsman, an organization was created to serve as watchdog on the activities of the news media. Today more than 30 press councils, taking a variety of forms, exist throughout the world.

Mr. Speaker, what recourse does a private citizen or public official have when a news story is reported inaccurately? What recourse does a religious, social or government organization have when the news-gathering activities of the news media breach commonly accepted standards of privacy?

Beyond a tart letter to the editor or perhaps an expensive, time-consuming and risky libel suit, there are few avenues available for addressing these complex and serious occurrences.

A recent article by David Shaw outlines one method of dealing with this problem. In the article printed below, Mr. Shaw reports on the history, the successes and the failures of the news council system of monitoring the news media.

While it is certainly not a perfect means of resolving the serious dangers posed by reckless reporting, it does provide a system by which the public can watch the watchdog.

Given the importance of the news media and accurate reporting to the proper functioning of our form of democracy, I commend this article and its insights to my colleagues.

The article follows:

[From the Buffalo News, Oct. 4, 1981]

IS WATCHDOG NEEDED OVER THE NEWS MEDIA?

(By David Shaw)

In London, a newspaper investigating a government official's relationship with a prostitute bugs bedroom and takes photographs through a hole in the wall.

In New York, a newspaper identifies many supporters of anti-abortion legislation as Roman Catholics—and does not identify

any other individuals by religion in these same stories.

In Minneapolis, a newspaper reporter in an automobile follows FBI agents so closely that they are forced to abandon a ransom drop in a kidnap case.

What can anyone who is offended, endangered or damaged by such journalistic behavior do about it, other than write an angry letter to the editor?

Well, he can file a formal complaint with, respectively, the British Press Council, the National News Council or the Minnesota News Council—three independent bodies created to evaluate reader complaints of inaccuracy, unfairness and irresponsibility in the media.

In those three cases, the various councils involved decided the complaints were warranted—and they censured the newspapers involved. The complaining parties were vindicated, and the newspapers were publicly embarrassed.

In the case involving the gratuitous identification of Catholics, for example, the National News Council not only ruled that The New York Times had been unfair but said further, that because the paper had ignored "repeated complaints on this specific issue, the council can only conclude that the Times is either insensitive to justifiable criticism or is condoning careless editing."

It has been 65 years since the first national press council was established in Sweden. Now there are more than 30 press councils throughout the world.

Some councils—like those in Indonesia and Sri Lanka—were created by the government, primarily to muzzle the press.

Others—like those in Austria, Denmark and Switzerland—were established and are run exclusively by the media, with neither government intrusion nor lay public representation.

But the most effective press councils are generally modeled after the British Press Council—independent of the government but with members of the lay public joining journalists in investigating and ruling upon complaints against the media.

The British Press Council was initially created as a purely journalistc body in 1953, upon the recommendation of a government-appointed Royal Commission on the Press. After a second Royal Commission report in 1963, the council voted to include lay members.

Despite the government's role in the establishment of the British Press Council, the government has taken no role in its financing, membership or decision-making. Thus, many in the British media who greeted the formation of the council about as warmly as one would welcome an outbreak of typhus are now enthusiastic supporters of the council. They think its very existence has enabled the press to avoid restrictive government regulation.

That is precisely why some American journalists supported the creation of the National News Council in the United States in 1972.

Spiro Agnew, then vice president, had been traveling around the country, accusing the press of a liberal bias. Many in the media feared that the Nixon administration might try to enact restrictive—coercive—legislation unless the media made a serious effort to monitor its own performance. Hence, the National News Council.

The idea of a National News Council was not new. The Hutchins Commission on the Freedom of the Press recommended creation of such a council in 1947, but press resistance—indeed hostility—delayed its establishment until a task force of the Twentieth Century Fund made a similar proposal in the wake of Agnew's attacks 25 years later.

In the interim, perhaps two dozen community press councils were formed in various parts of the country. Most gradually died; the Honolulu Community Media Council is probably the largest of those now functioning.

But a statewide news council was established in Minnesota in 1971, and both it and the New York-based National News Council continue to be enormously controversial within the media, despite their attempts to design complaint procedures to offset media resistance.

Before either the National News Council or the Minnesota News Council will agree to investigate a citizen complaint, for example, the complaining party must sign a waiver, agreeing not to pursue any legal claim against anyone "based on the subject matter of my complaint."

Complainants must first try to resolve their complaints directly with the news organization involved. Then, if they are not satisfied, the complaint is subject to a screening procedure by the council or its staff before it is finally accepted for investigation and a public hearing.

The vast majority of complaints are settled, withdrawn, dismissed or rejected as outside the council's purview before the formal investigative process begins. The National News Council has formally investigated only 198 of the 853 complaints it has received in nine years. The Minnesota News Council has investigated only 43 of the 349 complaints it has received in 10 years.

Of those complaints investigated, the Minnesota council has ruled that about half were warranted. The national council has found only 30 percent warranted (although that figure has jumped to 60 percent in the last three years, largely because the initial screening process is now more rigorous).

Although many editors who have worked with news councils on complaints against their papers tend to praise the councils' work, most American editors continue to oppose the entire news council concept.

Journalists in the United States are fiercely protective of their First Amendment rights. They know there are countries that issue (and revoke) journalists' licenses, and they know there are press councils in other countries empowered to impose jail sentences on reporters and to levy heavy fines against newspapers.

No thanks, most American editors say. We don't want a press council here. It would just be a first step toward government regulation.

"Peer pressure can lead to regulatory pressure," says A. M. Rosenthal, executive editor of The New York Times.

Frequently ignored (or criticized) by what is generally regarded as the best paper in America—the paper of record—the council has had great difficulty gaining nationwide acceptance, credibility and impact.

But news councils in the United States were not created by the government, they receive no government financing, have no government membership and can take no punitive or coercive action.

Council defenders insist that the specter of council-deliberation-cum-government regulation is counter-productive, self-justifying paranoia. "Nonsense and in some cases . . . sophistry" George Chaplin, editor of the Honolulu Star-Bulletin, said.

"These councils have no authority at all beyond their persuasive power and their ability to make public reports," Chaplin pointed out. "If we're putting out the kind of paper we should, we have nothing to worry about (from them). And if we're not putting out the kind of paper we should, we ought to get kicked in the tail on those areas of dereliction."

Most council supporters say that the councils help prevent government regulation and save newspapers from some expensive libel suits by providing critics with an alternative means of vindication.

The basic argument in favor of a news council is relatively simple:

The press is more powerful than ever before thanks to the pervasiveness of network television, the growth of media conglomerates and monopoly newspapers, the celebrity status of some journalists and the loosening of libel restraints by the courts, dating back to 1964.

Therefore, since the people who report and edit the news, being only human, occasionally make mistakes—of both omission and commission involving questions of both accuracy and fairness—some independent body should monitor and pass judgment on their performance when specific complaints arise.

After all, the press criticizes every other institution in society; why shouldn't the press, too, be criticized and be held accountable—in public? Doctors and lawyers have internal watchdog groups that monitor ethical standards. Why shouldn't the press do the same thing?

Most editors reject that line of reasoning, though. Their attitude was best summed up by Claude Jean Bertrand who studied press councils worldwide while a research fellow at the American Council of Learned Societies:

"Newspeople, accustomed as they are to criticizing others and not being criticized, resent having their work publicly evaluated by arrogant colleagues and incompetent strangers."

Thus, few newspapers report National News Council rulings, and only a few major media companies contribute money to the council.

Only 26 percent of the council's funding comes from the media. The rest comes from foundations, corporations and private individuals.

There are small signs that media resistance may be lessening, though.

When the council was founded for example the Los Angeles Times editorialized against it, arguing that the press was already subject to pressure from government and from the courts and that the added intimidation of a news council might improperly influence individual newspaper decisions on what to publish or not to publish.

But Times Editor William F. Thomas says he is no longer quite as worried about the council's powers of intimidation as he once was, and he says he would cooperate with the council any time it wanted to investigate a specific complaint against the paper. Nor would he object to a corporate contribution to the council.

Thomas says the council "has behaved in every case I've noticed, very responsibly . . . It does a pretty good job."

The Washington Post has always cooperated fully with council investigations, too—most recently in the Janet Cooke-Pulitzer Prize case—but only in the last two years has the Post supported the council financially.

In fact, Post Executive Editor Benjamin C. Bradlee still thinks "the council's target

is wrong. Why do you (the council) target the best of American journalism, rather than the worst of American journalism?"

The council has heard more complaints against CBS and The New York Times, for example, than against any other news organizations. But that's because CBS and The New York Times are not only the best in their fields, they are also the most visible and the most influential.

"The way you keep the press in line is to pick on the best," Newsweek Editor Lester Bernstein said.

The National News Council has issued more findings critical of CBS than of any other single news organization in the United States, council officials say. But CBS continues to support the council financially. CBS News President William Leonard says the council performs "a useful service."

There are, however, some valid criticisms of the council—most recently over its ruling against the Village Voice in New York for a story on Dennis Sweeney, the accused killer of former Congressman Allard Lowenstein.

In some ways, the council almost seemed less upset by the Voice's journalistic transgressions than by suggestions in the Voice story that Lowenstein had engaged in homosexual activity.

"I don't think the council applied the same standard of ethics and accuracy in those proceedings as it demands of the press," said Osborn Elliott, dean of the Graduate School of Journalism at Columbia University.

The news council can also be faulted on other grounds—beginning with the very composition of its membership.

The council is supposed to be composed of eight people from the media and 10 from the general public, according to its bylaws. But four of the present "public" members are former journalists, and all four are clearly media-oriented in their experience and outlook.

It raises an important question: Is the media-oriented imbalance on the council—in truth, 12 of its 18 members are media figures—a major reason why the council finds only 30 percent of the complaints it investigates against the media to be warranted?

Most Council members—and most council decisions—do not seem biased. "I was very favorably impressed and to some degree surprised by the amount of objectivity," said William Rusher, publisher of the National Review and a member of the council from 1972 to 1980.

As a conservative magazine publisher and outspoken press critic, surrounded by what he perceived as a group of liberal newspaper editors, Rusher says he fully expected to "see myself in a den of inequity." But that didn't happen.

Nevertheless, the council selects its own members, and the stacking of the council with media representatives creates at least the appearance of impropriety and raises legitimate questions of credibility—the very kinds of issues the council is supposed to be investigating.

Chairman Norman Isaacs himself concedes that is a problem and he says a council committee is studying the matter. He says that what the council really needs is a new "outside re-evaluation" to more clearly define its purposes.

Isaacs is particularly sympathetic to the charge that the council largely ignores the truly significant issues facing the media today.

The council rarely, if ever, looks into such issues as newspaper monopolies, concentration of media ownership, the small percentage of total revenue that many very successful publishers spend on their editorial product—and the potential conflict of interest arising from increasing media ownership of nonmedia companies.●

FIRE SAFETY

HON. TOM RAILSBACK

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. RAILSBACK. Mr. Speaker, the media attention given recent major hotel fires in Nevada and New York highlighted a serious national tragedy. Each year thousands of lives are lost and millions of dollars of damage occur because of disastrous fires. It is time for the Federal Government to intensify its efforts to promote fire prevention.

A good place to begin, Mr. Speaker, is with our Nation's lodging institutions. Residential fire safety ultimately must depend upon the vigilance of individual homeowners. However, when each of us checks into a hotel, or place those we love in a medical care institution, we must rely entirely upon the institution's owners and the adequacy of local safety codes to provide fire protection.

Fires start for many reasons—because of a faulty applicance or poor electrical wiring, or someone smoking in bed. Such fires ought to be contained, but—more often than not—there are too few smoke detectors and inadequate sprinkler systems, or fires originate in bedrooms containing flammable furniture or bedding, usually the largest concentration of flammable material in lodging guest rooms.

The U.S. Fire Administration has found that upholstered furniture and mattresses, as the first items ignited, account for 40 percent of all U.S. residential fire deaths. Several recent large fires—notably the 1980 MGM Grand Hotel fire in Las Vegas—were also made more severe by this factor.

When a fire spreads through a large institution, many innocent victims are trapped. Thus, containment of fires, as much as prevention of ignition, is a critical factor in fire safety. Increased use of flame-resistant material in furniture and mattresses used in hotel rooms can do much to contain the spread of fire. Recent research resulting in new fiber development has made improved flame-resistant products possible.

I am pleased to not that an Illinois sleep product manufacturer has become a leader in the develolpment of such products. This company has developed a mattress with a ticking—covering—which significantly exceeds the current Federal flammability standards.

Demonstrations have shown that when a fire is ignited in a wastebasket next to a Sandel-treated mattress, the mattress does not become involved with the fire. The new sleepsets also help confine fire to the room in which it started allowing quests more time to escape and firefighters important extra minutes to contain a blaze. According to industry sources, the bedding represents a major breakthrough in fire safety for the lodging industry.

Clearly, use of this and other fire-resistant products in large institutions should be encouraged. The problem is that fire safety often costs more money, and hotel and other institution owners have insufficient financial incentives to provide this additional protection.

For these reasons, I am today introducing legislation to encourage the owners of hotels, hospitals, high rise office buildings, nursing homes, restaurants, and other institutional facilities, to go beyond their local fire codes and provide more fire safety for all of us. To provide the needed financial incentive, this bill would offer a tax credit for investments in fire prevention property. These include automatic sprinkler systems, early fire detection systems, fire extinguishers, fire rated doors or walls, nonflammable sleep products, and other items which the Secretary of Treasury could specify by regulation as increasing the fire safety of a building.

Last year, fire claimed 7,780 lives and caused estimated property damage exceeding $5,740,000,000. In addition to the tragedy for the individual victims, these fires also represent a substantial loss of revenue for State and local governments, and our Federal treasury. Fires destroy tax producing property and reduce income tax liability.

This legislation will encourage businesses to take measures which can save lives and at the same time reduce the economic cost to our Nation resulting from the terrible tragedy of fire.●

CONSUMER FINANCING OF ALASKA PIPELINE IS UNWISE

HON. TOM CORCORAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. CORCORAN. Mr. Speaker, I have decided to oppose the waivers that have been proposed in connection with the Alaska Natural Gas Transportation Act of 1976. The waivers were proposed by the President on October 15. My decision was made after participating in several days of hearings on the proposed waivers by the Energy and Commerce Committee's Subcommittee on Fossil and Synthetic Fuels. The full House and Senate will have until mid-December to act on

this proposal, which will not be subject to amendment.

For the benefit of our colleagues, Mr. Speaker, I would like to include in the RECORD at this point the text of a press release I issued at the conclusion of the extensive hearings on the subject. The release describes my concerns about this waiver proposal.

PRESS RELEASE

WASHINGTON.—Over half the nation's natural gas consumers could be saddled with "an enormous white elephant" if Congress approves a scheme for financing the Alaska gas pipeline, U.S. Rep. Tom Corcoran (R-15th, IL-Ottawa) said today after a hearing on the plan.

Under a proposal set for expedited congressional review, gas ratepayers could be billed for pipeline construction costs before they receive Alaskan gas and even if it is delayed or never completed. According to a congressional study, consumers could pay $37 billion over 20 years for a 4,800-mile pipeline they may never use.

"On energy grounds, this unusual financing method is clearly unjustified," said Corcoran. "Gas supplies are now adequate. Paying four times the current average price for gas we probably won't need is folly," he said. As the afternoon hearing neared its conclusion, Corcoran announced that he intends to vote against the plan and work for its defeat.

At the joint hearing by the Energy and Commerce Committee's Fossil and Synthetic Fuels Subcommittee, on which he serves, and the Interior Committee's Energy and Environment Subcommittee, Corcoran said it is most unlikely that Alaskan gas costing an estimated $18 per thousand cubic feet "could ever be sold." "It is a strange irony that the consumer would be asked to finance this thing and yet they wouldn't really be consumers in the sense of getting anything to consume," he said.

"It's just a bad deal for consumers," Corcoran said. "Investors see this as too risky for their funds, yet ratepayers would take on those risks through the plan. If it is completed under this arrangement, private concerns—including major oil companies—would get very handsome profits." Originally forecast to cost $3 billion, the massive pipeline project may now run bills totalling $50 billion, Corcoran said, citing a Commerce Committee economist's analysis.

Authorized by the Alaska Natural Gas Transportation Act of 1976, the pipeline would transport gas from Alaska's Prudhoe Bay to the Midwest and West Coast. Terminal points are 60 miles southwest of Chicago at Dwight, Illinois, and San Francisco, California.

After a target pipeline completion date determined by the Federal Energy Regulatory Commission [FERC] is reached, the FERC could permit gas bills to be increased for the over 60 percent of American gas consumers whose utilities are involved in the project to cover their costs. Companies building the Canadian segment could be allowed by the FERC to recover their investment and their operating, debt service and tax costs after that time and when the segment is operational. All costs of a gas conditioning plant in Alaska and the Alaskan segment, except the investment, could be passed on to consumers after reaching the target date and having been completed. Non-investment costs represent 80 percent of the total, according to the committee economist's report. Should the elements not be finished simultaneously or at all, participating companies could nonetheless be allowed to charged consumers for those costs.

Submitted to Congress on October 15, the plan fulfills a commitment made by former President Carter. Under the 1976 law, committees have until mid-November to consider the plan and Congress must act on it by mid-December.●

ANGOLA—FACING REALITY

HON. EDWARD J. DERWINSKI
OF ILLINOIS
IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. DERWINSKI. Mr. Speaker, inasmuch as Angola is prominent in the news lately, the views of a skilled observer of the Angolan scene are appropriate. "Facing Reality," a book by the noted journalist Cord Meyer, presented new facts about Soviet intervention in Angola and how the United States was outmaneuvered. Mr. Meyer is a now nationally syndicated columnist. The following column was part of a series from the book and appeared in the Washington Star on November 20, 1980. The facts and historical perspective presented in the column are still valid and appropriate.

The joint Soviet-Cuban decision to introduce large numbers of Cuban troops into Angola in 1975 to turn the tide of the civil war there was, in my opinion, the first clear-cut and dramatic demonstration of how the Soviets are likely to react to their improving strategic strength.

By that time, American officials were willing to concede that the Soviets had achieved a position of rough parity with the United States in nuclear armament, and the overwhelming American superiority that had played so decisive a role in the resolution of the Cuban missile crisis had disappeared.

Sensing that the strategic balance was shifting in their favor and correctly estimating that the trauma of Watergate and the withdrawal from Vietnam had at least temporarily impaired the American ability to react, the Soviets gambled successfully in a bold, aggressive move on the world's chessboard.

In an operation spanning three continents and requiring the well-timed orchestration of political assets and conventional military resources that had been built up over many years, the Soviets with their Cuban allies imposed their chosen instrument on the people of Angola as the new government when the Portuguese colonial masters finally withdrew on Nov. 11, 1975.

The Marxist government, based on one of the three black nationalist guerilla organizations that had been fighting the Portuguese, the Popular Movement for the Liberation of Angola, remains in power to this day with the indispensable support of 20,000 Cuban troops. In one strategic stroke, the Soviets with Castro's help, succeeded in fundamentally changing the balance of power in southern Africa to their advantage. In so doing, they gained effective political influence in a huge slice of the Dark Continent, obtained access to new strategic ports and airfields, and secured a political base from which to operate against the remaining non-Communist countries in Africa.

Here, then, as clearly as I could reconstruct it in London where I was CIA station chief at the time, is the story of how the Soviets brought their queen, Castro's Cuban troops, into play on the Angolan chessboard to win a decisive victory and to prepare the way for future successful adventures in Africa.

First, it should be remembered that by 1975 the relationship between the Castro regime in Havana and the Soviets had changed drastically from what it had been a decade earlier when Che Guevara first made his romantic debut as a guerrilla hero in the Congo. After Guevara's career as a modern Robin Hood was ended by his arrest and execution in Bolivia, Castro began his retreat from the guerrilla adventures that had caused so much friction between his guerrilla leaders and the more cautious and pragmatic Latin-American Communist parties who took their guidance from Moscow.

Dependent on the Soviets for economic assistance and military hardware, Castro was compelled to become a much more disciplined member of the international community of Soviet-controlled Communist parties. Symbol and proof of this transformation was the fact that by 1971 the Cuban intelligence service, the DGI, was under close tutelage of the KGB. Cuban intelligence officers regularly sent in large numbers to the Soviet Union to complete their training, and KGB specialists in Cuba exercised a supervisory role over the planning and execution of Cuban intelligence operations. This change in the Soviet-Cuban relationship was an essential precondition for the role Castro was now to play in Africa.

In July 1975, even before the first trickle of covert American military support began to reach the fighting fronts in Angola, there was evidence that the Popular Front leaders had approached the Soviets with the complaint that their cadres were unable to use effectively or to maintain the ever more sophisticated weaponry that the Soviets were giving them. Fearful of the potentially superior numerical strength of their opponents, they pleaded not only for Soviet military training experts but for a Soviet troop presence to operate the new equipment on the battlefield.

The Soviets reportedly explained to the Front that the introduction of Soviet troops into the Angolan civil war was too dangerous an escalatory move and might well provoke the United States into committing its own forces to the struggle. Instead, they advised the Front leadership to seek assistance from the Cubans.

A Front mission flew to Havana and met with Castro in early August to argue their urgent need for trained troops. Perhaps fearful of American reaction, Castro was reported to have appeared initially reluctant; but the Front leaders pleaded that it was his revolutionary duty to help them as he had previously done in sending Cuban troops to South Yemen and Syria.

By mid-August, Castro, for whatever reason, made up his mind to take the risks involved; and the decision was made to proceed with the extensive logistical planning necessary to mount a massive sea and air lift of large numbers of Cuban troops, equipment and supplies across the Atlantic to Angola.

To the best of my knowledge, there is no clear evidence available on the respective roles the Soviet and Cuban leaders played behind the scenes in reaching this decision. Certainly, there had to be very close and continuing coordination between them once

the decision was made, because the bulk of the heavy weapons and ammunition that the Cuban troops were to use in Angola had to be flown or shipped from the Soviet Union.

Whatever history may eventually reveal about the respective roles of Moscow and Havana, it was a brilliant and daring conception that added a whole new and dangerous dimension to the Soviet ability to project Communist power into the Third World. By supporting the proxy army of Cuba, the Soviets avoided the direct commitment of their own forces which could so easily alarm the United States and provoke American counteraction.

Because of Castro's prominent role in the nonaligned movement his army enjoyed the reputation of being part of the Third World and was not as much feared and resented as would have been the troops of one of the superpowers. Moreover, among the Cuban troops sent to Angola, care was taken to ensure that almost half were black, so that a racial identity appeared to exist that would not have been the case if Soviet troops had been sent.

For Castro, too, there were obvious advantages in the new strategy. The guerrilla adventures of Che Guevara had had romantic appeal, but in each case they had failed in conception and execution. They had lacked the careful calculation of the odds and of the strength of the opposition that the Soviets could offer their Cuban partner through their worldwide intelligence apparatus. Guevara had relied upon a spontaneous mass uprising of the peasantry, which never occurred, whereas joint operations with the Soviets depended on a heavy military preponderance ensured by the provision of large amounts of modern weaponry transported by Soviet planes and ships.

By becoming a junior partner in the Soviet geopolitical offensive, Castro lost the freedom of action he had once enjoyed, but he gained indispensable Soviet political and logistical support and a role on the world stage for a vaulting amibition that had never been content to be confined to improving the lot of the Cuban people on one small island.

Once decided upon, the commitment of Cuban troops to the Angolan civil war proceeded with dispatch and utmost secrecy. The arrival of Soviet and Cuban ships and planes in Pointe-Noire and Brazzaville could not be masked from American surveillance, but by unloading troops at night and by strict security discipline during the sea voyage a successful effort was made for some time to conceal the fact that troops as well as weapons and supplies were being transported.

In spite of sporadic agent reporting that Cuban troops were arriving, the CIA and the American policy makers were slow in facing up to the size of this large-scale intervention. On Sept. 24, Cuban troops were identified disembarking at Pointe-Noire and being transported by trucks into Angola, but it was only later that it was realized that, by November, 4,000 Cuban combat troops had been deployed. By January 1976, the figure had reached 15,000. By February, the CIA estimated that the combined Soviet-Cuban sea and air lift had transported 38,000 tons of weapons and supplies to Angola at a total cost for the operations of approximately $300 million, 10 times the size of the American covert intervention. The armaments included armored cars, T-54 tanks, mass fire rockets, helicopters and MIG fighter planes.

The Soviet intervention dwarfed the scale of American efforts in every respect—and proved once again that when the Soviets determine to commit their military resources, they do so decisively and with overwhelming superiority, leaving little to chance.●

REAGANOMICS: JEOPARDIZING THE QUALITY OF EDUCATION

HON. TOM HARKIN

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. HARKIN. Mr. Speaker, after Sputnik was launched in 1957, our entire Nation sought to upgrade the quality and quantity of math and science in our schools. It is now a generation later and we seem to have forgotten our need to train scientists, engineers, and mathematicians.

Our need is, I believe, far greater now than it was then. In the 1950's we were a long way ahead of our allies, and certainly the Soviet Union, in almost all scientific disciplines and engineering, with perhaps the exception of space technology. Now, we face very strong competition from Western Europe and Japan in many areas of high technology and machinery sales. They have caught up with us in many areas; they are ahead of us in others. There are numerous reasons for their competitive gain and our present position.

In education we are now making decisions which will determine our place in the economic world for the next generation. Unfortunately, at the national level we seem to place little concern on the need to produce well-trained scientists and engineers for our future. Some say that it is for the local schools, not the National Government, to be concerned about education. However, the administration and Congress are making many decisions which are directly and indirectly having a negative effect on science and math education and on education in general.

The administration recommended completely doing away with the science and engineering education program of the National Science Foundation. This $77 million program helps to train students at the college level. More importantly, it improves the skills of teachers at all levels. President Carter suggested that the program receive $112 million in fiscal year 1982. President Reagan recommended $10 million, an 87-percent cut. The Congress has tentatively approved $27 million.

Elementary and secondary education funds, commonly called title I, are mainly used for remedial reading and math. While cuts in this program are not as large proportionally, they will be very damaging. Outlays were supposed to be $3.9 billion under the Carter budget. Under administration pressure the House of Representatives reduced the program to $3.2 billion. The President's 12-percent across-the-board cut that he announced on September 24 will actually mean an additional 23-percent cut in this program. It will be reduced to $2.47 billion if the Congress follows his advice.

A far greater impact on education is the indirect effect of Reaganomics. By sharply cutting back on grants of all kinds and with almost no notice, we are causing a great strain on local government financing. While many of these cuts may not directly affect school funding, it will have its impact. Schools will find it much harder to receive support from local and State governments. Local and State taxes will rise to make up for Federal cutbacks, and this will create pressure against school levies. Salaries will not keep up with inflation and teachers will suffer. Many will leave the profession. Needless to say, the quality of equipment and the availability of new textbooks will also decline. All areas of education will suffer.

Our increase in military spending will also have a real effect. Unlike the increases we experienced during the Vietnam war, a far larger portion of our current escalation of military spending will be in high technology research. The military will spend whatever it must in order to acquire the personnel it needs. Increased demand will increase salaries. This will drain personnel from civilian research projects and from our universities.

The business sector will also pull people away from teaching. Educational institutions will be under the tightest restraints and will certainly lose in the bidding war. The pull will be greatest for those involved in math and the sciences.

As I said earlier, the teaching of science and math is already declining in many schools. However, our present funding policies will hasten that decline. If we cannot change our general priorities, I do believe that we must develop protective programs to support the quality of our schools which will be changed.

Joseph Whitaker wrote an excellent article in the Washington Post which describes the present situation concerning math teachers. I would like to have that article printed in the RECORD at this time:

SUBTRACTING MATH TEACHERS—FRUSTRATIONS, LURE OF HIGHER PAY TAKE TOLL

(By Joseph D. Whitaker)

When Sandra Lavene began teaching in the Montgomery County public shcools 10 years ago, she had visions of unlocking the intricacies of mathematics for bright youngsters in a classroom brimming with enthusiasm.

But not long after she began teaching at Walt Whitman High School in Bethesda, Lavene's vision started to fade. As she ex-

pected, the work was hard, the students were sometimes unruly, and the pay was inadequate. What surprised her was the student apathy, the lack of respect for her profession, and the thanklessness.

"I would knock myself out," said Lavene, 34. "I'd stay up long hours marking papers. I worked after school helping the kids. But in nine years, the parents, the principal, the kids—nobody said 'thanks.'"

She quit her $19,000-a-year teaching job 18 months ago and exchanged the noisy classrooms for quiet computer keyboards, higher pay, merit raises and profit sharing at the Rockville office of Hewlitt-Packard.

Decisions like Lavene's are causing increasing concern among educators and scientists who fear that the difficulty of attracting and keeping math teachers poses a threat not only to schools' ability to offer a full range of math courses but also to the nation's long-term dominance in math-related fields.

The same lures of higher pay and fewer hassles that have prompted an exodus by many math teachers also have reduced sharply the number of students opting for math education degrees in college, with the result that there are serious shortages of math teachers in various areas around the country.

Other areas, including Washington, have managed to maintain an adequate supply of certified math teachers so far. But they are aware of the problem and are scrambling to develop strategies to steer them around possible future shortages.

Many experts, pointing to the growing gap between teachers' salaries and those in private industry, expect the shortages to worsen, primarily in grades 7 through 12.

"A lot of math teachers are going into the computer field simply because it pays more and there are fewer hassles," said Max Sobel, president of the 80,000-member National Council of Teachers of Mathematics. "Math teachers coming out of college already realize that the $12,000 paid to a beginning teacher is a lot less than the $20,000 they could earn in the first year with some computer firms.

"In addition, the public's indifference to the plight of teachers, the low pay, crowded classrooms and poor facilities are a signal to many students to stay from the teaching field," added Sobel, who teaches math at Montclair (N.J.) State College.

Evidence of the problem abounds:

In North Carolina, 45 percent of all persons teaching math are not certified in the subject. Cleo Meek, assistant director of the mathematics division in the State department of education, said the State's math teachers—who earn $12,000 to start—have been hired in large numbers by nearby computer firms that sometimes pay starting salaries of more than $20,000.

The city of Houston, in a desperate effort to hire more math teachers, has added an $800 bonus to the starting salary of teachers certified to teach math. Still, this year the city issued 44 "emergency permits" to teachers not certified in mathematics in order to cover its math classes, according to Oscar Sarabia, director for secondary school assignments.

Philadelphia, which has just come off a crippling 50-day teachers' strike, began the last school year with 90 vacancies for math teachers and ended the year with 24 of those positions unfilled. With a starting salary of only $10,900 for new teachers, school officials said they cannot compete with thriving, talent-hungry computer firms.

The National Center for Education Statistics last month released its most recent survey on the issue, showing that in 1979 there were 900 math teacher vacancies in elementary and secondary schools nationwide, although there were major surpluses in most other fields.

A 1979–80 survey in Maryland found that 50,000 secondary school students were being taught mathematics by more than 400 teachers who were not certified to teach math. While that survey has not been updated, state education officials say the situation has not improved since it was taken.

In the Washington area, which has had fewer problems because of generally higher salaries and the lure of the nation's capital, public school systems routinely use persons uncertified in math to teach for a few days or a few weeks while they arrange to fill math vacancies.

Montgomery County, apparently alone among area systems, is allowing half a dozen former elementary school teachers uncertified in math to teach the subject at upper levels—after they took an aptitude test and promised to take the college courses necessary for certification.

Fairfax County reports no uncertified math teachers, but had been concerned about filling 25 vacancies when the year began. The county is developing a series of college courses that would be taught to teachers in the county schools over two summers and would culminate in a mathematics certification.

D.C. public schools, which have laid off hundreds of teachers in recent years because of declining enrollment and budget cuts, have been able to keep an adequate supply of math teachers by drawing from that pool.

The difficulty of recruiting and retaining math teachers nationwide over the past five years has been paralleled by a similar but somewhat lesser problem with science teachers, but more attention and concern are being focused on math because it is critical to so many disciplines.

"If school systems can't find enough qualified teachers, they will use teachers who do not have a good math background," said Alphonse Buccino, the National Science Foundation's acting deputy assistant director of science and engineering. "Advanced-level mathematics classes which usually have the lowest student enrollment are the first ones to be dropped when there are not enough teachers.

"Then students who might otherwise have studied math in college enter higher education poorly prepared and cannot compete in science and engineering programs. Ultimately, we could find that the pool from which we select our future scientists and engineers is shrinking."

Buccino said that current trends in the United States in which high school students over the last decade have been required to take fewer and fewer math and science courses are directly opposite the approach in Japan, Russia and Germany, where increasingly more math and science studies are required.

At the University of Maryland at College Park, the number of graduating students with math education majors has dropped from 39 eight years ago to only 10 last year, according to Robert Risinger, director of math education at the university. During the same period, the school's business administration, business management and engineering programs became overcrowded, Risinger said.

The same trend has emerged at the University of Virginia in Charlottesville where the number of math education graduates has gone from seven in 1973 to only three this year, according to William Lowery, the university's only remaining math education professor.

"I didn't go into teaching for the money," Lavene said recently. "I wanted to teach kids who had a love for learning math and would be willing to work hard. But after I taught for a few years, I found that the kids wanted good grades, but didin't want to do the work."

Her search for alternative employment led to Hewlett-Packard, where she said she was hired at a salary "significantly higher" than the $19,000 she was earning as a teacher after nine years. Her employment package includes stock purchase options, profit sharing and merit pay increases that brought her pay raises amounting to 25 percent in her first year, she said.

"Mathematics is always a good background for working with computers," said Jerry Hendrick, a spokesman for Hewlett-Packard. "And math teachers make attractive prospective employees because they can usually assimilate computer information rapidly.

"But we don't want to give the impression that we're out to raid the high schools," Hendrick said. "In every instance that we've hired a teacher, they've come to us. If we have an opening and a math teacher applies, we can't say, 'You're needed in the school system, go back there.'"

Lavene's reasons for leaving teaching are echoed by Paris Rasnic. At age 22, he graduated from Virginia Polytechnic Institute with a bachelor's degree in mathematics and immediately took a job teaching math at Marshall High School in Fairfax County.

For the first few years, said Rasnic, he enjoyed teaching. Then the novelty of the classroom wore off and the daily routine of teaching began to wear on his nerves.

"The kids wouldn't cooperate in the classroom," said Rasnic, 32, who is currently employed by a Fairfax County computer firm. "It was a discipline problem that I couldn't control. I frequently came home from school frustrated and mad. That was no way to live."

Rasnic found the contentment he was seeking in a neaby computer firm, which hired him to keep an array of computer programs running smoothly. With few regrets, Rasnic replaced his chalk board, text books and complaining students with a cozy suburban office equipped with computer terminals and silent green screens.

When he went to work for the computer firm in Vienna, Rasnic said, the firm increased the $16,500 a year he was earning after seven years as a teacher by $5,000 in cash and other benefits. He currently earns $27,000 annually, after three years with the company, Rasnic said.

But the money is only one of the benefits of his new job, he said. "I like it here because your supervisors notice what you do and they show appreciation if you've done good work." His job is to keep an array of computer programs running smoothly, and "I can go home relaxed. I don't have to carry my work home with me."

At the end of a typical day, Andre Samson, a math teacher at Woodson High School in Fairfax, leaves work with a briefcase filled with student papers. At home, after dinner, he will typically spend two to three hours marking and evaluating the

papers so he can return them to his students the next day.

"When I go home, I don't play with my daughter or talk to my wife or watch television," said Samson, who said he values job satisfaction over wealth. "I grade my papers. I feel I owe it to the kids to get their papers back to them as quick as possible."

As Samson, voted Virginia's "Teacher of the Year" three years ago, has continued his devotion to teaching, he has seen several of his colleagues move into higher paying, less demanding jobs in the computer field.

"I must admit I'm beginning to envy them more and more," he said. "The people who have left teaching come back with a new personality. They say they have fewer pressures and don't have to take their work home."

"Teaching is not a rosy profession," said Samson, 39. "But I'm a professional and the zest for teaching is still in me. But I don't know how long I can continue because the economic pressure has hit me like it has everyone else.

"I work hard and every now and then I get a pat on the back. But a pat on the back won't feed my family."●

ASSISTANCE LEAGUE OF PHOENIX VOLUNTEERISM DESERVES ADMIRATION OF ENTIRE COMMUNITY

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. RUDD. Mr. Speaker, there exists a group of dedicated, hardworking and civic-minded citizens in my fourth district in Phoenix, Ariz., whose contributions to the well-being of the elderly and frail citizens in my home State cannot go without mention.

The Assistance League of Phoenix, chartered in March 1966, is a women's philanthropic service group which has been dedicated in its worthwhile efforts to providing needed services and assistance to the needy in the Phoenix metropolitan area. Their projects include: Homemaker Service, a family aid program in which the league employs aides to provide home health care and personal assistance to the elderly, infirm, and chronically ill individual; and TONIC (Take on Needs of Immobile Clients), which involves league members who volunteer their time on a one-to-one basis with clients. Such TONIC services include grocery shopping, providing needed clothing and bedding, driving clients to medical appointments, or even transporting and accompanying clients on social outings.

On the TONIC project alone, Assistance League members have given a combined total of about 22,000 hours to their service project.

Unlike many similar community programs, the Assistance League of Phoenix does not receive funding from any government agency, or any larger entity. The Phoenix Chapter of the National Assistance League raises and distributes all of its operating funds in the Phoenix community through sources like a thrift shop, located at 7044 North Seventh Street, where the homemaker office is also located; an annual champagne brunch; and contributions from individuals and businesses in the community.

In a recent national address to our Nation, President Reagan spoke about the spirit of volunteerism among our citizens which will always be a primary source of relief for our Nation's needy. The Assistance League of Phoenix exemplifies in a most eloquent way the type of voluntary community involvement and spirit our citizens have to offer.●

CANADIAN AMBASSADOR TOWE PROMOTES UNITED STATES-CANADA RELATIONS

HON. ROBERT McCLORY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. McCLORY. Mr. Speaker, the distinguished Ambassador from Canada, Peter Towe, will terminate his assignment as Canadian Ambassador to the United States in the near future. During Ambassador Towe's service in Washington, I have come to know and respect him as a personal friend and as a friend of our Nation. First and foremost, Peter Towe has been an able representative of the Canadian Government in our Capital City.

In recent conversations with Ambassador Towe I have expressed my concern about some aspects of the relationships between our country and Canada and have pointed out the need for restraint and candor in statements which are uttered on both sides of our common border. It would be unrealistic for us to ignore some of the circumstances which give rise to the Canadian policies. For instance: Canada's efforts to strengthen its own economy encounters right off the dilemma of about 70 percent of its oil and gas industry owned by foreign interests—principally American; our failure to ratify the fisheries treaty; the continuing problem of "acid rain," and the general concern that foreign industry fails to take adequate account of the need of internal industrial development—in Canada.

In my view, President Reagan has set a good example for effective diplomatic contacts by his visit to Canada in March and by his appointment of my friend and constituent, Paul Robinson, Jr., as our Ambassador to Ottawa. However, members of the American business community and representatives of the media should continue to seek ways of cooperation for the benefit of our two nations, and both Canadians and Americans should avoid suggestions or threats of "retaliation."

Mr. Speaker, Ambassador Towe recently addressed the Carnegie Endowment and American Foreign Service Association on the subject of "Canada/United States Relations: The Canadian Perspective."

In my view, Ambassador Towe's remarks set forth a reasoned and straight-forward approach to the problems and solutions inherent in the relations of our respective countries. I am pleased to attach to these remarks for the edification of my colleagues and all those who glean these pages, a copy of the Ambassador's address presented in Washington on Wednesday October 28:

CANADA-UNITED STATES RELATIONS: THE CANADIAN PERSPECTIVE

The first words I have for you today are not my own. However, in tone and in content, they are very familiar.

"The relations of few countries are as intimate and important as those between Canada and the United States. They loom far larger in the eyes of a Canadian than of an American. This is natural . . .

". . . It may be expected that the relations between the two states will become increasingly important and that the problems arising therefrom will grow in magnitude."

Those must be the sage observations of a Canadian political figure, you might conclude. Or of an Ambassador to the United States.

They are.

Lester Pearson—Who, of course, was both.

And what might be illuminating to you is that they are from a letter he wrote in January 1932.

You know, Canadian Ambassadors here have been saying that sort of thing for as long as there have been Canadian Ambassadors here. Because it's true. We are two nations sharing a continent. We share prosperity; fears; and many values. We also share a great deal of history. Some of this history is not at all about sharing.

I enjoyed the festivities celebrating the 200th anniversary of the battle of Yorktown earlier this month. I was the one at the ceremony thinking that the American victory at Yorktown made superfluous General Washington's plan for another expedition in 1782 or 83, this one of enormous strength, to take Canada.

I was also thinking, as your President exchanged toasts with President Mitterrand, of how Canada fitted 200 years ago into that triangle. The French did, of course, support the American Revolution against their English enemies. The Congressional leaders in fact expected their French allies to invade Lower Canada. But the French did not attack Canada. The official explanation was that the first priority was to assist the Americans to liberate the colonies in the Southern part of the continent. The actual policy of Versailles was to leave Canada in the hands of the British so as to drive the newly independent state into friendship and expanded trade with France.

To a large extent, French policy was foiled. General Washington, in peace negotiations with the British asked that Canada be ceded to the U.S. which, if the request

had been taken seriously, would have enabled you to spend this lunch hour listening to someone else. It wasn't, but the British concessions to the new Republic were meant to counter French influence—and they were made to a large extent from what eventually became Canada. Such was—and remains—the rather seamy stuff from which history is shaped.

Canada. Not yet a country. Still a colony. But with a growing number of inhabitants of many different kinds. Whose own views were mixed—Canadians in fact fought on both sides at Yorktown—and naturally, were not considered by these big powers.

Who were they? They were the original French-speaking habitants. Still resentful of the British conquest but determined to survive culturally. Then, the Loyalists to the British Crown, many in fact refugees from the Revolutionary War to the South. And there were others—in Montreal, particularly—who had been impressed by the philosophical values of the American Revolution. In a Canadian way, these values worked their way into our own nation-building process, and became the basis of the political values we share in common, even if our political systems are in so many ways quite different.

Indeed, that nation-building process goes on today. Its effects, stemming from the very fact that we are different nations, seem to be what the present fuss in Canada-U.S. relations is all about. But its description is not so different from what Lester Pearson sensed 50 years ago.

My first posting to the Canadian Embassy here came at a time of unprecedented cooperation between us. We worked together even when the issues were difficult, through such huge undertakings as the construction of the St. Lawrence Seaway. Also, at that time, having years before dropped our defences against each other, we joined in defence against others, through the creation of the Permanent Joint Board of Defence in 1940 which led after the war to the Pinetree Line and the Dew Line, and eventually to join defence of the continent through NORAD.

During my next posting to this city, a decade and more ago, the mood was dramatically different. The U.S. was briefly and aberrationally in trade deficit with Canada. The measures taken in 1971 to protect the American dollar, measures which had a grievous, and disproportionate effect on Canada, were not the object of any prior consultations. Canadian pleas that account be taken of our historically special relationship with the USA went unheeded.

This is, I suppose, a contradiction, but it is one Canadians are used to. You were much bigger and stronger and could speak of retaliation much more credibly than we could. As my historical reflections today indicate, we in Canada are aware that it was ever thus. Successive Administrations here have had, perhaps, a shorter-term view of what's been going on. There is after all a tendency here to think that history re-begins every four years.

I don't mean to suggest that as Ambassador here, or earlier, as an officer in our Embassy—where, incidentally, I've spent almost half my working career—I've been stewing in the acid of 200 years of accumulated grievance.

Far from it. Most of my time has, in fact, been spent on the things we've worked out together, in the development since the war of the most complex, and concentrated relationship which exists between any two nations.

I recall those very creative post-war years when international institutions emerged from a common sense of hope or of peril! The resolution among the three countries which had cooperated in developing the atomic bomb to see atoms used henceforth only for peace; the founding of the United Nations; and when the Cold War shocked us all into insecurity again, the creation of the Atlantic Alliance.

In these experiences, our common and enduring view of the world's perils became shaped. It became natural for Canada to think of itself as an ally of the U.S.; in responding to Secretary Acheson's special plea to send ground troops to Korea; in Canada making a special effort to respond to the Suez crisis, where Canadians could play a peacekeeping role from which the larger powers were disqualified, in a sort of complementarity to U.S. big power leadership—and one which at that time kept the good relations between the U.S. and the U.K., as well as France, on the rails.

So I preface my remarks by taking a long view. Not of antagonism. But of history, the history of two nations, each, in its way, pursuing its own aspirations.

And now I turn to today.

We are told that relations between Canada and the United States have entered a difficult and dangerous phase. Americans in both the public and private sectors bewail the so-called new nationalism of Canadian government policies. In Canada many complain loudly about recent American statements, describing them as alternately patronizing or imperialistic. Looming over all the rhetoric is the perception on both sides of the border that we are locked into an inescapable spiral of retaliation and counter-retaliation, to the eventual disadvantage of both countries.

A dramatic picture—but is it accurate? I think not. It exaggerates current tensions in a few areas at the expense of an overwhelmingly positive relationship and it implies that until recently the bilateral relationship was devoid of substantive issues and difficulties.

Quite frankly, relations between Canada and the United States are always delicate.

It is not hard to see why. Interdependence is the watchword of the present age. Academics describe it, politicians espouse it, and the common man confronts it in his daily life. Imports and exports, balance of payments, the value of the dollar, the shock of escalating energy prices. We have all become part-time international economists. The lesson is clear to us all—no nation's economy is a secure fortress. We must struggle to find accommodations with our economic partners or we will all suffer.

For Americans this is a relatively recent experience. To Canadians this "modern reality" has been a feature of our national life for generations. We have had historically to be more sensitive than most to the economic policies of foreign governments. At the present time fixed U.S. capital investment in Canada is greater than in any other country, as is Canadian investment in the U.S., where we are the third largest source of foreign investment. Trade between our two countries totals almost (Can) $100 billion annually.

It is important, I believe, not to over stress the negative. It is not surprising to me that many commentators express real anguish over what they perceive to be a deterioration in our bilateral relations. After all, for many years relations between Canada and the U.S.A. as countries and, more importantly, between Canadians and Americans as individuals, have been warm and genuine. There is an easy familiarity between our two countries which is, perhaps, unequalled in the world. In fact, the similarities between us are so great that we often overlook the differences which make us distinct. And we do so at our peril. Our strength as nations depends not only on our shared qualities but also on those qualities which are unique and lend variety and richness to our national lives.

It is not an easy task to specify these differences: some are very obvious while others are rather abstract and difficult to define with precision. I do not want to provide an exhaustive list for you, but I would like to suggest a few items which contribute to a deeper understanding of Canada.

Our geography and population. Although Canada is larger in area than the U.S., we have a population only one-tenth as large, and almost all of it located within 100 miles of the frontier with the U.S. These facts create special problems such as the vast transportation and communications systems which must be maintained in support of a relatively small economic market.

Our bicultural and bilingual identity. The fact that Canada has two founding cultures and official languages—French and English—creates special national riches but also special and unavoidable costs.

Our federal political system. Canadian provinces exercise jurisdiction over social and economic sectors to a much greater extent that the individual states in the U.S.A. The Canadian federal government's powers are correspondingly more limited than those of its American counterpart.

These, and other, factors taken together have created a distinctively Canadian political culture, a blend of our respect for and dedication to free enterprise and individual initiative with our recognition that government involvement in the economic, social and cultural life of Canada is demanded by the imperatives of our national heritage.

Canadians expect their governments to develop and execute policies which are responsive to their needs and interests. This expectation, by itself, is not unique. Americans also expect their governments to pursue policies which maintain national security, encourage social and political stability and promote economic prosperity. Bluntly put, Canadians and Americans look to their governments to articulate and defend their respective national interests.

And this is as it ought to be. To demand otherwise would be foolish and unrealistic. But it is not the end of the matter for the term "national interest" is infinitely elastic and can be stretched to justify almost any action. Therefore, Canadians and Americans make an additional demand on their governments which reflects their shared belief in democratic political principles—we demand that our governments pursue our national interests in a responsible manner.

When we look at foreign policy we see that responsible governments adjust their policies to suit changing circumstances. This is not opportunism or cynicism; rather we must continually make judgments about how best to pursue our national interests in a manner consistent with our international obligations and responsibilities. At times we must summon up the national will to act boldly while at other times prudence and patience provide the sternest tests of our national resolve.

It is balance we seek and, when I reflect on over three decades of personal involve-

ment in the Canada-U.S.A. relationship, I am struck by the balance we have achieved in the management of this relationship. I cannot think of two other countries which have so effectively pursued their national interests in such a harmonious and mutally beneficial way.

I am deeply troubled, therefore, by the recent charges in the United States that Canada has embarked on a new—and dangerous—course of economic nationalism. Nationalism, I hasten to add, is not used by those making the charge as a neutral description of the reasonable pursuit of national interest. No, we are speaking here of a nationalism which conjures up images of folly, irresponsibility and anti-Americanism. It is our emotions which are being appealed to—not our reason. Against the backdrop of such a long and fruitful bilateral relationship, I find the invocation of the term "nationalism" entirely inappropriate.

When the United States government argues (as does Canada) in favour of fair international trading practices, it does so because it believes such practices benefit the U.S. economy. Similarly, when the Administration and Congress state they will pursue fair trading practices, even if it means "getting tough" with trading partners, they do so because they believe this is necessary to achieve vital national objectives. There is nothing wrong with this: indeed, it would be exceedingly odd if the U.S. government pursued policies which it believed were inimical to American national interests. But we should not delude ourselves into thinking that pursuit of these interests, however reasonable they may be, is cost-free; voluntary restrictions on automobile exports may be a necessary element in the revitalization of the domestic automobile industry, but they do impose a cost on Japanese producers. There have been, and continue to be, debates within the United States on the best ways to pursue trade objectives and yet, throughout these debates, I cannot recall a single reference by any of the participants to the new "nationalism" of the United States Government, not even when such blatant acts as buy-American legislation are enacted by the Congress or, increasingly, by State governments. Perhaps it is the case that one nation's "nationalism" is another nation's "patriotism".

The point is that labels, by themselves, are not really helpful and may even prove damaging. We should be prepared to look behind the labels if we wish to gain a richer understanding of each other. All nations—even Canada and the United States—make mistakes. When we do we expect you to point them out; I know we do not hesitate to point out your mistakes to you. If we cannot resolve our problems through bilateral discussions we have recourse to multilateral instruments such as the GATT, instruments we both helped to create and continue to sustain.

Historically, we have acted responsibly towards each other and we can continue to do so if we do not lose our nerve. It takes political courage to exercise patience, to calmly assess the costs and benefits of foreign policies. In the United States, President Reagan has embarked on a dramatic economic program. Its success will be vital to the recovery of the global economy. We know the measures will take some time to work through the economy and so we have refrained from excessive criticism of the program for its short-term consequences, such as high interest rates, which have a dramatic impact on Canada. Similarly, Canada's National Energy Program has as its primary objectives the achievement of energy security and, by 1990, providing for ownership by Canadians of 50 percent of our own oil and gas industry. Surely few Americans will find these goals objectionable. The program's measures are designed not to punish foreign investors but to encourage Canadians to invest in the energy sector and to bear the costs necessary to achieve national energy objectives. Some have taken issue with the means. But it is by now I hope clear, that Canada has and will continue to implement this policy in a manner consistent with our obligations to you and our other economic partners.

If the Program works—and we believe it will—Canada will be off the world oil market by the early 1990's This clearly serves not only Canadian interests but also global interests. Your economic recovery program and our National Energy Program are bold policies designed to meet extraordinary circumstances. Both governments agree and support the long-term objectives of both programs; we must avoid allowing our short-term anxieties to thwart the achievement of those objectives.

I also want to touch on another Canadian policy which has been frequently criticized. I want to demonstrate that this policy, once it is understood, is a most reasonable response to a difficult and precarious situation. I refer to Canada's policy on foreign investment.

Canada is a major importer of capital. Throughout our history we have actively sought foreign investment and created the domestic conditions which make Canada so attractive to investors from abroad. We would not have achieved, nor could we maintain, our high standard of living without major infusions of foreign investment capital. We have not pursued this policy for selfless reasons; we do it because it serves our interests. Similarly, foreign investors find Canada an attractive country to invest in becasue they make a profit. Foreign capital investment, like domestic investment, demonstrates the free enterprise maxim that pursuit of private benefit contributes to the public good.

But this is not holy scripture. All modern nations recognize that the marketplace is not perfect and some government role is necessary if market imperfections are to be prevented from becoming gross economic distortions. Antitrust laws, for example, are not predicated on the simplistic notion that big is bad but rather on the hard economic evidence that monopolies can stifle competition, encourage inefficiencies and lower general economic performance. Where natural monopolies are necessary, as in the utilities sector, we regulate them to ensure they operate in the public interest.

Foreign investment is not exempt from this type of scrutiny; if anything, there is greater public demand in this country for your government to become involved in foreign investment issues. And the demand increases in direct proportion to increases in the level of foreign investment. To be sure, some of the complaints reflect little more than xenophobia, a belief that foreign investment is, by virtue of its origin alone, undesirable. But there are grounds for some serious worries as well. For example, are head offices in foreign countries sufficiently sensitive to domestic realities? Do they offer domestic companies a fair opportunity to bid on branch plant procurement? Or do they puchase goods and services from traditional sources located near the head office? Do decisions about corporate marketing and investment made on a global scale ignore domestic concerns such as the desire to raise the level of research and development activities of branch plants? Are subsidiaries subject to the extraterritorial application of foreign laws?

Successive Canadian governments had to face these issues at a time when foreign investment had risen to extraordinarily high levels and there were real fears in Canada that control of the economy was in foreign hands. We could have chosen to ignore this, but that would have allowed the legitimate concerns of Canadians to fester and, perhaps, explode in an unpredictable manner at some future time. It could have chosen to drive out foreign investment, even though this would have damaged severely the Canadian economy. Instead, in 1974, the government chose to steer a middle course between the two extremes of inaction and over-reaction—it established a mechanism to screen new foreign investment in Canada.

Canada requires foreign investors to demonstrate that their investment proposals confer "significant benefits" on Canada. Is this an irresponsible demand? I think not. Of course, our screening mechanism is not perfect—not everyone, even in Canada, believes it is necessary. No mechanism created by government and implemented by bureaucrats can or should claim omniscience. But minor difficulties should not be used to destroy the reasonable objectives of the policy. Canada will continue to need vast amounts of capital beyond our own ability to save; by reassuring Canadians about the economic benefits of foreign investment, the government ensures that Canada remains an open and hospitable environment for foreign investors.

I've spent a lot of time lately explaining Canadian positions but in doing so I don't want to imply that the U.S. has a monopoly on grievances—far from it. I have already referred to the proliferation of "Buy America" legislation, but there are other trade issues such as the DISC legislation where Canada has serious disagreements with American policy. On investment issues, the Jones Act and the Communications Act among others prohibit or strictly limit foreign investment in certain sectors. You too have notable exceptions to the principle of national treatment. Perhaps I don't need to recall that there was deep disappointment in Canada at the failure by the Senate to ratify a treaty which would have created an equitable joint management scheme for our East Coast fisheries. As for the environment there are a number of areas where we must develop cooperative programs if we are to avoid the destruction of irreplaceable resources in both countries. These problems—ours and yours—will not be solved by mere finger-pointing, much less exaggerated claims and counter-claims. We must strengthen our commitment at the highest level to finding appropriate solutions.●

MISINFORMATION ON EL SALVADOR

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. FIELDS. Mr. Speaker, the perpetual use of misinformation and

"planted" news stories by leftists of every shade has become more generally known and understood by the public in recent years. Therefore, it is hoped that the possibility of lies and distortions appearing in the commercial media would be kept in mind when considering reports from any nation besieged by guerrilla and terrorist movements.

Mr. Speaker, the now familiar patterns of deception used by the left and their sympathizers appear regularly in concert with the activities of Soviet and Cuban-backed insurgents operating throughout Central America.

Mr. Speaker, the Council for Inter-American Security has published in its newsletter, West Watch, reports and analyses demonstrating the continued and intentional use of misinformation relative to El Salvador for leftist propaganda purposes. I urge my colleagues to read these reports and cast a critical and cautious eye upon any antigovernment reports about El Salvador or any other nation besieged by terrorist movements. Only the most strained ideologue can remain blind to the truth about what has happened to Nicaragua, and what will ultimately happen to El Salvador and its people without U.S. aid and support.

Two reports follow.

[From West Watch, October 1981]

SALVADORAN LEFT "PENETRATES" WORLD MEDIA

The Salvadoran left is executing a plan to influence news coverage of events in El Salvador, according to papers discovered last May in the home of a propaganda director of the Salvadoran revolutionary opposition.

The media manipulation project is set forth in a 31-page document written in Spanish. WEST WATCH has obtained a copy of the document, which outlines in detail what it calls "a global plan in the area of propaganda."

The plan calls for the leftists to "penetrate" international news agencies and plant recruits in the most important foreign newspapers.

The revolutionaries have already recruited agents within AP, UPI and ACAN-EFE, the document reveals. Three individuals are mentioned as "comrades" within these agencies. They are identified only as Rina, Ana Leonor and Alex.

This project is called Operation "Aguila," which is Spanish for "Eagle." It includes a step-by-step program showing how to develop "sympathizers" in the media and how to induce journalists to use material such as communiques provided by the revolutionaries.

Operation "Aguila" is spelled out in a document captured by the Salvadoran National Guard on May 2 in the home of Ana Margarita Gasteazoro Escolan, the General Secretary of the National Revolutionary Movement (MNR), a faction of the Democratic Revolutionary Front (DRF).

The document is not a proposal. It is a practical guide for the propaganda specialists within the revolutionary opposition.

It is important to note that many of the projects mentioned in the document are already being executed. The papers include an assessment of propaganda activities that were initiated in 1970.

The document notes that "we have not penetrated solidly the agencies that have the greatest worldwide repercussion" like AP, UPI, ACAN-EFE and LATIN-REUTERS. Still, the document claims that this is "where we have most been able to advance."

"It is necessary to consolidate the work of political attention with the comrades that have been recruited within the agencies, especially with the comrades of ACAN-EFE, AP and UPI (Rina, Ana Leonor and Alex)," the document states.

Operation "Aguila" itself was begun in October 1980, the document says. The papers also reveal that, since January 10, Operation "Aguila" has been under the responsibility of CONAPROP, which is the Comision Nacional de Propaganda, or National Propaganda Commission, of the DRF.

The project includes establishing relations with TV crews and working with newspaper reporters to convince them to write articles from the opposition's point of view.

"This job must be developed by winning sympathetic journalists of the different media, mostly by providing them with material they can publish . . ." the document says.

Again, this is not something that could be done or will be done. It is already being done.

"We have our people who are already filming for the television networks, using, besides, that cover," the document states.

"In the interior, journalists of diverse world media have been contacted in order to carry them to camps," the papers say. "They have been given a vision of the war, of the organization."

The left in El Salvador is said in the paper to have begun arranging interviews for foreign correspondents with guerrilla leaders and penetrating news agencies during a "preparatory period" before January 1980.

"Journalists in the written media as well as from television news and films for television have been oriented," the document notes. "This is a job that has been able to be developed equally with that of the agencies."

The document also suggests that the opposition continue using institutions "controlled by us" such as the Salvadoran Human Rights Commission.

The revelation that the revolutionary opposition controls the Salvadoran Human Rights Commission is extremely significant. Many news items based on information provided by the Salvadoran Human Rights Commission have been published by major newspapers like the Washington Post. This indicates that the revolutionaries' plan to influence the media has already been quite successful.

The Salvadoran Human Rights Commission was the principal source for a front page article in the August 18 Washington Post entitled "Salvadoran Troops Said to Murder Up to 41 After Roadside Quarrel." The author of the story, Christopher Dickey, says: "The most comprehensive version of what happened appears in testimony given to the Salvadoran Human Rights Commission, a private organization that collects evidence of alleged rights violations by security forces."

Another news item in the August 26 Washington Post begins like this: "Salvadoran political prisoners began a hunger strike to protest death threats against relatives and other alleged rights violations, the Salvadoran Human Rights Commission said."

The Salvadoran Human Rights Commission was also quoted in an Associated Press story in the September 17 New York Times. The Commission claimed in this story that more than 32,000 Salvadorans had been killed in political violence since October 1979.

The revolutionaries apparently recognize that propaganda can be disguised as objective news reporting if it emanates through a purported human rights organization that appears to be imminently respectable.

The document sets up a distinction between partisan propaganda, which obviously comes from the organized left, and what is called "objective" or "neutral" propaganda, which is designed to look like the impartial rendering of factual information.

"In 'neutral' propaganda, it is fundamental to use the technique as much as possible of supposed 'neutrality,' 'objectivity,' and 'impartiality,' which is achieved by using another media, and not the party, to affirm or deny something. This is what gives impact to the transmitted message," the document explains.

In other words, leftist propaganda that would be disregarded by the public if it were to come openly from the guerrilla front becomes credible if it is communicated by a "bourgeois" newspaper or magazine in the guise of news reporting.

The document also notes that the revolutionaries have under their control the Film Institute. It so happens that this institute has been playing a film entitled "El Salvador: The People Will Win" in the theaters and on college campuses in the U.S.

This film was reviewed in the August 15 New York Times, which mentioned in small print that the "documentary" was presented by "the Film Institute of Revolutionary El Salvador, F.M.L.N." The review also noted that a member of the central command of the Farabundo Marti Liberation Front was the film's political director.

In sum, the document outlining Operation "Aguila" sets forth a systematization of the revolutionary opposition's propaganda network in El Salvador and abroad. "What we need to do, within a general program and within the strategic lines of the organization, is penetrate all the media of the enemy, at the same time, as an organization we need to create our own media," the document says.

Another document found in the opposition leader's home is entitled "Work plan of sub-team with attention to foreign journalists." WEST WATCH has obtained a copy of this document, which is dated April 15, 1981.

It sets forth as the general objective "to reach foreign newspapers with our vision of the popular war and have the newspapers transmit the truth about the events."

A specific objective is "to form a network of collaborators among sympathetic journalists." The means of achieving this include "interviews with members of the FMLN and FDR" and "visits to camps and interviews with combatants."

The paper also details how the revolutionaries plan to carefully select certain "recommended" journalists and influence their reporting by granting them access to special information.

"Established mechanisms in the exterior have been left for sending us journalists and media," the document says.

These documents provide an invaluable inside look at the revolutionary propaganda machine in El Salvador.

The most compelling evidence that the plan is working lies in the fact that the discovery of the plan was not reported by the major media in this country.

[From West Watch, October 1981]

MASS MURDER EXPOSED AS RUMOR

Those who have played the children's game of "gossip" know how a story whispered quickly in a child's ear can become another story altogether by the time it has been repeated several times.

This is what is happening in El Salvador. Stories which are nothing more than rumors manage to get repeated by the right people and end up reported as fact in major U.S. newspapers.

For example, there were page one stories in March about the massacre of 1,500 Salvadoran refugees who were supposed to have been sealed in a cave called Cueva Pintada near the towns of Yarutela and Santa Helena.

The "massacre" had been reported by Honduran church and human rights groups. The alleged atrocity triggered demonstrations in this country against aid to El Salvador.

However, it turned out that Cuerva Pintada does not exist. Neither does the town of Yarutela. This was revealed in the April 29 Washington Post on page 16 in an article entitled "Massacre Report Proves Hard to Verify."

The guerrillas broadcast a second version of the "massacre" on their clandestine radio, alleging this time that the incident had taken place near Yarula, a town in Morazan province.

But there is no town of Yarula in Morazan province. Still, Radio Havana and Amnesty International insisted that the "massacre" had occurred in Morazan.

The National Catholic News Service later said that the incident took place, not in March, but in April, and not at Cueva Pintada, but at Cueva Sentada.

The source of this report turned out to be an unnamed priest who is supposed to have said, not that 1,500 people were killed, but rather that "a large number" of Salvadorans were killed. Another source was quoted as saying that 150 people died.

The April 29 Washington Post article notes that Amnesty International now says it simply received word of a "possible" massacre and did not vouch for its veracity.

In other words, what had been reported in the major media as a moral certainty was nothing more than a rumor. The story had been embellished and exaggerated, passing through several inaccurate versions. Maybe there is some truth to it. Maybe not.

Nevertheless, syndicated columnist Ralph de Tolenado observes that the original story continues to be broadcast by Radio Havana and repeated by the media, with the support of "international aid organizations" which, the Post notes, "provide no firm indication of where or how many were killed."

Is this an isolated case? Or could we expect other rumors in El Salvador to be believed and reported as hard news?

"In such a climate of horror, it has become possible to believe almost anything," writes Loren Jenkins, the correspondent who authored the April 29 Washington Post article. "Any street rumor or report heard on foreign or clandestine radio gains a life of its own that no amount of official denials can shake."

Another example of a sensationalist story that on closer inspection turns out to be based on a single, unnamed source appeared in the August 18 Washington Post.

The page one headline was "Salvadoran Troops Said to Murder Up to 41 After Roadside Quarrel."

Sounds ghastly. The problem is that, aside from all the hearsay and gossip, the only allegation in the entire story of the involvement of government troops in the alleged murders was in an affidavit by "an unnamed Armenia resident" filed with the Salvadoran Human Rights Commission.

This "unnamed resident" said that government troops took several persons from their homes at night and that 23 bodies were found in the river the next morning.

The rest of the article consists of second-hand reports or conclusions drawn from anonymous persons and bits of information that could mean almost anything.

One unnamed person, "who makes it his business to know where bodies are buried," tells that someone told him that 42 persons were killed one night and that 22 bodies were dumped in the river. Unnamed peasants who live near the river are said to have heard "a heavy truck" stop for several minutes the following morning. "They did not look outside," the article states.

As evidence of mass murder by Salvadoran troops, this is pretty flimsy stuff.

Yet it was splashed across the front page of the Washington Post in an article cleverly constructed to disguise its lack of substance.

But even the author of the article, Christopher Dickey, did not seem to find this assemblage of "evidence" convincing. About 15 inches into the story, buried on page 14, he writes that the alleged massacre "fits a pattern of similar events in which many people profess to be certain of what happened, and the only certainty is that people were taken from their homes, and people were found dead."●

THE TRI-COUNTY OBSERVER CENTENNIAL

HON. JOHN J. DUNCAN

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. DUNCAN. Mr. Speaker, I have a neighbor in Madisonville that just turned 100 years old. Despite the age, there is no sign of senility or weakness. I still welcome my neighbor's advice and insights. It is always good to know there is someone you can rely on in good times and bad.

My neighbor is the Tri-County Observer, and there are many of us who are happy to see it alive and kicking in its 100th year. The Observer traces its roots back to the Madisonville Clarion, which was first published September 5, 1881. The fortunes of the newspaper have been tied to the Hicks family of Madisonville for about 70 of the 100 years.

Since September of 1967, Dan Hicks, Jr., has been owner and editor of the Observer. He has maintained his family's commitment to journalism and preservation of the first amendment. During his tenure as editor, the Observer has won the Elijah Parish Lovejoy Award for Courage, from Southern Illinois University; the John Peter Zenger Award, from the University of Arizona; and the Golden Quill Awards for Editorials, from the International Society of Weekly Newspaper Editors, as well as numerous State journalism honors.

It is good to have such a well respected neighbor. That is what the Observer has been as it makes its weekly visits into the homes in Monroe, McMinn, and Loudon Counties. These sentiments can be found in the congratulatory advertisements which fill the centennial edition of the newspaper. This is perhaps the highest honor a newspaper can receive; the support of its community, and its recognition as a neighbor.

I use the word neighbor, because it best expresses the role the Observer fills in the tricounty region. It is a neighbor that communicates through its news stories, advises through editorials, and lifts one's spirits in its features. It listens carefully to the opinions of its readers expressed in the letters to the editor.

One has to appreciate the perseverance shown by the Hicks family in maintaining this paper through the years. As Dan Hicks, Jr. states:

Because it has been the life blood of three generations of the Hicks family, its history will necessarily revolve around the Hicks name. But this is fitting because the motto on the Hicks Family coat of arms reads: "Not we for the kings, but the kings for us."

It was in this spirit that the first amendment became a cornerstone of our democracy. The Tri-County Observer is a legacy of that amendment and the Hicks family motto is good neighborly advice.●

DIVORCED MILITARY SPOUSES

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. WHITEHURST. Mr. Speaker, I am encouraged by the activities in this Congress aimed at correcting the inequity in the current system which unfairly penalizes the divorced long-term military spouse, and I commend both the House Armed Services Committee Personnel and Compensation Subcommittee and Senate Armed Services Committee Manpower and Personnel Subcommittee for holding hearings on this issue. I would like to address this important matter by including my statement in the CONGRESSIONAL RECORD for my colleagues' review, and I urge favorable consideration of legislation of this nature when it comes to the House floor for a vote.

BENEFITS FOR LONG-TERM MILITARY SPOUSE

Mr. Speaker, on Wednesday, November 4, 1981, I introduced H.R. 4902, which has also been introduced in the Senate by Senator Jepsen, Chairman of the Senate Armed

Services Committee Manpower and Personnel Subcommittee. Our bills address the main areas of concern with regard to the issue of benefits for the long-term military spouse.

As I testified before the House Armed Services Committee Personnel and Compensation Subcommittee last week. I have long been an advocate of official recognition of the contributions of the long-term military spouse. As more and more evidence points to the major role played by the military spouse in determining whether or not an individual decides to pursue a military career, it is imperative that action be taken to establish some security for the military spouse, just as has been for Foreign Service Wives. Military spouses should have the security of knowing that they can, at the least, count on their government after long years of commitment in the partnership dedicated to the defense of this country.

H.R. 4902, will be helpful in establishing that personal security for the long-term military spouse. As we all know, military life is unique and military families are required to share that uniqueness, its benefits and the sacrifices in the name of defense.

The long-term military spouse often sacrifices her own career in order to support her husband's military career. Frequent moves, on the average of one every 2½ years during a 20-year military career, are normally not conducive to a spouse's career. She is often required to begin new jobs at the entry level, and she has scant opportunity to become vested in her own retirement plan. All too often, it is not possible for a military spouse to complete her own education because of the high cost of out-of-state tuitions and frequent moves, especially when the move is the result of an overseas assignment. There are, of course, many other sacrifices and contributions that can be contributed to the military wife, and it is time that they receive the recognition and credit they deserve. Current statistics regarding the plight of older women in our society and the ability of women to collect on court-ordered payments for alimony, child support or property settlements are alarming, and it is important to officially recognize the long-term military wife's contributions by treating her more fairly when her marriage ends in divorce, which is often the direct result of the strains of a military career.

I believe the legislation Senator Jepsen and I have introduced offers a fair and equitable solution for all concerned.

With respect to court-ordered payments, it provides that the Service Secretaries can make direct payments from an individual's retired or retainer pay to a former spouse for court-ordered payments for child support, alimony, or property settlements. This legislation allows military spouses to obtain the benefits awarded them by State Divorce Courts, the recognized authority with regard to the dissolution of a marriage. Our bills also contain a provision which protects the retiree by stipulating that any such payment cannot exceed 50 percent of the retired or retainer pay.

With regard to SBP, this legislation simply amends the current law by including certain former spouses in the category of those eligible to be designated as a recipient of benefits under the SBP program. This does not dictate who would be awarded benefits under the program, it simply would allow a former spouse to be named as a beneficiary if that was the decision of the retiree.

The health care portion of this legislation provides that the unremarried military spouse, who was married for a minimum of 20 years could be designated by a Service Secretary to receive continued health care for a medical condition which existed prior to the divorce. This provision protects the former spouse, who because of a pre-existing medical condition finds that she is uninsurable in the private sector. I strongly believe that these women should not be forced to turn to our welfare agencies for health care. They should be given the dignity of receiving continued health care from the military at DOD medical facilities or through CHAMPUS.

This legislation was prepared after the Senate hearings on this issue, and after consultation with the Department of Defense. I believe that it offers former spouses an effective collection mechanism for payments under lawful court orders, and it recognizes their contributions and sacrifices.

Certificates of appreciation, grocery bag logos and laurels on a husband's efficiency report are no longer satisfactory compensation in today's society. Passage of legislation of the nature discussed here would be a tangible example of our support for the proverbial, "Mom, apple pie and the American Flag," for those who will benefit by it have been, for the most part, dedicated to the ideals of motherhood, and have been willing to stay home and bake the apple pies as part of their role in the partnership dedicated to the defense of the American Flag.●

NEGATIVE VOTE FOR ADOPTION OF CONFERENCE REPORT

HON. DICK CHENEY

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. CHENEY. Mr. Speaker, for more than a century, Republicans have been in the forefront of the environmental movement. From its earliest days, the goals and programs of the U.S. Department of the Interior have been shaped by the framework laid by Republican leadership in the formative years of the agency.

Conservation and preservation of our natural heritage, sound managment of our resources, protection of the environment and stable administration of the programs protecting the rights of the first Americans have long been basic Republican principles. So, too, have many of the emergency programs created during the past decade to meet the mounting crisis of growing energy demand and dangerous dependence on foreign sources of energy to meet the needs of American society.

There is no greater threat to the environment in which we live and work, however, than the disastrous economic climate in which America finds itself after nearly a half century of the free-spending philosophy of Democratic Congresses. There is no more crucial job facing Congress than the rebuilding of a devastated economy and the restoration of economic vigor to the American working man and woman, the taxpayer, and ultimately, to American business as well. The long-term economic health of those American workers and taxpayers who finance all of Government, including environmental and energy programs, can be guaranteed only through quick action by Congress to reverse the downturn caused by those spending programs, especially in the 4 years after President Ford left office.

President Reagan's strong economic program of budget and tax cuts has gone far in wiping away the stain of those 4 years of economic mismanagement. The rate of inflation, which nearly tripled under Carter administration programs enacted by the Democratic Congress, will fall more than 25 percent in President Reagan's first year in office. Real growth in the gross national product, which unbelievably fell into negative figures under those programs, has reversed that trend and is rising once again toward a healthy level. Soaring interest rates on Federal T bills, which rose uncontrolled from a 5-percent figure under President Ford to 14.7 percent under those Democratic programs, have been halted. Again, the trend has been reversed. The productivity of American workers and businesses, shackled by those Democratic programs, has been freed and is speeding upward once again after 4 years of stagnation.

This is not the time to scuttle an economic recovery program that is working. Yet by adopting this conference report, the House would be voting to do exactly that.

The report is a major threat to President Reagan's budget proposals already enacted into law by Congress. It would result in an increase in outlays of $1.5 billion in 1982.

This one appropriations bill would force the projected fiscal 1982 Federal debt up by $1.5 billion. If this conference report is adopted and the precedent set were to be accepted by Congress in dealing with other pending appropriations measures, the fiscal 1982 budget deficit would increase uncontrollably by between $10 and $12 billion.

This conference report alone is $600 million in budget authority and $400 million in spending above the March budget of President Reagan. In addition, in drafting this report, there was no meaningful consideration made of means to achieve the additional savings of $1.4 billion in budget authority and $1.1 billion in outlays called for by President Reagan in September.

This report keeps alive the solvent refined coal demonstration facility, wasting an additional $135 million on a project that will not be built because of an anticipated 400-percent increase in its expected cost of construction. If that project is carried through to completion, it alone will add another $3 to

$4 billion to Federal spending during the next 5 years.

In a time of retrenchment, this conference report proposes to add $600 million to Interior programs over the President's budget. It increases funds for Department of Energy programs—other than the strategic and naval petroleum reserve programs—by $400 million, or 95 percent more than President Reagan's budget. Funding for the National Endowments for the Arts and Humanities similarly is some 87 percent over President Reagan's figures.

The conference estimates do not reflect earlier action of the Appropriations Committee on the 1981 supplemental and rescission bill and will add $400 million in fiscal 1982 outlays to programs funded under the conference report. In addition, the Appropriations Committee estimates of the relationship of the conference report to President Reagan's budget seriously understate the true spending impact of the bill because they fail to account for earlier action on fiscal 1981 funds and for off-budget funds.

This conference report would increase spending in 1983 and subsequent years by $830 million, making it a total of $2.3 billion in outlays over President Reagan's budget, which is a centerpiece of the economic recovery America so badly needs.

Mr. Speaker, I urge my colleagues to vote to recommit this conference report. If that motion fails, I urge our Members to vote against adoption of this budget-busting proposal. And if the conference report prevails despite that opposition and if this measure is sent to the White House, I strongly urge an immediate veto from President Reagan.●

VETERANS DAY, 1981

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. CARMAN. Mr. Speaker, John F. Kennedy once said, "A nation reveals itself not only by the men it produces but also by the men it honors, the men it remembers."

Yesterday, Congress was not in session in order to commemorate Veterans Day. On that day, the citizens of our Nation joined to pay tribute to the 38 million Americans who have bravely and honorably served our country. Over 1 million of these men and women have died in active service to preserve the freedoms we now enjoy.

Congress has not forgotten these patriots, and this year has passed much legislation increasing and expanding benefits for our veterans. Although we will never be able to fully reward our vets for their devoted service to our country, I am hopeful that our actions in Congress will further exemplify our gratitude to them.

I join with all Americans in honoring and thanking our veterans who have risked their lives so that we may live in freedom and democracy.●

NATION'S AIR QUALITY PROGRAMS HAVE SERIOUS PROBLEMS

HON. CLEVE BENEDICT

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. BENEDICT. Mr. Speaker, in my previous remarks on the Clean Air Act, I tried to make clear that required pollution control processes and technologies are responsible for impeding progress toward cleaner air. Problems with the State Implementation Plan (SIP) provisions of the act are also hindering movement toward our clean air goals. The SIP requirements have led to serious problems in Federal-State relations and in the overall conduct of the Nation's air quality programs. This assessment is shared by industry, the Environmental Protection Agency, and the National Commission on Air Quality.

Congress, through the Clean Air Act Amendments of 1970, required the development of individual State implementation plans that embody the strategies and control measures employed to achieve the national ambient air quality standards. Further requirements for nonattainment areas were added in the Clean Air Act Amendments of 1977. All plans are required to provide for the implementation of all reasonably available control measures as expeditiously as practicable and to demonstrate reasonable further progress toward attainment of the standards. States not meeting these requirements are subject to federally imposed sanctions.

This process has never afforded the States adequate flexibility to address air quality questions arising from local needs and concerns. The development of State implementation plans has been done under a completion deadline which did not allow States the ability to address specific problems in the most cost effective manner for that region. Under the current act, any area exceeding an ambient standard, regardless of the degree or the circumstances involved, is subject to the same regulations, restrictions, and sanctions, including a ban on new construction.

Such a policy hinders the development of sound air pollution control policies which might benefit our clean air efforts and allow for regionally identified industrial growth. In addition to not addressing the problems preventing the attainment of air quality standards, construction bans prevent air quality improvements that might be achieved from taking place. Companies and facilities with construction and expansion plans that will significantly reduce emissions of air pollutants are prevented from putting those plans into effect. Current law should be changed to allow States to develop State implementation plans in accordance with the different solutions and schedules appropriate to different areas.

Delays in the initial approval of State implementation plans can also be eliminated safely. Even routine SIP reviews require the approval of both the State and EPA. The approval process requires notice and public comment at the State level and a similar process at the Federal level. Although the act specifies that reviews are to be done by EPA in 4 months, none have been done in less than 9 months and some have taken years. These delays create confusion over the status of State implementation plans and their legal significance, further frustrating efforts at construction planning and realization and the resulting attainment of cleaner air. Changes to the Clean Air Act should specify that any State implementation plan not acted upon by EPA within the designated period of time will be deemed approved. They should also eliminate the need to duplicate the notice and public comment process at the Federal level already completed by the States.

Yet another problem involves the required Federal processing of SIP changes. The act requires the States to include in their plans emission limitations applicable to all stationary sources. Any changes to these limits must be individually reviewed at the Federal level before they can take effect. This process has taken a minimum of 10 months and in some cases years and adds to the difficulties in realizing beneficial new construction and modernization. States need the authority to make these revisions on their own based on local needs and circumstances. The Federal role will be limited to reviewing actions by the States to insure they do not prevent reasonable further progress toward attainment of ambient standards. Only if such progress is not being made should EPA have the authority to intervene and regulate activities within the States.●

INTERNATIONAL BALLET COMPETITION

HON. WAYNE DOWDY

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. DOWDY. Mr. Speaker, today I am introducing a joint resolution to

grant official recognition to the International Ballet Competition held in Jackson, Miss.

The International Ballet Competitions began in 1964 in Varna, Bulgaria. Because of the artistic success and prestige of this event, competitions were established in Moscow and Tokyo. The United States entered the "Olympics of Dance" with greater dancer participation when Jackson hosted an International Ballet Competition in 1979. The success of the event spurred a Second International Ballet Competition in Jackson to be held June 20 through July 4, 1982.

This competition promotes international friendship and through recognition of the artistic talents of the young competitors transmits an understanding of excellence to a new generation. I am proud to have such a prestigious and important event held in my congressional district, and I urge my colleagues to cosponsor this resolution in support of this very worthy artistic endeavor.●

TELECOMMUNICATIONS REWRITE

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. SWIFT. Mr. Speaker, the House Subcommittee on Telecommunications, Consumer Protection and Finance, on which I serve, is now in the process of drafting one of the most critical and far-reaching pieces of legislation that will come before the 97th Congress—an update of the Communications Act of 1934. As telecommunications assumes an increasingly important role in our domestic economy and international trade policy, the legislation that we enact will have a dramatic impact on our Nation's economic health in the years to come.

An article in today's New York Times clearly defines the critical role the Houe will play in the enactment of this legislation, and outlines the direction that the able chairman of our subcommittee Representative TIM WIRTH, feels the legislation should take. The issues involved are complex, and require thoughtful and careful analysis. If we are to pass a progressive and forward-looking bill, I believe we must begin now to understand what the issues are, and how best they can be resolved. I commend this article to you.

WIDER HOUSE ROLE IN A.T. & T. DEBATE

(By Ernest Holsendolph)

WASHINGTON.—Every branch of government seems to be getting in on the act of reshaping the American Telephone and Telegraph Company and, in the process, national policy in telecommunications.

The Justice Department is pursuing a longstanding antitrust suit. The Federal Communications Commission has outlined its own program for splitting the company into a regulated telephone company and an unregulated equipment and data-processing company. The Senate has passed its own bill laying down a new structure. And the Reagan Administration is pressing its own views.

ATTENTION SHIFTS TO HOUSE

Now attention is shifting to the House of Representatives, where Timothy E. Wirth, a Colorado Democrat who specializes in communications policy, expects approval by next June of legislation lifting restrictions on A.T. & T. and promoting competition in the communications industry.

The Senate and House approaches to the issue are based on the F.C.C.'s proposal for a split company; the differences have to do with the degree of separation between the parent and its subsidiary and the manner of transition and capitalization.

LESS EMPHASIS ON DEREGULATION

For instance, Mr. Wirth said in an interview this week, his bill was likely to put less emphasis on deregulation than the one passed by the Senate. The Representative is emerging as the key player in a complex Federal effort to reshape phone industry regulations.

"We're looking for a level competitive playing field," Mr. Wirth said, indicating that any measure that allowed Bell to drive competition from the field would be unsatisfactory.

Meanwhile, as Congressional action proceeds, the F.C.C. program is facing a challenge in the United States Court of Appeals here from more than 40 Bell competitors as well as from the Justice Department. All briefs in the case are due next month, and oral arguments are expected to be conducted in February, according to the commission's litigation staff.

Left in limbo, pending the outcome of the court appeal and final congressional action, is an Administration plan to drop its antitrust suit against Bell if "acceptable" legislation is passed. The historic antitrust suit, now being tried here in the United States District Court before Judge Harold Greene, may well conclude as legislation is completed. Judge Greene expects to rule on the case in July.

For its part, Bell is proceeding as if the F.C.C. program will go into effect by January 1983 at the latest. Pickward Wagner, a Bell spokesman here, said that while developments unfold, the company would proceed with reorganization for open competition on the basis of the challenged F.C.C. plans. "We have no other choice," he said.

The commission's proposal to split the company in two is contingent on the company's putting together an acceptable capitalization program for "Baby Bell" at least 180 days before it goes into business. Baby Bell is the nickname given to the divisions that would not be regulated.

A Federal court in Newark has endorsed the commission's view that Bell can enter computer-related businesses and stay in step with the newest communications technology. It rejected arguments by the Justice Department and others that to do so would violate the terms of a 1956 consent decreee meant to keep A.T.&T. out of the data processing.

WORK BEGINS IN THE HOUSE

Against this complex and shifting backdrop, the measure that Mr. Wirth and his subcommittee on telecommunications will put together in the next few months will attempt to remove the uncertainty for Bell and provide the F.C.C. with a mandate for opening up the telecommunications business.

The subcommittee, Mr. Wirth said, is basing its draft on a 700-page report on the communications business that shows that although there are competitors throughout the industry, there is less than full competition in certain areas.

For instance, Bell and its affiliates account for 96.3 percent of the long-distance business despite the success of companies like MCI Communications and Southern Pacific, which together account for less than 1 percent. Further, the report said, while there is competition in new terminal phone equipment such as telephones and small switchboards, there is little in the supply of major network equipment.

Mr. Wirth said: "We as a Congress would not have deregulated the airline industry if we found that one airline controlled 95 percent of the air traffic, owned 90 percent of the airports and controlled 98 percent of the rental-car agencies. We just would not have deregulated under those circumstances."

As for the telephone business, he said, "You maintain regulation so that the rate payer can be protected."

A key way in which the House bill could differ from the Senate measure, Mr. Wirth said, is that it would require Baby Bell to obtain its own capital rather than get it from the parent A.T.&T. If Baby Bell does not raise its financing on its own like the competitors do, Mr. Wirth asked, "isn't that a form of subsidy by the regulated company?"

GIVING THE F.C.C. A MANDATE

The most helpful role of legislation, Mr. Wirth said, is to give the F.C.C. a mandate, thus relieving it of having to choose which among many rules and policies to emphasize. "No matter how many people you give the F.C.C.," he said, "no matter how well you pay the accountants and lawyers, no matter what they do in this exploding fast-changing telecommunications market, you can't expect the commission to do all things. They need priorities."

As for the Administration's wish to free Bell to capture more of the export market, Mr. Wirth said this had more to do with Bell's corporate goals than the regulatory structures. "A.T.&T. has much to offer us and our trade base abroad," he said, "but they have little incentive to do that with a captive domestic market in terminal equipment. The network equipment market is over 80 percent A.T.&T., totally captive.

CONCERNS OF THE WHITE HOUSE

Bernard Wunder, an Assistant Secretary of Commerce who is the Administration's top communications policy maker, said he had told Mr. Wirth that the White House had four basic concerns—that the nation's communications system meet the security needs of the Defense Department, that it promise increased international trade, that it promote competition and that it offer protection for the rate payers. "We see those principles embodied in the Senate bill," he said, "and I see no reason why we cannot expect them from the House bill."

Mr. Wirth's schedule calls for a draft bill to be issued by the end of the month, scrutiny of the draft by the industry and the public in December and January, hearings on the bill in February, formal committee approval of the bill in March, floor action in the spring and a conference with the Senate

in June. The House bill will contain nothing about broadcasting or cable television policy, Mr. Wirth said.

For Mr. Wirth, there is a lot at stake. Although Congress has tried for five years to pass a bill and failed, the House has come closer than the Senate. This term, however, Senator Bob Packwood, the Oregon Republican who is chairman of the Senate Commerce Committee, stole a march on the House and passed a bill.

Now, the last word will evidently be spoken by the House, making it probably that Congress will have a new common carrier bill for the first time in 48 years.●

A TRIBUTE TO THE ARMENIAN GENERAL BENEVOLENT UNION

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. MINETA. Mr. Speaker, I would like to rise today on behalf of Congressman DON EDWARDS and myself to pay tribute to the Armenian General Benevolent Union as they celebrate their 75th Diamond Jubilee Anniversary. The week of November 15 through November 21, 1981, has been set aside as the Armenian General Benevolent Union Week. This celebration will culminate on November 20, 1981, with an anniversary banquet and musical program.

The organization was established in Cairo in 1906 by esteemed national leaders, headed by Boghos Nubar Pasha, who saw a need to aid the destitute people of their homeland. This philanthropic union has grown and flourished throughout the years. It has inspired the trust and appreciation of the Armenian people. Due to the patriotic and unselfish activities of the leaders and members, the organization has been successful in its humanitarian mission.

The Armenian community of Santa Clara County has continued the valiant efforts of their forefathers, resulting in numerous social, cultural, and spiritual events and benefits for our community. Presently, the Santa Clara Valley chapter is hosting a banquet in this year of celebration. Mr. Alex Manoogian, life president of the Union will be their guest of honor and primary speaker.

Mr. Speaker, at this time, I would like to ask you and all our colleagues in the House of Representatives to join Congressman DON EDWARDS and myself in honoring the dedicated members of the Armenian General Benevolent Union of America and wishing them continued success in the future on the occasion of their 75th Diamond Jubilee Anniversary.●

STICK TO ANNOUNCED SCHEDULES

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mrs. COLLINS of Illinois. Mr. Speaker, early in this session, Members of the House were told that they could expect votes not to be scheduled for Mondays. This was announced so that, with some certainty, Members could schedule events for the benefit of constituents in the district, in my case in Chicago, on Mondays.

With full faith in this announcement, I asked HENRY WAXMAN, chairman of the Subcommittee on Health and Environment, to schedule a field hearing on the proposed clean air act amendments in Chicago on Monday, November 16. This is an issue of great importance to my constituents.

Chairman WAXMAN graciously consented to my request.

This afternoon, November 12, we were informed that the House expects to vote on Monday, November 16. The vote is to be on the joint resolutions providing for continuing appropriations. This, too, is an important issue to my constituents.

If I cancel my hearing, it will make my constituents unhappy. If I miss the vote, it will make my constituents unhappy. Darned if I do and darned if I do not, so to speak.

I implore the leadership to please stick to the announced schedule so that Members may plan sensibly and, therefore, maybe break even in trying to fulfill their congressional and constituent obligations.●

SENATE—*Friday, November 13, 1981*

(Legislative day of Monday, November 2, 1981)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

"Our Father which art in heaven, hallowed be Thy name, Thy kingdom come, Thy will be done on Earth as it is in heaven."

Thou hast taught us this prayer, O Lord, and in times like these nothing we can pray seems more relevant. The glory of God, the coming of His kingdom and the doing of His will on Earth is the promise of a perfect social order, an order which cannot be achieved by the finest human effort unaided by God. Grant us the wisdom to acknowledge this and to yield our minds to the direction of the Holy Spirit, that hard decisions derived from intense struggle may conform to Thy purpose for history.

We pray for the astronauts and their families. May this probe into space be successful and may they return to Earth safely with mission accomplished. Grant to the Senators and their families a weekend of rest, reconciliation and renewal. Bless the time with their loved ones, and restore energy and strength, that the labors of the week to come may be pleasing to Thee and a benefit to the whole world. Through Christ our Lord, we pray. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I understand that there is a special order for the recognition of the Senator from Mississippi (Mr. COCHRAN) for 15 minutes, to follow the recognition of the two leaders under the standing order; that after the expiration of time for the special order, the Senate will resume consideration of H.R. 4169, the Commerce-State-Justice appropriations bill, at which time a Weicker perfecting amendment on legal services will be the pending question. Is that correct?

The PRESIDENT pro tempore. The Senator is correct.

LEGISLATIVE SCHEDULE

Mr. BAKER. Mr. President, today is Friday the 13th, and what I am about to say has no relationship to that old, traditional superstition.

However, I must say that as we gear up for the final push to adjournment sine die, it will no longer be possible, absent the most extraordinary circumstances, to honor the requests of individual Members to be protected on votes at particular times or on given days. I regret to make that announcement, but I believe it is essential if the Senate is to dispatch its business with reasonable swiftness and efficiency.

Therefore, Members are on notice that, with the greatest regret, the leadership will no longer accept requests to be protected during the day or during the week against rollcall votes.

Senators also should be on notice that, while the leadership will continue to attempt to schedule the business of the Senate in order to avoid late sessions beyond approximately 6 p.m., except on Thursdays, it may not be possible to do so in these final days of the session; and there is at least an enhanced possibility of late sessions beyond the normal adjournment or recess hour of 6 or 6:30 p.m. on days other than Thursdays, for the remainder of this session.

Mr. President, the continuing resolution making appropriations for the operation of many agencies and departments of Government expires, by its terms, at midnight on November 20. That is next Friday, a week from today.

So that Senators may be aware of the possibility well in advance, in order to plan for it, they also should take account of the fact that there is at least a possibility that the Senate will be in session on Saturday, November 21.

That would not be the case unless it were necessary to continue our efforts to pass the continuing resolution or other matters in connection with a continuing resolution. But Members should be on notice now that there is a possibility of a Saturday session a week from tomorrow, the 21st.

Mr. President, I will continue to give the best schedule announcements I can, from day to day, so that Senators may plan, but the best plan Senators can make now is to be here until we adjourn.

I urge Senators to consider that as they are away from the city or away from the Capitol in these final days and hours of the session, there is very little protection the leadership can offer them against missing rollcall votes and important debate; also, that there is an increasing likelihood of weekend sessions and late night sessions on any night of the week or on any given weekend.

So, Mr. President, I apologized in advance for making this unpleasant announcement on Friday the 13th, but I believe it is the appropriate time to do it, and I wish to share that bad news with my colleagues as soon as possible.

The Senate will be in today for a full day of legislative activities. I expect that we will continue with the debate on the State-Justice appropriations bill, with the hope that we can finish it before we recess today. I estimate the time of recess to be about 5 o'clock.

ORDER FOR RECESS UNTIL 11 A.M. ON MONDAY

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in recess until 11 a.m. on Monday.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR TECHNICAL CORRECTION—SENATE EXECUTIVE RESOLUTION 2

Mr. BAKER. Mr. President, I ask unanimous consent that a technical correction be made to Senate Executive Resolution 2. On line 12 the word "Provision" should read "Prevention", and I send the correction to the desk.

The PRESIDENT pro tempore. Without objection, it is so ordered.

The corrected resolution follows:

S. EXECUTIVE RES. 2

Resolved, That the Secretary of the Senate is directed to return to the President of the United States the Convention between the United States and Thailand for the Avoidance of Double Taxation, and the Prevention of Fiscal Evasion with Respect to Taxes on Income signed at Bangkok on March 1, 1965 (Ex. E, 89th Cong., 1st Session); the Convention between the United States and Israel for the Avoidance of Double Taxation and for the Encouragement of International Trade and Investment, signed at Washington on June 29, 1965 (Ex. F, 89th Cong., 1st Session); and the Convention between the United States and Egypt for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income, signed at Washington on October 18, 1975 (Ex. D, 94th Cong., 2nd Session).

Mr. BAKER. Mr. President, I have no further need for my time under the standing order, and I am prepared to yield it to any Senator who wishes me

to do so or to yield it to the control of the minority leader, if he has need for it.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. The minority leader is recognized.

Mr. ROBERT C. BYRD. I thank the distinguished majority leader.

Mr. President, I have no need for the time, and I yield back my time.

CELEBRATING THE PRIDE AND SPIRIT THAT CANNOT BE CRUSHED

Mr. ROBERT C. BYRD. Mr. President, November 11 was Veterans Day. Across our country, official celebrations, parades, and public concerts honored America's nearly 30 million veterans.

But it was also a special day in Poland. November 11, 1918—World War I's Armistice Day—was also Poland's modern Independence Day. No official observances or parades were held in Poland.

Nevertheless, millions of Poles either made unofficial gestures of celebration or remembered their nation's resurrection in their hearts.

Poland's 1918 rebirth was both real and symbolic. In the late 18th century, Poland's rapacious neighbors—Prussia, Hapsburg Austria, and Tsarist Russia—cynically and methodically obliterated Polish independence.

Erasing Poland's boundaries, however, did not destroy Poland. Poland—a state of mind and heart—lived on in the souls of Polish people everywhere.

For more than a century, in spite of persecution from "divine right" tyrannies in Berlin, Vienna, and St. Petersburg, Polish national pride, culture, and religious faith flourished.

The 1918 Armistice saw Poland reborn—the redemption of one of Woodrow Wilson's goals, as well as the cherished hope of the Western European democracies. For 21 years thereafter, the Polish people enjoyed the recovery of their national identity and independence.

Unfortunately, Poland fell again under foreign domination in 1939, the first victim of Adolf Hilter's blitzkrieg tactics. Subsequent to Hitler's invasion, the Soviet Union swallowed half of Poland—a dividend from the "devil's compact" earlier signed between the Nazis and the Soviet Communists.

For more than three-and-a-half decades, Poland has lived under the Soviet fist. Today, however, the Polish people are showing the world that even the tentacles of Communist totalitarianism cannot strangle Polish pride and faith. In her struggle, Poland is again earning the world's admiration and respect.

Mr. President, I salute Poland and the Polish American community. And I want to assure those Polish Americans that many of their neighbors congratulate them on the occasion of Poland's Independence Day.

Historically, the ties between the United States and Poland are strong. Currently, as in the past, the American and Polish people share many mutual hopes, one of which is for a strong, independent, and forever-free Poland. May we live to see the day when Warsaw's streets publicly and officially ring with the cheers of a free Polish people celebrating November 11 as joyously as Americans celebrate the Fourth of July.

RECOGNITION OF SENATOR COCHRAN

The PRESIDENT pro tempore. Under the previous order, the Senator from Mississippi (Mr. COCHRAN) is recognized for not to exceed 15 minutes.

THE VOTING RIGHTS ACT

Mr. COCHRAN. Mr. President, 3 weeks ago I introduced S. 1761 to amend the Voting Rights Act of 1965 to establish a new preclearance procedure applicable to all 50 States.

Each week since then I have obtained time to discuss some of the provisions and ramifications of this proposal in hopes that Senators would review this suggestion carefully and be advised about the intent and motivation behind it.

It has been stressed that this is a new proposal and has not been previously considered by either the Senate or the other body during previous discussions of the Voting Rights Act.

What distinguishes this proposal from previous suggestions for change to extend application of the law nationwide is that this bill provides for a new procedure for preclearance and vests jurisdiction for administering that procedure in the Federal district courts.

At the same time it does not take away from the Department of Justice the obligation and responsibility to review proposed changes in local election laws. As a matter of fact, the procedure that is incorporated in this bill would require that process be served upon the Attorney General. The political unit, upon proposing to make a local change in an election law, would file an application in the Federal district court for a declaratory judgment. Not only would the Attorney General be made a party to this proceeding but any interested person or group through a representative would as a matter of right be able to intervene and participate in the preclearance procedure.

Sixty days would be provided to the Attorney General within which to consider and review the proposed change and to interpose in the Federal district court any objection to clearance of that change that it might have.

This is similar to the procedure that is now provided whereby the Department is given the sole responsibility for reviewing such changes and within 60 days making a decision to approve or disapprove the change.

Also included in the bill is a provision for expedited handling of these election law changes. If any party is aggrieved at the decision that is reached by the district court, an expedited appeal can be had to the court of appeals.

Some may say upon hearing about this suggestion that this is not anything that we have not considered before. Back in 1975 when this body was debating the Voting Rights Act there was an amendment offered by my State colleague Senator STENNIS that would extend the provisions of the voting rights law nationwide. But there was no provision in that amendment for a new procedure for handling preclearance. It simply presumed that the Department of Justice would be able to handle the increased volume of requests that would necessarily follow from approval of that amendment.

Recognizing that there would be additional work required of the Department and more personnel might be needed, this Senator has suggested that not only should we involve the Department of Justice but also all of the Federal district courts around the land so that we will be sure that whatever workload increase might result could be effectively and fairly handled so that the voting rights, the right of full participation in the political processes of this country, could be effectively protected.

Another difference in the proposal that I am making and the one I have referred to that was considered in 1975 is that there was an effort to repeal section 4 of the Voting Rights Act along with extending application nationwide. Section 4 of the act suspended the use of literacy tests. I am not in favor of going back to a situation where literacy tests or other devices are used to deprive certain citizens of voting rights in many cases simply because they were a minority or in a politically disadvantaged situation.

That section also in addition to suspending literacy tests prescribed a test by which it would be determined which political units and which States would come under the section 5 preclearance requirements. That test was in effect: First, if there was a literacy test in use and, second, if less than 50 percent of the eligible voter population was not registered or did not vote in previous elections.

My amendment does not tamper with the present section 4 provisions of the Voting Rights Act which now not only suspend literacy tests but on a permanent basis do away with them and also extend coverage to jurisdictions with language minorities.

The bill that I am introducing relates only to section 5, the preclearance section, and extends the preclearance re-

quirement to those States not already covered under the act.

There was another provision in the amendment offered by Senator STENNIS in 1975 which included authority for the Attorney General to establish criteria by which any State or political subdivision might be exempted from the provisions of section 5 and section 6.

There is nothing in the bill offered by this Senator which would provide any exemption whatsoever for any State or any political subdivision.

My proposal would amend section 5 to require all States and all political units to preclear election changes on a permanent basis.

There were some suggestions, Senators may recall, in the other body when the Voting Rights Act was up for consideration several weeks ago for change in the preclearance section. Congressman BUTLER of Virginia offered an amendment that would have vested in district courts jurisdiction to hear applications for a bailout. That was a nationwide change in that his suggestion was that the preclearance procedure should apply nationwide but there be given a right on the part of political units to petition the courts for a bailout. Again, that suggestion differs from the one now before the Senate in that this Senator is not suggesting that any such bailout provision is appropriate.

Another amendment was offered by Congressman HARTNETT. His suggestion was that before the House of Representatives and was rejected along with the Butler amendment attempted to extend nationwide the application of the preclearance requirements, but like the amendment that was before the Senate in 1975, it did not provide any new procedure for reviewing the numerous submissions from the 50 States nor did it suggest any willingness to provide additional appropriations or personnel for the Department of Justice to handle the increased volume of submissions that could be expected from nationwide extension of the law.

Again, then, I am attempting to demonstrate by these references to earlier amendments that neither the Senate nor the House of Representatives has ever fully considered the suggestion that is incorporated in S. 1761.

S. 1761, Mr. President, is clearly an effort to insure that the right of every citizen in every State to vote, to participate fully in the electoral processes of this land, is protected. A procedure for preclearance in Federal courts which have the capability, the expertise, the experience to make fair and just determinations under the rules of due process is suggested by this amendment.

It is my hope that the Senate Judiciary Committee during its hearings will consider this suggestion and, of course, I hope it is found to be a reasonable and workable improvement in the law, not an effort to undermine enforceability, not an effort to lessen the commitment that the Government has, and should have, to protect the voting rights of citizens in this great country of ours.

I noticed in reviewing some of the debate on the bill back in 1975 that Senator Abraham Ribicoff, whom everybody remembers as a champion of civil rights and on the frontlines of many of the early civil rights battles, said this:

If we are going to solve the dissension in this country, one of the places to start is to make sure there is uniformity in the application of national laws in the 50 States.

This bill is consistent with the hope and challenge laid before this body by Senator Ribicoff. This bill will achieve uniformity under the Voting Rights Act for all 50 States, for all political units in the country, and insure that it does not matter whether a minority voter lives in Illinois or New York or California or Alabama. This right to fully participate in the political processes will be protected by a law that is fair and workable.

But some say, "Well, there is no evidence that there is discrimination, that there are any efforts to prevent that kind of full participation in some of these areas."

Well, if there is not then what is the objection to submitting to the Federal court for an expedited review of election law changes? If there is no discrimination the proceeding will be a summary proceeding. The court will review it. If no objection is made, nobody feels aggrieved by that change, and if it has no effect of depriving anyone of the right of full participation, then the court will approve that change. That is not such an onerous burden. It is a small price to pay, Mr. President, for uniformity in the law, making this law like every other Federal law.

If it is a crime to commit arson in the State of New York, it is likewise a crime to commit arson in the State of Texas. Cite me, if anyone can, any other Federal law that singles out specific political units in this great country of ours and says, "You are under these requirements, these obligations, but all other political units are exempted." I think it should be the goal and the effort of this body, when it goes about formulating our Federal laws, to make sure that they are applied fairly, evenhandedly, and with the same force and effect in one jurisdiction as they are in any other.

Our income tax laws apply evenly and fairly throughout every State and every county of this country even though we do not have a Federal Treasury large enough to pay for enough agents to review individually every income tax return that is filed in this country. But we have before us now a procedure for enforcement of the important provisions of the Voting Rights Act, Mr. President, which can be enacted by this body when it reviews the Voting Rights Act later this year or early next year.

I am hoping that Members will review this suggestion for change and improvement and agree with the Senator that it is time to have a law for the 1980's and not just a law that related to the problems of the 1960's.

I yield back the remainder of my time.

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS, 1982

The PRESIDING OFFICER (Mr. D'AMATO). Under the previous order, the Senate will now resume consideration of H.R. 4169, which the clerk will state by title.

The assistant legislative clerk read as follows:

A bill (H.R. 4169) making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

AMENDMENT NO. 629

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. MATTINGLY). Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, in regard to the pending bill, first, let me say that I urge support of the committee bill relating to the Legal Services Corporation without additional amendments.

Like the distinguished floor manager, I do not particularly like the restrictions that were included by the Senate Appropriations Committee. I realize, however, that a number of the supporters of the legal services program on both sides of the aisle feel that these restrictions are necessary.

I want to make it clear for the record that I do not share those views. During the entire period that I served on the Senate Labor and Human Resources Committee—the authorization committee for the Legal Services Corporation—I have never seen any evidence of widespread abuse in this program. The so-called abuses have involved isolated cases. Indeed, investigation into some of the claims of the opponents of the Legal Services Corporation have revealed major distortions in the facts described by the opponents of the program.

For example, the opponents of the legal services program often like to say that Legal Services attorneys sued to return two-thirds of the State of Maine to the Indians. That is an inaccurate and misleading statement. I ask unanimous consent that an analysis of the facts behind two oft-cited controversial cases, including the Maine case, prepared by the New York Lawyers' Committee to Preserve Legal Services, as well as an August 23 article from the St. Louis Post Dispatch, describing the misleading and unsupported allegations frequently made

against the Legal Services Corporation, be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. CRANSTON. Mr. President, although I do not see the necessity for the restrictions in the committee bill, they are certainly far preferable to these included in the House bill.

For example, under the House bill, there is substantial question as to whether a Legal Services attorney could respond to a direct request from a Member of the Senate to provide information relating to a matter before the Congress that involved questions of substantive policy relating to the poor. One of the opponents of the amendment described it on the House floor quite aptly as the "right-not-to-know" amendment.

I do not think that the Senate ought to be adopting in one vote an entire array of legislative restrictions developed, for the most part, on the House floor. The House Appropriations Committee simply incorporated into this appropriations bill provisions from the House-passed authorization bill, many of which were developed on the House floor. I do not think it is prudent or responsible for the Senate to compound the problem. By rubber-stamping the House's action in this matter, we would be abdicating our responsibilities.

We have an authorization bill on the calendar. Let the proponents of the House authorization bill present their arguments on the appropriate vehicle. The pending bill, as reported by the Appropriations Committee, is already carrying, in my view, more than enough restrictions.

Mr. President, in 1980, some 5,000 attorneys working in locally controlled legal services programs handled 1.5 million matters for low-income individuals. The overwhelming portion of these activities involved handling routine day-to-day legal problems of low-income families. The emphasis on controversial cases by the opponents of this program distorts the true nature of the legal services program.

This program has been an effective and important mechanism for serving the legal needs of low-income individuals. I have been particularly impressed by the letters of support for the legal services program that I have received from members of the judiciary and from public officials.

A number of the letters from public officials in my State have begun with phrases like "I've been sued by legal services program" and conclude "but I nevertheless support continuation of this program."

A local district attorney in a rural northern California county wrote to me:

> I have myself been sued and threatened with suit on a variety of occasions. I have not enjoyed either these law suits or threats, but the comfort of government officials to be free from suits by poor people is trivial when compared with the absolute necessity to guarantee that every American has full and fair access, through able and dedicated counsel, to the courts of justice. Justice is not a luxury that is reserved for those who can afford it.

That is a strong testimonial for this program, Mr. President.

Let us not ham-string the legal services program with all of the baggage loaded on by the House. The Appropriation's Committee restrictions cover the areas which have been of most concern. That ought to be enough.

AMENDMENT TO DELETE ALL FUNDING FOR LEGAL SERVICES CORPORATION

Mr. President, let me address for a moment the amendment which will be offered by the Senator from Alabama (Mr. DENTON) to delete all funds for the Legal Services Corporation from the pending bill.

Whatever differences of opinion may exist between Members of the Senate as to restrictions which ought to be placed upon the activities of the Legal Services Corporation and its grantees, it is clear that there is strong bipartisan support for continuation of the Legal Services Corporation.

I especially want to congratulate those Senators on the other side of the aisle who have made it clear that continuation of the Legal Services Corporation is not a partisan matter—it is an issue which every Member of this body who is committed to promoting Justice for all—not just for those who can afford it—can and should support.

Mr. President, the opponents of the Legal Services Corporation frequently assert that they recognize that the poor need legal representation or that they support the concept of legal services for the poor, but not this way. What other way, I ask, do they propose?

Return to haphazard voluntary donations of time by the private bar? Preposterous; that day is long past, if it ever existed.

The legal services program was created in the sixties because the poor did not receive adequate legal assistance under the old voluntary approach. There is not one iota of evidence to suggest that if the Leal Services Corporation was abolished the private bar would be able or capable of filling the void.

Mr. President, the bar association leaders in my State, and I am sure in every State, are actively involved with the legal services programs there is establishing and operating pro bono programs so that lawyers will be encouraged to donate services to those who are unable to afford legal representation. But these activities are ancillary to programs funded by the Legal Services Corporation. These pro bono programs are important and should be supported, but they cannot replace an adequately funded legal services program.

The other argument advanced by those who oppose the Legal Services Corporation, but assert their support for the "concept" of legal services for the poor, is to propose transferring responsibility to the States to decide whether the poor should have legal representation. This is usually advanced as a block-grant proposal.

Again, the reality is that this approach will mean little or no legal assistance for the poor in many States.

It is unrealistic to expect that Government officials in the majority of States will allocate any significant funds to a legal services program which will, in many cases, be representing low-income people in legal disputes against these same Government officials. There is an inherent conflict of interest in transferring responsibility for the legal services program to the States. Indeed, that is the very reason Congress established an independent Legal Services Corporation in the first place—to eliminate the conflict of interest at the Federal level, to insulate the program from political upheavals, and allow it to direct its attention toward the needs of low-income individuals for legal representation.

As to those who questions whether the Federal Government should support a legal services program which represents clients in litigation against Government entities, the answer is simple: No person and no office is above the law. When the laws of this land confer certain rights upon individual citizens and corresponding obligations upon Government agencies, then those individuals ought to be able to enforce their rights by seeking redress in the courts. That is true whether it be a Federal, State, or local public entity. When the poor of this Nation are denied rights granted under the laws of this great Nation, they ought to have the same ability to protect those rights through our judicial system as do corporations or wealthy individuals.

Mr. President, the amendment of the Senator from Alabama to delete all funding for the Legal Services Corporation is purely and simply a denial of legal representation to low-income individuals. I have heard his statement of support for the concept of legal services for the poor, but the practical effect of his amendment is to deprive poor people of any meaningful access to our system of justice.

It is that plain. It is that simple. I strongly oppose this amendment.

AMENDMENT TO REDUCE FUNDING TO $100 MILLION

Mr. President, I also strongly oppose the amendment to be offered by the Senator from Mississippi to reduce the level of funding provided in the committee bill for the Legal Services Corporation.

The committee bill provides $241 million for the Legal Services Corporation for fiscal year 1982. That represents a reduction of $80 million below the 1981 level. This is a 25-percent cut, but as the committee report indicates it actually represents close to a one-third reduction in funds when the effect of inflation is taken into account.

This is already a drastic reduction in the legal services program at a time when there will be greater—not lesser—legitimate need for legal assistance for the poor. This level of funding will result in substantial cutbacks in the legal services program and the closing of Legal Services offices throughout the country, leaving many indigent clients

without legal representation. Any further reduction would cripple the program.

Mr. President, any truly meaningful effort to provide poor people with minimal legal service cannot be sustained at the level proposed by the Senator from Mississippi. The Appropriations Committee has recommended a funding level that requires the legal services program to bear its share of cutbacks. Further reductions are simply unjustifiable.

The entire premise of the Legal Services Corporation rests upon the notion that every individual, regardless of his or her income, ought to have access to effective legal representation. Our system of justice is based upon the notion that the poor—no less than the rich—are entitled to their day in court. Our entire society benefits when conflicts are resolved through our judicial system.

The amendment offered by the Senator from Mississippi would close the halls of justice to many of those who most need the protection of our Constitution and the laws. That would be a tragic result for this Nation and the cause of justice.

CONCLUSION

Mr. President, the Legal Services Corporation is a cornerstone of our national commitment to equal access to justice for all—not just those who can afforded it. I urge defeat of those amendments aimed at eliminating or crippling this important program.

EXHIBIT 1

(From Brief in Support of the Reauthorization and Continued Funding of the Legal Services Corporation by the New York Committee to Preserve Legal Services)

THE FACTS BEHIND TWO "SENSATIONAL" CASES

Congressman Sam B. Hall, Jr. in his dissent to the House Judiciary Committee Report on H.R. 3480, cites certain cases, selected from a list prepared for an Office of Management and Budget working paper on the legal services program, as examples of "abuses" by LSC-funded lawyers. He concludes that, "LSC's case history is clearly one of using taxpayer dollars to force judicial resolution of political and public policy issues best left to Congress for deliberation." Legal Services Corporation Act Amendments of 1981, H.R. Rep. No. 97-97, 97th Cong., 1st Sess. 31 (1981). One such case is described by him as a "suit against [a] California grower who issued short-handled hoes to workers who could not stand while using them; [the] grower contended that, if workers use long-handled hoes, supervisors cannot tell who is resting." *Id.*

The case to which Rep. Hall refers is *Carmona v. Division of Industrial Safety*, 13 Cal. 3d 303, 118 Cal. Rptr. 473, 530 P.2d 161 (1975). The lawsuit was initiated on behalf of the farmworkers by legal services lawyers challenging the grower's insistence on the use of a one-foot-long hoe that required farmworkers, for much of their workday, to work continuously bent over almost to the ground. They alleged it was unsafe and in violation of an administrative regulation prohibiting the use of "unsafe hand tools." The Supreme Court of California ordered the California Division of Industrial Safety to set aside and reconsider its decision that the short-handled hoe was not an "unsafe hand tool" in light of the "largely uncontradicted" evidence that use of the hoe caused permanent back damage and other disabling injuries to the farmworkers. 118 Cal. Rptr. at 480. How an attempt to enforce an existing administrative regulation requiring safe working conditions for farmworkers can be characterized as "abusive" or "best left to Congress" is difficult to comprehend.

A case frequently cited by LSC critics is one described by them as a case by legal services lawyers to return a major portion of the State of Maine to the Indians. *See, e.g.*, 127 Cong. Rec. S3177 (daily ed. Apr. 1, 1981) (remarks by Sen. Helms). Actually, this case is one in which the major effort on behalf of the Indian tribes was made by non-legal-services lawyers, including lawyers for the United States Government, and the result obtained was specifically approved by the Congress. The case in which a legal services lawyer was involved at one time was *Joint Trib. Coun. of Passamaquoddy Tribe* v. *Morton*, 528 F.2d 370 (1st Cir. 1975). The direct issue was not whether the Indian tribes should recover the Maine land they contended had been illegally taken from them, but merely whether the United States Government had an obligation under the Indian Non-Intercourse Act, 25 U.S.C. § 177, to investigate whether the Indians' claims had merit and to take appropriate action on their behalf. The suit was handled for only a short period of time by an attorney with Pine Tree Legal Assistance, Inc., a legal services office funded by the LSC, after the private attorney who had initiated the action had withdrawn and before the case was taken over by the Native American Rights Fund ("Fund") and brought to trial. The suit was financed by the Fund solely with moneys provided by the Ford and Lilly Foundations—not the LSC. The trial and appellate courts held that the United States Department of Interior had a fiduciary role with respect to the protection of the lands of a tribe covered by the Act, that the Passamaquoddy Tribe was such a tribe, and that there was a corresponding federal duty to investigate and to take such action as might be warranted under the circumstances. 528 F.2d at 379. As a result, the United States Government itself filed suit on behalf of the Indians. *United States* v. *Maine*, Civil No. 1966 (1972).

The claim of the Indian tribes was evidently not without some merit. Before the trial the dispute was compromised in a settlement approved by both the Maine legislature and the Congress of the United States. The Maine Indian Claims Settlement Act of 1980, P.L. 96-420, 94 Stat. 1788 (October 10, 1980). Under the settlement, a trust fund was created by the federal government for the benefit of the Indians and a separate fund was set aside for the purchase of 305,000 acres of land for the Indians. *See*, Maine Indian Claims Settlement Act of 1980. H.R. Rep. No. 96-1353, 96th Cong., 2d Sess., reprinted in [1980] U.S. Code Cong. & Ad. News 7145.

Even if this case had been handled primarily by an LSC-funded program, it would hardly be an "abuse" for which the LSC should be terminated. Like so many other such "abuses," the case is an example of proper legal representation by attorneys fulfilling their ethical obligations to their clients.

[From the St. Louis Post-Dispatch, Aug. 23, 1981]

FLAWED ATTACK MADE ON POVERTY LAWYERS

(By William Freivogel)

The campaign to abolish the federal program providing lawyers for poor people has been waged with several inaccurate, unsubstantiated and misleading allegations, an inquiry by the Post-Dispatch has found.

The program's most active and outspoken opponent is Howard Phillips, chairman of the Conservative Caucus Inc.

In congressional testimony and newspaper advertisements, he has made unsupported claims of abuses in the program. Some have been repeated by the Reagan administration.

Some of the unsupported allegations turned up in an administration "working paper" circulated this summer on Capitol Hill. The working paper was an attempt to muster support for the administration's proposal to permit states to determine how much money goes into legal services.

Rep. Sam B. Hall Jr., D-Texas, a congressional critic of the program, repeated some of the same charges in a congressional document opposing financing of the Legal Services Corp., which runs the program.

Most of the allegations attempt to link the corporation with Communist groups or liberal causes. Phillips has maintained that the corporation is a captive of radical leftists.

For example, Phillips alleged that the corporation filed "litigation to compel the New York City Transit Authority to hire former heroin addicts."

The allegation is repeated almost verbatim in the administration working paper and a report by Hall.

But the New York suit was not filed by the Legal Services Corp. It was filed by the New York Legal Action Center, a private organization with no affiliation with the government-financed program.

The administration report was written by Michael Horowitz, special counsel of the Office of Management and Budget. He agreed that some of the summaries of cases in the report appeared to be misleading or unsubstantiated. He said he had not checked them himself.

He maintained that did not alter the basic position of the paper: "A group of people have captured the program and run it in accordance with their bankrupt ideology."

A spokesman for Hall said he had not checked the allegations independently. The spokesman said Hall's main reason for opposing the corporation was its activities in Texas.

The Post-Dispatch has tried unsuccessfully over a period of several weeks to reach Phillips. Although he refused to be interviewed, the Post-Dispatch forwarded a series of questions to him asking the basis of some of his allegations.

Larry Woldt, director of communications for the Conservative Caucus, responded to the inquiries. He sent newspaper and magazine clippings to support a few of the allegations.

After more than a month, he said he had not found the documentation for the other allegations, did not have time to search for it and broke off contact with the Post-Dispatch.

"Ninety percent of the allegations are true," Woldt said.

Phillips has said legal services lawyers have opposed prayer in schools, filed suits challenging parents' authority to intercept mail addressed to their children and supported boycotts of states that have not ratified the Equal Rights Amendment.

Available evidence indicates that the lawyers have not been involved in those activities.

He has said legal services lawyers have represented "pro-Castro groups like the Gray Panthers."

The Gray Panthers is an association of older people. It says its only connection with Cuba is that it once scheduled a trip to study how older people were treated there.

Woldt said it was unfair to write a story about the allegations. Phillips could not document when he was able to prove 90 percent of what he said about the corporation.

Woldt said the Post-Dispatch was biased in favor of the corporation. "Mr. Phillips said he might as well be talking to the public relations department of Legal Services Corporation," he said.

The Post-Dispatch sought documentation of about 20 allegations voiced by Phillips. Documentation was found for two.

Legal Services lawyers have filed suits to obtain government-paid radical benefits for persons seeking sex-change operations. And the corporation has filed suits seeking government financing of abortions for poor women.

The corporation says that in these controversial cases, it was seeking to protect established legal rights for poor people. The courts agreed with the corporation on the sex-change operations and ordered the government to pay medical benefits for them.

The corporation eventually lost the abortion case when the Supreme Court ruled that states could refuse to provide such medical benefits for poor women.

Mr. Ayers, a spokesman for the corporation, said the controversial cases were only a small proportion of the corporation's actions.

Most of the suits Phillips criticizes are class-action suits in which the corporation represents a group of poor people challenging a government policy. Ayers said less than 1 percent of legal services suits are class-action suits.

Most cases involve problems such as divorces, evictions and repossessions, he said.

Phillips has led the conservative opposition to the legal services program since the early 1970's, when he tried to cut it back as then-President Richard M. Nixon's director of the Office of Economic Opportunity.

He renewed his campaign last year in a series of mailings, newspaper advertisements and appearances before congressional committees. Here are some of the major accusations:

In testimony March 24 before the House Judiciary Subcommittee on Courts, Civil Liberties and the Administration of Justice, Phillips said legal services lawyers were lobbying against congressional efforts to allow voluntary prayer in public schools.

He cited a quotation from Clearinghouse Review, a publication of the Legal Services Corp. that reports on legal developments relevant to the poor.

He relayed the quotation this way: "The most politically controversial access issue of the 96th Congress was the effort to remove by statute all federal court jurisdiction over school prayer issues . . . If the forces seeking to eliminate school prayer jurisdiction succeed, they are likely to move on to other issues more directly affecting the poor, including abortion and school desegregation."

What Phillips left out of the quotation, where an ellipsis appeared in his testimony, was this phrase:

"While school prayer is not a legal services issue, the underlying question of Congress's authority to limit federal court jurisdiction over constitutional claims is."

Ayers, the legal services spokesman, says the Legal Service Corp. has never argued against school prayer.

In an advertisement June 16 in the Washington Post and in testimony to a Senate Appropriations subcommittee, Phillips accused legal services lawyers of helping "pro-Castro activist groups like the Gray Panthers."

The Gray Panthers is an organization of older people that argues in court and lobbies in Congress for the rights of the elderly. The Legal Services Corp. sometimes represents the group. None of the assistance has involved suits relating to Cuba.

The basis for Phillips' allegation is a trip the Gray Panthers planned to make to Cuba to study the life of older people there.

Woldt said an article in a Gray Panthers publication describing the trip showed that the group is pro-Castro. The article said: "In Cuba, the word for 'retiree' is jubilado, literally 'jubilated.' Though Cuban jubilados often confront the loneliness and boredom forced on many of the aged here, their retirement is not mandatory and thus, many opt for a still productive lifestyle after the age of 65.

"According to Steven Wayne, who with Maggie Kuhn is organizing the trip, 'Too many people have a distorted view of life in Cuba and it must be our duty to provide a different perspective.' "

Ms. Kuhn, head of the group, denied it was pro-Castro. She said her group has consultative status at the United Nations. It was in that role that the group planned a trip to "see what Castro was doing and see the dynamics of age discrimination in the Castro regime," Ms. Kuhn said.

The group has traveled also to Micronesia, Kenya, Malaysia and the People's Republic of China, she said.

An advertisement by the Conservative Caucus May 4 in the National Law Journal said "LSC-funded activists . . . support boycotts of states that have not ratified ERA."

Phillips cites a quotation from Clearinghouse Review that "the economic boycott against non-ratifying states has been vindicated in the context of the ERA as a tool for women's advocates."

The article he cites is about court decisions affecting women. The quoted material is at the beginning of a summary of the federal court decisions rejecting Missouri Attorney General John D. Ashcroft's challenge to the boycott in Missouri.

The Legal Services Corp. decided not to boycott states that have refused to ratify the Equal Rights Amendment, Ayers said. Recently, legal services groups have met in Florida and Missouri, states that have refused to ratify the amendment.

Nor was the corporation involved in the federal court case that upheld the right of women's groups to boycott states that have refused to ratify the amendment.

In a fund-raising letter on Sept. 8, 1980, Phillips wrote that all legal services projects "are committed to the implementation of a radical social and political agenda which has included . . . lawsuits by young children to challenge the authority of their parents on matters like access to personal mail, choice of schools, and the like . . ."

Phillips made much the same charge in an article in Human Events on Jan. 14, 1974. There he cited a suit by the San Francisco Neighborhood Legal Assistance Foundation on behalf of a 17-year-old girl whose father intercepted her mail.

The San Francisco Neighborhood Legal Assistance Foundation responded at the time that the allegation was false, that no such suit existed and that legal services attorneys were not representing such a girl.

Woldt was unable to present evidence of suits challenging parental authority over mail and choice of schools. He said he knew of a case in which the corporation represented a retarded child in a suit by the child's father seeking control over her affairs. He declined to provide details.

Other allegations by Phillips and other critics, while not unsubstantiated, omit some details.

On March 24 in House testimony, Phillips criticized the Legal Aid Society of Columbus, Ohio, for representing penitentiary inmates in "extensive litigation . . . on such matters as 'inmate idleness' and inadequate 'recreational services.' "

The society sued in 1978, challenging conditions at the 140-year-old state penitentiary in Columbus, where prisoners were allowed out of their cells only for meals and two hours of recreation a week.

Inmates were housed in dimly lighted, unheated cells without hot water. During the winter, temperatures in the cell blocks dipped into the 30s. The state had closed the prison in the early 1970s but reopened it when a new penitentiary at Lucasville became overcrowded.

The Justice Department joined the suit against the Columbus facility. In 1979, the state agreed to close it in 1983 and upgrade conditions until then.

In Senate testimony April 22 and in a Conservative Caucus advertisement in the Washington Post on June 16, Phillips alleged that Legal Services employees participated "in raising funds for the anti-American Castroite terrorists and guerrillas in El Salvador."

That allegation is based on an article on Jan. 29, 1981, in The Daily World, a left-wing newspaper. It describes a meeting of union leaders in New York who agreed to participate in a campaign to sell bonds to pay for humanitarian aid to El Salvador. The article says that members of a union representing legal services lawyers in New York attended.

The money raised by sale of the bonds was to be sent to a Catholic archbishop in Mexico. The bonds indicated the money was "for a free El Salvador."

Woldt said he had no other evidence that money was being used to finance terrorists and guerrillas in El Salvador.

Spokesmen for the legal services union in New York denied any involvement in raising funds for terrorists. A spokesman said the union did not send a representative to the meeting and is not selling the bonds.

The Reagan administration working paper also left out key facts in criticizing corporation cases. For example, the report stated:

"California Rural Legal Assistance sued Madera County to overturn regulations requiring welfare recipients to accept available agricultural work on penalty of jeopardizing their welfare eligibility."

It did not explain that the 1968 suit was brought on behalf of 19 families whose welfare benefits had been ended because they had refused to send their children into the fields to harvest grapes.

One of the clients was Jesus Segovia, his wife and four daughters. Segovia was blind, his wife disabled and one of the daughters mentally retarded. The California Supreme Court summarized the facts this way:

"Social worker Schleich (an agent and employee of the Welfare Department) allegedly threatened Mrs. Segovia with termination unless she and her four daughters reported to pick grapes. . . . The family feared termination and decided to work. However, Mrs. Segovia has a disabled arm, and her 15-year-old daughter, Armandina, is mentally retarded and cannot work without close parental supervision. These two therefore stayed home.

"Three other Segovia daughters, aged 10, 11, and 17, went to the field accompanied by their stepfather, a recipient of Aid to the Blind, who feared for their safety . . . In the field there was allegedly no toilet, no place to wash one's hands, and no first aid kit . . .

"That same afternoon Schleich allegedly came to the house and told Mrs. Segovia that her disabled arm was insufficient excuse for not working, and that she would be terminated unless she worked. On Thursday and Friday, therefore, all but the mentally retarded child went to the fields.

"On Thursday, Sept. 21, Schleich allegedly phoned the home, found Armandina there, and so verbally assaulted her that she was still emotionally distraught when the family returned that evening . . .

"The state terminated the benefits."

Benefits of another mother were ended after she refused to send her children, 11 and 16, back to the fields after they became sick from working in the sun.

The California Supreme Court ruled that the county had no right to cut off the benefits.

Ronald Reagan, then governor of California, criticized that suit as "frivolous and harassing" in a longrunning battle with the legal services program. A committee appointed by the Nixon administration to investigate Reagan's allegations concluded that it was neither frivolous nor harassing.

Horowitz acknowledged that the details cast the suit in a different light. But he questioned whether the legal services organization had tried hard enough to settle the issues before filing suit.

LEGAL SERVICES

Mr. HOLLINGS. Mr. President, I am a strong supporter of legal services because I do consider them fundamental. Directing my remarks immediately to abuses, we only have to refer to the lobbying activities and, as you well know, Mr. President, I have supported programs from the word "go" for feeding the hungry poor. But I refer to the food stamp office lobbying with a flyer entitled "You don't have to take that mess from the food stamp office" and "The Palmetto Food Stamp Service can help you fight back." The Palmetto Food Stamp Service unit is a member of the Palmetto Legal Services of Columbia.

When we come to the very elevated talk of constitutional rights and access to America's system of justice, that is one thing. When we get down to your business and mine, namely, lobbying and politics, that is another thing.

I am very much and have been, as I say, supportive of this, I imagine, same food stamp service. They have performed a useful service in trying through outreach to have extended the feeding programs to those that have had difficulty participating, so it is not my purpose to deride that particular entity. On the contrary, it is to point out the need for limitations on the legal services program, for the simple reason that if we do not pull in its horns from the matter of lobbying and posting bills and everything else of that kind, then we have another thing involved—not access to the system of justice, but access to the system of politics. That is a different debate, with the Federal Election Commission and whether we ought to put in money to have you and me run for the Senate and whether we ought to finance political causes and everything else of that kind. So there is that reason.

I can give another example with relation to the matter of appearing before the legislature. I ask unanimous consent that letters received from Y. W. Scarborough, Jr., president of the Atlantic Coast Life Insurance Co. of Charleston, S.C., and accompanying documents be printed in the RECORD. They are with respect to the flyers on food stamps and lobbying on insurance.

There being no objection. the material was ordered to be printed in the RECORD, as follows:

ATLANTIC COAST LIFE
INSURANCE CO.,
Charleston, S.C., August 24, 1981.

Hon. E. F. HOLLINGS,
U.S. Senator,
Washington, D.C.

DEAR FRITZ: I wrote you on March 20, 1981 opposing Legal Services Corporations formed under the Legal Services Corporation Act of 1974. Enclosed is a copy of that letter which states our case.

I now understand that Senate Bill 1533 by Weicker (R-Conn.) which authorizes appropriations of 100 million for each of the three fiscal years 1982, 1983, and 1984 is now in the Senate Labor and Human Resources Committee. I do hope that you will oppose this Bill if and when you get a chance to do so. Deleting all funds from the Legal Services Corporation will not deprive the poor and disadvantaged of legal services. Local bar associations throughout the United States are providing free legal services for those who are truly in need.

Enclosed is one of many of the type fliers that are being passed out by staff members of Palmetto Legal Services of Columbia and others.

With kindest regards, I am
Sincerely,
Y. W. SCARBOROUGH, Jr.,
President.

PALMETTO FOOD STAMP SERVICE CAN HELP YOU FIGHT BACK!

Some very powerful people in this country are trying to stop the food stamp program. They do not care if the hard-working people don't have enough to eat. They do not care if our children don't have enough milk and juice to drink. All these rich people want is to take more money from us so they can use it for themselves.

Last year, thousands of people were cut off of food stamps by the United States Congress. Food Stamp Supervisors have scared many people away from food stamps by threatening to put them in jail for trying to get stamps. Many caseworkers act very nasty to people so that the people will get angry and stop getting food stamps.

But we should not let them cheat us so easily. Food stamps belong to us by right! We paid for them long ago by our hard work and our tax money. And with the price of food and everything else rising so high, how are we going to pay our bills without any help?

Do you feel that you are being cheated by the Food Stamp Office?

Do you think that you should be getting food stamps, but the folks at the Food Stamp Office tell you that you can't get any?

Do you think that you should be getting more food stamps?

Have you been mistreated by a guard or a caseworker at the Food Stamp Office?

Well, you don't have to take that mess! You should fight for your rights at the food stamp office! Palmetto Food Stamp Service will help you fight!

ATLANTIC COAST
LIFE INSURANCE CO.,
Charleston, S.C., March 20, 1981.

Hon. E. F. HOLLINGS,
U.S. Senator,
Washington, D.C.

DEAR FRITZ: The Home Service Insurance Industry represented by such South Carolina Companies as Liberty, Public Savings, South Atlantic, Atlantic Coast and others, not to mention the many fine out of State Companies, like Life of Georgia, Liberty National, Pilot and others has, and is now facing, real antagonism from various Legal Services Corporations, starting in Tennessee in 1978, followed in Georgia, Florida and now presently in Alabama.

We understand Legal Services Corporations were formed under the Legal Services Corporation Act of 1974. It was the purpose of this Act of Congress to amend the Economic Opportunity Act of 1964 to provide for the transfer of the legal services program from the Office of Economic Opportunity to a Legal Services Corporation established in the District of Columbia as a private non-membership, non-profit corporation, for the purpose of providing financial support for legal assistance ". . . to persons financially unable to afford legal assistance." Part 1612 of the Code of Federal Regulations contains some of the rules and regulations with respect to Legal Services Corporation. Section 1612.4 of such rules and regulations provides in part:

"(a) No funds made available to a recipient by the Corporation shall be used directly or indirectly, to support activities intended to influence the issuance, amendment, or revocation of any executive or administrative order or regulation of a Federal, State or local agency, or to influence the passage or defeat of any legislation by the Congress of the United States or by any State or Local legislative body or State proposals by initiative petition.

"(1) An employee may engage in such activities in response to a request from a governmental agency or a legislative body, committee, or member made to the employee or to a recipient; and

"(2) An employee may engage in such activities on behalf of an eligible client of a recipient, if the client may be affected by a particular legislative or administrative measure but no employee shall solicit a client in violation of professional responsibilities for the purpose of making such representation possible; . . ."

It is submitted that contrary to the purpose of its establishment, and even to the published rules and regulations governing its actions, Legal Services Corporation in promoting various hearings, in distributing handbills, and in suggesting to Insurance Departments that they change their rules and regulations, have violated the Act and the rules and regulations governing them.

There are now bills pending in Congress H.R. 6386 and S. 2237 to reauthorize the existence of the Legal Services Corporation and to appropriate funds for its work. It is difficult to believe that Congress, in establishing the Legal Services Corporation to provide legal assistance to persons financially unable to afford legal assistance, contemplated that those funds would be used to influence attacks upon industry whose taxes support it or regulations of state agencies or legislation of the various states. To permit Legal Services Corporations to function thusly should serve as a warning and an example to other business and/or industries that personnel of Legal Services Corporations might choose them as targets.

For the benefit of the insurance industry and its policyholders and other businesses and/or industries, it is recommended that the bills now pending (H.R. 6386 and S. 2337) to be amended to restrict Legal Services from continuing these activities. Such action would not be unlike the restrictions placed upon the FTC earlier this year wherein your assistance meant so much.

If more information is desired, let us hear from you.

With kindest regards, I am
Sincerely,
Y. W. SCARBOROUGH, Jr.,
President.

Mr. HOLLINGS. Mr. President, it could well be that the insurance issue needs to be changed, needs to be lobbied, but not with taxpayers' money that is intended for landlord-tenant, for domestic, for contract cases and those fundamental difficulties that the poor and the disadvantaged are faced with every day and attorneys are not available to them. I do not know why that happens. Doctors, under the Hippocratic oath, are supposed to come, but you cannot get them; you have to get yourself to the doctor and to the hospital. Now, in our society, it is the same with lawyers.

When we graduated, we were always assigned a criminal term. They just called you up and told you, "Be over at the courthouse in an hour because you have a case to try," and you thought nothing about it and immediately, you attended and started trying the case. You were not compensated for it or anything else. That was part of the professional nature of the medical profession

and the legal profession. Now it is all institutionalized. We have defense counsel, legal services, we have this and that. Society has gotten so complex.

As I say, those who cannot afford it should not be denied their right to access. We certainly finance the access of the rich to legal services in our society. I am trying to get an accurate figure from the Internal Revenue Service whereby we can document the writeoffs of all of these corporations. For one reason, Occidental appeared on the front page the day before yesterday, saying, "I am not going to pay a corporate tax."

If we did not have a corporate tax law, we would not have all kinds of provisions for corporations to participate in abstaining from our Government services in this society. On the contrary, we have written all these affirmative action policies within the law to say that should be taken from the revenue, that should sustain that particular endeavor; namely, legal services to the rich for all of these Washington lawyers and around the country are written off in terms of hundreds of millions of dollars, far in excess of what we are now asking for legal services for the poor.

Mr. President, I just say that because of what has been flowing into my office—and in order to make an accurate record here—I think there is good basis for the amendment of the Committee on Appropriations. We make it plain that these moneys are not for lobbying, they are not for class actions, they are not for solicitations of Congresses and legislatures, all those solicitations we love and adhere to and listen to. That is not the purpose of the Legal Services Corporation instituted by the American Bar Association, which has had bipartisan support over the past 10 years. It has worked, on balance, very, very well.

We have been riding herd on it in the subcommittee on appropriations for the past several years. We have been cleaning it up and when we get the least indication that it is not within the bounds of its statutory directives, we put in the kinds of provisions that we have here in the committee amendment. We also provide that the majority of the particular legal services board in that community shall be comprised of attorneys that are members of the bar in that particular community.

We are not trying to change around society and zoom in a bunch of South Carolina attorneys into the New York scene or the Boston scene and tell them, here is a bunch of class actions and we think we ought to clean you up in Boston.

We do not want Boston lawyers coming down to Charleston and saying, "Now, we have a bunch of attorneys that the taxpayers are supporting to tell them how to bring class actions, put out pamphlets," and everything else about the services of that kind. That totally destroys the program and that is why we are where we are today.

I hope we can support these amendments and support these appropriations for Legal Services.

Mr. WEICKER. Mr. President, I ask unanimous consent that my amendment, which is the pending business, be withdrawn.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 629) was withdrawn.

Mr. KENNEDY addressed the Chair.

The PRESIDING OFFICER. The Senator from Massachusetts is recognized.

Mr. KENNEDY. I rise in support of the provisions in this bill on the Legal Services Corporation. This is a program which I have followed very closely during my service both on the Judiciary Committee and on the Labor and Human Resources Committee. Its development and continuation have always been a high priority with me and many of my colleagues.

I hope we will continue our strong commitment to this vital program. Through the Legal Services Corporation, our Nation has insured that the millions of people who would be denied access to the legal process have an opportunity to present their concerns and their injustices to the courts of this country for impartial adjudication.

If we are truly to be a nation under laws, we have to insure that access to the legal system is not limited to the wealthiest individuals in our society.

Mr. President, I am pleased that my colleagues on the Appropriations Committee chose to fund the Legal Services Corporation in this bill. I commend them for their wisdom in continuing this vital program. It is a program that not only benefits the poor—by providing essential legal aid—but also benefits our entire society—by insuring that equal justice for all Americans is in fact provided by our society.

Let me say that I would have preferred continuing to fund the program at its current level. I recognize, however, that many of my colleagues believe that all programs must suffer a budget cut to reduce Government spending. I also do not believe that the provisions in the bill restricting the activities of the Corporation are necessary. I believe that any abuses that may have occurred have been minimal. I do not believe that we should limit the actions of legal services agencies. Nevertheless, I recognize the concerns of many of my colleagues about these issues and I recognize that their support is necessary to continue the program.

Since its creation in 1975, the Legal Services Corporation has gradually extended legal assistance to poor people across the country. Six years ago, the Corporation set a goal of equal access for all poor people in this country to legal services. Last year, the Corporation achieved its goal by providing two attorneys for every 10,000 poor people. They accomplished that goal by using their funds efficiently and effectively. Less than 3 percent of their budget went to administrative costs. I challenge my colleagues to discover a more efficient program. Last year, they served 1.2 million people—with the vast majority of those cases involving food, shelter, health, and income—the basic necessities of life.

Let me emphasize that these recipients are the truly needy that President Reagan has so often spoken of. Eligible individuals must earn less than $4,700. Eligible families of four can earn no more than $9,300. Studies have demonstrated that an individual can simply not afford a private attorney with an income below $10,000.

The private bar cannot replace the services provided by the Corporation. I certainly agree that the private bar has a responsibility to the poor. In recent years, the bar, in cooperation, has dramatically expanded pro bono services. Further significant expansion is neither possible nor likely. Before the establishment of the Corporation, we relied exclusively on the generosity of the private bar. It was not enough then. It will not be enough now.

Nor can State and local governments be expected to take up the slack if the Corporation was not continued. The burdens placed on their budgets by the Reagan budget plan is already immense. Only last week, three Governors—one of them a Republican—told the Congress that the burden already placed on them was more than enough.

We cannot deny that without the legal services program, many poor people would be denied effective access to our system of justice. And the consequences of that denial are enormous:

Children are forced into programs for the mentally retarded without any evaluation of their intelligence.

Mothers are left without money to feed their families when a benefit check does not arrive.

Elderly people live in unheated apartments because their landlords have not paid the utility bill.

President Reagan's vaunted safety net will mean little to the poor without the means to enforce it—legal services programs.

In this society of 1981, we cannot afford to step backward to a time when the poor were denied equal access to our system of justice. We cannot return to a time:

When poor consumers were victimized by fraud;

When elderly Americans were denied their legal benefits;

When thousands of other less fortunate Americans were further disadvantaged because they could not afford a lawyer.

We cannot return to the days when the principle of equality before the law was a fundamental principle in our country—unless you were poor.

Mr. President, I commend those legal services attorneys for their fine efforts over the last 6 years and I again commend the Appropriations Committee for allowing those efforts to continue. I intend to support the committee's recommendations. I hope my colleagues in the full Senate will follow suit.

Mr. WEICKER. Mr. President, I think I should give fair warning to my colleagues that it is my intention now to move the committee amendment and that those wishing to amend should make their feelings known.

It is not my desire here to slide anything through. I know there are Senators who have amendments and want

a vote. I am prepared to have votes this morning, one right after the other.

I have tried to find out if there is anyone who wishes to speak at this time, and I understand there is not. So I am going to call for a quorum; and if there is no response in a few minutes, it is my intention to go ahead and move the committee amendment.

I yield the floor.

Mr. DURENBERGER. Mr. President, there is no question that every Member of this body is committed—fully committed—to equal rights for all Americans. We reaffirm the existence of those rights in the actions we take every day on the Senate floor.

The problem here is that rights without remedies have no value. The court system in this country is the ultimate mechanism in our system of government for vindicating legal rights drawn from the Constitution, the common law, and the acts of Congress. When any American lacks access to the courts, they lack access to the freedoms and benefits of this society as a whole.

President Nixon recognized that fact when he created the Legal Services Corporation. President Ford reaffirmed it when he appointed a Board of Directors that carried LSC programs to every part of the Nation. I would be the last to deny that the LSC—like every other Federal agency—has made its share of mistakes. But to use these mistakes as an excuse to kill the organization, and cut millions of Americans out of the legal process, is classic overkill. Former President Nixon understood the alternative when he said that—

Justice is served far better and differences are settled more rationally within the system than on the streets.

Congress chose the wise alternative when it created LSC 10 years ago, and we are confronting exactly that same choice today.

Mr. President, I come from a State where the LSC has worked and worked well. Last year, it provided more than 40,000 Minnesotans with access to the legal system—access they could not achieve with their own resources. Some of these litigants were right and some were wrong. But the critical fact is that their rights were resolved within the legal system, and not by a barrier of poverty that denied them access to that system.

For example, in the Anoka and Moorhead areas, Minnesota has pioneered the judicare system, which delivers legal services through a combination of legal service staff and private bar involvement. In the remainder of the State, more traditional staff-based delivery systems have operated effectively for nearly a decade, opening access to the legal system for tens of thousands of Minnesotans. The success of these programs has drawn growing support from the private sector. In fact, the Legal Aid Society of Minneapolis now draws roughly half its operating budget from sources other than the Federal Government.

The Legal Services Corporation is certainly no more immune to budget restrictions than any other Federal program. But the appropriation reported by this committee already represents a 33-percent reduction from last year's funding—one of the sharpest cuts dealt to any Federal program. Deeper cuts would threaten the integrity of the program itself. Should this appropriation be stricken, legal aid in urban Minnesota would lose half its operating budget. The impact in outstate Minnesota would be even more severe, with newly established programs losing up to 95 percent of their funding. Abolition of these programs would place an insuperable barrier between millions of Americans and enforcement of rights basic to our society. It is a result we cannot tolerate if we are to remain a society of laws and not of men.

Withdrawal of funding is not the only mechanism that can destroy the integrity of the program. It can be destroyed just as effectively by the package of stringent operating restrictions placed on the Corporation by the House of Representatives. These restrictions create a dual system of law in this country, one for the rich and one for the poor—separate and unequal. Where there are administrative problems in the Corporation, they should be addressed by the Board and the Corporation's Administrators. I am sensitive—very sensitive—to the argument that this and other agencies can easily become independent sources of unelected political power. But I cannot believe that the kind of people this administration will appoint to the Corporation's Board would tolerate that result. Legal Services attorneys do not want it, and if Congress performs its oversight role, it is a result that will never occur in any administration.

These restrictions carry a simple message—that lawyers for the wealthy shall have more power than lawyers for the poor. That message is inconsistent with the very concept of equal justice under law.

Mr. President, I do not believe that the Federal role in legal services is likely to be a permanent or even a long lasting role. As the program develops, based on what we have seen in my State, I am confident that it will continue to draw greater public support and greater involvement from the private bar. But it is every bit as clear that as strong as its efforts have been, the private sector is not yet ready to carry the full load. The Legal Services Corporation has earned a right to continued existence, and I urge my colleagues to affirm that right by voting with the committee amendment.

THE LEGAL SERVICES TO THE POOR A SOCIAL POLICY IN NEED OF A NEW PROGRAM

Mr. HATCH. Mr. President, a social policy which is eventually debated and passed by Congress normally has the assurance it will benefit our total society, not merely its targeted benefactors. When this body approved the passage of the Legal Services Corporation Act, it did so because of this Nation's belief that no citizen should be denied access to our justice system because of his or her financial status in life. I believe the furtherance of that value is as important today as it was 16 years ago when we passed the Legal Services Corporation Act.

While this body has the profound responsibility of developing social policy, it also has the responsibility of reviewing that policy to see if it continues to promote the general welfare of our society. I strongly believe that the Legal Services Corporation is one of those social policies which now needs close scrutiny and action by the 97th Congress.

During my tenure, I have seen this body continually hear of abuses on the part of the Legal Services Corporation which has affected various segments of our society. Each year the problems grow and multiply, and each time this body passes amendments aimed at eliminating the abuses by the Legal Services Corporation.

All of us have agonized over our dilemma that, on the one hand, we deeply believe that no American should be denied access to justice, and on the other hand, the abuses brought on to others by the Legal Services Corporation. Because we are emotionally and intellectually torn, we have allowed the abuses to escalate. If this body is to be faulted, it is because we have erred on the side of our commitment to justice. At this time, painful it might be, we must ask ourselves: Has our judgment been colored by our wishful thinking that the problems created by Legal Services will go away? The evidence is clear that in spite of what this body has done to curb the abuses on the part of the Legal Services Corporation, they have gone unheeded and it is clear the Corporation is incapable of controlling itself.

Now then, we must ask ourselves: Do we not have a duty to examine this social policy which, while on the one hand, had noble intentions in providing legal services to the poor people, and on the other hand, it has had an adverse affect on other groups of our society. I will not go into detail, but for the RECORD I would like to submit examples of some of the abuses.

I believe this body not only has the duty, but the responsibility as well, to promulgate social policies which have the welfare of society in general and to curtail or change a policy when it places an undue burden upon other members of that society. While this body has attempted over the years to correct the abuses of the Legal Services Corporation without success, it is vital that this body act today in assuming our responsibility for solving the problem by eliminating the funding of the Legal Services Corporation.

Examples of abuse follow:

LEGAL SERVICES CORPORATION ABUSES

1. Legislative advocates for veteran organizations in seeking redress in exposure to agent orange and nuclear fallout cases.

2. Help Passamaquoddy and Penobscot Indians sue for possession of a good portion of the State of Maine, which would have displaced 350,000 persons.

3. Sued U.S. Steel to prevent shutdown of an unprofitable plant.

4. Eight point plan to defeat President Reagan's economic pack.

5. In Utica, New York farmers are being sued on behalf of Omeida Indians for return-

ing roughly 5,000,000 acres of land. This case pits poor land owners against poor Indians.

6. In northeast Ohio Legal Services turned away indigent would-be clients in order to pursue litigation preventing U.S. Steel from closing its plants, or alternately allowing sales to a worker-community group that would seal federal funding.

7. California Rural Legal Services litigated on behalf of 19 farm workers to challenge the entire California system of publicly sponsored agriculture research to produce more efficient farm machinery, claiming it was displacing migrant farm workers.

8. Worked against the legalization of prayer in public schools. How does this help the poor of America?

9. Sued CSA for nine poor plaintiffs and collected $18 million. Only $2000 of this money was received by the plaintiffs.

10. Said State of Connecticut had "the legal responsibility to provide medical care" for a person to receive a sex change operation.

11. Used 50 percent of budget on two class action cases while 3,998 cases split the other half of the agency's budget.

12. Defended Ku Klux Klan members in civil rights case.

13. In June, 1979, an article appeared in the New York Times outlining a suit by Michigan Legal Services to compel the federal government to define "black English" as a separate language and to therefore provide mandatory remedial language training to all blacks.

● Mr. DANFORTH. Mr. President, I am pleased to be able to join today with a large, bipartisan group of Senators to support the Appropriations Committee's proposal for continued funding for the Legal Services Corporation.

While this proposal reduces the current level of funding for the Legal Services Corporation by 25 percent, it still assures that the Corporation will be able to provide a minimum level of access to our system of justice. Moreover, it assures that the legal services program will operate in accord with the original intent of Congress. It addresses the concern of many in the Senate as to the scope of legal services activities, without limiting the ability of Legal Services attorneys to represent their clients effectively.

Mr. President, I urge my colleagues to support the committee's action providing for the continued operation of the Legal Services Corporation, because of the essential role this program plays in our system of justice. Perhaps the most noble of our Nation's historical commitments is to assure equal justice for all citizens. The Legal Services Corporation, operating as an independent entity, enables us to honor this commitment—fulfilling the mandate of Congress to provide effective legal representation for those who would otherwise be unable to afford it. Absent the legal services program, many Americans would go without representation—simply because they are poor.

Indeed, the need among low-income citizens for civil legal assistance exceeds the level of services currently provided by both the Corporation and the private bar. Elimination of the Corporation and its funding could further impair the rights of the disadvantaged to equal justice under the law. The voluntary effort to provide the poor with access to our justice system, while significant, is not sufficient to meet the needs of the poor, and it is unrealistic to expect the States to step in. Accordingly, we must continue to meet our commitment with the Legal Services Corporation.

To be sure, the legal services program has always generated a great deal of controversy, even though the overwhelming majority of legal service cases have concerned routine matters—resolved without litigation. However, much of this controversy has been inevitable because effective legal representation of a client often requires confronting powerful intrests—public and private. Such confrontations and conflicts are inherent parts of our adversarial system of justice, and it was to shield legal services from the repercussions generated by such adversarial confrontations that the independent Corporation was created.

At the same time I must note that the Legal Services Corporation has also generated controversy of another sort by engaging in activities that have carried it away from its primary purpose. Much of this controversy has been provoked by the lobbying activities of Legal Services attorneys. Like many of my colleagues, I have been concerned about such activities. While I believe that Legal Services attorneys must be free to pursue actively the claims of their individual clients, it becomes another matter when they engage in comprehensive lobbying campaigns. This problem is effectively addressed in the committee's proposal.

One other source of controversy has been interference by outside organizations and interest groups. I have been concerned about assuring local control of the legal services programs without such interference. The committee's proposal establishes requirement of such control and meets this need.

Accordingly, I support the committee's action as to the continuation of the legal services program, and I urge my colleagues to join me. It is a matter of simple justice.●

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

Mr. WEICKER. Mr. President, we are prepared to vote on the committee amendment, and I urge my colleagues to come to the floor and present their amendments.

I know that Senator COCHRAN is here and ready to proceed. I hope that others who wish to proceed would do so now.

I am going to suggest the absence of a quorum, but I am also under the importunings of the majority leader, who would like to have this matter proceed. He said that if it does not proceed, I should move the question. I do not want to do so; that means we have to have someone here on the floor, presenting an amendment.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, I move the committee amendment.

The PRESIDING OFFICER. The question is on the committee amendment.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, the ranking member and myself agree that the pending business, the committee amendment which is the pending business, be temporarily laid aside.

The PRESIDING OFFICER. The amendment is laid aside.

The question is on agreeing to the first committee amendment.

UP AMENDMENT NO. 621

(Purpose: To strike the appropriation for the Legal Services Corporation)

Mr. DENTON. I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Do the managers lay aside temporarily all committee amendments for the consideration of floor amendments?

Mr. WEICKER. The ranking Member and myself agree that all committee amendments be temporarily laid aside.

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

The Senator from Alabama (Mr. DENTON), for himself, Mr. HATCH, Mr. HUMPHREY, Mr. MCCLURE, Mr. HELMS, Mr. NICKLES, Mrs. HAWKINS, Mr. THURMOND, Mr. HAYAKAWA, Mr. SYMMS, and Mr. LAXALT proposes an unprinted amendment numbered 621:

On page 32, beginning with line 19, strike out through line 10 on page 36.

The PRESIDING OFFICER. The amendment that the Senator has sent to the desk attempts to strike House language plus a committee amendment that has been laid aside. Therefore, it is not in order without unanimous consent.

Mr. WEICKER. Mr. President, if I might, through the Chair, direct my comments to my good friend, the Senator from Alabama. It is my understanding that it was his intention to amend the monetary amounts in the bill relating to legal services. As a matter of courtesy to the Senator from North Carolina and others, I laid the committee amendment aside.

If he would so modify his amendment to deal with the monetary amount, I would have no problem. Obviously, if we are going to get back to the language, then we are right back to the point which I tried to resolve on behalf of the Senator from Alabama and the Senator from North Carolina and others.

Mr. DENTON. Mr. President, I wish to make clear to the Senator from Connecticut that the effect of what I am trying to do now would, as he will see from the rest of my remarks, result in what he and I agree upon.

I ask unanimous consent that this amendment be in order at this time.

Mr. WEICKER. I would respectfully ask that the Senator from Alabama modify his amendment with respect to the dollar amount that he seeks to amend, otherwise it is my understanding the amendment is going to be out of order and I would not agree to a unanimous-consent request. The committee amendment is not up for amendment at this point.

Mr. HELMS. Will the Senator from Alabama yield to me?

Mr. DENTON. I yield to the Senator from North Carolina.

Mr. HELMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. DENTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. HELMS. I object.

The PRESIDING OFFICER (Mr. DURENBERGER). Objection is heard.

The legislative clerk resumed the call of the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I am about to propound a unanimous-consent request. I would invite the attention of the distinguished Senator from Connecticut. If he has objection, of course, I will withdraw it. I believe it will get us out of this parliamentary maze.

I ask unanimous consent, Mr. President, that we return to committee amendment No. 7; further, that the committee amendment be agreed to; and, further, that the language be considered original text with no point of order being considered waived, and that the amendment by the distinguished Senator from Alabama (Mr. DENTON) therefore be in order.

The PRESIDING OFFICER. Is there objection?

Mr. WEICKER. Reserving the right to object, might I just suggest—and I think I might not object—for about a minute the absence of a quorum so that the distinguished Senator from North Carolina and I can discuss a certain point?

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HELMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, the Senator from Alabama wishes to modify his amendment, which will take care of the parliamentary situation in another way. Therefore, I withdraw my unanimous-consent request.

The PRESIDING OFFICER. The request is withdrawn.

UP AMENDMENT NO. 621, AS MODIFIED

Mr. DENTON. Mr. President, I send a modification of the amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be so modified. The amendment, as modified, will be stated.

The legislative clerk read as follows:

The Senator from Alabama (Mr. DENTON), for himself, Mr. HATCH, Mr. HUMPHREY, Mr. MCCLURE, Mr. HELMS, Mr. NICKLES, Mrs. HAWKINS, Mr. THURMOND, Mr. HAYAKAWA, Mr. SYMMS, and Mr. LAXALT proposes an unprinted amendment numbered 621, as modified.

On page 32, on line 23, strike out "$241,000,000".

Mr. DENTON. Mr. President, my amendment would delete funding from the State, Justice, Commerce, and Judiciary appropriations for the Legal Services Corporation.

As I have said many times before, I strongly believe that the poor have legitimate requirements for legal assistance. To some extent, we can meet these requirements through alternative sources, such as the Older Americans Act and title XX. In my judgment, the most appropriate way to deliver legal services to the poor would be through increased pro bono participation on the part of the private bar.

While I am not opposed to a limited and appropriate Federal role in helping provide the services, I have four reasons for my belief that funding for the Legal Services Corporation should be deleted from this appropriations bill.

First, there is currently no authorization for the Corporation.

Second, the record shows that the Legal Services Corporation has immersed itself in social activism.

Third, the Legal Services Corporation has no real accountability imposed upon it.

Fourth, this appropriations bill, itself, could be a target of a veto if substantial cuts are not made.

Mr. President, I am going to expand now on each of these four points.

First, there has been no authorizing legislation for the Legal Services Corporation since September 1980. The Corporation was one of the few programs to benefit from the fact that the Federal Government operated on a continuing resolution through fiscal year 1980 and it still continues to receive funds in this fashion.

There is an authorization bill, S. 1533, on the Senate calendar which extends the Corporation at $100 million for each of the next 3 years. Consideration of this authorizing legislation should take place before we consider appropriations for the Legal Services Corporation. We simply do not have the time to debate many of the issues surrounding the Corporation on an appropriations bill, nor do we have the freedom to add enforceable restrictions or offer alternative means of delivering legal services such as judicare, tax incentives for private attorneys, or a block grant approach, like that originally requested by the President.

The decision as to the precise form legal assistance is to take should be considered in due course prior to this usurpative appropriation.

Second, in addition to the impropriety of prospective usurpation, there is special need to examine this controversial program. This Senator agrees with the President of the United States that the Corporation is not the proper vehicle to provide Federal financing of legal assistance to the poor.

Mr. President, the Legal Services Corporation has engaged in social activism. The list of social engineering endeavors of the Corporation is long, but I will cite a few examples. The LSC has worked to secure approval of a Massachusetts measure to establish a graduated income tax; to exert pressure on behalf of more Federal money for food stamps and related programs; and to lobby against the adoption of President Reagan's economic recovery program. In addition, the Corporation's recipients have sued to return part of the State of Maine to the Passamaquoddy and Penobscot Indians, have sued U.S. Steel in order to prevent the shutdown of an unprofitable plant, and have sued to prevent the University of California from engaging in research to develop labor-saving farm machinery.

All this has been done in the name of their nominal responsibility of providing legal services to the poor who require them. Social change is something that takes place in this country naturally and falls within the responsibility of the legislatures and Congress, precisely because these bodies are comprised of elected officials answering to the taxpayers of this country. The Legal Services Corporation has no such authority or responsibility.

My third point is that the Corporation is not subject to an effective system of accountability. The members of the Corporation, by past performance, have no apparent desire to enforce the policy guidelines laid upon it by Congress. Time and time again, Congress has found it necessary to put restriction after restriction on the use of funds by the Corporation in an attempt to get the Corporation on the track originally intended. I have no objection to the funding restrictions currently being proposed for the activities of the Corporation, if we were taking all the amendments that have been proposed for that purpose. However, given the LSC's track record, the nominal assignment of additional restrictions to it would be useless. We must use more than the pen if we wish to effectively prohibit the Corporation from promoting its questionable causes.

Finally, Mr. President, the total funding level of the bill we have before us—the overall appropriation bill—is almost $450 million above the President's September budget request. As late as this past Tuesday, the President indicated his intention to veto any appropriations bill that exceeded his budget. By eliminating the $241 million for the Legal Services Corporation, we can cut the excess in H.R. 4169 by over half. We in the Congress must take action to eliminate wasteful spending if we are to avoid national bankruptcy.

I must say again that a bankrupt nation can provide no services to the poor.

All of us will be poor. We are looking at a $1 trillion national debt, with increasing deficits anticipated beyond that.

I have been assured by the White House of their unequivocal support for this amendment. The Director of the Office of Management and Budget has also written a letter endorsing my amendment. I ask unanimous consent that the letter be printed in the RECORD.

I hope that my colleagues will support this amendment.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

OFFICE OF MANAGEMENT
AND BUDGET,
Washington, D.C.

Hon. JEREMIAH DENTON,
U.S. Senate,
Washington, D.C.

DEAR JEREMIAH: This letter expresses the Administration's position on appropriations for the Legal Services Corporation. As you know the authorization for the corporation expired at the end of fiscal year 1980.

The Administration strongly opposes the funding of the corporation and has not recommended funding in fiscal year 1982. Legal services are an authorized activity for funding within the social and community services block grants. Under these financing mechanisms States have broad discretion to finance an array of social services based on an assessment of local and individual needs. We believe there would be sufficient funding for these activities at the levels we recommended for 1982.

Additional funding for such activities in the State, Commerce, Justice appropriation would maintain a narrow categorical program and increase federal spending. Therefore, we support amendments to delete funding for this unauthorized program from the pending appropriations bill.

Sincerely,

DAVID A. STOCKMAN,
Director.

Mr. DENTON. Mr. President, I yield to the distinguished Senator from South Carolina who has a brief statement to make.

Mr. THURMOND. Mr. President, today, I rise to express my support for the amendment offered by my distinguished colleague from Alabama (Mr. DENTON) to delete funding for the Legal Services Corporation.

As I have stated on several occasions, I support the overall goal of equal access to the courts for the poor. However, I do not feel that the present system of providing Government aid for this effort through the federally-financed Legal Services Corporation is the most desirable means of meeting that goal. This Corporation, originally designed to give aid to those Americans too poor to afford legal help in such basic matters as settling disputes with their landlords, or domestic relations problems such as divorce and child support, has instead become a weapon used by social and judicial activists in an unending battle against the very Government that funds their activities.

Rather than attending to the legitimate, basic legal needs of the poor and disadvantaged, the grantees of the Corporation and their employees have repeatedly misued taxpayer dollars to promote their own ideals of social justice or change, using the poor they represent to obtain standing in their suits. Nor is this problem a temporary phenomenon, or one which could be easily remedied through legislation.

On several earlier occasions, Congress has attempted, through amendments to the Legal Services Corporation Charter, to restrict Corporation attorneys and other employees to proper legal assistance activities. Unfortunately, many Legal Services staffers have continued to ignore their charter, or interpreted it to suit their own purposes and notions of social activism, and I honestly do not feel that any new restrictions will substantially change this fact. It is partly because of this continued, serious misuse of public funds that I oppose further funding of the Legal Services Corporation at this time.

I believe that the task of providing basic legal services, if it is a responsibility of Government at all, is a responsibility which should be borne primarily by the States, local communities, and bar associations.

The administration supports the decentralization of Legal Services Corporation authority. Under such a proposal, State and local units of government, in cooperation with local bar organizations, would assume the responsibility for providing these services. This is an approach with which I wholeheartedly agree. The existing Legal Services Corporation provides no assistance which cannot be more efficiently and directly made available by State and local sources, possibly assisted to some extent by Federal funds. Furthermore, the resulting more localized administration of the programs would allow for a more effective review of the wayward activities of some program attorneys and other employees.

In conclusion, Mr. President, I hope my colleagues support the amendment which has been offered by the Senator from Alabama (Mr. DENTON). I remain convinced that experimentation on behalf of novel legal theories and rights, where it is pursued, should be pursued through the private sector, not with Government funding supplied for the purpose of helping lower income Americans with basic legal services.

Mr. President, I repeat, I think this is a matter for the States, the local communities, and the bar associations and not the primary responsibility of the Federal Government. The Federal Government has enough responsibility as provided in the Constitution and should not be called upon to provide services in any of the communities which are primarily the responsibility of the States, local communities, and local bar associations.

Mr. DENTON. Mr. President, I thank the distinguished Senator from South Carolina and regard his remarks as particularly valuable, since he is the chairman of the Committee on the Judiciary.

I yield now to the distinguished Senator from Iowa.

Mr. JEPSEN. Mr. President, I rise in support of the amendment of the Senator from Alabama. There are many examples of well-intentioned activities of legal services around the country, but all too frequently, in many cases, the end results have been disastrous.

Just last week, on November 6, 1981, there was a press release put out from the Governor's press office in the Commonwealth of Pennsylvania, and I should like to read from it:

Gov. Dick Thornburgh today expressed his gratitude at the safe release of the remaining hostages at Graterford State Prison.

"I am sure that all Pennsylvanians joined me in our prayers on behalf of these hostages and their families," the governor said.

Then we go down to the point at hand. Here again, I am quoting:

"While we have achieved the most important result of obtaining the safe release of the hostages, there are lessons for the future to be learned from this situation which should not be ignored," he added. The governor said he believed there were at least four such immediate lessons.

I quote again, because it is very important:

"The ringleader in the attempted escape and hostage-taking is a three-time convicted murderer," he said. "He murdered a police officer and, while in prison, murdered a warden and deputy warden. Nevertheless, Community Legal Services of Philadelphia insisted upon pushing for a court order in 1975 requiring that this convict be returned to the general prison population at Graterford. More disturbing, the Shapp administration agreed to have this order entered over the strong objections of its own professional correction officials.

"Thus, one lesson that must certainly be taken from this situation is that never again should government permit 'cause' groups, or even the courts, to place the purported rights of vicious criminals above the safety of law enforcement and correction officers without the strongest possible opposition."

Mr. President, I thank the Senator.

Mr. DENTON. Mr. President, I thank the distinguished Senator from Iowa for those highly relevant remarks, which indicate the degree to which the Legal Services Corporation has participated in the victory of the criminal over the victim.

I yield now to the distinguished Senator from New Hampshire for some remarks. He is on the Subcommittee on Labor and Human Resources, which delivered the bill which is still pending, about which you have heard.

Mr. HUMPHREY. I thank the Senator from Alabama.

Mr. President, I strongly support the amendment presently pending. The Legal Services Corporation is under the jurisdiction of the Labor and Human Services Committee which has reported out legislation authorizing the Corporation. That legislation should be the vehicle for debate rather than this appropriation bill.

There is simply no doubt that the Legal Services Corporation has abused its charter, and has engaged in activities over the years which were not only not intended but explicitly proscribed by the Congress.

There is an essential problem with the Legal Services Corporation, Mr. President. That is its independence. I know that there are those who argue that the independence of the Corporation was intended deliberately by the Congress, but in the opinion of this Senator, the Congress never has any business using taxpayer funds to fuel an entity over which

it has no meaningful oversight capability.

That is the problem with the Legal Services Corporation, Mr. President. It is so independent that this body, the Congress, has no meaningful oversight capability. That is why we have abuses year after year, notwithstanding our efforts to curb them through legislation. The essential problem is the independent nature of this corporation.

Let us fund legal services through a block grant or some other means, but let us finally put to rest this mischievous corporation, which should never have been created in the first place.

I thank the Senator from Alabama for yielding, Mr. President.

Mr. DENTON. Mr. President, I deeply respect my colleague from New Hampshire and I share in the sentiments he just expressed.

Mr. NICKLES. Mr. President, will the Senator yield for a question?

Mr. DENTON. I am happy to yield to my friend from Oklahoma.

Mr. NICKLES. The Senator stated that the bill before us today is how much over the September request?

Mr. DENTON. Almost $450 million.

Mr. NICKLES. If the Senator's amendment were adopted, that would save the taxpayers how much money?

Mr. DENTON. Two hundred forty one million dollars. Then we would take up the authorization bill on the Senate calendar, which has not yet been acted upon.

Mr. NICKLES. So we would save well over half what this bill is actually over the President's request, and then we would take up Legal Services in the authorization process, as we do with respect to every other agency.

Mr. DENTON. In the normal order of things. The Senator is correct.

Mr. NICKLES. With the approval of the Senator from Alabama, I ask unanimous consent that my name be added as a cosponsor of the amendment.

Mr. DENTON. I appreciate that, and I thank the Senator from Oklahoma.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. NICKLES. Mr. President, in addition to being opposed to H.R. 4169 because it is almost $450 million over the target figure for the President's September request, I oppose H.R. 4169 because a vote for H.R. 4169 would be a vote in favor of the reauthorization of the Legal Service Corporation as a separate entity.

I am certain that the poor, the handicapped, the elderly, and the minorities of this country still encounter discrimination and legal difficulties in their everyday existence. We have a certain responsibility to help those who do not have the means available to insure that their basic human rights are not violated. However, I do not feel that the Legal Services Corporation, in its present form, is the most appropriate Government response to such need.

When it was originally chartered in 1974, the Corporation was to represent the poor in basic day-to-day legal disputes such as family law, landlord-tenant problems, employment cases, and consumer litigation. However, certain case examples have shown that either this simple charter is either an impossibility to fulfill because of inherent contradictions or that it is too simple, with certain social-reform minded participants using it to achieve what they feel are appropriate social ends.

Whatever the case, the result has been disillusioning and disturbing. Despite an attempt by Congress to give guidance to the Corporation as what is appropriate involvement and what is not, there exists what appear to be flagrant violations.

For example, section 1007(b)(7) of the Legal Services Act of 1974 forbids the Corporation from making funds available to "initiate the formation; or act as an organizer of any association, federation, or entity." However, in the December 1979 issue of the Corporation-funded Research Institute on Legal Assistance publication, Clearinghouse Review, the Corporation solicited members for a "national coalition, citizens for tax justice * * * to promote those programs active in tax reform activities." One would be hardpressed not to call this initiation or organization.

Also, this past May, the Office of Management and Budget documented the Corporation's widespread violation of Federal laws prohibiting lobbying. They found that through the use of State and local recipient organizations, the Legal Services Corporation developed an extensive lobbying campaign to support its reauthorization legislation. This was explained in a memo from Alan Houseman, Director of the Research Institute on Legal Assistance, which states that the group would be "increasing the Washington lobbying efforts of the Corporation * * * to successfully obtain support from Congress for the continuation of an aggressive legal services program." We cannot continue to tolerate such violations of this organization's own charter.

The Corporation charter also prohibits training or encouraging political activism, strikes, or demonstrations. But attorneys of the Florida Rural Legal Services have been active in organizing rent strikes.

They have also violated their charter by participating in a suit to integrate South Boston high school by forced busing.

The Corporation's charter also expressly prohibits the use of Corporation funds for "providing legal assistance with respect to any proceeding which seeks to procure a nontherapeutic abortion." However, by challenging State abortion laws and seeking Government funding of abortions which could hardly be called therapeutic, the Corporation again deviated from its stated purpose.

Legal Services has even represented the Klu Klux Klan, litigated on behalf of disability payments because of homosexuality, racial quotas in medical school admissions, and the mandatory hiring of heroin addicts by the New York Transit Authority. These cases seem abhorent to the spirit of the original act, an act designed only to provide legal aid necessary in basic everyday problems—not to lobby and litigate for social reform.

I do not think that the abuses I have mentioned can be corrected by more restrictions in the Legal Services statute. This has not worked in the past and I have no reason to think that it will work now. The very establishment of the Corporation as a separate structure not under the authority of any governmental department is at the root of the problem. In addition, trying to manage and oversee such a delicate and diverse task from the Federal level is itself an impossibility.

In my opinion, the best solution to the problem of how to best provide legal advice and assistance to those in need is to make funds available to the States. From their closer vantage point, they can make more intelligent decisions as to where the true needs exist and can monitor for abuse more effectively.

Let us be willing to call a bad apple bad, and not keep funding something which has shown itself to continually abuse the funds it receives. The American people are looking to Washington to get its house in order. This is a very good place for us to begin.

The PRESIDING OFFICER. The Senator from Alabama is recognized.

Mr. DENTON. Mr. President, I ask unanimous consent that Senator EAST be added as a cosponsor to the list including Senators HATCH, HUMPHREY, MCCLURE, HELMS, NICKLES, HAWKINS, THURMOND, HAYAKAWA, SYMMS, and LAXALT.

The PRESIDING OFFICER. Without objection, it is so ordered.

● Mr. LAXALT. Mr. President, I oppose continued funding for the Legal Services Corporation for two reasons. First, I think that any Federal funding for legal services programs should be authorized through block grants made to the States, with final authority for making funding priorities at the State level. Second, the Legal Services Corporation has conducted activities which raise serious questions about the level of services provided to those truly in need of free legal assistance.

The emphasis of the budgeting process during this Congress has been on returning responsibility to the States. In addition to giving States a greater role in the management of programs, we have given them increased responsibility to determine the priorities among a variety of beneficial programs requesting grants from Government.

We have long recognized that the regional differences require special consideration before the imposition of national standards. What is appropriate in the Northwest may be ridiculous in the South. Further, from State to State there are different levels of need for the services traditionally supplied by Government. By tailoring programs to specific needs, we can provide essential services without wasteful overlap or inefficient administration.

As the Federal budget is trimmed, and each dollar is carefully scrutinized to insure that it is spent effectively, special attention must be given to State assessment of the need for various programs. Categorical funding substitutes the distant decisionmaking of the Congress for

the hands-on judgment of State and local government.

In addition to the argument that the form of funding under which we will authorize Legal Services Corporation is undesirable, there are valid arguments against the continuation of the Corporation itself. There is an acknowledged need for free legal assistance for those who cannot afford to pay. The American Bar Association Code of Professional Responsibility recognizes the individual duty of each attorney to provide pro bono services in order to insure adequate legal assistance for all members of the community.

The ABA also states, however, that voluntary services offered by individuals cannot provide the full range of legal assistance required. I believe that the question to be considered at this point, given the professional responsibility canons, is whether the bar itself should play a bigger, more active role in providing these services, or whether that duty should rest with Government.

We must make sure that people are not deprived of legal assistance only because they are unable to pay. Certainly the words of Judge Learned Hand are pertinent:

> If we are to keep our democracy, there must be one commandment: Thou shalt not ration justice.

Legal Services Corporation was created to meet a real need. The bar had stepped away from its duty and the poor, needing counsel, had no place to turn for justice. But Legal Services Corporation did not concentrate on assisting the poor in eviction cases, in child support or custody cases, in individual discrimination cases.

Rather, Legal Services Corporation centered its activities on "public interest" law in the following kinds of cases: Successful Federal district court suit prohibiting Oregon counties from substituting local welfare for Federal food stamps; successful Federal district court litigation to compel Pennsylvania to provide transportation to hospital for woman inmate seeking a "nontherapeutic" abortion; Legal Aid Society of San Diego represented the Tom Hayden-Allied Coalition for Fair Rent in placing a rent control initiative on the California ballot; Massachusetts Law Reform Institute brought suit to compel a methadone maintenance clinic not to speed up addict detoxification or reduce addict dosages; and California Rural Legal Assistance sued Madera County to overturn local regulations which required welfare recipients to accept available agricultural work on penalty of jeopardizing their welfare eligibility.

In addition, the Legal Services Corporation has actively engaged in lobbying efforts. According to a May 1, 1981 report by the Office of the Comptroller General:

> . . . we have concluded that LSC has itself engaged and allowed its grant recipients to engage in lobbying activities *prohibited by Federal law.* (emphasis added)

This list could go on. I consider it a "parade of horribles" in many ways. It is a listing of agency abuse and overstepping, in spite of efforts by Congress to bring the agency back into the activities for which it was designed.

We have amended authorization requests before in an effort to curtail the LSC. We have, most obviously, failed to do that effectively. We are now being asked again to appropriate funds, with amendments to bring the LSC into line. I am unwilling to continue to fund a program which does not meet the need for which it was created, does not respond to the directives of the Congress, and does not have an adequate degree of State input into the kinds of services which are actually required.●

● Mrs. HAWKINS. Mr. President, I support the amendment offered by Senator DENTON to delete funding for the Legal Services Corporation. While I support the restrictions placed upon the Legal Services Corporation by the Senate Appropriations Committee, I have serious doubts if the restrictions will be sufficient to prevent abuses by the Corporation. I strongly support adoption of the McCollum amendment which clarifies that illegal aliens are not entitled to free legal assistance by LSC attorneys.

In fact, on October 5, I introduced language identical to the McCollum and Kazen House amendments as printed amendment 584 to S. 1533, the reauthorization of the Legal Services Corporation Act. But the clarifications contained in this amendment are necessitated by a flouting of the restrictions placed on the Legal Services Corporation by previous appropriations bills.

During the 96th session of Congress, a restriction was placed on the appropriations bill that stated:

> None of the funds appropriated in this title may be used to carry out any activities for or on behalf of any individual who is known to be an alien in the United States in violation of the Immigration and Nationality Act or any other law, convention, or treaty of the United States relating to the immigration, exclusion, deportation, or expulsion of aliens.

Despite this restriction, the Legal Services Corporation attorneys have continued to represent illegal aliens. The General Counsel of the Legal Services Corporation has interpreted this restriction as applying only to aliens that have completed adjudication and on whom a final order of deportation is outstanding which is not subject to further judicial review.

We have a situation in Florida where thousands of illegal aliens have ignored our national immigration laws and sovereignty as a nation to enter our country illegally, instead of applying for asylum through the normal channels. This has created a situation where an alien who enters the United States illegally has more due process protections than his counterpart in Haiti who applies for asylum through the normal legal process. The illegal entry of these people into Florida has created a tremendous backlog in the processing of the asylum applications. This backlog will grow further if we allow taxpayer dollars to pay for legal assistance to aid these individuals in their fight to stay in this country.

During the House debate on this issue, Representative KAZEN of Texas mentioned that some legal aid attorneys have illegal aliens representing as much as two-thirds of their caseloads. Therefore, while I believe that a further clarification of congressional intent on this issue is desirable, I believe that the authorization bill, not the appropriations bill, is the proper vehicle for this restriction. Restrictions attached to previous appropriation bills have been ignored or circumvented by the Legal Services Corporation. In fact, the circumventing of this restriction by the Legal Services Corporation raises severe doubts in my mind whether any restrictions placed upon this entity will be heeded.●

● Mr. HAYAKAWA. Mr. President, once again, the Senate is considering the question: Should Federal tax dollars be used to fund the Legal Services Corporation? I must respectfully disagree with my colleagues who believe that we should continue to appropriate money for this organization, which has clearly abandoned its mandate of providing legal services for the poor.

Legal Services attorneys have devised their own mandate for impact law, lobbying activities, and class actions, at the expense of serving individual client needs. With fiscal austerity as the order of the day, how can we afford to spend $200 million on an organization which has politicized the plight of the poor in order to advance their own beliefs?

I believe that we cannot continue to fund the Legal Services Corporation. Charges of illegal activities have emanated from sources as diverse as the "New Republic" on the left and the "Conservative Caucus" on the right. Many of these charges have been conclusively proven. The controversial nature of the Legal Services Corporation is further evidenced by the Senate's reluctance to consider its reauthorization bill, S. 1533.

The Corporation has been functioning without authorization since September 1980. It is a political hot potato, with advocates and foes lobbying Members of Congress.

However, there is no doubt in my mind that the opponents have overwhelming evidence to justify the amendment I am introducing today with Senator DENTON, an amendment which will terminate funding for the Legal Services Corporation.

The Corporation was established in 1974 as a private, nonprofit organization to fund legal services for the poor in civil matters. Had the Legal Services Corporation adhered to its great and noble intentions, it would not have mushroomed into a bureaucracy more eager to make a political statement than to help the poor.

I cannot, in good conscience, support funding for a Government-based organization which has strayed from its original mission into ideological pursuits where it was never intended to be involved.

I strongly believe that the majority of Americans do not support the Legal Services Corporation. I am especially impressed by the letters I have received which condemn its activities. These are

not form letters, generated by a special interest group.

These are individual, mostly handwritten letters from the largest interest group of all, our citizens. These people are outraged by the confrontation politics of the Legal Services Corporation. I would like to share a few of their comments with you.

The people in Legal Services do just about everything except what they are supposed to do. Let's abolish Legal Services.

Much of the Legal Services activity looks like "make work" stuff . . . This must stop . . . May I have your support for abolishing Legal Services Corporation?

I also heard from a legal services worker in California who opposes Legal Services Corporation funding. She wrote:

I have worked in the legal service field for over 20 years in an administrative capacity, and I can tell you that locally controlled programs provide more real legal services for low-income people than federally funded programs . . . I understand you are considering "block grants" to states so they may continue legal service programs now in existence under state control. I hope that if this is accomplished that something can be done about the priorities set by these programs. The present people who are involved are more interested in "impact law" or "class actions" than in helping people with their everyday legal needs.

If time permitted, I could share many more of these comments with you. However, I believe I have made my point—our citizens have recognized the unparalleled violations of congressional intent by the Legal Services Corporation. I recomend that we take the advice of our citizens, and vote today to terminate its funding.

Just what kind of abuses are perpetrated by the Legal Services Corporation and the organizations which it funds? Section 1007(b)(4) of the Legal Services Act states:

No funds made available by the Corporation under this subchapter either by grant or contract, may be used for (any) political activity.

Yet the Contra Costa, California Legal Services boasts about its tradition of strong community involvement and aggressive participation in local political, social, and economic battles on behalf of its client communities.

Massachusetts Law Reform Institute spearheaded a lobbying campaign for the graduated income tax in Massachusetts.

And an article in Legal Services-funded Clearinghouse Review states:

A community group's main consideration for example, might be to back a sympathetic political faction or public agency over an unsympathetic one.

Section 1007 of the Legal Services Act prohibits lobbying by recipients except on certain instances which were intended to be narrowly defined. The organizations I described are engaged in outright lobbying. The same subsection prohibits funding recipients from actively working on behalf of or against balloting initiatives.

Yet, in Tehema County, Calif., the federally subsidized legal aid group litigated against an action which had already been approved by a majority of the local voters. The plaintiffs lost the fight on every level, but their tactics delayed implementation of the action for several years at a substantial cost to the taxpayers.

Passage of this amendment will not mean that we have abandoned our concern for access to justice for the poor. I support the administration's plan to provide federally funded legal services through the community services block grant approved earlier this year. I agree with the President's belief that there are other local resources available to poor people who need legal aid.

Presently, with relaxed bar association rules regarding advertising, fee competition, and so forth, many private sector firms have organized efficient means of delivering first-rate legal services to the poor in such day-to-day areas as divorces, evictions, and sales contracts. Fees for such services are exceedingly modest, and could be made even lower if a "free" Federal mechanism were not in place to provide such representation.

I am convinced that we, as Senators, have a responsibility to terminate an organization which has deviated from its original purpose of being an impartial arbiter for the indigent of this country. I wish to share a final comment from one of my constituents in Lodi, Calif.:

Like the plague of fruitflies troubling our land, this costly, harmful government agency deserves extinction.

Mr. President, I urge favorable consideration of this amendment.●

● Mr. WILLIAMS. Mr. President, I rise in support of the reauthorization of the Legal Services Corporation at the $241 million funding level.

As we all know, for the past year, this administration has continuously recommended that the Congress scuttle this program that has played a crucial role in our Nation's civil justice system.

According to the administration, the Federal Government is the root of our economic turmoil. There is no Government program that is 100 percent on target or that can boast there is no waste.

While the Legal Services Corporation, like most human institutions, can be subjected to constructive criticism to improve its effectiveness, there is no hard evidence that eliminating the Corporation will either cure inflation or balance the budget.

The LSC is an independent corporate entity that serves well in our adversarial system of justice that strives to both defend and enforce individual rights.

While I am firmly committed to cutting the Federal deficit and bolstering our beleaguered economy, I cannot support an effort to emasculate assistance benefits of the working poor.

The Federal Government has administered a program of legal services for the poor since 1966, and enacted legislation in 1974 creating the Legal Services Corporation. With the inception of that 1974 statute, it was the intent of the Congress to provide "all low-income individuals and families with at least minimum access to legal services." Our commitment to that goal should be as strong now as it has been in the past.

In my home State of New Jersey, there are 33 Legal Service offices providing legal assistance in civil cases to 40,000 residents who could not otherwise afford a lawyer. I am proud of that record.

The counseling and litigation activities funded by the Legal Services Corporation provide quality legal advice, fair representation and equal access to justice. Local programs do not provide criminal representation. Most of the legal problems of eligible clients fall into four broad categories: Family law; administrative benefits, including medicaid, AFDC, and SSI; consumer law; and, housing law.

Approximately 15 percent of those cases are actually litigated and approximately 85 percent are resolved through advice, negotiation, consultation, and other out-of-court mechanisms.

This body must not deny our Nation's nearly 30 million citizens living in poverty these essential services. The economically disadvantaged have legal problems too, and I would urge my colleagues not to further condemn those individuals who have already suffered dismally in the name of budget cuts.

I wholeheartedly encourage your support for the reauthorization of the Legal Services Corporation.●

LEGAL SERVICES CORPORATION

Mr. EAGLETON. Mr. President, for the third time this year, the Senate is faced with an amendment which seeks to eliminate Federal funding for legal services. This amendment tonight is, in essence, the same amendment which was offered on the floor on April 1, and again on May 7. In the first instance, the amendment was withdrawn after considerable debate. In the second instance, it was overwhlemingly defeated by a vote of 72 nays to 24 yeas.

This is clearly not a new issue, and not one on which we must engage in prolonged debate. I will take only a moment to remind my colleagues that the legal services program conducted under the authority of the Legal Services Corporation, is based upon the very simple, fundamental premise that the poor are entitled to legal representation to redress their grievances and defend their interests.

Throughout the debate on the Corporation, it seems to me that one key element of our judicial system is overlooked. Providing access to the system for the poor does not provide the Corporation clients with the right to win. It simply provides the poor with the right to be heard. No one, rich or poor, has the right to win unless the law is on his or her side.

The view that the national ideal of equal justice under law is disserved by effectively excluding the poor from the opportunity to seek legal recourse has been eloquently expressed by Mr. Justice Powell as follows:

Equal justice under law is not merely a caption on the facade of the Supreme Court building. It is perhaps the most inspiring ideal of our society. It is one of the ends for which our entire legal system exists. And central to that system is the precept that justice not be denied because of a person's

race, religion or beliefs. Also, it is fundamental that justice should be the same, in substance and availability, without regard to economic status.

I urge defeat of this amendment.

Mr. DENTON. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I rise in opposition to this amendment.

We heard during earlier discussions, both in this debate and in earlier debate, how vital legal services are in this country to the very survival of the less fortunate in our Nation. Yet, the Senator from Alabama proposes to eliminate the one mechanism that effectively and efficiently provides those services. The Senator from Alabama says that it is not so. He tells us that other sources of money and services will continue to provide legal assistance to the poor.

I say to the Senator that he is wrong. We cannot rely on the private bar or on the State and local governments to provide this vital assistance. The private bar has already greatly expanded its pro bono activities. I am sure it will continue to expand them. But it recognizes, as we should, that it can only supplement, not replace, a federally-funded legal services program. Without the framework provided by this program to facilitate pro bono activities, these activities will undoubtedly dwindle.

Neither are State and local governments the answer. They have already been handed the responsibilities for more Federal programs, while being given fewer Federal dollars to support these programs. Only last week, three Governors—one of them a Republican—told the Senate that the financial burden imposed on their States was already too large.

Moreover, such a shift of responsibility would be administratively wasteful. It would require the creation of 50 new State bureaucracies to replace a single extremely efficient one—one which uses less than 3 percent of the Corporation's budget.

Nor would such a shift permit more local control. Legal Services agencies are already governed by local boards of directors. It would simply subject this vital program to increased local and State political pressures and manipulation.

This amendment would mean an end to legal services for many poor people. It would mean a return to the exclusion of the poor from the legal system. It would mean abandonment of the principle of equal justice for all.

It is important, Mr. President, to realize that we are talking about a program which has seen a 25 percent reduction from its current level of funding. If we consider inflation, the cut is 33 percent.

In listening to the Senator from Alabama speak about some of the activities of the Legal Services attorneys, I noted that he talked about their representation of the Indians in the Passamaquoddy case. Am I correct?

Mr. DENTON. That is right.

Mr. KENNEDY. Does the Senator realize how that representation was ultimately resolved?

Mr. DENTON. Yes.

I was aware that there may have been some argument regarding the Legal Services Corporation's action to try for the return of land from the State of Maine to those two tribes.

Mr. KENNEDY. Does the Senator understand what the basic arguments for the Passamaquoddy Indians were? There were a series of disputes over land in New England. The disputes arose as a result of treaty obligations by the United States and, therefore, there were very serious questions that were being raised not only in Maine but in my own State of Massachusetts.

I am just wondering whether the Senator thinks that the ultimate resolution in the Passamaquoddy dispute was unfair, inequitable, and unjust? I would be very interested in his opinion, particularly since the Senator from Maine, Senator COHEN, was very much involved in that final resolution.

Mr. DENTON. I am respectful of the concerns of the Senator from Massachusetts for righting an injustice.

It is my understanding that the Legal Services Corporation exists to provide services principally for individuals who are poor and cannot otherwise receive those services. I recognize that there could be a group of these individuals who have such needs.

But from my examination of the Legal Services Corporation's record and activities there is much too much expenditure of money and time on social engineering, on less justifiable grounds than those which you might be able to provide regarding these Indians.

Mr. KENNEDY. I welcome the fact that the Senator would feel that Indians, whose legitimate rights had been violated and who could not afford legal representation, were entitled to the kind of legal services that they in fact received.

I quite frankly felt that the work that was done by Legal Service attorneys in this and other areas was not social engineering but in fact was quite constructive.

I yield the floor.

Mr. DENTON. Mr. President, if the Senator will yield for a question, is he aware that the Indians' original suit was for return of two-thirds of the State of Maine?

My staff member worked for the Senator from Maine when that suit was originated.

Mr. KENNEDY. What is the Senator's point? There was a land dispute that was brought by the Indian tribes and ultimately it was resolved. Ultimately, through the efforts of Legal Services attorneys, the Indians received some satisfaction.

I dare say that they would not have received it had it not been for the legal sevices program. If the Senator from Alabama does not believe that kind of activity was justified, I take strong exception.

Those Indians did not have the resources to be able to bring a case. Eventually they were able to bring a case. It was a long and difficult struggle. Eventually it was resolved. So those rights have been resolved and they would not have been resolved unless there was a legal services program.

Their initial position is unimportant. Litigation strategy often dictates taking extreme positions to benefit a client. What is important is the fact that in a number of the Indian land cases affecting New England there were various injustices that were done to a series of the Indian tribes and that the Legal Services Corporation, as correctly pointed out by the Senator from Alabama, was involved in righting those injustices.

Quite frankly, those rights had not been respected for many years. I am glad that ultimately those issues have been resolved.

Mr. DENTON. I yield to the Senator from North Carolina.

Mr. HELMS. Mr. President, I thank the distinguished Senator from Alabama.

Mr. President, this latest debate is on whether to continue the perfectly outrageous use of the taxpayers' money for a misrepresented noble purpose.

I think back to the first year I was in the Senate, and I believe that was the first time that the horror stories about the abuse of this organization known as the Legal Services Corporation really erupted in this Chamber.

Since that time year after year I have heard Senators attempt to defend it with all sorts of self-serving declarations, which is fine.

The point is that there is a great preponderance of opinion among respected citizens across this country that the abuse of the original intent of this Corporation is apparent.

To state it in the most moderate terms, the Legal Services Corporation—and this is an understatement—is not the best device for providing essential legal services to the poor of our Nation.

I do not know how many times those of us who have questioned this organization have to repeat this statement, but let me repeat it again:

A fundamental aspect of any free society is the ability of its citizens to assert their rights before an independent and impartial judiciary.

Of course, we are agreed that the words "equal justice under law" are paramount in terms of our principles, but they have a hollow ring if substantial numbers of our citizens are denied their day in court because they cannot afford an attorney. So we all agree.

I do not yield to the Senator from Massachusetts or anyone else in my belief in that principle. That is not the point.

The proponents of and the apologists for the Legal Services Corporation repeatedly say that those who seek to eliminate funding for LSC are cruel and hardhearted. They imply or at least they would have others, principally the media, infer that we are seeking to deny the right of all Americans to legal representation. But nothing could be further from the truth.

The distinguished Senator from Alabama cannot, I believe, be challenged as

an American who was not willing to lay down his life for this country and its principles. I do not wish to embarrass him, but I hear so often that Americans are not allowed to have heroes any longer. JEREMIAH DENTON is my hero. I think back to the 7 years, I think it was, that JEREMIAH DENTON was a prisoner of war because he was willing to lay down his life if necessary for his country.

Here he is today saying a very logical and reasonable thing that the Legal Services Corporation by reason of its record no longer deserves to survive, that legal representation for the poor can be provided better in another way.

Any Senator who has a better record of defending his country than JEREMIAH DENTON let him stand now and challenge him.

JERRY DENTON loves his country and its principles, including the assurance of adequate and proper legal representation in the courts.

So I commend the able Senator for being willing to undertake what may well be a losing cause, but he has made his point in honesty and in truth. His amendemnt deserves to be approved, and I shall support it. I do support it.

But I must say, Mr. President, that I object to the caterwauling that occurs every time this issue comes to the floor, and especially do I resent the suggestions, the implications, the inferences that those who seek to provide a better way of legal representation for the poor are somehow hardhearted.

Mr. President, I am not going to get into the litany of horror stories about the abuses of this program by this Corporation, a Corporation that has been heedless of the messages sent year after year to the people operating it to clean up their act. They have refused to clean up their act.

It is still an abuse of the taxpayers' money, and I thoroughly agree with the Senator from Alabama that another way is available to assure—and I emphasize the word "assure"—adequate and essential legal services to the poor of this Nation.

Again I commend the Senator from Alabama on his amendment, and I urge its adoption.

Mr. COCHRAN. Mr. President, for the information of Senators, after the amendment of the Senator from Alabama is disposed of, if it is not adopted, it is the intention of this Senator to offer an amendment to reduce the funding level for the Legal Services Corporation to $100 million for the next year. This would make the funding level consistent with the amount provided in the first budget resolution previously agreed to by the Congress. It would also put the funding level at the same level provided in the authorization legislation that the Senator from Alabama has previously described. For the information of Senators, that is the intention of the Senator from Mississippi.

Mr. WEICKER. Mr. President, I ask for the yeas and nays on the amendment of the Senator from Alabama.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. DENTON. Mr. President, may I thank the Senator from North Carolina for his overly kind remarks, and express my deep admiration for his record of services, both before he got to the Senate and now in the Senate.

I thank the Senator from Mississippi for his clarification of the steps which we are taking to try to place this question in perspective.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Alabama. The yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from North Carolina (Mr. EAST), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator from Maryland (Mr. MATHIAS), the Senator from Oregon (Mr. PACKWOOD), and the Senator from Pennsylvania (Mr. SPECTER) are necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina (Mr. EAST) would vote "yea."

Mr. ROBERT C. BYRD. I announce that the Senator from Oklahoma (Mr. BOREN), the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), the Senator from Montana (Mr. MELCHER), the Senator from Ohio (Mr. METZENBAUM), the Senator from New York (Mr. MOYNIHAN), the Senator from Arkansas (Mr. PRYOR), and the Senator from Louisiana (Mr. LONG) are absent on official business.

I also announce that the Senator from Vermont (Mr. LEAHY), and the Senator from Michigan (Mr. LEVIN) are absent because of illness.

I further announce that, if present and voting, the Senator from Ohio (Mr. METZENBAUM), and the Senator from Michigan (Mr. LEVIN) would each vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 21, nays 61, as follows:

[Rollcall Vote No. 370 Leg.]

YEAS—21

Armstrong	Helms	Simpson
Byrd, Harry F., Jr.	Humphrey	Symms
Denton	Jepsen	Thurmond
Garn	Laxalt	Tower
Grassley	McClure	Wallop
Hatch	Nickles	Zorinsky
Hawkins	Proxmire	
	Quayle	

NAYS—61

Abdnor	Domenici	Murkowski
Andrews	Durenberger	Nunn
Baker	Eagleton	Pell
Baucus	Exon	Percy
Bentsen	Ford	Pressler
Biden	Gorton	Randolph
Boschwitz	Hatfield	Riegle
Bradley	Heflin	Roth
Bumpers	Heinz	Rudman
Burdick	Hollings	Sarbanes
Byrd, Robert C.	Huddleston	Sasser
Chafee	Inouye	Schmitt
Chiles	Jackson	Stafford
Cochran	Johnston	Stennis
Cohen	Kassebaum	Stevens
D'Amato	Kasten	Tsongas
Danforth	Kennedy	Warner
DeConcini	Lugar	Weicker
Dixon	Matsunaga	Williams
Dodd	Mattingly	
Dole	Mitchell	

NOT VOTING—18

Boren	Hart	Melcher
Cannon	Hayakawa	Metzenbaum
Cranston	Leahy	Moynihan
East	Levin	Packwood
Glenn	Long	Pryor
Goldwater	Mathias	Specter

So Mr. DENTON's amendment (UP No. 621), as modified, was rejected.

Mr. WEICKER. I move to reconsider the vote by which the amendment was rejected.

Mr. WALLOP. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ANNOUNCEMENT OF POSITION ON VOTE

Mr. SPECTER. Mr. President, had I been present, I would have voted against the Denton amendment, in favor of the community legal services program. I was absent at the time because I was at the White House discussing criminal justice legislation with the President and others.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I have a couple of requests I want to make but I understand the distinguished minority leader has not yet reached the floor. I shall forbear to make those requests at this time. I yield the floor.

The PRESIDING OFFICER. The question recurs on the committee amendment.

Mr. WEICKER. Mr. President, by agreement with the ranking member, I ask unanimous consent that the committee amendments be laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT 622

(Purpose: To reduce funding for Legal Services)

Mr. COCHRAN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Mississippi (Mr. COCHRAN) proposes an unprinted amendment numbered 622.

Mr. COCHRAN. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 32, line 23, strike out "$241,000,000" and insert in lieu thereof "$100,000,000".

Mr. COCHRAN. Mr. President, I ask unanimous consent that the following Senators be listed as cosponsors of this amendment: Mr. HAYAKAWA, Mr. NICKLES, and Mr. STENNIS.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

The PRESIDING OFFICER. The Chair recognizes the majority leader.

Mr. BAKER. Mr. President, I have two unanimous-consent requests which I understand have been cleared by the distinguished minority leader.

TREATY OF TLATELOLCO

Mr. President, as in executive session, I ask unanimous consent that at 2 p.m. today, the Senate go into executive session to consider the Treaty of Tlatelolco, Executive Calendar No. 10.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Further, I ask unanimous consent that the treaty be advanced through all its parliamentary stages, up to and including the presentation of the resolution of ratification.

The PRESIDING OFFICER. Without objection, the treaty will be considered to have passed through its various parliamentary stages up to and including the presentation of the resolution of ratification, which the clerk will state.

The legislative clerk read as follows:

RESOLUTION OF RATIFICATION

Resolved (two-thirds of the Senators present concurring, therein), That the Senate advise and consent to the ratification of Additional Protocol I to the Treaty for the Prohibition of Nuclear Weapons in Latin America, also known as the Treaty of Tlatelolco, signed on behalf of the United States of America on May 26, 1977 subject to the following understandings:

(1) That the provisions of the Treaty made applicable by this Additional Protocol do not affect the exclusive power and legal competence under international law of a State adhering to this Protocol to grant or deny transit and transport privileges to its own or any other vessels or aircraft irrespective of cargo or armaments.

(2) That the provisions of the Treaty made applicable by this Additional Protocol do not affect rights under international law of a State adhering to this Protocol regarding the exercise of the freedom of the seas, or regarding passage through or over waters subject to the sovereignty of a State.

(3) That the understandings and declarations attached by the United States to its ratification of Additional Protocol II apply also to its ratification of Additional Protocol I as follows:

That the United States Government understands the reference in Article 3 of the treaty to "its own legislation" to relate only to such legislation as is compatible with the rules of international law and as involves an exercise of sovereignty consistent with those rules, and accordingly that ratification of Additional Protocol II by the United States Government could not be regarded as implying recognition, for the purpose of this treaty and its protocols, or for any other purpose, of any legislation which did not, in the view of the United States, comply with the relevant rules of international law.

That the United States Government takes note of the Preparatory Commission's interpretation of the treaty, as set forth in the Final Act, that, governed by the principles and rules of international law, each of the contracting parties retains exclusive power and legal competence, unaffected by the terms of the treaty, to grant or deny non-contracting parties transit and transport privileges.

That as regards the undertaking in Article 3 of Protocol II not to use or threaten to use nuclear weapons against the Contracting Parties, the United States Government would have to consider that an armed attack by a Contracting Party, in which it was assisted by a nuclear-weapon state, would be incompatible with the Contracting Party's corresponding obligations under Article I of the treaty.

II

That the United States Government considers that the technology of making nuclear explosive devices for peaceful purposes is indistinguishable from the technology of making nuclear weapons, and that nuclear weapons and nuclear explosive devices for peaceful purposes are both capable of releasing nuclear energy in an uncontrolled manner and have the common group of characteristics of large amounts of energy generated instantaneously from a compact source. Therefore the United States Government understands the definition contained in Article 5 of the treaty as necessarily encompassing all nuclear explosive devices. It is also understood that Articles 1 and 5 restrict accordingly the activities of the contracting parties under paragraph 1 of Article 18.

That the United States Government understands that paragraph 4 of Article 18 of the treaty permits, and that United States adherence to Protocol II will not prevent, collaboration by the United States with contracting parties for the purpose of carrying out explosions of nuclear devices for peaceful purposes in a manner consistent with a policy of not contributing to the proliferation of nuclear weapons capabilities. In this connection, the United States Government notes Article V of the Treaty on the Non-Proliferation of Nuclear Weapons, under which it joined in an undertaking to take appropriate measures to ensure that potential benefits of peaceful applications of nuclear explosions would be made available to non-nuclear-weapons states party to that treaty, and reaffirms its willingness to extend such undertaking, on the same basis, to states precluded by the present treaty from manufacturing or acquiring any nuclear explosive device.

III

That the United States Government also declares that, although not required by Protocol II, it will act with respect to such territories of Protocol I adherents as are within the geographical area defined in paragraph 2 of Article 4 of the treaty in the same manner as Protocol II requires it to act with respect to the territories of contracting parties.

Mr. BAKER. Mr. President, I ask unanimous consent that the resolution be considered under the following time agreement: 15 minutes on the resolution of ratification to be equally divided between the chairman of the Foreign Relations Committee and the ranking minority member, or their designees; and that the reported committee understandings be deemed agreed to, with no other action to occur on the resolution of ratification with the exception of the vote on the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that it be in order to ask for the yeas and nays at this time.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask for the yeas and nays on the resolution.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER. I ask unanimous consent that, following the vote on the resolution of ratification and a motion to table the motion to reconsider, the Senate return to legislative session and resume the State-Justice-Commerce appropriations bill or such other matters as the Senate may at that time have deemed appropriate.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONSIDERATION OF THE NOMINATION OF C. EVERETT KOOP ON MONDAY, NOVEMBER 16, 1981

Mr. BAKER. Mr. President, as in executive session, I ask unanimous consent that at the hour of 3:30 p.m. on Monday, November 16, the Senate go into executive session to consider the nomination of C. Everett Koop under the following time agreement: 1 hour on the nomination to be equally divided between the chairman of the Labor and Human Resources Committee and the ranking minority member or their designees; and that the agreement be in the usual form.

Further, I ask unanimous consent that it be in order now to order the yeas and nays on the confirmation of C. Everett Koop.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER. Mr. President, I thank the Senators.

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS, 1982

The Senate continued with consideration of the bill.

Mr. COCHRAN. Mr. President, the purpose of the amendment I have offered is to reduce the funding in this bill for the Legal Services Corporation from the amount of $241 million for the next fiscal year to $100 million. The reason for the amendment, Mr. President, is that when the Senate had before it the first budget resolution, this body agreed to set a level of funding at the amount of $100 million for this program. The committee increased that amount by $141 million.

We have heard a good deal of talk about how the appropriations bills are out of line with the budget targets, that some of them were exceeding the budget requests of the administration, and that we are running the risk of veto of these bills. I think we are all very interested in trying to hold these funding levels down to the lowest possible amount so we can stay within the budget commitment that has been made and try to get the bill signed by the President. This is a program that has been very widely discussed over the years since its creation.

People have strong feelings about it on both sides. It is not the purpose of this Senator to rehash all of the arguments for and against the merits of the Corporation. The fact is that this is the only legal services program that we have right now. There is legislation that has been reported from the legislative committee to revise the program, and there are proposals to create a new program in a block grant approach to delivering legal services to the poor. That is not yet law. The present law is a program under the auspices of the Board of Directors of the

Legal Services Corporation. But the funding level is the point that is at issue in this amendment.

Over the past 6 years, funding for the Legal Services Corporation has been increased by 248 percent. Some say if the level of funding in the bill is reduced, to what I am suggesting in this amendment, it will cripple the program. I suggest there are ways to find savings in this program just as there are in many other programs that the Federal Government supports. I have a good example, I think, of one way we can approach that dilemma.

Back in the summer, some of my constituents called my attention to a newspaper story contained in the Oxford Eagle of August 20. It is a story relating to a sign that was displayed in the window of the office of the North Mississippi Rural Legal Services. The sign said, "The Oxford Office of North Mississippi Rural Legal Services is no longer accepting new cases due to proposed Reagan budget cuts." Big sign, big letters, professionally painted, in the front window. In the same newspaper, Mr. President, 1 week later, is an invitation for bids for furnishings for the North Mississippi Rural Legal Services Offices.

The point is, if just the proposal to make cuts is going to make an office cut its caseload and make it unable to receive requests from poor people for legal services, how in the world can it have time to pick out new furniture and redecorate the offices to be paid for out of the same budget.

Mr. President, I know there are other instances where you can find examples of how savings can be made without really jeopardizing the right of poor people to services of legal counsel. I support that effort. That is why this is an effort not to cripple the program but simply to bring the funding in line with the previous level of funding and also make it consistent with the authorizing legislation level which was set at $100 million.

Mr. President, I ask unanimous consent to have printed in the RECORD the articles to which I have referred, which appeared in the Oxford Eagle.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Oxford (Miss.) Eagle, Aug. 20, 1981]

BUDGET CUTS HAMPER NMRLS

(By Alma Stead)

The sign in the window said, "The Oxford office of North Mississippi Rural Legal Service is no longer accepting new cases due to proposed Reagan budget cuts."

Client reaction to the notice ranges from bewilderment to outrage. They don't understand why no new cases are being accepted when funding for the service is available through December.

"President Reagan has proposed to abolish legal services," said Jesse Pennington, deputy director of administration for the North Mississippi program. "And lobbying against us has been going on. If the program is not abolished, there will be at least a 50 percent cutback. We can't leave the clients stuck with these cases."

At present there are some 6000 cases open among the 39 counties administrated from Oxford. A fourth of these are family cases—custody of children, visitation, adoption, paternity, abuse, support. The other three-fourths are divided among juvenile cases—the one exception to the rule that legal services attorneys must not handle criminal cases—and consumer finance (bankruptcy, installment buying, credit, public utilities, unfair sales practices) and income maintenance (social security, welfare, food stamps).

Pennington said that in Tupelo the private bar has cooperated with NMRLS by taking over some of the case either "pro bono" (Latin for "for the good") which means free, or with reduced fees or installment plan payments. "The private bar has an obligation," said Pennington.

The situation is comparable to "going out of business," as Pennington put it. "The Corporation has advised us that in order to do justice to our current clients we have to close out. Taking on a new client without knowing that our funding will be continued is doing him a disservice."

The program is not dead; Congress has not yet decided what to do about funding it, but will decide during September. Because courts work on the quarterly system, the typical time lapse from the client's first visit to the Legal Service office until his case comes to court is three months.

INVITATION TO BID

A–1; Project Name: Furnishings; North Mississippi Rural Legal Services; Oxford, Mississippi; Owner: North Mississippi Rural Legal Services

Separate, sealed bids for Furnishings for North Mississippi Rural Legal Services will be received by the Office of Hall-Burle at 426 South Lamar or P.O. Box 458, Oxford, Mississippi until 2:00 p.m. on Thursday, September 17, 1981 then publicly opened and read aloud.

The Drawings, Specifications, Bidding Documents and Contract Forms may be examined at the Office of Hall-Burle, Ltd., 426 South Lamar, Oxford, Mississippi 38655.

Copies may be obtained at the Office of Hall-Burle, Ltd., located at 426 South Lamar, Oxford, Mississippi 38655 upon deposit of $50.00. Full refund will be made for sets returned within twenty-one (21) calendar days after award of contract and in good condition.

Proposals shall be submitted in duplicate only upon the blank proposal forms provided with the Specifications and must be accompanied by Proposal Security in the form of Certified Check or acceptable Bid Bond in an amount equal to at least five percent (5 percent) of the base bid; such security to be forfeited as liquidated damages, not penalty, by any bidder who may be awarded the Contract but who fails to carry out the terms of the proposal, execute Contract and post Performance Bond in the form and amount within the time specified. The Bid Bond, if used, shall be payable to North Mississippi Rural Legal Services, Oxford, Mississippi.

All bidders shall be currently licensed in the State of Mississippi.

The Owner reserves the right to reject any or all bids and waive any and all informalities in bids.

WILHELM JOSEPH,
Executive Director.

Mr. WEICKER. Mr. President, I rise with reluctance insofar as the personal aspects of this are concerned but with enthusiasm insofar as the substance, to oppose the amendment of the distinguished Senator from Mississippi.

I will read one paragraph from a letter to Senator BAKER by the president of the American Bar Association, David Brink, and then I will rest my case, because I know my colleagues want to vote. I feel that what has been stated needs a response. Mr. Brink states:

The Legal Services Corporation has been efficiently and effectively providing routine legal services to millions of the nation's poor for the past six years, enabling these individuals to resolve through the justice system problems which might otherwise fester and grow or find resolution in ways far more costly to society. The program is a model of efficiency, with less than 2 percent of its budget going to national administrative expense. Only within the last year has the program been able to expand geographically into all areas of the country; and even at a budget level of $321 million for FY '81, and with substantial contributions of free legal services by members of the private bar, the program has not been able to provide service to all who need it. A further cutback of funding below $241 million would be devastating.

Mr. President, if the $100 million advocated by the Senator from Mississippi were the level of funding, you would have to close down most of the 323 local legal services programs.

He cites an example of fraud, waste, and abuse. I am not going to dispute that. It was obviously wrong. But it would be possible in any situation to come up with examples here and there.

The fact is that this program has worked, it has been efficient, it has not been abused in the expenditure of money, and, most important, it has assured millions of Americans of their constitutional rights.

I oppose the amendment.

Mr. STENNIS. Mr. President, I commend my colleague from Mississippi for his preparation in connection with this amendment and his very earnest presentation of it.

I oppose the amendment that would eliminate this service. I think it has a place and has done a lot of good. A great deal depends upon the attitude of some of the local leaders in various areas of the Nation where these funds are spent. That leadership sometimes is excessively aggressive and provoking, and that leads to the same kind of conduct at times on the part of the opposition.

However, as one who has formerly carried the responsibility of a trial judge, who often was called on to appoint attorneys to serve, without compensation, for those who were actually in court and charged with offenses, I have some feeling and some pride for the fact that the tradition of America is that one in need of representation in court gets it. It is one of the jewels of the legal profession, in which I still have pride, the way it has carried the load over the decades of our Nation's history and has done it without compensation.

I am opposed to the elimination of the program. I favor the reduction to a figure that is recommended by the committee which passed on it for the Senate and is also reflected, as my colleague has said, in our budget resolution.

I expect to continue to support this program, but at a lower level. I think this is excessive. I hope the amendment will prevail.

Mr. WARNER. Mr. President, I oppose the amendment and support the committee's funding level for the Legal Services Corporation for fiscal year 1982.

The funding level proposed by the Senate Appropriations Committee is $241,000,000, which represents a 25-percent

reduction in funding for the Legal Services Corporation in just 1 year. In addition, this funding level falls below the overall budget guidelines for fiscal year 1982.

Mr. President, for more than 200 years, one of the fundamental principles our Nation has honored is equal access under the law. But equal access under the law needs to be more than just an ideal for Americans. Since the inception of the Legal Services Corporation, many of the estimated 30-million low-income people in our society have been afforded the opportunity to have equal access. They may not have agreed with justice's ultimate decision, but they had the opportunity for justice to decide.

The Legal Services Corporation has given these individuals the chance to have access to professional, efficient legal service in some of the most basic arenas of our lives—housing, family situations, health. One of my constituents spoke eloquently on this issue when he wrote to me:

> The principle that all segments of our society should have access to the protections of the law must be of concern not only to lawyers, but to all persons who cherish the notion of justice and equality. It is fundamental to our society. We must ask whether legal services is a commodity to be bought and sold at market prices, reserved only for those who have the money to pay. Or do the demands of justice require that legal services be available to all persons as part of their fundamental right to equal justice under the law?

Mr. President, my support for the concept of providing Federal funding to enable persons to receive the benefit of legal counsel, providing they have inadequate personal resources to retain their own counsel, is derived from some personal experience during my own career. For nearly 5 years in the late 1950's I served as an assistant U.S. District Attorney actively engaged in criminal prosecutions in the greater Washington, D.C., area. Many times I witnessed, firsthand, indigent persons being denied the constitutional protections of our system of government, as a result of their inability to obtain proper legal representation.

Following my Government service, I entered private law practice and became one of the organizers and the principal financial sponsor of a private legal aid society, named in honor of the former Chief Judge of the U.S. Circuit Court of Appeals for the District of Columbia for whom I once served as a law clerk.

This legal aid society, the Prettyman Fellowship program, pioneered private legal aid in the Washington area and continues a leadership role to this date.

The concept of a public legal service corporation emanated from the experience of this private program and others elsewhere in the United States. While I have some misgivings about certain areas of representation provided by the Legal Services Corporation, as enumerated by my distinguished colleague from Mississippi and others, on the whole, it has carried forward notably the concept of equal access to justice for all. I hope it will profit from some of the legitimate concerns expressed during the course of this debate.

Nevertheless, I strongly urge my colleagues that we decline to support this amendment and that we accept the recommendation of $241 million for fiscal year 1982. When one considers what is at stake, this is indeed a very modest figure.

Mr. KENNEDY. Mr. President, in my earlier comments, I expressed my views about the importance of this program. I believe it is important to underline one additional point. Under the committee's recommendation, funding for the Legal Services Corporation will be reduced by 25 percent.

If we accept the Cochran amendment, we will be reducing the legal services programs by an incredible 70 percent. I am confident that no other program has been cut by this extent this year.

There is one lawyer for every 500 people in this country who are above the poverty line. Currently, the Corporation provides only two lawyers for every 10,000 poor people. I cannot believe that Senator COCHRAN feels this is excessive.

If we accept the Cochran amendment, we will effectively emasculate the guarantee of equal rights under law to millions of Americans. It seems to me to be too drastic a cut for such an important program, particularly considering its widespread support by the public, the bar, and the judges.

A great deal has been stated, both on this floor and in speeches across the country, about the importance of law and order.

It seems to me if we deny access to the courts to a significant segment of our population then we are going to be inviting individuals to seek redress for their difficulties outside of the law.

One final point that I would like to make. This program has one of the smallest administrative budgets in relationship to the dollars expended of any Federal program—approximately 3 percent. And even this 3 percent is already being cut in half under the spending proposals of the Legal Services Corporation. It is being effectively administered. The resources that are being appropriated are actually going out into the field. The cases that they are bringing have a sense of legitimacy and justice. I hope the amendment is defeated.

Mr. MITCHELL and Mr. BENTSEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Maine.

Mr. MITCHELL. I yield to the Senator from Texas.

Mr. BENTSEN. Mr. President, I really do not believe that requiring private law firms to increase their pro bono caseload is the answer to this problem. I think it is done on a hit or miss basis, and that does not provide an equal opportunity for all Americans to gain access to our judicial system.

Let me give a personal example of that. I have a law degree. I have a license, but I sure do not think of myself as an attorney. I practiced about 6 months. I am still a member of the bar.

I recall one time when I called my office and asked my secretary, "What do we have in the mail that is important?" She answered, "Well, you have a letter here from a court that says that you are supposed to represent an indignant defendant." I said, "Are you sure that does not say indigent?" She said, "Oh, I guess it does." I said, "You were right in the first instance. If I went down there to represent that particular defendant and I had about 15 minutes with him, he would throw himself on the mercy of the court. He should be indignant because I certainly have no practice and experience that would qualify me to properly represent that man."

So I called the court and I asked them if they could not substitute someone who could really represent that person, and they did.

I would hate to see us go back to that kind of a practice. The staff attorneys of the Legal Services Corporation are, for the most part, dedicated members of the bar. Certainly, there have been some abuses, especially in the areas of class action and "social change" type suits, and these abuses should be curtailed.

So when we talk about equal access before the law, let us not limit it only to those people who have the finances necessary to obtain it. Let us not add to the frustrations of the poor who think that they have somehow been dealt out of this economic system and that there is no one to speak up for them and to share their concerns and to try to represent them.

So even though I have been one who is voting for cut after cut, this is one I am not going to go along with. I agree with the cut of 25 percent but I think if we go to the extent that my good friend from Mississippi is proposing, then I think that we have devastated the program.

So I am going to support my friend from Connecticut and oppose this particular amendment.

Mr. MITCHELL. Mr. President, I think the Senator from Texas has touched upon an important point here and that is the quality of representation.

I have had opportunity to have spent a good part of my adult life in the courtroom as an attorney and as a judge. I have appeared on both sides, as a prosecutor and as a defense attorney. I have appeared on the other side of Legal Service lawyers, and I have had them appear in my courtroom when I served as a judge.

I say that it may be a standard in this Nation that all men are equal before the law, but that is a standard that is not met if one person does not have quality representation.

De Tocqueville said that the United States was a nation unique in its respect for and adherence to the law, and indeed it is.

And the law plays a crucial role in our society. Indeed, almost daily in this Chamber we are told that the courts are too important in our society and that the jurisdiction, role, and participation that they play in our society must be reduced. That is a separate question not to be decided today, but there can be no

doubt that the law is a crucial and important element in our society.

If a person is going to have adequate representation is an important factor in whether a person is to have his or her rights vindicated. People are not equal before the law if they do not have quality representation.

The poor people of this country are desperately in need of that representation, particularly at a time when legal costs are escalating almost beyond sight.

It is a rare case in any court in this country, State or Federal, in which the legal fees do not exceed the amount in dispute. Even large corporations are now unable to litigate and unable to fight for their rights because they cannot afford the legal fees.

And the first question that anyone ever asked me when they came in to ask me to try a case for them was, "How much will it cost," because it costs a great deal. The average citizen cannot afford it, let alone low-income and poor people, in our society.

This is a good program. The people who work in the Legal Services are for the most part dedicated, decent committed people who are trying to do a job to improve our society and who are doing it.

I think it would be a serious error, very adverse to the interest of our society as a whole were we to accept this amendment which virtually eliminates a program that has done a great deal of good. There undoubtedly have been excesses. There undoubtedly have been mistakes. Of what human institution could that not be said?

But this program has by and large been good. It has been a positive force for good in our society. It has made a little more realistic the ideal of equality before the law in our society. It should not be eliminated which this amendment virtually does.

I urge the Members of this Senate to oppose the effort to deprive those in our society who are deprived of so much else of the opportunity to stand equal before American law.

Thank you, Mr. President.

Mr. COCHRAN. Mr. President, I ask unanimous consent that Senator THURMOND be listed as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Mr. President, I am about ready to make a motion to table the amendment of the distinguished Senator from Mississippi. I want to make certain that everyone has had his or her say. I do not intend to close off any remarks.

Mr. President, I move to table the amendment of the Senator from Mississippi, and I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table the amendment of the Senator from Mississippi.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. EXON (when his name was called). Mr. President, on this vote I have a live pair with the Senator from Ohio (Mr. METZENBAUM). If he were here and voting he would vote "yea." If I were permitted to vote, I would vote "nay." I therefore withhold my vote.

Mr. STEVENS. I announce that the Senator from North Carolina (Mr. EAST), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator from Maryland (Mr. MATHIAS), and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina (Mr. EAST) would vote "nay."

Mr. ROBERT C. BYRD. I announce that the Senator from Montana (Mr. BAUCUS), the Senator from Oklahoma (Mr. BOREN), the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), the Senator from Montana (Mr. MELCHER), the Senator from Ohio (Mr. METZENBAUM), the Senator from New York (Mr. MOYNIHAN), the Senator from Arkansas (Mr. PRYOR), and the Senator from Louisiana (Mr. LONG) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) and the Senator from Michigan (Mr. LEVIN) are absent because of illness.

I further announce that, if present and voting, the Senator from Montana (Mr. BAUCUS), the Senator from Colorado (Mr. HART), the Senator from Vermont (Mr. LEAHY), the Senator from Michigan (Mr. LEVIN), and the Senator from New York (Mr. MOYNIHAN) would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 48, nays 33, as follows:

[Rollcall Vote No. 371 Leg.]

YEAS—48

Abdnor	Domenici	Murkowski
Andrews	Durenberger	Pell
Baker	Eagleton	Percy
Bentsen	Ford	Pressler
Biden	Gorton	Randolph
Boschwitz	Hatfield	Riegle
Bradley	Heflin	Rudman
Bumpers	Heinz	Sarbanes
Burdick	Hollings	Sasser
Chafee	Huddleston	Schmitt
Cohen	Inouye	Specter
D'Amato	Jackson	Stevens
Danforth	Johnston	Tsongas
DeConcini	Kennedy	Warner
Dixon	Matsunaga	Weicker
Dodd	Mitchell	Williams

NAYS—33

Armstrong	Helms	Quayle
Byrd, Harry F., Jr.	Humphrey	Roth
	Jepsen	Simpson
Byrd, Robert C.	Kassebaum	Stafford
Chiles	Kasten	Stennis
Cochran	Laxalt	Symms
Denton	Lugar	Thurmond
Dole	Mattingly	Tower
Garn	McClure	Wallop
Grassley	Nickles	Zorinsky
Hatch	Nunn	
Hawkins	Proxmire	

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—1

Exon, against.

NOT VOTING—18

Baucus	Goldwater	Mathias
Boren	Hart	Melcher
Cannon	Hayakawa	Metzenbaum
Cranston	Leahy	Moynihan
East	Levin	Packwood
Glenn	Long	Pryor

So Mr. WEICKER's motion to lay on the table UP amendment No. 622 was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. May we have order, Mr. President?

The PRESIDING OFFICER. The Senate will be in order.

The Senator from North Carolina is recognized.

(Mr. KASTEN assumed the Chair.)

Mr. HELMS. Mr. President, I raise the point of order that this committee amendment is authorization language on an appropriation bill.

Mr. WEICKER. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. WEICKER. What is the pending business?

The PRESIDING OFFICER. The pending business is the fourth committee amendment dealing with immigration.

Mr. WEICKER. I do not think my good friend from North Carolina wants to raise a point of order against that amendment.

Mr. HELMS. Mr. President, did we not just vote on an amendment to the Legal Services Corporation?

Mr. WEICKER. My good friend from North Carolina will recall we did not. The committee amendment was laid aside. The amendment was being addressed to the bill.

Mr. HELMS. Does the Senator want me to wait until the committee amendment comes back up? Whatever he wishes, I will accede to.

Mr. WEICKER. I am not playing games at all. I just did not want the Senator to be overruled on the point of order. It would have not lain against the fourth amendment.

Mr. HELMS. I thank the distinguished Senator for his courtesy. The Chair is saying that we did not automatically continue on the Legal Services question. Is that correct? The amendments of Senator DENTON and Senator COCHRAN addressed the bill, and not the committee amendment, did they not?

The PRESIDING OFFICER. The Senator is correct.

Mr. HELMS. Very well. I will withhold until excepted committee amendment 7 is pending?

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

SEVENTH EXCEPTED COMMITTEE AMENDMENT—PAGE 32, LINE 23 THROUGH PAGE 36, LINE 10

Mr. WEICKER. Mr. President, by agreement with the ranking member, I now ask that the pending business be the seventh committee amendment.

The PRESIDING OFFICER. The seventh committee amendment is now before the Senate.

The seventh excepted committee amendment is as follows:

On page 32, line 23, strike ": Provided", through and including "Representatives" on page 33, line 1, and insert the following: *Provided*, That none of the funds appropriated in this Act shall be expended to provide legal assistance for or on behalf of any alien unless the alien is a resident of the United States and is—

(1) an alien lawfully admitted for permanent residence as an immigrant as defined by sections 101(a)(15) and 101(a)(20) of the Immigration and Nationality Act (8 U.S.C. 1101(a) (15), (20));

(2) an alien who is either married to a United States citizen or is a parent or an unmarried child under the age of twenty-one years of such a citizen and who has filed an application for adjustment of status to permanent resident under the Immigration and Nationality Act, and such application has not been rejected;

(3) an alien who is lawfully present in the United States pursuant to an admission under section 207 of the Immigration and Nationality Act (8 U.S.C. 1157, relating to refugee admissions) or who has been granted asylum by the Attorney General under such Act; or

(4) an alien who is lawfully present in the United States as a result of the Attorney General's withholding of deportation pursuant to section 243(h) of the Immigration and Nationality Act (8 U.S.C. 1253(h)).

An alien who is lawfully present in the United States as a result of being granted conditional entry pursuant to section 203 (a)(7) of the Immigration and Nationality Act (8 U.S.C. 1153(a)(7)) before April 1, 1980, because of persecution or fear of persecution on account of race, religion, or political opinion or because of being uprooted by catastrophic natural calamity shall be deemed, for purposes of section 1007 (b)(11) of the Legal Services Corporation Act, to be an alien described in subparagraph (C) of such section: *Provided further*, That none of the funds appropriated in this Act shall be used by the Legal Services Corporation in making grants or entering into contracts for legal assistance unless the Corporation insures that any recipient organized primarily for the purpose of providing legal assistance to eligible clients is governed by a body at least 60 percent of whose membership consists of attorneys who are admitted to practice in the State in which the legal assistance is to be provided and who are appointed to terms of office on the governing body by the governing bodies of State, county, or municipal bar associations the membership of which represents a majority of the attorneys practicing law in the locality in which the recipient is to provide legal assistance. Any such atttorney, while serving on such board, shall not receive compensation from a recipient: *Provided further*, That none of the funds appropriated in this Act shall be expended by the Corporation to participate in litigation unless the Corporation or a recipient of the Corporation is a party, or a recipient is representing an eligible client in litigation in which the interpretation of this title or a regulation promulgated under this title is an issue, and shall not participate on behalf of any client other than itself: *Provided further*, That none of the funds appropriated in this Act shall be available to any recipient to be used, directly or indirectly—

(A) to pay for any personal service, advertisement, telegram, telephone communication, letter, printed or written matter, or other device, intended or designed to influence any decision by a Federal, State, or local agency, except where legal assistance is provided by an employee of a recipient to an eligible client on a particular application, claim, or case, which directly involves the client's legal rights and responsibilities, or

(B) to influence any Member of Congress or any other Federal, State, or local elected official to favor or oppose any Acts, bills, resolutions, or similar legislation, or any referendum, initiative, constitutional amendment, or any similar procedure of the Congress, any State legislature, any local council, or any similar governing body, except that this subsection shall not preclude such funds from being used in connection with communications made in response to any Federal, State, or local official, upon the formal request of such official: *Provided further*, That none of the funds appropriated in this Act shall be used to bring a class action suit against the Federal Government or any State or local government except in accordance with policies or regulations adopted by the Board of Directors of the Legal Services Corporation.

Mr. WEICKER. Mr. President, I ask unanimous consent to have printed in the RECORD a letter dated November 3, 1981, signed by 37 Senators, in connection with funding for the Legal Services Corporation.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEAR COLLEAGUE: Within the next few days the Senate will be considering H.R. 4169, funding for the Departments of State, Justice, Commerce, the Judiciary and Related Agencies for Fiscal Year 1982. We are writing to ask your support for the Committee's action regarding funding for the Legal Services Corporation.

The Committee has recommended a funding level of $241,000,000 for the Legal Services Corporation. Restrictions have been placed on the Corporation in four major areas. These provisions restrict lobbying activities; limit involvement in class action suits against Federal, State and local governments; establish requirements to give the local bar a greater voice in legal service programs; and, restrict Corporation involvement in the representation of aliens.

Legitimate concerns about the operation of the Legal Services Corporation have been expressed by members of the Senate. The Committee has effectively dealt with these concerns in a manner that will prevent abuse while continuing the most important activities of this program.

The $241.000.000 figure represents a 25 percent reduction in funding for the LSC, and it does not exceed the budget. Although this figure exceeds the assumption under the First Budget Resolution figures, the subcommittee decreased funding in other programs within its jurisdiction to stay within its overall budget guidelines.

We believe that the Corporation is necessary to insure that all citizens are provided access to our system of justice. We will support the Committee proposal during floor consideration of H.R. 4169 and urge you to join with us.

With kindest personal regards.

Lowell P. Weicker, Jr., Chairman, State, Justice, Commerce, the Judiciary and Related Agencies Subcommittee; Ernest F. Hollings, Ranking Minority Member, State, Justice, Commerce, the Judiciary and Related Agencies Subcommittee; David Durenberger, Warren Rudman, Edward M. Kennedy, Dennis DeConcini, Daniel K. Inouye, Ted Stevens, Mark O. Hatfield, Howard M. Metzenbaum, Paul S. Sarbanes.

John C. Danforth, Henry M. Jackson, George J. Mitchell, Thomas F. Eagleton, Arlen Specter, Daniel Patrick Moynihan, Patrick J. Leahy, Dale Bumpers, Slade Gorton, John H. Chafee, Donald W. Riegle, Walter D. Huddleston, Harrison A. Williams, Jr., John Heinz, Quentin N. Burdick.

Jennings Randolph, Bill Bradley, Charles H. Percy, Spark M. Matsunaga, William S. Cohen, Christopher Dodd, Claiborne Pell, Joseph R. Biden, Jr., Paul E. Tsongas, Charles McC. Mathias, Jr., David Pryor.

Mr. HOLLINGS. Mr. President, I rise in support of the Appropriations Committee's approach to funding for the Legal Services Corporation. Let me explain several things about the committee's approach to the $241 million appropriated for the Legal Services Corporation in this bill. I hope these explanations will lay to rest many of the issues that will undoubtedly be brought forward by the critics of this program.

The Senate Appropriations Committee has recommended a funding level for the Legal Services Corporation of $241 million for the 1982 fiscal year. This is a 25-percent reduction from its current funding level. Let me emphasize that a 25-percent reduction is substantial and severe. It will definitely mean that branch offices around the country will be closed, clients will be denied civil legal services, and fewer cases will be brought. The national office of the Corporation has already been pared to the bone in anticipation of such a cut.

I strongly urge against any action to cut this program further. We simply cannot maintain it in all parts of the country at any lower levels. An appropriation level in the $100 million range is not practical. You simply cannot maintain this program with a 70-percent cut, which a $100 million appropriation would be.

If you do not believe in legal services for the poor, then abolish the program. But do not waste valuable dollars funding it at such a low level it cannot possibly do its work.

Some of my colleagues will try to tell you that this $241 million appropriation for legal services will "bust the budget" and that it exceeds the first concurrent budget resolution. As the ranking member of the Senate Budget Committee, I have some knowledge of the work of that committee this year. I can tell you absolutely that this appropriation is not in conflict with and is not inconsistent with the first concurrent budget resolution.

Maybe we should remind ourselves what the budget resolution in fact does: It sets ceilings. It sets ceilings on functional areas. Agencies are not line itemed

in the first concurrent budget resolution. If you read that resolution you will not find one word in it about funding for the Legal Services Corporation. Rather it sets functional ceilings which have been allocated to the various appropriations subcommittees. Rather than "busting the budget," this State, Justice appropriations bill is under the allocations of the first concurrent budget resolution in its appropriations. In fact, it is $169 million under that first concurrent resolution. I repeat, it is simply not the case that funding the Legal Services Corporation is inconsistent with the first concurrent budget resolution.

We have all heard many horror stories about legal services. Some of the stories may have shreds of truth in them, but far too many just do not stand up when compared to the actual facts. Nevertheless, our committee took action—strong and bipartisan action—to deal with the most offensive activities of the legal services program. We placed restrictions on the use of the funds appropriated to the Legal Services Corporation for fiscal year 1982.

There have been many complaints about improper lobbying activities. The committee has added an amendment which narrowly allows legislative advocacy by a Legal Services lawyer for an eligible client.

There have also been complaints about the use of class actions by Legal Services lawyers. Even though class actions constitute only a very, very small percentage of the cases handled by legal services programs, the committee decided controls were needed. Therefore, we added an amendment to restrict the use of appropriated funds for class action lawsuits against Federal, State or local governments, except in accordance with policies and regulations adopted by the Board of Directors of the Legal Services Corporation.

The committee included an amendment limiting the use of funds for the representation of aliens. We defined specifically those aliens for whom representation may be provided.

Finally, to increase the involvement of the local bar associations in the governance of the local legal services programs, we included an amendment requiring local bar associations to name the lawyer board members to the local program's board of directors.

With these restrictions, the committee believes that the Legal Services Corporation and its programs will be able to continue to provide legal services while avoiding the problems in the past.

As a final note, I want to explain one other vital fact about the Legal Services Corporation. It is governed nationally by a Board of Directors whose members are appointed by the President of the United States with our advice and consent. We have heard criticisms that the Corporation and its Board of Directors are too liberal or too radical. Yet at this very moment President Reagan has the authority—and many would say responsibility—to appoint the entire Board, all 11 members of the Board of Directors of the Legal Services Corporation. If the administration is critical of the current Board and its policies, then the President should take steps to replace the current leadership. It seems strange to me that the President would not exercise his authority here—especially with a program with which he has strong disagreements.

I believe that the actions taken by the committee in imposing new restrictions should be accompanied by action by the President in appointing a new Board of Directors to insure new leadership is brought to this program.

Therefore I urge all Members to support this bill.

● Mr. GRASSLEY. Mr. President, I have long been concerned with evidence that has been presented to me as a Member of the House and Senate, that the Legal Services Corporation has strayed far from the intentions of Congress when it gave birth to the organization in 1974. The Legal Services Corporation, at times, has abandoned its original purpose of providing equal access to the courts for the Nation's poor and, instead, given chase to social activism and law reform.

I have, in the past, brought to the attention of my colleagues a number of incidents which have occurred in my own State that would bear out that assertion. I do not intend to go into any more detail, at this time, as to the particulars of those situations. Suffice it to say, however, that I am pleased the Congress has recognized the need to place more stringent restrictions and provide specific guidance for the activities of the Legal Services Corporation and its grantees. I commend the committee for its responsiveness to these sorely needed changes.

However, I concur with my distinguished colleagues from North Carolina and South Carolina that there are several areas of reform that are not covered as comprehensively in the committee amendment as they were in the House. I would, therefore, urge my colleagues to support Mr. HELMS and Mr. THURMOND in opposing the committee amendment to the Legal Services program and preserving the House's actions.

I prefer the House version of operating restrictions on the Legal Services Corporation because I feel that it would more effectively counter abuses that have been documented in this program. For example, the committee amendment provides that no funds appropriated under this act may be used to bring class action suits against the Federal, State, and local governments, unless such action is brought in accordance with policies or regulations adopted by the Board of the Corporation.

Currently, local boards can authorize class action suits. The committee's intent that the Board itself regulate class action suits through issuance of policies and regulations is, I admit, an improvement over current law. However, the House amendments place an overall prohibition on such actions which, in my mind, is more desirable.

In addition, I feel that the House version offers more detailed restrictions on the use of funds to support legal activities in cases relating to abortions, unless abortion is necessary to save the life of the mother. It would not prohibit, however, the provision of legal advice to an eligible client with respect to the client's legal rights and responsibilities. This is a reasonable approach and one that is undoubtedly superior to current law. Let me add that the committee amendment contains no clarification or provision regarding the use of funds for abortion cases.

In general, I would like to emphasize that the House version offers a more detailed framework for control of Legal Services Corporation's activities. While the House restrictions are not a cure-all, they certainly represent a more effective approach than those proposed by the committee. I am hopeful that they would help bring this program closer to its congressional mandate and would insure that Federal moneys received by LSC grantees are spent properly. Therefore, I urge my colleagues to oppose the committee's amendment and retain the more restrictive House language.●

Mr. THURMOND. Mr. President, today, I wish to express my opposition to the committee amendment to the State-Justice-Commerce appropriations bill, dealing with restrictions on the Legal Services Corporation.

The amendment would delete the operating restrictions placed on the Legal Services Corporation by the House of Representatives, and would substitute for these restrictions new guidelines for LSC activities substantially less restrictive than those proposed by the House.

Mr. President, the House-passed restrictions are designed to prevent the repeated past abuses which have been perpetrated by LSC employees. Rather than attending to the legitimate, basic legal needs of the poor and disadvantaged, the grantees of the Corporation and their employees have, in many instances, misused taxpayer dollars to promote their own personal ideas of social justice or change, using the poor they represent to obtain standing in their suits. This misuse of taxpayer dollars must stop.

While I do not believe the House restrictions are a certain cure for the abuses which have occurred in the past, indeed I remain opposed to further funding for the LSC at this time, the House restrictions certainly represent a more realistic approach to assuring a proper use of taxpayer dollars than do those proposed by the committee.

This Corporation, originally designed to give aid to those Americans too poor to afford legal help in such basic matters as settling disputes with their landlords or domestic relations problems such as divorce and child support, has instead become a weapon used by social and judicial activists in an unending battle against the very Government that funds their activities. The Federal Government simply has no business funding Legal Services Corporation activities promoting abortions, advocating forced school busing or lobbying the Congress and State legislatures. All Americans deserve their day in court; however, experimentation on behalf of novel legal theories and rights, where it is pursued,

should be pursued through the private sector, not with Government funding supplied for the purpose of helping lower income Americans with basic legal services.

If my colleagues will compare the House-passed restrictions with those being offered by the committee, they will find that the concerns I have just disclosed are presented and addressed in a much more detailed, comprehensive, and effective manner by the House. The committee restrictions do not prohibit class actions against Federal, State, and local governments; the House restrictions do. The committee restrictions do not address the problem of LSC involvement and participation in abortion cases; the House restrictions do. The committee restrictions do not address the problem of LSC involvement and participation in cases dealing with homosexuality; the House restrictions do.

Mr. President, the House restrictions are simply better than those proposed by the committee; it is as simple as that. If we are to continue funding the Legal Services Corporation, continue to finance the activities of hundreds of attorneys across this country, we should try our best to assure that the services to be provided are only those which were intended by the Congress. I do not believe there is much question as to which set of restrictions now before us are better able to perform this function.

I urge the defeat of the committee substitute for the House language.

● Mr. RIEGLE. Mr. President, I rise to state my strong support for the $241 million appropriation level for the Legal Services Corporation for fiscal year 1982.

I, for one, would have preferred to see legal services maintained at present funding levels. Cuts in this vital program can only add to the frustration and hardship of poor people who are already forced to contend with massive cuts in social service, education, and health programs. To cripple or eliminate the budget of the Legal Services Corporation—fully 93.4 percent of which goes directly to local agencies who deliver necessary legal services to the poor—is false economy, pure and simple. Nevertheless, the $241 million appropriation included in this bill is a substantial improvement over earlier figures proposed by the administration.

The committee has responded to criticism of the Corporation's activities voiced by some Members of this body by attaching several new restrictions to the legal services program. Although I intend to support the bill in its present form, I question the wisdom of a process which would seek to intrude on the judgment of an attorney as to how he or she might best serve a given client's needs. I would further question sanctions which would limit the access of poor, disabled and elderly citizens to legal assistance available to more affluent members of our society.

And finally, I am concerned that the new provisions outlining the composition of local governing boards may act to severely limit the representation of members of minority and women's bar associations. Although I question the restrictions, I believe the committee has acted responsibly to address controversy surrounding the Corporation's activities in order to insure the continuation of vital legal services to our Nation's needy. I would only hope that the serious deliberation of the committee on these issues will be respected, and that no further efforts to intrude on the attorney/client relationship will be supported by this body.

Mr. President, I have long been a supporter of the Legal Services Corporation. Its record of efficiency is commendable and demonstrates the wisdom of a program that channels funds directly to the local agencies which provide legal services, without intervening of separate State and local bureaucracies.

I argued strongly for the inclusion of funding for this program during Budget Committee consideration of the first budget resolution. As a cosponsor of legislation to reauthorize the Legal Services Corporation, I have opposed efforts in committee and on the floor to eliminate this important program. Access to the justice system for all its members may be the single most important indicator of a healthy democratic society. I urge my colleagues to join me today in support of continued funding for the Legal Services Corporation.●

Mr. HELMS. Mr. President, I think it is essential to point out at this point that the Senate committee amendment is totally inadequate to restrain the Legal Services Corporation. The Senate version leaves out many important restrictions for cutting off the expenditure of taxpayers' money to recipient organizations which violate regulations, as well as restrictions on encouraging political activities, labor or antilabor activities, boycotts, strikes, demonstrations, prohibitions on litigation relating to abortion (unless necessary to save the life of the mother), on litigation relating to school desegregation, on lobbying.

Those are just a few. And also, the Senate version omits the requirements for audits which the House version has: It omits authority for GSA participation in such audits.

In other words, Mr. President, the committee language is totally unsatisfactory.

Mr. President, I raise the point of order that committee amendment No. 7 is authorization language in an appropriation bill.

Mr. WEICKER. Mr. President, I raise the question of germaneness of the committee amendment.

The PRESIDING OFFICER. The question of germaneness having been raised, under rule XVI it must be submitted to the Senate without debate. The question is, Is the amendment germane?

Mr. WEICKER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The question is, Is the committee amendment on page 32, line 23, through and including page 36, line 10 germane?

The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI), the Senator from North Carolina (Mr. EAST), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator from Maryland (Mr. MATHIAS), the Senator from Alaska (Mr. MURKOWSKI), and the Senator from Oregon (Mr. PACKWOOD) are necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina (Mr. EAST) would vote "nay."

Mr. ROBERT C. BYRD. I announce that the Senator from Montana (Mr. BAUCUS), the Senator from Oklahoma (Mr. BOREN), the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), the Senator from Montana (Mr. MELCHER), the Senator from Ohio (Mr. METZENBAUM), the Senator from New York (Mr. MOYNIHAN), the Senator from Arkansas (Mr. PRYOR), and the Senator from Louisiana (Mr. LONG) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) and the Senator from Michigan (Mr. LEVIN) are absent because of illness.

I further announce that, if present and voting, the Senator from Michigan (Mr. LEVIN) and the Senator from Ohio (Mr. METZENBAUM) would each vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 57, nays 23, as follows:

[Rollcall Vote No. 372 Leg.]

YEAS—57

The PRESIDING OFFICER. The amendment is germane, and the point of order falls.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment is germane and the point of order falls.

Mr. HOLLINGS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from North Carolina is recognized.

Mr. HELMS. Mr. President, I thank the Chair.

Mr. President, we have just gone through a little exercise for the purpose of proving a point.

Since the day I came the first time in this Chamber I have heard all sorts of declarations about legislating on an appropriations bill. Horrors upon horrors, the very idea of legislating on an appropriations bill.

Now we see the truth. It depends on whose ox is getting gored.

I ask the Chair: What was the tally on the last vote?

The PRESIDING OFFICER. The tally was 57 yeas and 23 nays on the last vote.

Mr. HELMS. Fifty-seven to twenty-three. All right. We have at least 57 of our colleagues who are on record now saying it is OK to legislate on an appropriations bill.

You cannot get around it. I do not want to hear any complaints from my colleagues when I bring up a social issue, or whatever, about legislating on an appropriations bill.

That is the reason I raised that point of order.

I entertained little hope at all that the Senate would examine the germaneness in a proper way.

Let me make one more confession. I favor legislating on an appropriations bill; and I am going to continue when I think it is in the best interest of the American people to attempt to legislate on an appropriations bill.

That said, Mr. President, let us see what this committee amendment that is in dispute is all about. The House made the appropriations of $241 million subject to the restraints of H.R. 3480, the authorization bill which has already passed the House. The committee struck the House language and inserted weak language of its own. Let us look on page 4 of H.R. 3480, beginning on line 7, with the title "Enforcement and Sanctions."

We are talking about H.R. 3480, the House version incorporated by reference in H.R. 4169, beginning on page 4, line 7. We are talking about the House bill which provided all sorts of protections and enforcement sanctions. Section 4 reads:

SEC. 4. (a) Section 1006(b)(5) of the Legal Services Corporation Act (42 U.S.C. 2996(b)(5)) is amended by striking out the second sentence and inserting in lieu thereof the following: "The Board, within thirty days after the date of enactment of the Legal Services Corporation Act Amendments of 1981, shall issue regulations to provide for the enforcement of this title, which regulations shall include, among available remedies, provisions for the immediate suspension of financial assistance under this title, suspension of an employee of the Corporation or any employee of any recipient by such recipient, and the reduction or termination of such assistance or employment as deemed appropriate for the violation involved.

The committee amendment makes no provision for suspending funds to violators of the regulations.

Let us move on to page 7, line 7:

LIMITATION ON CLASS ACTIONS

SEC. 6. Section 1006(d)(5) of the Legal Services Corporation Act (42 U.S.C. 2996e(d)(5)) is amended by adding at the end thereof the following: * * *

And note how straightforward the House version is:

No class action suit may be brought against the Federal Government or any State or local government.

That is all there is: The committee adds provisions to render the prohibition nugatory.

In other words, our committee says, "Come on, boys, use the taxpayers' money to sue the Federal Government, the State government, the local government."

On the same page 7 Liability for Attorney's Fees:

SEC. 7. Section 1006(f) of the Legal Services Corporation Act (42 U.S.C. 2996c(f)) is amended to read as follows:

"(f) If an action is commenced by the Corporation or by a recipient and a final order is entered in favor of the defendant and against the Corporation or a recipient's plaintiff, the court shall, * * *

And note, from this point on, what the House says:

* * * upon motion by the defendant and upon a finding by the court that the action had no reasonable basis in law, or fact, enter an order (which shall be appealable before being made final) award reasonable costs and legal fees incurred by the defendant in defense of the action, * * *

Mr. President, is that not reasonable? Should we allow Legal Services to attack citizens when there is no reasonable basis in law, and force those citizens to bankrupt themselves with legal defense fees?

Mr. President, I know that there are not many Senators listening, but I hope that somewhere along the line all Senators and a great many other people will read the text of what I am saying later on. It will be too late because the committee amendment is going to be adopted. Senators are not paying any attention to the implications of it, and it is a Friday afternoon and all the rest of it.

But let us move on to page 8 of H.R. 3480. At line 13, this is under the heading, "Negotiation Requirement,"

SEC. 8. Section 1007(a) of the Legal Services Corporation Act (42 U.S.C. 2996f(a)), as amended by section 4(c) of this Act, if further amended—

(1) in paragraph (9) by striking out "and" after the semicolon;

(2) in paragraph (10) by striking out the period and inserting in lieu thereof "; and"; and

(3) by adding at the end the following new paragraph:

And so forth.

(Mr. KASTEN assumed the Chair.)

Mr. HELMS. We get down to line 13, and listen carefully:

Require recipients to attempt to negotiate a settlement of controversies before filing suit in order to prevent the persistent incitement of litigation and to encourage the resolution of such controversies through compromise and settlement rather than through litigation,

Our committee never addressed that problem. They said, "Go on, have these lawsuits financed by the taxpayers; don't try to resolve anything. Let these Legal Services Corporation lawyers just have at it."

Page 9, beginning at line 10, and refers to the involvement of the private bar:

(12) in each fiscal year, to the extent feasible and consistent with paragraph (3) of this subsection make available substantial amounts of funds to provide the opportunity for legal assistance to be rendered to eligible clients by private attorneys,

Why did the committee ignore that issue? No, we seem to want a horde of Government attorneys on the payroll.

Page 11 of H.R. 3480 with respect to the section "Allocation of Funding" which actually begins on line 17 of page 10, paragraph (14):

Unless minimum access to legal assistance is available or provided in all parts of the country, allocate basic field grants so as to insure

Here is the point:

that no greater level of access to legal assistance funded by the Corporation is available or provided to any part or area of the country than is available or provided to all parts of the country.

Out the window it went, Mr. President. Why should not the Corporation's funds be distributed on an equitable geographic basis?

On the same page, page 11, line 24, the issue of participation by the private bar is raised again:

At least one recipient in each State provides legal assistance to eligible clients through a private bar component with open participation rights by members of the bar.

I thought we were trying to encourage the bar to help the needy.

Page 12, the same page, line 22:

No funds made available to carry out this title may be used (1) to provide legal assistance to promote, defend, or promote homosexuality,

The House tried to deny legal assistance to promote, defend, or protect homosexuality. The House took a position on that. The Senate said, "Oh, no, we will strike that."

Moving on to the next page, page 13, line 9, the committee amendment completely failed to include House restrictions intended—

to support or conduct training programs for the purpose of advocating particular public policies or encouraging political activities, labor or antilabor activities, boycotts, picketing, strikes, and demonstrations, including the dissemination of information about such policies or activities,

Now, those important restrictions were omitted. It is like saying, "Go ahead, boys and girls, use the taxpayers' money to promote particular public policies or political activities, labor or antilabor activities, boycotts, picketing, strikes, and demonstrations, including the dissemination of information about such policies or activities." Out the window it went.

Same page, line 19, another key restraint was left out. The House language prohibited funds—

to provide legal assistance with respect to any proceeding or litigation relating to abor-

tion unless such abortion is necessary to save the life of the mother,

The House would have excluded funds for that. The Senate took that out.

Page 14, line 6, the House did not feel it appropriate to provide legal assistance with respect to, and I am quoting line 6:

to provide legal assistance with respect to any proceeding or litigation relating to the desegregation of any elementary or secondary school or school system.

That was taken out.

Page 17 under "Civil Actions" line 2 of this authority was omitted:

The Corporation may bring an action in the appropriate district court of the United States to compel the specific performance of any agreement between the Corporation and any recipient for the provision of legal services under this title.

In other words, the Corporation would not have grounds to sue, if its contracts were breached, under the Senate committee version.

Well, that is not all of them, Mr. President, but I think it illustrates the point. This has been a very valuable day for me because now I understand the arithmetic of the position of the majority of Senators on this business of legislation on appropriation bills. Fifty-seven Senators say it is OK to legislate on this bill.

The Chair would absolutely have ruled in favor of my point of order had it not gone to the germaneness issue at the insistence of the distinguished and able Senator from Connecticut, who is my friend. I think Senator WEICKER knew how the Chair was going to rule on my point of order.

So I say again, Mr. President, the committee amendment is totally inadequate to restrain the abuses and derelictions of the so-called Legal Services Corporation.

The Senate version leaves out important restrictions for cutting off aid to recipient organizations which violate regulations as well as restrictions on encouraging political activities, labor or antilabor activities, boycotts, strikes, demonstrations, prohibition on litigation relating to abortion unless necessary to save the life of the mother, on litigation relating to school desegregation, on lobbying.

Here we are appropriating $241 million without authority, without proper consideration of what restraints ought to be on that authority. Many Senators said earlier that they thought the Legal Services Corporation was important to the concept of law and order. We have no law and no order. There is no legislation, only the appropriation. This is not an orderly way to proceed.

That is the reason, Mr. President, why I say the committee amendment ought to be rejected.

No doubt this amendment will not be rejected. I am speaking in a virtually empty Chamber, and this is one of these issues where public perception prevails instead of what the legislation itself says. The media will help promote the myth that those who question or oppose this Legal Services Corporation are ipso facto opposed to legal services for the poor.

I protest that perception. The question is how those services will be delivered.

I yield the floor.

Mr. WEICKER addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut is recognized. Prior to that I wish to indicate that there is a previous order scheduled for 2 p.m. The Senator from Connecticut.

Mr. WEICKER. Mr. President, I wish to alert my good friend from North Carolina and I want to have him hear what I have to say. I move the adoption of committee amendment No. 7.

Mr. HELMS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WEICKER. Is there time to have the yeas and nays?

The PRESIDING OFFICER. The yeas and nays have been ordered. However, under the previous order, the hour of 2 o'clock having arrived, the Senate will now go into executive session to consider Executive Calendar No. 10, which the clerk will report.

Mr. WEICKER. Mr. President, I ask unanimous consent that the special order commence at 2:20 rather than the hour of 2 o'clock.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered. The special order for 2 o'clock will be delayed until 2:20.

The PRESIDING OFFICER. Is there further debate on committee amendment No. 7? If not, the question is on agreeing to committee amendment No. 7. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from North Carolina (Mr. EAST), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator from Maryland (Mr. MATHIAS), the Senator from Oregon (Mr. PACKWOOD), the Senator from New Mexico (Mr. SCHMITT), and the Senator from Vermont (Mr. STAFFORD) are necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina (Mr. EAST) would vote "nay."

Mr. ROBERT C. BYRD. I announce that the Senator from Montana (Mr. BAUCUS), the Senator from Oklahoma (Mr. BOREN), the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), the Senator from Louisiana (Mr. LONG), the Senator from Montana (Mr. MELCHER), the Senator from Ohio (Mr. METZENBAUM), the Senator from New York (Mr. MOYNIHAN), and the Senator from Arkansas (Mr. PRYOR) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) and the Senator from Michigan (Mr. LEVIN) are absent because of illness.

I further announce that, if present and voting, the Senator from Michigan (Mr. LEVIN), the Senator from Ohio (Mr. METZENBAUM), and the Senator from Montana (Mr. BAUCUS) would each vote "yea."

The PRESIDING OFFICER (Mrs. KASSEBAUM). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 47, nays 33, as follows:

[Rollcall Vote No. 373 Leg.]

So committee amendment No. 7 on page 32, line 23, through page 36, line 10 was agreed to.

Mr. WEICKER. Madam President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HOLLINGS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXECUTIVE SESSION

ADDITIONAL PROTOCOL I TO THE TREATY FOR THE PROHIBITION OF NUCLEAR WEAPONS IN LATIN AMERICA (THE TREATY OF TLATELOLCO)

The PRESIDING OFFICER. Under the previous order, the hour of 2:30 having arrived, the Senate will now go into executive session to consider Calendar Order No. 10, Executive I, 95–2, which the clerk will state by title.

The assistant legislative clerk read as follows:

Executive I, 95th Congress, second session, Additional Protocol I to the Treaty for the Prohibition of Nuclear Weapons in Latin America (The Treaty of Tlatelolco).

The PRESIDING OFFICER. The time for debate on this matter is 15 minutes equally divided between the Senator from Illinois (Mr. PERCY), the distinguished chairman of the Committee on Foreign Relations, and Senator PELL, the ranking minority member.

Mr. PERCY. Madam President, the Senate today will be taking a long overdue step in approving protocol I to the

Treaty of Tlatelolco, the treaty which prohibits nuclear weapons in Latin America. Protocol I is designed to gain adherence to the obligations of the treaty by countries which have non-self-governing territories in Latin America. In the case of the United States, such territories include Puerto Rico, the Virgin Islands, and the Guantanamo Naval Base. This protocol was signed for the United States in 1977 and submitted to the Senate in early 1978. It has remained before the committee since that time, not because of any substantive problem with the protocol itself, but because of a dispute between the committee and the executive branch regarding access to a letter from the National Security Council to the Joint Chiefs of Staff.

Madam President, I think that dispute is clearly moot with the change in administration. But in any case, we were very careful in our hearing on September 15 to confirm that the views of the Joint Chiefs of Staff on this protocol were arrived at objectively and independent of any influence from outside persons or agencies. The Joint Chiefs have made clear their full support for this agreement, coupled with the understandings added by our committee, and position.

The only major substantive issue raised about this protocol concerns the right of the United States to transport nuclear weapons through the Latin American zone on vessels and aircraft. I think it is beyond debate that the protocol would not limit that right, but to make it perfectly clear that the United States ratifies the protocol with that understanding, the committee has incorporated a set of understandings proposed by the administration. Senators will note the text of those understandings in the proposed resolution of ratification.

Madam President, the only cloud on this issue is a Soviet statement which was made at the time the Soviet Union signed the other protocol to this treaty—protocol I—which involves adherence by nuclear weapons states. The Soviets stated in 1978 that they regarded transit of nuclear weapons as incompatible with the objectives of the treaty. This is not only an unfounded statement as a legal matter, Madam President, it is clearly not a constructive contribution to the broader process of arms control. Given Soviet activities in Cuba and the Caribbean and the operations of their own nuclear submarines in those areas, it is also a hypocritical position. It undermines our confidence in the ability of both of our countries to cooperate in good faith in the interest of meaningful arms control while respecting the legitimate security needs of each other. I trust the Soviets recognize the unhelpful nature of such propaganda statements and will refrain from them in future efforts to broaden the arms control process.

In that regard, I am encouraged that the Soviets have not repeated assertions to the contrary, despite several opportunities to do so. Hopefully, they have dropped this view of the protocol and will make that clear in the future.

Madam President, I conclude by noting that this protocol represents the first tangible step of the Reagan administration on the agenda of arms control, and the first formal action by the Senate to endorse a concrete step in that all-important agenda. I hope that it will be only the first in a series of such steps that we will be taking jointly with President Reagan during the next 3 years and beyond. I urge my colleagues to give their support to Senate advice and consent.

Madam President, I know of no opposition to this treaty. The treaty is a long overdue step.

Mr. PELL. Madam President, I strongly support Senate advice and consent to ratification of the additional protocol I to the Treaty for the Prohibition of Nuclear Weapons in Latin America, known as the Treaty of Tlatelolco. Protocol I will obligate the United States not to test, use, store, or deploy nuclear weapons in the principal territories of Puerto Rico, the Virgin Islands, and Guantanamo Naval Base.

This protocol is an important adjunct to the treaty, which established the first nuclear-free zone in any populated region of the world. U.S. ratification should help further efforts to achieve full entry into force of the treaty. At present 22 Latin American States have ratified the treaty and are bound by its terms. When several further steps are taken, including French ratification of protocol I, Argentine ratification of the treaty, and Cuban signature and ratification of the treaty, it will enter fully into force. At that time Chile and Brazil will also become bound by the treaty.

This treaty, which was essentially a Latin American initiative, is a little known, but very worthwhile accomplishment. In joining this treaty, the parties have obligated themselves to prohibiting manufacture, testing, use, storage, deployment, or possession of nuclear weapons. As a result, the nations involved are helping to guarantee to each other that the nuclear threat which could be posed in that region of the world will be curbed. By avoiding the waste of precious funds on nuclear programs the nations of Latin America have enabled themselves to devote resources to more productive and human needs. We should all commend them. I am glad we are able to give them tangible evidence of our backing in our action today.

I hope that this step will help encourage actions by others. As an example, the Treaty of Tlatelolco could be a precedent for other regions, in particular the Middle East. In that connection, I should note that Israel, Egypt, and other countries last year joined with the United Nations in adopting a resolution calling for a Mideast nuclear weapons free zone.

Madam President, I hope that U.S. ratification of protocol I will help demonstrate continued American interest in and support of efforts to control nuclear proliferation. Recent concerns over nuclear programs in Iraq and Pakistan demonstrate that nuclear proliferation is no idle concern. We cannot afford a laissez-faire approach to the matter, since, if we fail to act firmly and decisively, our children and grandchildren could face a world of nuclear threats more dire than we can now imagine.

I thank the Chair.

Mr. PERCY. Madam President, I am prepared to yield back the remainder of my time.

I am happy to yield to the Senator from Connecticut.

Mr. DODD. Madam President, in the immediate aftermath of World War II, Albert Einstein offered this observation regarding the future of atomic energy:

> Since I do not foresee that atomic energy is to be a great boon for a long time, I have to say that for the present it is a menace. Perhaps it is well that should be. It may intimidate the human race into bringing order into its international affairs, which, without the pressure of fear, it would not do.

Ever mindful of Einstein's admonition, I rise in support of Additional Protocol I to the Treaty for the Prohibition of Nuclear Weapons in Latin America, which is commonly referred to as the Treaty of Tlatelolco.

Basically, the purpose of the pending agreement is to bring within the scope of the proposed Latin American nuclear-free zone those territories which are the possessions of nations outside the zone. In concrete terms, then, protocol I would obligate the United States not to test, use, store, or deploy nuclear weapons in the territories under U.S. control located within the zone of application; namely, Puerto Rico, the Virgin Islands, and the Guantanamo Naval Base.

By way of background, Madam President, protocol I was signed by President Carter in 1977 and forwarded in 1978 to the Senate for its advice and consent. Although hearings were held later that year before the Foreign Relations Committee, no further action was taken on the protocol until September 22 of this year. At that time, an array of executive branch officials appeared before the committee and, in no uncertain terms, placed the Reagan administration's stamp of approval on the agreement that is now before us. Eugene Rostow, Director of the Arms Control and Disarmament Agency, summed up the administration's view in these terms:

> Our ratification (of Protocol I) will complete formal U.S. participation in the treaty regime, and will promote hemispheric solidarity, good relations with our Latin American neighbors and will provide significant benefits for national security and nonproliferation objectives. I recommend that the Senate take prompt and favorable action on Protocol I of the Treaty of Tlatelolco in recognition of this important regional arms control initiative and for the important benefits it represents to the United States.

Madam President, I wholeheartedly agree with the Rostow assessment and I believe it is fair to say that the entire Foreign Relations Committee takes the same positive view of this agreement. Here, I point out that when the committee voted favorably to report protocol I to the Senate, it did so without a single dissenting vote.

My hope is that the Senate as a whole will follow the committee's lead and will, after long last, give its resounding endorsement to the pending measure, the sole objective of which is to bring us closer to the day when the Latin American and Caribbean region is freed from the specter of nuclear weapons deploy-

ment. This objective is not only laudable. it is necessary—vitally necessary.

Protocol I to the Treaty of Tlatelolco should be approved overwhelmingly.

I am in strong support of this treaty, Madam President.

The PRESIDING OFFICER. Is all time yielded back?

Mr. PERCY. Madam President, the Senator from Illinois has yielded back his time.

Mr. PELL. We yield back our time, Madam President.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the resolution of ratification on Executive I, 95th Congress, 2d session, additional protocol I to the treaty for the prohibition of nuclear weapons in Latin America (the Treaty of Tlatelolco).

On this question, the yeas and nays have been ordered. The clerk will call the roll.

The bill clerk called the roll.

Mr. STEVENS. I announce that the Senator from North Carolina (Mr. EAST), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator from Maryland (Mr. MATHIAS), the Senator from Oregon (Mr. PACKWOOD), the Senator from New Mexico (Mr. SCHMITT), the Senator from Vermont (Mr. STAFFORD), and the Senator from Texas (Mr. TOWER) are necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina (Mr. EAST) would vote "yea."

Mr. ROBERT C. BYRD. I announce that the Senator from Montana (Mr. BAUCUS), the Senator from Oklahoma (Mr. BOREN), the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Ohio (Mr. GLENN), the Senator from Michigan (Mr. HART), the Senator from Louisiana (Mr. LONG), the Senator from Montana (Mr. MELCHER), the Senator from Ohio (Mr. METZENBAUM), the Senator from New York (Mr. MOYNIHAN), and the Senator from Arkansas (Mr. PRYOR) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY) and the Senator from Michigan (Mr. LEVIN) are absent because of illness.

I further announce that, if present and voting, the Senator from New York (Mr. MOYNIHAN) and the Senator from Montana (Mr. BAUCUS) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The yeas and nays resulted—yeas 79, nays 0, as follows:

[Rollcall Vote No. 374 Ex.]

YEAS—79

Abdnor	Cochran	Gorton

Cannon	Leahy	Packwood
Cranston	Levin	Pryor
East	Long	Schmitt
Glenn	Mathias	Stafford
Goldwater	Melcher	Tower

The PRESIDING OFFICER. Two-thirds of the Senators present and voting having voted in the affirmative, the resolution of ratification is agreed to.

Mr. WEICKER. Madam President, I move to reconsider the vote by which the resolution of ratification was agreed to.

Mr. STEVENS. Madam President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

LEGISLATIVE SESSION

The PRESIDING OFFICER. Under the previous order, the Senate will resume consideration of legislative business.

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS, 1982

The Senate resumed consideration of H.R. 4169, the fourth excepted committee amendment—page 26, line 3.

Mr. WEICKER. Madam President, Senator HOLLINGS and I agreed to consider the committee amendment on page 26, line 3.

The fourth excepted committee amendment is as follows:

On page 26, line 3, strike "$387,136,000", and insert "$388,376,000";

UP AMENDMENT NO. 623

Mr. WEICKER. Madam President, I send to the desk an amendment to the committee amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Connecticut (Mr. WEICKER) for himself and Mr. HOLLINGS proposes an unprinted amendment numbered 623.

Mr. WEICKER. Madam President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 26, line 3 strike "$388.376,000" and insert in lieu thereof "$473,557,000".

On page 26, line 5, after the word "expended" insert "and of which $36.821,000 shall remain available until expended for construction".

Mr. WEICKER. Madam President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. WEICKER. Madam President, I suggest the absence of quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WEICKER. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WEICKER. Madam President, the amendment, as I understand, amends the bill in two places. I ask unanimous consent that it be in order.

The PRESIDING OFFICER. Without objection, it is in order to consider the amendment.

Mr. WEICKER. The amendment I have sent to the desk increases the appropriation for the Immigration and Naturalization Service by $85,181,000. Of the additional amounts provided, $50,181,000 is for restoration of necessary enforcement capability and positions and for emergency requirements necessitated by the continued influx of Haitian refugees in south Florida. The remaining $35,000,000 is provided for the construction of a detention facility within the United States.

This amendment brings the total amount provided for the Immigration and Naturalization Service to $473,557,000—an increase of $110,181,000 over the amount requested in the March budget estimates submitted by the administration.

The administration has requested these additional funds as part of its comprehensive overhaul of U.S. immigration and refugee policy. The amendment which I have introduced—together with $25,000,000 provided by the committee—accomplishes the appropriations actions required by this program, $42,045,000 is targeted to provide effective border and interior enforcement and restore positions in adjudications and status vertification; and $33,136,000 is provided for the detention of Haitian refugees in Krome North and Fort Allen, Puerto Rico. In all, 898 positions and 179 workyears for inspections are restored.

As I have mentioned, we are providing $35 million for the construction of a permanent INS detention facility. Details on this project are currently being finalized by the Attorney General. The funds are recommended with the understanding that we expect to see these details by the time we go to conference on this appropriation act.

Mr. President, I ask unanimous consent that a table indicating the distribution of enforcement and detention funds under this amendment compared to the committee recommendation—be inserted in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

WEICKER/HOLLINGS AMENDMENT—IMMIGRATION AND NATURALIZATION SERVICE

[Dollar amounts in thousands]

Comparison by activities	Committee amendment		Weicker/Hollings amendment: Enforcement program		Weicker/Hollings amendment: Detention of Haitians		Comparison

[1] Amendment adds 179 work-years.

Mr. WEICKER. As a final word, Mr. President, I would only say that we all are keenly aware of the difficult situation presented by the continued influx of illegal refugees and aliens along our southern coast and borders. This amendment responds to the needs presented by that situation. There is an emergency which exists and the amendment deserves our support.

(At the request of Mr. ROBERT C. BYRD the following statement was ordered to be printed in the RECORD:)

● Mr. LEVIN. Mr. President, I would like to take this opportunity to speak in favor of the decision to restore vital funds to the budget of the Immigration and Naturalization Service and to insure that full-time INS positions will be reestablished at the level originally contemplated in the 1982 budget figures.

I would like to call attention to situation in my home State of Michigan. The combined traffic volume at the Detroit and Canada Tunnel and the Ambassador Bridge makes Detroit the largest inland port of entry on the Canadian border, and the lack of adequate service has caused the manufacturing and trucking industries to divert traffic to other points of entry.

Michigan continues to suffer with the highest unemployment rate in the Nation—more than double the national average—and yet Detroit sits in the heart of the manufacturing industry of the Midwest, greatly hampered by services afforded by the U.S. Government in expediting the movement of their goods across the border at this point. The crippling effect of these backups on the tourist and convention industry in the area is devastating.

The history of understaffing in Detroit INS has reached the crisis point. Michigan people—Michigan business—Michigan security are all directly and adversely affected by the vacancies currently in Detroit INS. These vacancies should not be filled with temporary employees who enjoy all the benefits but lack the skills and dedication of full-time INS staff people.

In addition to inspection responsibilities at the borders of the Ambassador Bridge and the Detroit-Windsor Tunnel, INS staff are responsible for border crossings in Port Huron, Sault Ste. Marie, a seaport and an international airport in Michigan, and for processing nearly 34,000 cases annually.

The situation is outrageous in Michigan. Restoration of INS funds is crucial. Vital to the automobile industry, the trucking industry, tourism and conventions, the import-export business and vital to security to deter increased drugs and undesirables admitted, to insure the removal of illegal entrants quickly and to prevent riots and disturbances as we have experienced in the Detroit-Windsor Tunnel when motorists were forced to endure long lines and long waits to cross the border.

Also of great import to the upgrading and direction of the Immigration and Naturalization Service is the expeditious naming of a new, qualified commissioner of that agency and confirmation of that person.

There is no doubt in my mind that restoration of these funds, nomination and confirmation of a new commissioner to guide the Immigration and Naturalization Service into full service is of utmost importance to the State of Michigan and indeed the entire Nation.●

The PRESIDING OFFICER. Is there further debate? If there is no further debate, the question is on agreeing to the amendment of the Senator from Connecticut. The yeas and nays having been ordered, the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from North Carolina (Mr. EAST), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator from Maryland (Mr. MATHIAS), the Senator from Georgia (Mr. MATTINGLY), the Senator from Oregon (Mr. PACKWOOD), and the Senator from New Mexico (Mr. SCHMITT) are necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina (Mr. EAST) would vote "nay."

Mr. ROBERT C. BYRD. I announce

that the Senator from Montana (Mr. BAUCUS), the Senator from Oklahoma (Mr. BOREN), the Senator from Nevada (Mr. CANNON), the Senator from California (Mr. CRANSTON), the Senator from Ohio (Mr. GLENN), the Senator from Colorado (Mr. HART), the Senator from Louisiana (Mr. LONG), the Senator from Montana (Mr. MELCHER), the Senator from Ohio (Mr. METZENBAUM), the Senator from New York (Mr. MOYNIHAN), the Senator from Arkansas (Mr. PRYOR), the Senator from Tennessee (Mr. SASSER), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I also announce that the Senator from Vermont (Mr. LEAHY), and the Senator from Michigan (Mr. LEVIN) are absent because of illness.

I further announce that, if present and voting, the Senator from Montana (Mr. BAUCUS) would vote "yea."

The PRESIDING OFFICER (Mr. LUGAR). Are there any Senators in the Chamber who have not voted who wish to vote?

The result was announced—yeas 54, nays 23, as follows:

[Rollcall Vote No. 375 Leg.]

YEAS—54

Abdnor	Durenberger	Murkowski
Andrews	Eagleton	Nickles
Bentsen	Ford	Nunn
Biden	Gorton	Pell
Boschwitz	Hatfield	Percy
Bradley	Hawkins	Pressler

NOT VOTING—23

Baker	Hart	Metzenbaum
Baucus	Hayakawa	Moynihan
Boren	Leahy	Packwood
Cannon	Levin	Pryor
Cranston	Long	Sasser
East	Mathias	Schmitt
Glenn	Mattingly	Williams
Goldwater	Melcher	

So Mr. WEICKER's amendment (UP No. 623) was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. INOUYE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, having conferred with the managers of the bill, I am informed that there is a series of noncontroversial amendments which will be attended to here in the remainder of the afternoon.

On behalf of the leadership, I urge all Senators who have such amendments to come to the floor and offer them.

Under the circumstances, there will be no further rollcall votes this afternoon.

The PRESIDING OFFICER. The question recurs on the fourth committeee amendment, as amended.

Mr. WEICKER. Mr. President, as I understand it, we are on the fourth committee amendment. Is that correct?

The PRESIDING OFFICER. That is correct; as amended.

Mr. WEICKER. Mr. President, I know there are several amendments scheduled to be offered. I agreed for Senator WALLOP to proceed and then Senator HUDDLESTON, who has been waiting a long time. I wonder if we might proceed with Senator WALLOP and then go to Senator HUDDLESTON. They will require about 2 minutes.

By agreement with the ranking minority member, I ask unanimous consent that the pending committee amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 624

(Purpose: To prevent conversion of the Cheyenne, Wyoming, Weather Service Forecasting Office to a weather service office)

Mr. WALLOP. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wyoming (Mr. WALLOP) proposes an unprinted amendment numbered 624.

Mr. WALLOP. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 6, line 12, strike the following: "$835,390,000" and insert in lieu thereof "$835,482,000."

On page 6, line 13, after the comma insert the following: "of which $92,000 shall be available to prevent the conversion of the Cheyenne Weather Service Forecasting Office located at Cheyenne, Wyoming, to a weather service office."

Mr. WALLOP. Mr. President, in essence, this adds $92,000 to maintain one full-time weather forecasting office in the State of Wyoming and prevents it from being reverted to a weather service office from its present status as a weather forecasting office.

I have discussed this amendment with the managers of the bill. It is my understanding that it is agreeable to the managers of the bill.

Mr. WEICKER. Mr. President, the amendment of the distinguished Senator from Wyoming is acceptable to the managers of the bill.

Again, on these matters it seems to me that the best judgments are made by those Senators representing the constituencies. I am more than glad to accept the amendment.

Mr. INOUYE. The amendment is acceptable to this side.

Mr. WALLOP. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The Chair must report that the amendment touches a section of the bill which has been amended previously. It would take unanimous consent for the amendment to be in order.

Mr. WALLOP. Mr. President, I ask unanimous consent that the amendment be in order.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is in order.

Mr. WALLOP. Mr. President, the amendment having been stated and no objection having been raised, I move adoption of the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (UP No. 624) was agreed to.

Mr. WALLOP. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. WEICKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FOURTH EXCEPTED COMMITTEE AMENDMENT—PAGE 26, LINE 3

Mr. WEICKER. Mr. President, before yielding to the distinguished Senator from Kentucky, I ask that committee amendment No. 4, as amended, be agreed to.

In explanation to my colleagues, that is the amendment which we just discussed concerning the INS.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment, as amended.

The fourth excepted committee amendment, as amended, was agreed to.

UP AMENDMENT NO. 625

(Purpose: To express the sense of the Senate that the Secretary of State and the Attorney General each should provide, upon request, certain written information to members of the Committee on Appropriations of the Senate)

Mr. HUDDLESTON. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kentucky (Mr. HUDDLESTON) proposes an unprinted amendment numbered 625.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 55, between lines 12 and 13, insert the following:

SEC. 509. It is the sense of the Senate that the Secretary of State and the Attorney General each should provide any member of Congress, upon request with any letter, memorandum, cablegram, telegram, or other written information in possession of the department of which he is the head, under appropriate restrictions to protect the confidentiality of such information, if such written information relates—

(1) to consideration by any department, agency, officer, or employee of the United States of whether an alien emigrating from another country is properly classified as a

refugee under the immigration laws of the United States; or

(2) to the role played by the United States refugee resettlement program in encouraging emigration.

Mr. WEICKER. Mr. President, I ask unanimous consent that the committee amendment now pending, by agreement with the ranking minority member, be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment of the Senator from Kentucky is now in order.

Mr. HUDDLESTON. Mr. President, this amendment simply expresses the sense of the Senate that officials in the Department of State and the Department of Justice should supply Members of the Congress with all available information relating to the classification of refugees from Laos, Cambodia, and Vietnam so that the Appropriations Committee may make an appropriate determination as to the cost associated with the refugee program. It has been cleared by both sides of the aisle and I move its adoption.

The PRESIDING OFFICER. Is there further debate? The Senator from Connecticut.

Mr. WEICKER. Mr. President, speaking for the majority and the minority, we are fully in the corner of the distinguished Senator from Kentucky on this issue. The only thing that I regret is that he has to come to the Senate floor to get the information he seeks. They should have given it to him in the first place.

I support the amendment, Mr. President.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the amendment.

The amendment (UP No. 625) was agreed to.

Mr. HUDDLESTON. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT 626

(Purpose: To prevent Federal judges from receiving again a pay raise notwithstanding the contrary intent of Congress)

Mr. DOLE. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) for himself and Mrs. HAWKINS, proposes an unprinted amendment numbered 626.

Mr. DOLE. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendment is as follows:

On page 52, insert between lines 14 and 15, the following:

"Notwithstanding any other provision of law, none of the funds appropriated by this or any other Act shall be obligated or expended to increase, after the date of enactment of this Title, any salary of any Federal judge or Justice of the Supreme Court, except as may be specifically authorized by Act of Congress hereafter enacted; provided, further, that nothing in this limitation shall be construed to reduce any salary which may be in effect at the time of enactment of this Title nor shall this limitation be construed in any manner to reduce the salary of any Federal judge or of any Judge of the Supreme Court".

Mr. WEICKER. If the distinguished Senator from Kansas will yield, I ask unanimous consent that the pending committee amendment be temporarily laid aside. This request has been agreed to by the minority member.

The PRESIDING OFFICER. The Senator has that right. Without objection, it is so ordered.

Mr. DOLE. Mr. President, I offer this amendment in behalf of myself and the distinguished Senator from Florida (Mrs. HAWKINS). It is an amendment which would put an end to automatic, backdoor pay raises for Federal judges.

The amendment addresses a major problem with existing legislation, a virtually automatic annual salary increase built into the present statutory system. Under the Executive Salary Cost-of-Living Adjustment Act of 1975 and the Pay Comparability Act of 1970, each year the President passes on to Congress recommendations made by the Department of Labor for increasing judicial salaries.

Should Congress manage not to vote down these increases before midnight on September 30 of a given year, they automatically take effect for the next fiscal year. This year Congress missed the deadline by only 27 minutes and, in an effort to give effect to its intent to cap judicial salaries, even went so far as to stop the clock before midnight. Despite this last minute rush of activity and even though salary increases for other Federal employees were capped, the country has still been saddled with judicial salary increases that Congress did not intend to authorize.

The reason is the Supreme Court's holding last winter in the case of *United States* v. *Will*, 449 U.S. 200. There, the Court ruled that article III of the Constitution prohibits alteration of the salaries of Federal judges on or after October 1 because the new rates vest on that date. At present, a failure by Congress to move quickly enough, even though a delay of only a few minutes, can have harmful consequences for congressional budget plans.

My amendment would remedy this situation by prohibiting judicial pay increases unless they were specifically authorized by Congress. I urge my colleagues to support this amendment.

Mr. President, let me make it clear that I am not one of those who oppose pay increases for Federal judges or Members of Congress, but it seems to me—I note the distinguished Senator from Alaska, who has been the leader in this effort, is here—we have to bring some semblance of reason to the entire system. This would be a step in the right direction.

I know of no objection to the amendment.

Mr. INOUYE. Mr. President, the managers of the bill approve this amendment.

The PRESIDING OFFICER. Is there further debate on this amendment? If not, the question is on agreeing to the amendment.

The amendment (UP No. 626) was agreed to.

Mr. DOLE. I move to reconsider the vote by which the amendment was agreed to.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT 627

(Purpose: To end chemical and biological warfare)

Mr. PRESSLER. Mr. President, I have an amendment at the desk. I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from South Dakota (Mr. PRESSLER) proposes an unprinted amendment numbered 627.

On page 55, between lines 12 and 13, add the following:

SEC. 509. It is the Sense of the Senate that funds provided for in this Act shall be expended to further intelligence activity to collect information regarding the use of chemical and biological weapons, including the use of Yellow Rain, against the peoples of Southeastern and Southwestern Asia and to implement prompt negotiations with other nations to bring about an end to their use.

The PRESIDING OFFICER. Before the Senate proceeds to debate the amendment, the Chair asks the manager of the bill——

Mr. INOUYE. Mr. President, I ask unanimous consent that the committee amendments be temporarily set aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PRESSLER. Mr. President, I propose this amendment for the purpose of drawing attention to the use of chemical and biological warfare in Southeast Asia and Southwest Asia. It provides that the State Department intensify its intelligence collection efforts in the area and also undertake appropriate negotiations to inquire into and bring about a cessation of these terrifying kinds of warfare, warfare that is being waged in many cases against defenseless men, women, and children.

Mr. President, this week I chaired hearings before the Committee on Foreign Relations on "yellow rain," the use of a new type of chemical which has apparently been designed by the Russians, and is reported to be currently in use against tribesmen in Afghanistan, Laos, Cambodia—or Kampuchea as it is now called.

There was substantial evidence presented at these hearings. The Department of State concluded that, after 5 years of research, it is certain that a chemical form of weapon has been sprayed upon villagers from low- and slow-flying aircraft and that this is the first use on a large scale of chemical warfare in the world since World War I.

Allegations that the Soviets are using or supplying new and terrible poisons or toxins for the purpose of exterminating their enemies are thoroughly frightening. They are frightening because the

evidence indicates that a new weapon has joined an already terrifying arsenal of world weaponry, and one that unscrupulous nations and even terrorist groups may acquire without great effort.

It is also frightening in a general sense that vicious fighting of any kind continues against the Laotians, Cambodians, and Afghans, who are justly struggling against the yoke of foreign and domestic oppressors.

These reports of chemical and biological warfare have tremendous implications for arms control. The allegation that mycotoxins, generally described as "yellow rain," are being used against the peoples of Laos, Cambodia, and Afghanistan, if it can be proved, would represent a clear breach of the Geneva Protocol of 1925, the Biological Weapons Convention of 1972, and customary international law.

It would call into question the advisability of signing any arms control treaty that did not have strict verification provisions. In a broader sense, it would open the troublesome question of international enforcement provisions against nations that violate international law. Let no one accuse us of being silent in the face of a new kind of holocaust.

Mr. President, I think it is very important to note the significance of the U.S. Government announcement that it had concluded that "yellow rain" has been used. I was happy to see, there have been editorials in the Washington Post and in the Wall Street Journal, articles in the New York Times, the Washington Post, and across our Nation, reporting this fact.

Mr. President, I ask unanimous consent that several of these newspaper reports be printed in the RECORD at this point.

There being no objection, the materials were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Nov. 11, 1981]

RAIN OF TERROR

Two months ago, Secretary of State Alexander Haig made headlines with the charge that while the United States is often judged by a "super-critical standard," the Soviet Union was conducting chemical and biological warfare in Southeast Asia without public knowledge or complaint. The charge dealt specifically with the use of deadly trichothecene toxins produced by a type of fungus.

The evidence at that time was fairly flimsy. The mycotoxins had been found in only a single sample of leaf and stem. Crucial "negative controls," showing that the substances were not present in areas that had not been attacked, were unaccountably missing. Statements that this fungus is not naturally found in Southeast Asia were premature and, as it turns out, incorrect.

Now, however, the missing evidence has been supplied. The government announced yesterday that a combination of four mycotoxins, all from different strains of the fungus, has been found in samples taken from both Laos and Kampuchea. The samples include water and scrapings from rocks, in addition to vegetation. The negative controls confirm the accuracy of the chemical tests. The mixture of four different toxins provides additional confirmation that the findings are not the result of even the most bizarre natural outbreak. As Assistant Secretary of State Richard Burt told the Senate Foreign Relations Committee, "The significance of this discovery . . . can be simply stated. We had solved the mystery. We had fitted together the jigsaw puzzle which had bedeviled us for five years."

The evidence that a biological weapon is being used now, therefore, seems solid. There is no comparably firm evidence tying responsibility for its use to the Soviet Union. But there is very strong suggestive evidence. Though the toxins have reportedly been sprayed by local forces, Soviet chemical warfare experts are known to be in the area. Facilities capable of mass-producing the fungus and extracting the toxin are known to exist in the Soviet Union, some, according to Mr. Burt "under military control and with heavy military guard." No such facilities are known to exist in Southeast Asia.

It seems reasonable to conclude that the Soviet Union is directing a vicious campaign of chemical and biological warfare in one of the most remote areas of the world against people unable to protect themselves or understand what is happening to them. This warfare, moreover, is in direct violation of international agreements signed by the Soviet Union. The government's information merits the most serious possible international inquiry to prove or disprove the charges and to hold the Soviet Union accountable for a flagrant violation of an arms control agreement.

As the administration correctly emphasizes, this must not be allowed to be seen as a U.S.-Soviet confrontation. The United Nations committee of inquiry is therefore the correct body to bring the investigation to a prompt conclusion. The United States' job is to make it plain that this Soviet warfare is an attack on the integrity of all nations and international agreements, as well as on, in Franklin Roosevelt's words, "the general opinion of civilized mankind."

[From the Washington Post, Nov. 11, 1981]

NEW DATA FOUND ON TOXIC "RAIN"—U.S. SAYS SAMPLES LINK SOVIETS TO USE OF POISON WEAPON

(By Philip J. Hilts)

State Department officials have produced new physical evidence, which they describe as a "smoking gun," to support their claims that biological warfare campaigns linked to the Soviet Union are being waged in Southeast Asia with the deadly new weapon called "yellow rain."

Four weeks ago, an announcement by Secretary of State Alexander M. Haig, Jr. that the State Department had its first "physical evidence" to substantiate charges of biological warfare in Southeast Asia was met with skepticism, primarily because of the nature of that evidence—a single broken leaf and a few stray green bits from another leaf.

"We now have the smoking gun," Richard Burt, the State Department's director of politico-military affairs, told the arms control subcommittee of the Senate Foreign Relations Committee yesterday.

"We now have four separate pieces of physical evidence. We may soon have more, as, I regret to say, chemical attacks have been reported in Laos and Kampuchea [Cambodia] within the last month," Burt said.

Even the most persistent critic of the early evidence indicated that the new material might change his opinion. Dr. Matthew Meselson, a biochemist from Harvard University, testified that he "would recommend caution on the question of whether tricothecene toxins have been used in Southeast Asia . . . although the preliminary evidence indicates that they have."

Four different poisons caused tricothecene toxins and made from a fungus, are the agents that Burt said are "weapons outlawed by mankind, weapons successfully banned from the battlefields of the industrialized world for over five decades" and which now are used, "against unsophisticated and defenseless people, in campaigns of mounting extermination which are being conducted in Laos and Kampuchea. . . ."

Burt said that the new biological weapons are indirectly linked to the Soviets in several ways:

Planes identified as Soviet AN2 crop-dusting type airplanes have been dropping the "yellow rain," particularly on the Hmong hill people of Laos.

The Soviets have many scientific papers on the subject of tricothecene toxins, including papers on the mass production of these poisons.

The Soviets have the facilities to grow the fungus that produces the poison, and the equipment to extract and purify it. "There exist, in so far as we are aware, no facilities in Southeast Asia capable of producing the mold and extracting the . . . toxins in the quantities in which they are being used," Burt said.

"There is clearly a link with the Soviet Union," he said. "We at a minimum believe the Soviets . . . could stop its use if they desire."

Some of the new evidence, water from a stagnant pond in a Cambodian village, was collected some months ago, at the same time and place as the first leaf and stem sample. The water sample contained 66 parts per million of a tricothecene, deoxynivalenol, several times the lethal amount.

Two other samples of "yellow powder," or tricothecene toxins, were taken from rocks after two gas attacks in Laos. One had 150 parts per million of T2, dozens of times more than the amounts in natural outbreaks of the fungus poisoning and more than 20 times the amount needed to kill humans.

Since the fungus is known to grow in the soil, attacking the roots of plants, Dr. Chester Mirocha of the University of Minnesota testified that he did not believe the tricothecenes would be found naturally in leaf, water, or rock samples. Mirocha's laboratory identified the toxins in the samples gathered from Southeast Asia.

He added that a Laotian pilot, a defector, who flew on some of the gas attacks, and captured soldiers have bolstered the accounts of refugees. Burt also noted one detail he considered especially convincing—that when the water sample was being brought back, a man spilled some of it on his clothes and quickly came down with symptoms of tricothecene poisoning.

[From the New York Times, Nov. 11, 1981]

U.S. FINDS CHEMICAL WARFARE TOXINS IN INDOCHINA

(By David Shribman)

WASHINGTON, Nov. 10.—The State Department said today that it had evidence, in the form of new samples of rocks, leaves and water from Southeast Asia, that chemical warfare agents had been used in Cambodia and Laos.

Richard Burt, director of the department's Bureau of Politico-Military Affairs, said an analysis of the samples confirmed the existence of toxic chemicals. He said they were being used against people resisting Vietnamese control of Laos and Cambodia. He said that even if the agents were being used "by indigenous forces," the Soviet Union was advising the forces and "controlling chemical warfare in Southeast Asia."

"We now have the smoking gun," he said, referring in testimony before a Senate arms control subcommittee to evidence of chemical warfare. "We now have four separate pieces of physical evidence."

Mr. Burt also testified that the United States had "concluded that chemical weapons are being used in Afghanistan, but we have no evidence."

HAIG REPORTED ON TOXIC CHEMICALS

The chemical attacks are often known as "yellow rain" because of the color of the chemical particles landing on roof-tops and vegetation. American officials have received reports of chemical warfare in Southeast Asia for more than a dozen years but until recently have had no physical evidence.

Secretary of State Alexander M. Haig, Jr. said in a speech on Sept. 12 in West Berlin that the United States had physical evidence that poisonous chemicals were being used in Southeast Asia. A day later, the State Department presented an analysis of one leaf sample taken in March in Cambodia, or Kampuchea as it is also known, near the Thai border.

One of the new samples mentioned by Mr. Burt today was said to be water taken from the same village. He said the others were from sites of separate attacks in Laos.

Mr. Burt said the samples revealed "very high quantities" of chemicals known as trichothecene mycotoxins. Exposure to the chemicals causes vomiting, itching, dizziness and death.

LOCATION OF PRODUCTION PLANTS

"Over the past five years, and perhaps longer, weapons outlawed by mankind, weapons successfully banned from the battlefields of the industrialized world for over five decades, have been used against unsophisticated and defenseless people in campaigns of mounting extermination which are being conducted in Laos, Kampuchea and more recently in Afghanistan," he said.

Mr. Burt testified that tests of other soil and vegetation samples from the same areas of Southeast Asia indicated that they were free of the toxic chemicals. He said this was evidence that they did not occur naturally there.

Mr. Burt said the State Department had been unable to find any facilities in Southeast Asia capable of producing the mold and extracting the mycotoxins in the quantities the United States believed they were being used. Such facilities do exist in the Soviet Union, he said, adding that they were "under military control and with heavy military guard."

He said that Soviet chemical experts had inspected several places in Southeast Asia where lethal and nonlethal chemicals were stockpiled.

Until the samples were obtained, charges that the Soviet Union or its client forces in Southeast Asia were using chemical weapons were based on reports of refugees, journalists and other observers. The first victims were believed to be highland tribal people such as the Meos, who have long resisted Communist forces in Laos.

The chemical attacks, according to accounts provided to the State Department, were conducted by low-flying aircraft, including a biplane that is used as a crop duster in the Soviet Union.

The Geneva Protocol of 1925 outlaws the use of chemical weapons in warfare and the Biological Weapons Convention of 1972 forbids the production, stockpiling or transfer of toxic weapons. The agreements, signed by the Soviet Union and Vietnam, do not, however, provide for verification.

Mr. PRESSLER. Mr. President, I shall continue to raise questions concerning "yellow rain." I shall continue to look into the allegations of this chemical and biological warfare. As I have noted, both the Soviet Union and the United States are signatories to agreements not to engage in or to produce this type of material. We are faced with the question whether we should enter into arms control negotiations with the Soviets at a time when they are not allowing international inspection regarding the allegations that mycotoxins are being used.

I say our Government must insist, through its representative at the U.N. and elsewhere, that there be verification, that international inspectors be able to examine some of the areas and some of the damage that has been caused. So far, those requests have been refused.

This amendment is a further step in highlighting the campaign to bring this to the public's attention.

Mr. President, I have been astounded at how little public attention and how little media attention there has been to what is happening in Kampuchea and the holocaust that is occurring. We talk much about the awful holocaust of World War II. But now there is evidence that in the past 5 years, a new holocaust exists in which great number of innocent people are being killed and maimed. This holocaust has been occurring, however, with very little comment from the Western World.

It should also be noted that this terrible new weapon could be used in Western Europe or in the United States at some future time. Therefore, we must wake up to what is happening regarding yellow rain.

Mr. President, I have spoken to both the minority and majority regarding this amendment. I commend them and their staffs. I believe I have general agreement on this amendment.

Mr. INOUYE. Mr. President, the managers of this bill have considered the amendment, and we are pleased to concur in it.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 627) was agreed to.

Mr. INOUYE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TENTH EXCEPTED COMMITTEE AMENDMENT—PAGE 53, LINES 11 THROUGH 15

Mr. WEICKER. Mr. President, with the agreement of the ranking minority member, I ask unanimous consent that the pending business be the committee amendment on page 53, committee amendment No. 10.

The PRESIDING OFFICER. The Senator has that authority. The amendment is the pending amendment.

Mr. WEICKER. I move that the committee amendment No. 10 be tabled and the succeeding sections be renumbered accordingly.

The PRESIDING OFFICER. The question then is on agreeing to the motion to lay on the table the 10th committee amendment.

The motion was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. WEICKER. Mr. President, I ask unanimous consent to have printed in the RECORD a letter from the U.S. Department of Justice dated October 27, 1981, addressed to the Honorable MARK HATFIELD, chairman of the Committee on Appropriation of the U.S. Senate.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AFFAIRS,
Washington, D.C., October 27, 1981.

Hon. MARK O. HATFIELD,
Chairman, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: I am pleased to take this opportunity to present the views of the Department of Justice regarding § 505 of H.R. 4169, the House of Representatives' version of the bill making appropriations for fiscal year 1982 for the Departments of Commerce, Justice, State and related agencies and for the Judiciary. We strongly oppose this provision because it raises serious constitutional questions, which I will elaborate upon below.

Section 505 reads as follows:

"None of the funds appropriated or otherwise made available by this Act shall be available to implement, administer, or enforce any regulation which has been disapproved pursuant to a resolution of disapproval duly adopted in accordance with the applicable law of the United States."

This provision starts with the premise that certain funds may be "appropriated or otherwise made available by this Act" for the enforcement of regulations by the named agencies. Absent application of section 505, it thus may be assumed that it would be perfectly legal for one of the named agencies to spend money appropriated by H.R. 4169 to enforce a given regulation. However, if the regulation subsequently were disapproved "pursuant to a resolution of disapproval adopted in accordance with the applicable law of the United States," under section 505 it would no longer be legal for the agency to expend money to enforce the regulation. Accordingly, under the terms of section 505, such a resolution disapproving a regulation would have the effect of amending H.R. 4169 to limit the expenditure of funds appropriated by that bill in a manner not set forth in H.R. 4169 itself.[1]

The constitutionality of the application of section 505 will turn on the question whether a "resolution of disapproval duly adopted in accordance with the applicable law of the

[1] Section 505 reaches any regulation of an agency covered by H.R. 4169 "which has been disapproved" by a resolution of disapproval. It might be read to apply only to any regulation which, *at the time of the passage* of H.R. 4169, *"has been* disapproved" in such manner (emphasis added). If that were the limit of § 505, we might react differently with respect to the constitutional issues because, as construed, it might not be viewed as an unconstitutional attempt to authorize legislative action by a procedure inconsistent with Art I. § 7 Cls. 2 & 3 and in a manner inconsistent with the separation of powers. The reason for this result is that any regulation which "has been disapproved" at the time of the passage of H.R. 4169 would be readily identifiable, and the words used in § 505 to identify such regulations could be viewed as simply an indirect way of naming the regulations. Limiting the reach of § 505 in that manner would alter the constitutional issue arising when the provision is read, as would be consistent with its language, to authorize a future resolution that would have independently binding effect. It is this latter interpretation that raises the constitutional difficulties which are the subject of this letter.

United States" is a joint resolution, passed by both Houses of Congress and presented to the President for his approval or veto, or a resolution adopted by a means short of the plenary legislative process. In view of its generality, the provision's language apparently would comprehend either process.[2] To the extent that a resolution is adopted for purposes of section 505 by any means short of the plenary legislative process, the application of section 505 would be unconstitutional, for it would seek to authorize legislative action by a procedure contrary to that explicitly stated in the Constitution. See Art. I, section 7, Cls. 2 and 3. First, it is clear that a disapproval resolution which is to have a binding effect on the Executive Branch in its execution of the law by means of regulation is an exercise of Congress' legislative power. Given that that is the case, such action must follow the plenary legislative process, which calls for passage of a resolution by both Houses of Congress and presentation of the item to the President for his approval or veto. See Art. I, section 7, Cls. 2 and 3. Furthermore, if a resolution for purposes of section 505 were to be characterized not as legislative action governed by the procedures of Art. I, section 7, Cls. 2 and 3, but rather as executive action, such action would be unconstitutional as an attempted usurpation by the Legislative Branch of the core functions of the Executive Branch, which include making decisions regarding the execution of the law by regulation. See *Buckley* v. *Valeo*, 424 U.S. 1 (1976). Therefore, unless section 505 is to be confined in its exercise to joint resolutions, section 505 is fundamentally inconsistent with central Constitutional principles controlling the exercise of legislative power and the relation between that power and the authority conferred on the Executive.

It would be no response to suggest that appropriations measures are in some ways distinguishable from other bills and thus should not be treated like other bills for purposes of constitutional analysis. First, what is of concern here is not any language of the appropriations bill itself that would have immediately binding effect on the Executive Branch. Such language, if H.R. 4169 were enacted, would be adopted constitutionally pursuant to the plenary legislative process. What is of chief concern to us is the bill's contemplation of a future resolution that would, pursuant to section 505, purport to have binding legislative effect on the Executive Branch. In addition, and critically, appropriations bills are not to be viewed in a light different from that focused on other legislative measures by the procedural requirements applicable to exercises of legislative power and the principle of the separation of powers. As Attorney General William D. Mitchell wrote in 1933:

"Congress holds the purse strings, and it may grant or withhold appropriations as it chooses, and when making an appropriation, may direct the purposes to which the appropriation shall be devoted and impose conditions in respect to its use, provided always that the conditions do not require operation of the Government in a way forbidden by the Constitution. *Congress may not, by conditions attached to appropriations, provide for a discharge of the functions of Government in a manner not authorized by the Constitution.* If such a practice were permissible, Congress could subvert the Constitution. It might make appropriations on condition that the executive department abrogate its functions. (emphasis added) [3]

See also *United States* v. *Lovett*, 328 U.S. 303 (1946) (establishing the principle that exercises of Congress' spending power must be scrutinized in terms of other applicable constitutional requirements); *Buckley* v. *Valeo*, *supra*, 424 U.S. at 132 (stating that Congress may not exercise its powers "in such a manner as to offend . . . constitutional restrictions stemming from the separation of powers").

Accordingly, to the extent that section 505 would provide that no agency receiving appropriations under H.R. 4169 may expend appropriated funds to enforce a regulation disapproved by a resolution adopted by means short of the plenary legislative process, we believe that that section is unconstitutional.

For your information, I am enclosing with this letter two statements by Assistant Attorney General Olson of the Department's Office of Legal Counsel that discuss thoroughly the constitutional problems with provisions calling for legislative action short of passage by two Houses of Congress and presentation to the President. The first statement was presented on April 23, 1981, to the Subcommittee on Agency Administration of the Senate Judiciary Committee; the second was presented on October 7, 1981, to the Subcommittee on Rules of the House of the House Rules Committee.

The Office of Management and Budget has advised that it has no objection to the submission of this report in view of the President's program.

Sincerely,

ROBERT A. MCCONNELL,
Assistant Attorney General,
Office of Legislative Affairs.

Mr. WEICKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

SIXTH EXCEPTED COMMITTEE AMENDMENT—PAGE 31, LINES 22 THROUGH 24

Mr. WEICKER. Mr. President, I ask the Chair as to what is the pending business at this time?

The PRESIDING OFFICER. The pending business is excepted committee amendment No. 6 on page 31, lines 22 through 24.

The excepted committee amendment is as follows:

On page 31, strike line 22, through and including line 24;

Mr. STEVENS. Mr. President, I perceive that this is the last amendment that we could bring up, and it will be the pending amendment on Monday when we resume consideration of the bill.

FEDERAL SHIP FINANCING FUND PROVISION

Mr. GORTON. Mr. President, several Members have expressed concern over a provision in H.R. 4169 dealing with the Federal Ship Financing Fund. Page 13, lines 10 through 22 of the bill would, for the first time, place an annual limit on the amount of ship construction loans which the Maritime Administration may guarantee under title XI of the Merchant Marine Act of 1936.

There are several reasons why Senators PACKWOOD, STEVENS, INOUYE, and I are critical of this unprecedented provision.

First, the authorizing statute creating the title XI program does not give the Appropriations Committee authority to set annual limits on loan commitments. Recognizing this, OMB sought an amendment to the authorizing statute to allow appropriations bills to set annual limits. The Commerce Committee, which is the authorizing committee for the title XI program, rejected any sum amendment.

It is clear, therefore, that the provision in question is simply beyond the authority of the Appropriations Committees. In the House of Representatives, the Appropriations Committee expressly noted their lack of authority in this respect. It is useful to quote the report of that committee:

The Committee has disapproved the request for appropriation language which would limit total commitments to guarantee loans from the Federal Ship Financing Fund during fiscal year 1982 to not more than $1,050,000,000 of contingent liability for loan principal.

As stated in the section of the report concerning Federal Ship Financing Fund, Fishing Vessels, title XI of the Merchant Marine Act of 1936 authorizes a limitation of $12,000,000,000 for this account as well as the NOAA account, on obligations guaranteed and outstanding at any one time from the Fund. Therefore, the proposed limitation on total commitments to guarantee loans during fiscal year 1982 would contravene this provision of the Act. With respect to the request for an aggregate limitation on the amount of direct loans for fiscal year 1982 that could be made from the Fund, the Committee notes that title XI provides for no such limitation on the direct loan program. Therefore, the proposed limitation on direct loans from this revolving fund, for which no appropriation is provided in the accompanying bill, would contravene the authorizing legislation and would also not be in order under the rules of the House of Representatives.
